INTRODUCTION

Canadian Farm Cook Book is compiled from a large number of recipes submitted by our women readers from every province of Canada. All the good recipes are not included, owing to the large number received, but it is needless to say that those selected are trustworthy and are vouched for by capable housewives as their choicest and best.

Reliability as well as simplicity and economy are its outstanding features. The recipes are plain and wholesome and, for the most part, inexpensive and easy of preparation. This book is not only designed to solve the problem of what to cook and how to cook it for the busy housewife, experienced in culinary conceits, but for the young beginner as well.

In placing this book before its readers, CANADIAN FARM desires to express its appreciation of the ready response given to the request for "Tried and True Recipes," and only regrets that space does not allow the acceptance of many other good recipes received.

BREAD

METHODS OF MAKING BREAD

There are various methods of making bread in the home. A few of the methods and their uses are discussed below.

1. *The ferment, sponge and dough method* is one of the most common methods in use, consisting of a ferment, sponge and dough stage. (a) *Ferment*: A thin batter made up of potato or plain water, a little sugar, and enough flour to make a pour batter, placed in a temperature of from 70 to 80° F., until it is light and spongy. This method is best suited to the use of dry compressed yeast, which is in a dry, dormant state, and needs the food, moisture, and warmth to bring it into a healthy, vigorous ferment. (b) *Sponge*: At the stage the sugar, salt, shortening and sufficient liquid to make the desired amount of bread is added to the ferment, and flour added to make a thick batter, and this sponge is allowed to rise from 8 to 10 hours. (c) *Dough*: The dough is then made by the addition of all the flour needed to make the mass of the desired consistency.

2. *Sponge and dough*, probably the most widely used in the home, and the best adapted to the uses of the soft and hard flours. Sponge may be made with hard Manitoba flour, and fermented from 6 to 10 hours. The hard flours take a much longer time to ripen, hence the reason for giving them the longer time in the sponge. Potato water and a little mashed potato improves this sponge. This is a desirable method where the home-made yeast is used, or the moist compressed yeast. The dough is made from this sponge with either hard or soft flour, either giving good results when properly

used. The soft flour gives a loaf of very close texture, but a characteristic sweet flavour that is very much liked by some people, and can only be obtained where Ontario winter wheat flour is used.

3. *Offhand dough* is that method in which the dough is made direct without any preceding stages of ferment and sponge, and it is the best method to use when it is desirable to make bread in a short time. Because of the short fermentation period, it is necessary to use a much larger amount of yeast in proportion to the amount of liquid, and flavor must to some extent be sacrificed, but, if rightly manipulated, this method makes very nice bread, and one in which a good grade of soft flour may be used. It is also a good method to follow in winter when there is no means of controlling temperature. The following recipes, typical of each process, are used in our flour-testing laboratories with satisfactory results.

The beginner is advised to start with the first method and become thoroughly familiar with its successful use before proceeding to the others. She is also urged to use a thermometer in order to become sensitive to correct temperature as soon as possible. After these typical recipes are mastered the beginner should be able to follow the variations of any good cook book.

The following are the detailed directions for making bread by each of the above methods. When the recipe does not provide sufficient materials to make the desired quantity of bread, the amount of the various ingredients may be halved, doubled or changed in any way, provided their relative proportion remains the same.

I. FERMENT, SPONGE AND DOUGH METHOD.

- 1 White Swan Yeast Cake.
- 2 quarts liquid.
- 2 level tablespoons salt.
- 2 level tablespoons sugar.
- 2 level tablespoons lard.
- Flour.

Preparation of Ferment. Put a pint of water at a temperature of about 90° F. into a bowl, drop the dry

yeast cake into it and soak for half an hour, then stir in enough flour to make a thin batter, add one tablespoon sugar, and beat with a dover beater until well mixed and full of bubbles. Stand in a temperature of 70° to 80° F. until light, which will take from four to five hours.

Preparation of Sponge. When the ferment is ready, put the rest of the sugar, salt and lard into a kneading-pan, bring the rest of the liquid to 90° F. and add it to the ingredients in the pan. Add enough strong flour to make a batter that will beat without spattering; add the ferment and beat until it looks smooth and elastic. This will probably take 15 or 20 minutes. Cover closely, and keep at a temperature of 70° F., until light and spongy. This will take from 9 to 10 hours.

Preparation of Dough. When the sponge is ready stir in strong flour until too stiff to use the spoon, then mix in more with a stiff-bladed knife or the hand, until the dough no longer sticks to the fingers. Turn the dough out on the moulding-board to knead, leaving the pan quite clean. The dough should knead without flour being put on the board or hands; if it proves sticky return it to the pan and mix in more flour, remembering that while too slack a dough makes coarse-textured bread, too stiff a dough makes slow-rising bread, which will dry out quickly. Knead lightly until the mass is elastic and velvety, the surface covered with a film of tiny bubbles, and a cut with a sharp knife shows the inside full of fine even bubbles, and free from lumps or unmixed portions. Grease the kneading-pan lightly with lard, warm both pan and cover if they are cold, put in the dough, cover closely, and keep at a temperature of 80° F. until rather more than doubled in volume, or until a gentle slap with the tips of the fingers causes it to fall in. This will take from 2 to 3 hours.

Knead lightly in the pan for a minute to get rid of the larger bubbles and return to rise a second time until double in volume. This will take from 1 to 2 hours.

WHITE SWAN YEAST CAKES — ALWAYS KNEADED

Divide into loaves that will half fill the bread tins. Knead each piece only enough to get rid of large bubbles and smooth the surface, and put it into a greased tin. Keep at a temperature of 70° to 80° F. until doubled in volume, when they should have a bold, nicely-rounded appearance.

Bake an hour in an oven about 350° F. When done, the loaves should give a hollow sound when tapped on the bottom.

When baked remove at once from the pan, and stand on edge or across the top of the pans, that the air may get to all parts and cool it quickly.

VARIATIONS.

1. The above calls for strong flour. Soft flour may be used for the dough stage, but must be kneaded down before it has quite doubled in volume each time. It is not advisable to use soft flour for the ferment and sponge stages, as it does not stand the long fermentation.

2. Home-made yeast may be used instead of the dry yeast. Use one cup home-made yeast and only 3½ pints of liquid.

3. The liquid may be part milk (scalded) and part water. The latter may be potato water, *i.e.*, water in which two or three potatoes have been boiled, removed and finely mashed and returned to the liquid.

4. The potato water may form the liquid for the ferment stage, and the mashed potatoes added when the sponge is made. Potatoes give that silkiness of texture so much desired by good breadmakers.

5. If the dough is kept covered while rising, it will not form a crust. If it seems inclined to form a crust, moisten it with warm milk and water. A crust is to be avoided, as it makes a streak through the loaf if kneaded in at the early stage, and an unsightly crust on the baked loaf if allowed to form in the last stages.

6. The second rising of the dough may be omitted, although the extra rising makes the loaf a rather finer texture.

7. The bread-mixer may be used to knead the dough after it is known exactly how much flour the liquid will need to make dough of the right stiffness.

II. SPONGE AND DOUGH METHOD.

- 1 White Swan Yeast Cake.
- 2 quarts liquid at 90° F.
- 2 level tablespoons salt.
- 2 level tablespoons sugar.
- 2 level tablespoons lard or butter.
- Flour.

Mix the yeast and half of the sugar in $\frac{1}{4}$ cup of warm water, and let it stand at a temperature of 80° F. for 15 or 20 minutes to start fermentation.

Measure the shortening, salt, and rest of sugar, into kneading-pan, stir in the rest of the liquid, and mix in flour enough to beat without spattering. Then add the well-fermented yeast and beat with a wooden spoon until it looks smooth and elastic.

From this point treat just the same as in the ferment, sponge and dough method.

VARIATIONS.

1. The above calls for strong flour. Soft flour may be used for the dough stage, but must then be kneaded down before it has quite doubled in volume each time.

2. The second rising of the dough may be omitted, but the extra rising makes a loaf of rather finer texture. When a large batch is being made, this may be taken advantage of to delay the baking of part until the first part is out of the oven.

3. The liquid may be all water, part water and part milk, or part potato-water and part milk.

4. Home-made yeast may replace the compressed yeast. Use one cup home-made yeast and only $3\frac{1}{2}$ pints liquid.

5. If the flour is taken from a cold place in the winter, it should be brought to a temperature of 80° F. before mixing it into either sponge or dough. When one has learned by experience what quantity of flour

Cowan's Perfection Cocoa makes sturdy children

the liquid will take up, it is a good plan to measure the whole quantity into a kneading-pan, mix the sponge in another dish, make a well in the rest of the flour in the kneading-pan, pour in the sponge and stand the whole in a warm place to rise; then when the sponge is risen the rest of the flour can be kneaded in.

III. QUICK METHOD.

- $\frac{1}{2}$ cup milk.
- $\frac{3}{4}$ cup water.
- 1 White Swan Yeast Cake.
- 1 teaspoon salt.
- 1 teaspoon sugar.
- 1 teaspoon lard or butter.
- Flour.

Put the sugar and yeast into a cup, add $\frac{1}{4}$ cup of the water warmed to 90° F., mix until the whole is smooth and the sugar dissolved, and stand in a temperature of 80° F. for 15 or 20 minutes to begin fermenting. Put the milk on to scald. Measure the salt and shortening into the kneading-pan, pour in the scalded milk, add the rest of the water, and bring the temperature to about 90° F. Add strong flour enough at the same temperature to make a batter that will beat without spattering; add the yeast, now fermenting vigorously, and beat with a wooden spoon until it looks smooth and elastic. Mix in at once enough warm flour to make a dough that will not stick to the fingers, turn out on the moulding board and knead as usual. Return to the warm greased kneading-pan, cover closely, and stand in a temperature of 70° to 80° F. until risen to rather more than double in volume. This will take 2 to 3 hours.

Knead lightly in the pan for a minute to get rid of the larger bubbles, and stand back in the warm place to rise again until double in volume. This will take 1 to 2 hours.

Shape into loaves that will half fill the bread tins, kneading only to get rid of large bubbles, and smooth the surface. Let rise until doubled in volume, then bake and cool as usual.

VARIATIONS.

1. Soft flours may be used for the whole process in this method, but care must be taken to knead it down at the proper time. It should be allowed to rise the first time to a little less than double in volume, and succeeding times still a little less. Once over-risen, soft flour dough is very hard to make into a good bread.

2. This process may be used for setting over night, using 1 White Swan Yeast Cake to six times the quantity of all the other ingredients, and allowing it to rise 9 to 10 hours the first time. The longer time will develop a delicious flavor which can never be attained by the short process.

3. Home-made yeast may be used, omitting the water. Bring the yeast to 80° F., add the sugar, and allow it to stand 10 to 20 minutes to begin working before adding it to the sponge.

HOME-MADE YEAST.

4 medium-sized potatoes.

½ cup hops.

1 quart boiling water.

½ cup sugar.

1 cup flour.

2 level tablespoons salt.

1 White Swan Yeast Cake.

Boil the potatoes, drain away the water, and mash the potatoes until free from lumps. Pour the boiling water, which may contain the water drained from the potatoes, over the hops and simmer 15 minutes. Measure into a three-quart bowl, or crock, the flour, sugar and salt, and mix them thoroughly. Strain the hop water, and add at once to the crock, stirring rapidly all the time. Add the mashed potatoes and give the whole a thorough beating. Cool to 70° or 80° F., and add one White Swan Yeast Cake or one dry yeast cake soaked in ½ cup of warm water for half an hour. Keep at a temperature of 70° F. for 3 or 4 hours, stirring down as often as it comes to the top. Bottle and keep in a cool place. Do not cork it tightly at first.

One cup of yeast is equal to one compressed or one dry yeast cake.

ROLLS.

1½ cups milk.

½ cup water.

1 White Swan Yeast Cake.

2 level teaspoons salt.

2 level tablespoons sugar.

2 level tablespoons butter.

1 level tablespoon lard.

Flour.

Put the yeast cake and one tablespoon of the sugar in a cup, add ¼ cup of the water warmed to 90° F., mix until smooth and the sugar is dissolved, and stand in a temperature of 80° F. for 20 minutes. Put the milk on to scald. Measure the butter, lard, salt, and the rest of the sugar into a kneading-pan, pour in the scalding milk, add the remaining ¼ cup of cold water, and allow it to come to 90° F.

Add enough flour to make a batter that will not spatter when beaten, stir in the fermenting yeast, and beat until it looks smooth and elastic.

Mix in enough more flour to make a dough that will not stick to the hands. Turn out on the board and knead until smooth, velvety and even textured. Return to the warm, greased bread-tin, cover closely, and keep at 80° F. until nearly tripled in volume.

Knead down in the pan, and let rise again at 80° F., until double in volume.

Shape into small rolls, remembering that they will increase greatly in size, put them into greased pans, and stand in a temperature of 80° F. until doubled in volume. Take care that the surface does not dry. If it is not possible to keep them covered closely, it will be necessary to moisten the top occasionally with warm milk or water.

Bake in a little hotter oven than used for bread for from 20 to 35 minutes, depending on the size of the rolls and the heat of the oven. The oven must not be too hot at first or it will prevent the expansion of the rolls, and may result in doughy centres.

Cool quickly by exposing as much surface as possible to the air.

SUMMARY.

The essentials of successful home breadmaking are:

1. Good bread flour.
 2. Good yeast.
 3. Dough of the right consistency.
 4. Control of the temperature at all stages.
 5. To remember that soft flour has not the expansive power of strong flour, and that soft flour doughs must never be allowed to rise longer than necessary. If it rises to the point of falling back, results will not be good.
 6. To avoid drying out of the surface at all stages, as this makes a dark streak through the baked loaf.
- MACDONALD INSTITUTE, Guelph, Ont.

OBJECTS OF KNEADING BREAD.

1. To mix the ingredients. To make the gluten elastic.
2. To break the bubbles and distribute dioxide gas evenly.

Bread is baked:—1 to kill the yeast plants. 2. To make starch digestible. 3. To drive off alcohol and carbon dioxide gas. 4. To form a brown crust.

When bread is baked it will not stick to the pans if they have been well greased or floured. Remove loaves at once and turn on a wire rack or on a cloth. The crust may be rubbed with butter or milk if a soft crust is desired, but if a hard crust is desired cool uncovered.

—GLADYS HARRIS, 101 Park St., Buffalo, N.Y.

When making bread, try putting a beaten egg in for each double loaf. Put this in in the morning when you go to mix the bread.

When cutting fresh bread try dipping your knife in hot water.—MRS. MENNO SMITH, Edgeley, Ont.

WET YEAST.—Boil 1 large handful of hops in a gallon of water for half an hour, grate 5 medium-sized potatoes and strain the boiling liquid over it, stirring well; add a little salt, sugar and ginger; let cool, then add 1 White Swan Yeast Cake and put in a warm place to rise; stir frequently. It is best made in a large dish and afterwards put into a jar and corked tight.

—MRS. HARRY PLATTS, Alma, Lot 3, P.E.I.

YEAST FOR FOUR-HOUR BREAD.—Peel and slice 2 quarts of potatoes, boil in 2 quarts of water. When cooked, scald 2 cups of flour with water of potatoes and add 2 quarts cold water; add 1 cup brown sugar and $\frac{1}{2}$ cup salt, along with mashed potatoes; add 2 White Swan Yeast Cakes dissolved in a cup of warm water. Set in a warm place, stirring 3 or 4 times. For making each loaf use a cup of yeast and 1 of warm water.—*MRS. GEO. N. LANGMAN, Rugby, Ont.*

HOME-MADE YEAST.—1 cup flour, 1 cup salt, 1 cup sugar, put in a dish and mix well together; 4 quarts of water put in a pot and when boiling put in three large handfuls of hops; boil thirty minutes, pour on flour, sugar and salt; when cool, put in White Swan Yeast Cake to start with; boil 12 large potatoes, mash fine, and add to mixture. Cover tight, put in a warm place till it ferments. Shake well before using.

BREAD.—Three pints of lukewarm water, add flour enough to make a thick batter, add one cup of this yeast, let rise till morning, then add salt to taste; mix in flour enough to make into loaves, let rise, then put in pans.—*MRS. G. W. BINNIE, Craighurst, Ont.*

YEAST FOR USE IN MAKING BREAD.—12 medium-sized potatoes, 3 tablespoons flour, 2 tablespoons sugar, 1 teaspoon salt, 1 cup lukewarm water, 3 White Swan Yeast Cakes, 1 quart cold water, 3 parts hot water. **METHOD:** Pare and boil potatoes, mash well. There should be 1 quart water on them when done; put the flour in a crock, sugar and salt, scald with 1 pint boiling water, then add the quart of hot water from the potatoes, with 1 quart cold water. Soak yeast cakes in lukewarm water, then add to the mixture when about cold, and let it rise all night. Keep in a cool place. It will keep from 3 weeks to a month.

BREAD.—Take a pint of the yeast for every loaf required. Set on the stove and stir with the hand until warm (not hot), warm a quantity of flour, add a little salt, sugar and butter (about a tablespoon of each for

three loaves). Make into a dough, let rise about 1 hour. Then knead, when light again mould into loaves, let rise. Bake in a hot oven about 1 hour or maybe more, according to size. Sugar and butter may be omitted. Do not put salt in upon the yeast, as it kills yeast germs.—ETHEL HERON, Regina, Sask.

PERPETUAL YEAST.—3 cups potato water, 1 cup granulated sugar and 1 White Swan Yeast Cake. Let stand 48 hours where temperature is moderate, then seal in 2 quart can and set in cool place. **METHOD:** At noon, save 3 cups potato water and add $\frac{3}{4}$ cup granulated sugar; pour in the yeast. At night take 3 cups of this liquid and to it add 3 cups warm water (always cup for cup); allow 3 cups of flour to 1 of liquid; add 1 tablespoon butter and 1 tablespoon salt. If larger batch is desired, save more potato water at noon. Knead well and put in pan to rise. In morning make into loaves. If yeast is put with potato water at night you may knead stiff in morning. Grease loaves with melted butter just before placing in oven.—MRS. J. D. McMILLAN, Harwich P.O., Ont.

BREAD.—At night put in the bake dish 4 quarts warm water, 3 level tablespoons salt, 2 White Swan Yeast Cakes, mix all together with enough good flour to make a thin batter. Next morning, when nice and light, put in 1 cup sugar, mix stiff and knead a few minutes, let rise and make into loaves. This will make 8 loaves. Let them rise and bake in moderate oven for one hour.—MRS. A. HARDIE, Hurdville, Ont.

2.—2 tablespoons granulated sugar, 1 tablespoon salt, 1 tablespoon lard, 2 cups mashed potatoes, 1 White Swan Yeast Cake. At noon mix sugar, salt, lard and potatoes in crock, pouring over this the hot potato water. When cool add yeast cake which has been dissolved in a half cup warm water. By night this should look foamy. In the morning warm the mixture and mix stiff with flour. When light knead and put in pans.—MRS. OWEN CUTLER, Corinth, Ont.

3.—Have mashed potatoes for dinner at noon; save potato water, take 5 tablespoons mashed potato,

WHITE SWAN YEAST CAKES expel
disappointments

2 tablespoons salt, 1 tablespoon sugar and cold water enough to make mixture lukewarm; beat thoroughly together and add 1 White Swan Yeast Cake. Let stand until night, then measure the yeast into a quart (dipper) measure and add enough warm (not hot) water to make four quarts of liquid; into this stir the flour gradually until too stiff for the spoon, then mix with hands to a medium stiff dough. The dough should not be sticky, but should yield readily to pressure. Put in warm place till morning, then work down in the pan, let stand until light again, when it should be moulded into loaves. Let rise one hour, put into medium hot oven, and bake from 1 to 1¼ hours.—M. G. LAIDMAN, Penticton, B.C.

THREE-HOUR BREAD.—½ cup flour, ½ cup white sugar, ¼ cup salt, scald with the water of the potatoes, add 1 quart of mashed potatoes and 3 quarts of boiling water and when cool enough add 1 White Swan Yeast Cake. Set in a warm place to rise over night. In the morning put this yeast into your flour (have the flour warm), mix stiff, let rise 1 hour, mix down, let rise 1 hour, then put in pans; let rise and bake. This recipe makes 7 loaves of nice sweet bread.—MRS. J. A. SCOTT, Rugby P.O., Ont.

FOUR-HOUR BREAD.—On the day before the baking is to be done, drain the water in which the potatoes for dinner have been boiled into a small pail or crock, add 6 potatoes mashed fine, and when it has cooled add 2 cups flour, 1 cup sugar, about ⅓ cup salt, and enough warm water to make three quarts; now add a White Swan Yeast Cake and set away in a warm place until the next day. When ready to bake set this pail or crock in a pan of warm water until it is warm (not hot), then add flour enough to knead into a stiff dough. Let it rise; when light, knead again and put in tins; let it rise again and bake.—MRS. GEO. HAYWARD, Corinth, Ont.

FOUR-HOUR BREAD YEAST.—Boil 12 medium-sized potatoes, have ready in a 2-gallon crock 4 heaping

tablespoons flour, 2 heaping tablespoons salt, 2 heaping tablespoons sugar; scald with potato water, mash potatoes through colander, then add enough water to make about $1\frac{1}{2}$ gallons, lukewarm, then add 2 White Swan Yeast Cakes which have been soaked in a little warm water; set in a warm place to rise.

BREAD.—Allow 2 cups of yeast for every loaf of bread; warm the yeast and flour, add a little salt, mix stiff and let rise, knead and let rise again; put in pans and rise again and bake. Keep at an even temperature while rising.—MRS. A. J. PATERSON, Ellesmere, Ont.

FIVE-HOUR BREAD.—Take 12 large potatoes, peel boil and mash fine, then take $2\frac{1}{2}$ cups flour and 2 tablespoons brown sugar and 1 tablespoon salt, and scald this with 1 quart boiling water; mix well, then add the potato water, then 1 quart of cold water; put 2 White Swan Yeast Cakes to soak in a little warm water and when the yeast is lukewarm, put the yeast cakes in and let rise. One cup of yeast and 1 of water makes 1 loaf.

SALT-RISING BREAD.—The following is the recipe of the good old-fashioned salt-rising bread so commonly known in the days of our grandmothers. Pour half a pint of water on 2 tablespoons of cornmeal and a generous pinch of salt. Let it stand for 10 minutes, then stir in 2 tablespoons of flour and set it in a warm place to rise over night. In the morning add half a pint of fresh, sweet milk, or warm water—either must be lukewarm—and just flour enough to make the yeast smooth; then put the vessel containing it in a pan or kettle of hot water, hot enough to bear your hand in and be very careful to keep it the same temperature. A carefully selected place on the back of the range may be best. When this rises pour it into a batter made of 2 quarts of fresh morning's milk, scalded, then cooled to lukewarm, and mixed with flour enough to make a batter. Beat this well, using a long spoon, then set the whole to rise again in a warm place. This will be about twenty-five or thirty minutes

if it has been well managed. Be careful that the place is not too hot; now stir in enough flour to make a batter so stiff it cannot be stirred with a spoon; then turn it out on a moulding board well dredged with flour, and before kneading it add a piece of lard the size of a large apple; mix this well into the dough. After a thorough kneading and working, keeping the dough just so, it will not stick to the hands, make it into small loaves, put them in well-greased pans, and set them in a warm place to rise again. When risen to nearly double their bulk, put into oven in a good even heat and bake as quickly as possible. The bread will be whiter and nicer for a steady, even heat. The time will vary according to the size of loaves. When done, brush each loaf over with a little melted butter, as this makes the crust rich and delicious, and prevents it from hardening. This makes about 6 good-sized loaves.—MRS. ERNEST E. BANISTER, Vanessa, Ont.

BREAD FROM MANITOBA FLOUR.—In the morning sift flour into your bread pan, then take 3 quarts of warm water to 1 quart of yeast, 2 table-spoons sugar, 3 table-spoons salt. Mix to consistency of a nice soft dough, then punch for half an hour, gradually sifting flour till you have a nice, smooth, spongy dough, then let rise and mix down twice, then put in the pans and let rise for an hour, then it will be ready for oven. — Mrs. W. H. ENGLISH, Harding, Man.

DAY YEAST.—Take 1 dozen large potatoes and boil till well done, then drain water and mash fine. Drain the potatoes on the following ingredients: 2 cups flour, 1 teaspoon ginger, $\frac{1}{2}$ cup salt, $\frac{1}{2}$ cup sugar. Drain the water on while hot and if too thick put a couple of quarts of cold water on to thin it down to the consistency of cream, then when lukewarm, add 4 yeast cakes. Let rise for 24 hours, then set away in a cool cellar. This will last a month.—MRS. W. H. ENGLISH, Harding, Man.

BROWN BREAD.—2 cups white flour, 3 cups Graham flour, almost 3 cups milk, $\frac{1}{2}$ cup brown sugar, $\frac{1}{4}$

cup molasses, 1 teaspoon soda, 2 teaspoons cream of tartar, $1\frac{1}{2}$ teaspoons salt. Mix all together and bake in a moderate oven.—HILDA SMITH, Rockland, Ont.

2.—4 cups warm water, 1 cup molasses, 1 White Swan Yeast Cake, a little salt; enough coarse Graham flour to make a thick batter, then set to rise. When light, stir in enough of bread flour to knead on board, shape in loaves, put in pans. When light bake about one hour in a medium hot oven.—ISABELLA GRICE, Stouffville, Ont.

3.— $\frac{1}{2}$ cup oatmeal, $\frac{1}{2}$ cup molasses, 1 teaspoon butter, 1 teaspoon salt. Put 1 pint of boiling water over the oatmeal, let stand till warm, then mix all together with $\frac{1}{2}$ White Swan Yeast Cake, and flour enough to make a stiff batter with a spoon. Let rise over night, in the morning stir down and put in bake pan, and when light bake.—MRS. C. H. BRIDGES, Maugerville, N.B.

STEAMED BROWN BREAD.—2 cups Graham flour, 1 cup milk, $\frac{3}{4}$ cup molasses, 1 cup raisins, little salt, good teaspoon soda. Steam 3 hours, then put in the oven half an hour. (Lovely with beans). MRS. F. M. PARKER, Parkersville, Ont.

2.— $1\frac{1}{2}$ cups Indian meal, $1\frac{1}{2}$ cups rye meal, $\frac{1}{2}$ cup molasses, 2 cups sour milk, 1 teaspoon soda, mix all together, pour in a dish and steam 3 hours; when taken off put in the oven for 15 minutes.—MRS. H. S. MORTON, New Germany, N.S.

3.—2 cups cornmeal, $1\frac{1}{2}$ cups sweet milk, 1 teaspoon salt, $\frac{1}{2}$ cup molasses, $1\frac{1}{2}$ cups flour, 1 cup sour milk, 1 teaspoon soda; steam $3\frac{1}{2}$ hours.—MRS. GEO. S. SHARPE, Lower Millstream, King's Co., N.B.

COFFEE BREAD.—2 cups bread sponge, $\frac{1}{2}$ cup butter, $\frac{1}{2}$ cup sugar, $\frac{1}{2}$ cup sweet milk, 1 beaten egg, $\frac{1}{2}$ teaspoon cinnamon. Use flour enough to mix stiff, let rise a second time, then roll out over 1 inch thick. MACDONALD INSTITUTE RECIPE FOR BAKING POWDER BISCUITS.—4 level cups flour, 1 level teaspoon salt, 2 level tablespoons shortening, $2\frac{1}{2}$ level tablespoons baking powder, about $1\frac{1}{2}$ cups milk. The shortening may be sweet lard, or dripping, or butter, or a mixture. See that the shortening is soft enough to rub easily. Place the board, mixing knife, rolling pin, cutter, and pan ready, and see that the oven is hot. Sift the salt and flour into a bowl; rub the shortening into it with the fingers; sift in the baking powder, and mix well. Mix into a soft dough with the milk, using a broad-bladed, flexible knife, in order to cut and mix it quickly. Flour the board lightly, turn the dough out, and roll it round to coat it with flour. Knead just enough to make the dough smooth, roll out about an inch thick, and cut into small biscuits. Place them in the pan, wet the tops only with milk or water, and bake in a hot oven about 20 minutes. The secret of success is a slack dough, quick mixing, and little handling.

Conclusion—Soft wheat flours yield the tenderest biscuits when conditions are uniform.

Remarks—When strong and weak flours are made slack enough for biscuits, and both are of the same slackness, the difference in ‘handling’ quality is very noticeable. The strong flour dough has a stickiness like glue, while the soft flour has a silky smoothness, which is much easier to handle.

Summary—1. Other things being equal, soft wheat flours make more tender milk biscuits than strong wheat flour.

“2. Given a strong wheat flour dough and a soft wheat flour dough of equal slackness and suitable for milk biscuits, the soft wheat flour dough is the easier to handle.

"3. At the present prices of the different flours the strong wheat flour biscuits cost more than soft wheat flour biscuits.

"4. It is possible that a larger proportion of fat used with the strong wheat flour would yield biscuits of tenderness equal to those of soft wheat flour, but the cost of fat makes that method of improvement a disadvantage."

SOUPS

SOUPS AND SOUP MAKING

Agnes W. McKay

Soup is an article of diet which is not used nearly so much as it should be in the average farm or village home. It is light, healthful and stimulating food, agreeing with everyone. It is more of a stimulant than a nutrient, as is generally supposed, containing a large proportion of water. There is little nourishment in it. Soups may be given to little children as their first food after a milk diet of babyhood, and are equally valuable for the aged, whose digestive functions are weak and need the stimulus supplied by hot soups. In cases of extreme exhaustion nothing is better than a cup of hot soup, which can have no bad after effects. In the cases cited, a clear meat soup is meant. The cream soups and purées are so nutritious that, with bread and butter, they furnish a well-balanced meal.

Soups are of two kinds—clear and thick, or stock and milk. Stock is the broth resulting from long, gentle cooking in water, of meat, poultry or fish. Pieces of meat which are of little use if otherwise prepared—tough muscle and bone, shin, neck, or tails and calves' heads—are used for soups. The flavor, aroma and sapidity of broths is due to osmazome, which exists only in flesh and blood, and is more abundant in the meat from old animals, and in dark meats. The properties of osmazome are more noticeable in roasted or broiled meats; and, as it excites the appetite and stimulates digestion, it is advisable to brown the soup meat before adding the water. The only nourishment in soup is albumen, a substance found in flesh, and in much greater abundance in blood. It is very much like the white of an egg, is soluble in cold or tepid water, but coagulates when heated; the nutri-

WHITE SWAN BAKING POWDER contains
no alum

tive properties are largely lost when it coagulates. Hence, soup meat should be put on in cold water—it is better if soaked in the water an hour first—heated gradually and simmered gently until done. In making soup, use about twice as much meat as bone, and from a pint to a quart of water for each pound of meat and bone. Put salt in at first, as it aids in extracting the meat juices. When it has cooked three hours, add seasoning, and mixed vegetables in the proportion of one quarter pound to each pound of bone and meat. Continue cooking until the meat is in fragments, about four or five hours in all. Strain through a sieve and set aside to cool. The fat will form a cake on top, which should not be removed until the stock is to be used. The stock will keep a week in winter, and about three days in summer. In hot weather the vegetables should not be cooked in it, but should be added as it is heated for use. In clearing soups, the scum, which contains the chief nutritives, is removed.

The stocks recognized by authorities are four:

Bouillon—made from lean beef, cleared.

Brown stock—made from two-thirds lean beef, one-third fat and bone, highly seasoned with vegetables, spices and sweet herbs.

White stock—made from chicken or veal.

Consommé—from beef, veal and chicken, highly seasoned with vegetables, spices and sweet herbs; always served clear.

To these is sometimes added *lamb stock*.

A thoroughly reliable recipe for stock is: 2 lbs. raw meat and bone; 1 pound cooked meat, or meat and bone; 3 quarts cold water, fresh or from cooked meat or vegetables. To each pound of meat and bone allow one tablespoon each of carrots, onions and turnips cut in one-half inch cubes, 1 stalk or root of celery, 1 bit of bay leaf, 1 sprig of parsley, 2 pepper corns or a few grains of pepper. Have the bones sawed in 1 inch lengths and split. Cut the meat into 1 inch cubes. If raw meat only is used, brown one-third of it in a little fat in the bottom of the pot. Let meat and bones soak in water 1 hour, then simmer in a cov-

ered kettle 4 or 5 hours. About 1 hour before taking off, add vegetables and seasoning. Strain, and set aside to cool. If desired darker in color, cut an onion in half, bake on a tin plate till very brown, and add to stock with vegetables. From this foundation many soups may be evolved. The addition of sliced vegetables gives a vegetable soup. Macaroni, noodles, and dumplings, make other varieties. Made very thick with vegetables and pearl barley, it is hotch-potch. It may be thickened with rice—in short, the possibilities are endless.

The milk, or thick soups are:

Cream Soups—made of vegetables or fish, and thickened milk.

Purées—very thick cream soups, and perhaps white stock.

Bisquis—generally made from shell fish and milk.

The cream soups are a combination of white sauce and vegetable pulp. They are rather heavy for dinner, with meat, but are suitable for the main dish at luncheon or supper. The vegetables are cooked until soft, rubbed through a sieve and, except potatoes, are used with part or all of the water in which they are cooked. Add a speck of soda to the milk before heating, and it will not curdle. Thicken according to the density of the pulp. All, even potatoes, are better of a little thickening.

The following *Cream of Potato* may be adapted for almost any vegetable:

Mix 1 cup of mashed potatoes with 1 pint of hot milk; add 1 cup white sauce, flavor with salt, pepper, celery salt and onion juice.

Bean Soup.—Soak 1 cup of beans over night, drain and put on to boil in 1 quart of cold water. Fry one slice of onion in 1 tablespoon of butter until slightly brown, and add, with 1 stalk of celery, to the beans. Let simmer till very soft, adding a little cold water occasionally to check the boiling and help soften the beans. Rub through a soup strainer, put over fire and when hot, add 1 cup white sauce (made of 1 tablespoon each of flour and butter, cooked together and

thinned with 1 cup hot milk). Season with salt, pepper and a bit of mustard, and serve with a very thin slice of lemon in each plate.

Potato Purée (a rich soup).—1 pound potatoes, pared and sliced; 1 Bermuda onion, 2 leaves celery, $1\frac{1}{2}$ pints stock, 1 gill single cream, 1 ounce butter, $\frac{1}{2}$ teaspoon each of salt and pepper. Put potato, celery, onion and butter in saucepan over fire, stir for five minutes. Add 1 pint stock and boil until potatoes are done, pass through sieve, adding the $\frac{1}{2}$ pint of stock, hot, to prevent clogging sieve. Return to saucepan, add cream, pepper and salt, and stir until it boils. Serve at once.

Soup is an extremely economical food, if care is exercised in its preparation. In small families it will be necessary to buy meat for it, but in large families, the bones and trimmings of roasts, steaks, etc., will serve. In buying meat for soup-making, the cheaper cuts, neck, cross-rib, plate, flank and skin are best. The skin is the most desirable piece for every-day stock, as it is so gelatinous. Smoked or cooked meats should not be used. When making soup from left-overs, all scraps of cooked or raw meats may be utilized, and also any scraps of cooked vegetables, the water in which fresh meat, poultry or young vegetables have been cooked, or even a spoonful of gravy. There is almost no limit to what may be done with left-overs, if one brings to the task an ingenious and inventive mind.

MILK SOUPS.—1 cup milk, 1 cup vegetable water or other liquid, 2 tablespoons flour, $\frac{1}{4}$ cup vegetable pulp or chopped fish, 1 tablespoon fat. Put the vegetable water, fat and $\frac{3}{4}$ of the milk over the fire to heat; mix the flour smoothly with the remaining milk; stir it into the scalding liquid and stir constantly until it thickens; stir in the vegetable pulp, season to taste with salt and pepper and serve hot.

VARIATIONS.—1. The vegetable water may be water in which the vegetable has been cooked, *e.g.*, green peas, asparagus, carrots, onions, turnips, etc., or a combination of two or three. 2. The vegetable pulp is the

cooked vegetable rubbed through a sieve. Usually the pulp is from the same vegetable which supplies the vegetable water, but there is no objection to any palatable combination. 3. The above is simply a mixture of white sauce, vegetable pulp and the water in which the vegetable has been cooked. It will therefore readily be seen how many a dish of hot soup for supper can be made out of left-over dinner vegetables, especially if they have white sauce on them. The sauce and vegetable are pressed through a sieve, thinned down with milk or vegetable water, seasoned to taste and set aside to re-heat when wanted. 4. If skim milk is used, a little more fat may be used, but not more than 2 tablespoons. The fat may be good sweet dripping or butter.—MACDONALD INSTITUTE, Guelph, Ont.

MILK SOUP.—4 potatoes, 2 onions, 2 ounces butter, pepper, $\frac{1}{4}$ ounce salt, 1 pint milk, 3 tablespoons tapioca. Put two quarts of water in a saucepan, then take four potatoes, peel and cut in quarters, take also two onions and cut them up; when the water boils put in potatoes and onions, then add the butter, salt and pepper to taste. Allow it to boil to a mash, then strain through a colander, working the vegetables through also; return the pulp and soup to the stewpan, add one pint of milk to it and boil; when boiling, sprinkle in by degrees three tablespoons of tapioca, stirring all the time, then let boil for fifteen minutes gently.—SARAH DOHERTY, Wexford, Ont.

POSSIBILITIES OF A SOUP BONE.—A shankbone is good, wash, place in the kettle, cover with cold water, and slowly boil until almost tender, then salt to taste.

Dumpling Dinner.—Take out the meat and use the best for dinner. No. 1. Set about half the broth away in a cool place, now pare a dozen or more potatoes, drop in cold water, then in the boiling broth, while it is coming to a boil again. Take one pint of water, or milk is preferable, a pinch of salt, one egg beaten light, one heaping teaspoon baking powder, sift in flour to make a very stiff batter. Drop from the spoon in round lumps

and let boil about fifteen minutes, serve with some of the broth.

Take the meat that is left over, chop fine, put in a dish, pour enough hot broth over to cover, press with a heavy weight; when cold turn out and slice for dinner No. 2.

Noodle Dinner.—Break three eggs, add 3 tablespoons milk, a pinch of salt, mix until light, add flour to make stiff. Roll very thin, flour well and cut in little strips and drop into boiling broth, cook for thirty minutes and serve with broth. If desired, part of the noodles can be kept for a time by wrapping in clean paper sack. If any broth and potatoes are left over they can be used for supper by adding two sliced onions, a little water, salt and pepper; put all in kettle and cook until tender and serve.—MRS. W. J. WAY, Merlin, Ont.

ASPARAGUS SOUP.—3 or 4 pounds of veal cut fine, a little salt pork, 2 or 3 bunches of asparagus and 3 quarts of water. Boil one-half of the asparagus with the meat, leaving the rest in water until about 20 minutes before serving, then add the rest of the asparagus and boil just before serving; add 1 pint of milk, thicken with a little flour and season. The soup should boil about 3 hours before adding the last half of the asparagus.—MRS. JAMES WOODROW, Richmond Hill, Ont.

BEAN SOUP.—Wash a cup of beans, soak in lukewarm water all night, drain water off in morning, boil until tender; take 2 eggs, beat, add flour to make a thin paste, drop from spoon, let come to a boil, then add salt, milk and biscuits to taste.—MISS LYDIA SHANTZ, Ayr, Ont.

LIMA BEAN SOUP.—Cut up 2 mutton chops, 1 quart Lima beans, 1 onion, 2 potatoes; cut in very small pieces; salt and pepper a sprig of parsley, cook until beans are done.—MISS E. MCILRAITH, Oxford Mills, Ont.

CABBAGE SOUP.—To a piece of meat, either pork or beef, add enough water to cover and bring to a boil,

skim it; cut cabbage fine, cover with water, bring to a boil, and drain and add it to the boiling meat; season with salt, pepper and onion. MILTON SAVAGE, Elgin Mills, Ont.

LOBSTER.—To test.—Tail should spring back after cooking as well as before, if lobster is fresh. It should be heavy for its size. To prepare.—Steam, rather than boil it; put lobster on rack with water 1 inch below. When water boils, put lobster in head first and quickly cover. Cook 20 minutes.—MRS. MILTON SAVAGE, Elgin Mills, Ont.

LOBSTER BISQUE.—2 pounds lobster, 2 cups cold water, 4 cups milk, $\frac{1}{4}$ cup butter, $1\frac{1}{4}$ cups flour, $1\frac{1}{2}$ teaspoons salt, cayenne. Remove meat from lobster shell, add cold water to body bones and tough end of claws, cut in pieces, bring slowly to the boiling point and cook 20 minutes. Drain, reserve liquor and thicken with butter and flour. Scald milk with tail meat of lobster finely chopped, strain and add to liquor, season, then add tender claw meat. LOBSTER CHOWDER.—4 or 5 pounds lobster, chopped fine; take the green part and add to it four pounded crackers; stir into 1 quart boiling milk, add lobster, a piece of butter $\frac{1}{2}$ size of an egg, a little pepper and salt, and bring to a boil.—MRS. JOS. WOODROW, Richmond Hill, Ont.

LOBSTER FARCE.—1 cup boiled lobster meat, $\frac{1}{2}$ cup milk or cream, 1 tablespoon butter, $\frac{1}{2}$ tablespoon flour, 1 tablespoon bread crumbs, $\frac{1}{2}$ teaspoon salt, 1 teaspoon chopped parsley, 1-6 teaspoon paprika. Put butter in pan, when melted stir in flour and milk or cream. Let boil, remove from fire, add lobster meat cut in pieces; fill shells from which the lobster meat

was taken with farce. Cover with buttered crumbs, brown in oven, arrange on bed of parsley.—MRS. MILTON SAVAGE, Elgin Mills, Ont.

LOBSTER A LA NEWBERG.— $1\frac{1}{2}$ cups diced lobster, 2 tablespoons butter, 2 tablespoons sherry, 2-5 teaspoon salt, paprika or cayenne, 2 yolks, $\frac{1}{2}$ cup cream. Serve on toast and garnish dish with points toast.—MRS. JOHN S. SMOKE, Mount Nemo, Ont.

VIRGINIA CREAMED OYSTERS.—Down on the Eastern Shore they have big clam-shells—at least, I suppose they are clam-shells, for they are broad and shaped like a clam-shell, although much larger than those we usually see—and in these the oysters should be creamed if one would compass perfection in this dish. In default of these shells, however, one may use nappies or ramekins. Lay three or four oysters in each nappy or shell. Have ready a sauce made by cooking together

2 tablespoons each of butter and flour until they bubble, and pouring on them, then, a cupful of oyster liquor and 1 of cream; add a tiny pinch of baking soda to the cream and stir over the fire in a double boiler until you have a thick, smooth sauce. Season to taste with salt and white pepper, beat up hard once and pour over the oysters in the shells or the nappies. Set in the oven and after the shells or dishes are hot, bake for about 5 minutes.—By a Virginia Housewife. By Courtesy of "The Delineator."

OYSTER A LA CREME.—1 quart oysters, 1 pint cream; put oysters in double boiler and cook till milk juice begins to flow out. Drain the oysters in a colander, put the cream in the double boiler; when it comes to a boil, thicken with flour, wet with milk to the consistency of cornstarch, ready to mould; put in oysters and cook five minutes.—MRS. JOS. WOODROW, Richmond Hill, Ont.

OYSTER COCKTAIL.—2 tablespoons catsup, 2 drops tobacco sauce, $\frac{1}{2}$ teaspoon Worcestershire sauce, $\frac{1}{2}$ teaspoon lemon juice, 1 teaspoon horseradish.—MRS. H. B. OHRT, 20 Farnham Ave., Toronto, Ont.

ESCALLOPED OYSTERS.—1 pint oysters, 4 tablespoons oyster liquor, 2 tablespoons cream, 1 beaten egg, $\frac{1}{2}$ cup stale crumbs, $\frac{1}{2}$ cup cracker crumbs, $\frac{1}{4}$ cup melted butter, salt, pepper; mix crumbs in butter. Arrange alternate layers in buttered baking dish of crumbs, oyster seasonings, wetting. Bake 35 minutes.—MRS. MILTON SAVAGE, Elgin Mills, Ont.

FRICASSEE OYSTERS.—1 pint oysters, 1 cup white sauce, 1 egg, 1 teaspoon chopped parsley, clean plump oysters, add egg to white sauce, add oysters.—MRS. MILTON SAVAGE, Elgin Mills, Ont.

FRIED OYSTERS.—Select the largest oysters for frying, take them carefully from the liquor, lay them on a cloth and press another lightly upon them to absorb the moisture. Now roll in cracker crumbs or cornmeal and fry quickly to a light brown in hot butter. Serve

at once in a warm dish.—MISS FLORENCE L. SCOTT, Acton's Corners, Ont.

PANNED OYSTERS.—Clean, place on small pieces of toast in baking pan, season, bake until plump. Serve with lemon butter, made with 3 tablespoons butter, creamed, and $\frac{1}{2}$ teaspoon salt, 1 tablespoon lemon juice, cayenne.—MRS. MILTON SAVAGE, Elgin Mills, Ont.

2.—Clean, place on small pieces of toast in baking pan, season, bake until plump, serve with lemon butter, which is made with 3 tablespoons butter creamed, $\frac{1}{2}$ teaspoon salt, 1 tablespoon lemon juice and cayenne pepper.—MRS. MILTON SAVAGE, Elgin Mills, Ont.

OYSTER PATTIES.—Make some rich puff paste, bake in very small patty pans; when cool, turn out upon a large dish; stew some large, fresh oysters with a few cloves, a little mace and nutmeg, then add the yolk of one egg, boiled hard and grated; add a little butter, and as much of the oyster liquor as will cover them. When they have stewed a little while take them out of the pan and set them to cool. When quite cool, lay 2 or 3 oysters in each shell of puff paste.—MRS. JOS. WOODROW, Richmond Hill, Ont.

PICKLED OYSTERS.—Wash them from their liquor and put them into a porcelain-lined kettle, with strong salt and water to cover them; let them come to a boil, and then skim them into cold water; scald whole peppers, mace and cloves in a little vinegar, the quantity of these to be determined by the number of oysters; when oysters are cold put into a stone jar with layers of spice between them, and cover with liquor in which they are cooked; spice to taste.—MRS. JOS. WOODROW, Richmond Hill, Ont.

OYSTERS ON THE SHELL.—Wash the shell and put them on hot coals, or upon the top of a hot stove, or bake them in a hot oven; open shells with an oyster knife, taking care to lose none of the liquor, and serve quickly on hot plates with toast; oysters may be steamed in the shells, and are excellent eaten in the same manner.—MRS. JOS. WOODROW, Richmond Hill, Ont.

OYSTER PIE.—In the old time a shallow pudding-dish was lined with good puff paste, filled with crusts of bread, these covered with a top of the paste, and baked. The edges of the dish were well-buttered so that the crust would not adhere to them too closely, and when the pastry was baked this top was lifted off carefully, the bread crusts removed, and in their place were put oysters, prepared just as for oyster scallop, except that the oysters were allowed to cook in the sauce for three minutes after they went in. Then the crust was laid back on the dish and the whole sent to table. The argument against lining the pie-dish with raw paste, putting in the uncooked oysters and baking all together, was that by the time the paste was ready to eat, the oysters were overdone and insipid.—By a California Housewife. By Courtesy of "The Delineator."

SAUTEED OYSTERS.—Clean oysters, dry, season, dip in crumbs, saute.—MRS. MILTON SAVAGE, Elgin Mills, Ont.

SCALLOPED OYSTERS.—Butter a pudding-dish and cover the bottom with a layer of crushed cracker-crumbs, moistening them with oyster liquor and a little milk. On this put a layer of oysters, dotting it with bits of butter and seasoning with salt and pepper. Cover with another layer of crumbs, repeat that of the oysters, continuing in this order until the dish is full, and making the top layer of crumbs. Strew thickly with bits of butter, bake covered for 20 minutes, and brown.—C. T. H., Pompton, N.J. By Courtesy of "The Delineator."

STEWED OYSTERS.—Not oyster stew, if you please! It was never called that in the old times, and I don't believe it has that name applied to it in the South, even now. Add a $\frac{1}{2}$ pint of hot water to the liquor drained from 2 quarts of oysters. Put a little salt and pepper with it, set over the fire and let it boil up once. Turn in the oysters and let them cook for not more than five minutes, or until the gills begin to crimp. Watch carefully for this stage, as every

second beyond it means injury to the flavor of the oyster. Add 2 tablespoons of butter and a large cup of boiling milk; take from the fire immediately and serve as soon as possible. Never let them stand at the back of the stove and keep warm unless you prefer them tough and tasteless.—By a Michigan Housewife. By Courtesy of "The Delineator."

SHRIMPS.—2 cups shrimps, broken once or twice; make 2 cups white sauce; when cooked, add 2 tablespoons mushrooms chopped, 1 teaspoon chopped celery, 1 teaspoon onion juice, 1 teaspoon lemon juice. Heat shrimps in sauce and serve on crackers.—MRS. MILTON SAVAGE, Elgin Mills, Ont.

BAKED SALMON.—1 can salmon, $\frac{1}{2}$ cup bread crumbs, 1 tablespoon melted butter, salt, pepper, and a little nutmeg, 1 tablespoon vinegar, or the juice of 1 lemon. Drain the salmon, pick to pieces and work in the melted butter, egg, seasoning and crumbs; moisten with liquid drained from salmon, turn into a well-buttered pan in boiling water, cover closely; bake 1 hour.—MRS. W. T. TURTON, Bradford, Ont.

This is enjoyed for the farmer's tea, both by the hired help and also the school children after a cold luncheon at noon hour.—MRS. JOSEPH WASS, Sunny Bank Farm, Oakville, Ont.

FOWL

CHOOSING A CHICKEN.—Select a young chicken. Choose a bird that has the claws on. They should not be tough and hairy. Breast bone should be soft and pliable, tips of the wings likewise. When feathers are picked off there should be no long hairs. Scales on the feet should be soft and dry. The skin must be tender and soft. For boiling and stewing choose a fowl not too young. For roasting use a tender fowl. To develop a flavor in an old fowl after boiling or stewing, brown it in the oven.—MACDONALD INSTITUTE.

TO BAKE POULTRY.—Wash and singe, take off head and legs, remove tendons—do not draw or break skin. Use a small pointed knife. Cut the skin down the full length of the back, then beginning at the neck, carefully scrape the meat away from bone, keeping the knife close to the bone. Break joints of wings and legs, and proceed to free the meat from the carcass. When one side is free, turn the fowl and do same to other side. Care must be taken to detach the skin from the breast bone without piercing the skin. When meat is free from the carcass, remove bones from legs and wings, turning the meat down inside out, as bones are exposed, being careful not to break the skin at the joints. The end bones of the wings cannot be removed, and the whole end joint may be cut off or left.—MRS. MILTON SAVAGE, Elgin Mills, Ont.

FORCE MEAT FOR STUFFING BONED FOWLS.—Use meat of another fowl or veal, or a mixture of both. Chop fine, and add to the mince meat 1 cup crumbs, and if convenient, some chopped ham or tongue; season with 1 tablespoon chopped parsley, 1 teaspoon onion juice, 1 teaspoon salt, $\frac{1}{4}$ teaspoon pepper, 1 teaspoon thyme, moisten with stock if veal is used; take it from knuckle, and use the bone in braizing pot,

as it will leave a good jelly. In stuffing, be careful that too much is not used, as allowance must be made for the swelling.—MRS. MILTON SAVAGE, Elgin Mills, Ont.

STUFFING FOR FOWL.—3 cups bread crumbs, 1 cup onions finely chopped, 1 tablespoon summer savory, 1 tablespoon sage, 1 teaspoon black pepper, 1 teaspoon salt, 1 cup butter; put butter in the frying pan, heat, then add the ingredients; when real hot add $\frac{1}{2}$ cup hot water, cover, let steam a few minutes, when it is ready to mash nicely, then it is ready for use.—MRS. W. H. BOWEN, Glen Meyer, Ont.

POULTRY DRESSING.—2 cups bread crumbs, $\frac{1}{2}$ cup raisins, 1 large sour apple, sugar to sweeten and milk to moisten; raisins and apples to be chopped fine; season with salt and pepper to taste.—MRS. C. FRETSHAW.

DUMPLINGS FOR BOILED DUCK OR CHICKEN.— $1\frac{1}{2}$ cups flour, 1 scant teaspoon soda, 2 scant teaspoons cream tartar, $\frac{1}{2}$ teaspoon salt. Sift twice, then add $\frac{2}{3}$ cup sweet milk, mix 1 light, handling as little as possible. Roll $\frac{1}{2}$ inch thick, cut into small squares, sift a little flour over them; then, when your chicken is nearly cooked, lay dumplings on top. Cover tightly, and let boil for fifteen minutes without moving the cover.—MRS. J. C. BULMER, Cobden P.O., Ont.

BAKED CHICKEN.—Cut the fowls open and lay them flat in a pan, breaking down the breast and the back bones, dredge with flour and season well with salt and pepper, with bits of butter; put in a very hot oven until done, basting frequently with melted butter, or when half done take out the chicken and finish by broiling it upon a gridiron over bright coals; pour over it melted butter and the juices in the pan in which it was baked.—MRS. JOS. WOODROW, Richmond Hill, Ont.

CREAMED CHICKEN.—1 chicken of $4\frac{1}{2}$ pounds, or 2 of 6 pounds, 4 sweetbreads, and 1 can of mush-

rooms; boil chicken and sweetbreads, and when cold cut up as for salad. In a saucepan put 4 coffee cups cream, in another 4 large tablespoons butter, and 5 even ones of flour; stir until melted, then pour on the hot cream, stirring until it thickens; flavor with a small half of grated onion, and a very little grated nutmeg; season highly with black and red pepper. Put chicken and ingredients together with sweetbreads and mushrooms (which if large should be cut in 4 pieces) in a baking dish; cover with bread crumbs and pieces of butter, and bake 20 minutes. It can be made without sweetbreads, but is not as good. Serves 16 persons.—HELEN MARSHALL, Decewsville, Ont.

CHICKEN CHEESE.—Take a plump chicken weighing about 4 or 5 pounds when dressed, put on and boil till tender and well done, remove all the bones and grisly parts and chop fine, with a little salt and pepper; boil down the water it was cooked in to a pint, and it jellies, and stir it in with the chicken. Make a dressing as follows: 1 small loaf of baker's bread put through the meat grinder and a lump of butter, cut fine, size of an egg, a little sage, salt and pepper, 2 beaten eggs stirred in to hold it together; put half of the chicken chopped in a deep earthen or granite dish, spread level; put on the dressing, spread level, then the rest of the minced chicken; this will almost fill the dish; set in the oven till hot, then set in a cool place over night; when cold slice and serve.—MRS. JOSEPH WASS, Sunny Bank Farm, Oakville, Ont.

CHICKEN DRESSING.—Take 3 cups bread crumbs, 1 tablespoon butter; mixed well through bread crumbs, 1 teaspoon salt, 1 teaspoon pepper, 1 tablespoon summer savory, 2 eggs; mix all together, put in chicken and roast.—MRS. N. FULLER.

FRIED CHICKEN.—Take good plump chicken, cut in half (lengthwise), and cut each half across, so as to make four pieces of the body; cut off the legs and open them to the bone; place the fowl in the frying pan in deep hot fat, slice over it 1 large potato and 1 large

onion; season well with pepper and salt, cover and fry gently for 20 minutes or $\frac{1}{2}$ an hour, turning meat to brown on both sides. This is delicious.—MRS. JOHN COOK, Murillo, Ont.

2.—Cut chicken up, boil 1 hour, dip each piece in flour, then fry in butter till brown.—MRS. JOHN FORTYTH, Glasgow, Ont.

JELLIED CHICKEN.—Boil a fowl until it will slip easily from the bones; let the water be reduced to about 1 pint in boiling; pick the meat from the bones, place in a wet mould, skim the fat from the liquor, a little butter, pepper and salt to the taste, and $\frac{1}{2}$ ounce of gelatine. When this dissolves pour it hot over the chicken. The liquor must be seasoned pretty high, for the chicken absorbs.—MRS. JOS. WOODROW, Richmond Hill, Ont.

CHICKEN LOAF.—Boil 2 chickens in as little water as possible to cook them without burning, until the meat will drop from the bones; remove the meat from the bone and cut it up fine; put it back in the kettle with plenty of water, pepper and salt and sage; heat it thoroughly, then slice hard-boiled eggs in the bottom of a dish, then pour the chicken over it while hot, place a weight upon it, and set in a cool place; when cold it will come out in a loaf and may be sliced. This makes great sandwiches for picnics.—MRS. JAMES A. STREET, Box 227, Thamesville, Ont.

CHICKEN PIE.—Line a deep biscuit pan with pastry made as follows: 1 part ice-cold water and one part of thick sour cream, with 1 teaspoon soda and 2 of cream of tartar to 1 quart of flour; bone the chicken and distribute white and dark meat evenly over crust, rolled crackers $\frac{1}{2}$ inch in depth sprinkled over meat when pan was half filled. Simmer broth to good strength, thicken and season as for gravy, pour in pan enough to nearly cover second layer of meat; leave opening in top crust for escape of steam; bake 40 minutes.—MRS. WM. SHIELDS, Shelburne, Ont.

2.—Boil the chicken until tender, having first put in two medium-sized potatoes and 2 large onions sliced very thin, pepper and salt, or any seasoning one may wish; thicken gravy nicely with little flour and water, having enough to cover chicken; now pour all into granite pan until crust is prepared. Crust for top: Same as for pie crust, but should be at least half an inch thick, and not too rich. This pie will bake in quick oven from 20 minutes to $\frac{1}{2}$ an hour.—MRS. FRANK COULTER, Couttsville, Ont.

3.—Cook chicken until tender, add salt and pepper to taste; place the chicken flat in a stone baking dish, make a gravy of chicken broth, not enough to cover, however. Crust for Pie.—2 cups of flour, sifted, with 1 teaspoon baking powder, $\frac{1}{2}$ teaspoon salt, 3 tablespoons butter mixed with flour. Beat 1 egg, add to it 1 cup sweet milk, stir into flour, dip in spoonfuls over chicken. Bake in moderate oven from $\frac{1}{2}$ to $\frac{3}{4}$ hour.—MRS. M. A. DUTCHER, Vegreville, Alta.

4.—Stew a nice chicken till tender, remove the larger bones, salt and pepper, thicken gravy with flour made smooth with milk and have plenty of gravy or the pie will be dry. For Crust: One pint or 2 cups cream; if sour add 1 teaspoon soda, if sweet $\frac{1}{2}$ teaspoon soda; 1 teaspoon baking powder in flour enough to roll; line 3 quart pan around sides, put in chicken and piece of butter, with $\frac{1}{2}$ cup sweet cream, butter size of an egg; cover with remainder of crust dough, cut a slit in top for steam escape and bake. When nice and brown remove from oven, cover for ten minutes and serve.—MRS. E. FISK, Clear River, Ont.

PRESSED CHICKEN.—Boil a chicken until tender, take out all the bones and chop the meat very fine, season with salt, pepper and plenty of butter; add to the liquid the chicken was boiled in, 1 cup bread crumbs made soft with hot water, and to this the chopped chicken. When heated, take out and press into a basin. Serve cold.—MRS. JOHN COWAN, Quinn P.O., Ont.

2.—Cover a young fowl, cut in joints, with boiling water; let simmer until tender, with a few slices of

carrot, $\frac{1}{2}$ an onion and a stalk of celery. Remove skin and bones and return with broth to fire and let simmer until reduced to 1 cup, strain broth and set aside. When the flesh is nearly cold, chop fine, remove fat from broth, reheat, stir the chicken into it, adding salt and pepper. Pack in pot, cover with buttered paper, weight it down, let stand until set, slice thin and serve with salad.—MRS. JOHN T. SMOKE, Mount Nemo, Ont.

A NICE WAY TO ROAST CHICKEN.—Take a young chicken and prepare as for cooking in the kettle and roll each piece in flour till your pan is full, or till you have plenty, then sprinkle with pepper and salt and a liberal sprinkling of butter, and set in the oven and roast till done, which takes about 1 hour.—MRS. OTIS C. PARRY, Tillsonburg, Ont.

ROASTED BONED CHICKEN.—Spread chicken on board, skin side down; turn the flesh of legs and wings right side out and stuff with force meat into shape. Equalize the meat as well as possible, placing against the little strip of white meat only the dark meat, dredge with salt and pepper. Make a roll of the force meat and lay it in the chicken, draw the skins up and sew it together securely. Turn it over, place legs and wings into the position of a trussed fowl. Press the body into natural shape and tie securely. Cover with slices of salt pork and roast, allowing 20 minutes to the pound, baste frequently. Remove pork last 15 minutes, dredge with flour, let brown, serve with gibbet or tomato sauce.—MRS. MILTON SAVAGE, Elgin Mills, Ont.

CHICKEN SALAD.—The white meat of cold boiled or roasted chicken or turkey, $\frac{3}{4}$ same bulk celery (chopped), 2 hard-boiled eggs, 1 raw egg well beaten, 1 teaspoon mustard, 1 teaspoon pepper, 3 teaspoons salad oil, 2 teaspoons white sugar, $\frac{1}{2}$ teacup vinegar. Mince the meat, removing all fat gristle and skin, mix with celery, pour dressing over when cold.—MRS. JOHN HUNTER, Craigvale, Ont.

2.—Take cold left-over chicken, the same quantity of celery, chop fine; add salt, pepper and a little vinegar and cream.—MRS. E. STOLTZ, Mannheim, Ont.

3.—2 chickens chopped coarsely, 3 bunches celery chopped, and 2 heads of lettuce, 2 hard-boiled eggs chopped fine and a few pickled cucumbers, salt to taste. Mix with mayonnaise dressing and garnish with lemons just before sending to table.—MRS. G. C. RICHARDSON, Milton, Ont.

SOUTHERN HASH.—Any left-over chicken or tomatoes will do for this; cut the chicken into small pieces, you should have about 2 cups; cut the tomatoes into small pieces, 2 cups are plenty; stew them gently in 1 cup water for 20 minutes; an onion stewed with them is an improvement. Put the chicken, tomatoes, and 1 cup boiled rice in a kettle and heat to boiling point. Serve hot, garnish the platter with parsley.—MISS C. E. JUDGE, Slate River Valley, Ont.

STEAM ROAST CHICKEN.—This is a recipe by a former chef of royalty in Austria: Roast a chicken in a covered roasting pan or in a Dutch oven from $\frac{1}{2}$ to 3 hours, according to size of chicken. Baste with bouillon.

Dressing.—Mix some bread that has been soaked in water and squeezed out, with some onions that have been chopped, and browned in lard or butter. To this add some chopped celery, parsley, pepper, salt, butter and 2 eggs, also a little minced boiled salt pork if desired.

Gravy.—Boil some tomatoes (if 1 gallon, then with $1\frac{1}{2}$ gallons of water) with the following: Onions, garlic, celery, parsley and some bones of roast beef or chicken bones. Marrow or butter can be used instead of the bones, as it is simply the oil from the bones that is desired. Boil 3 hours and then add some bouillon. Steam and boil again with flour to thicken ever so slightly, and a little salt to suit taste.—ELIZABETH STOFFELS, Napa, Cal. By Courtesy of "The Delineator."

STEWED CHICKEN.—Place a layer of bacon in bottom of stew kettle, then a layer of chicken, season

and sprinkle a little flour, and so on until you have sufficient. Fill kettle with water until within $\frac{1}{2}$ inch of top of meat, cover tightly and cook about 2 hours; do not stir, only turn in round in the pot. Skim off grease and butter and a little flour for gravy.—MRS. W. H. McNEIL, Oakville, Ont.

BRUNSWICK STEW.—1 chicken, 6 large tomatoes, 3 large potatoes, 1 pint sweet corn, $\frac{1}{2}$ pint shell beans, green. Put the chicken over and cook till nearly done, then add tomatoes and potatoes and beans; let cook until about 15 minutes before taking up, then add corn, salt and pepper to taste. The stew should cook 3 hours altogether. If done that way, will find it excellent.—MRS. VANWAGONER, Acacia, Ont.

A NICE WAY TO COOK CHICKEN.—Prepare chicken as for stewing, roll each piece in flour, place in a small dripping pan, sprinkle with pepper and salt and some butter, fill the pan half full of sweet milk, cook in the oven for 1 hour. The milk makes a nice gravy.—MRS. WM. MCKAY, Altona, Ont.

POTATOES WITH CHICKEN.—Use 2 cups hot mashed potatoes, piece butter size of an egg, $1\frac{1}{2}$ cups hot milk, beaten yolks of 2 eggs, salt and pepper to season, and a little minced celery. Beat till all are thoroughly mixed, then fold in the beaten whites of eggs. Pour in a border mould, bake in a hot oven. Turn out on a hot dish, and fill centre with stewed chicken.—MRS. JOHN T. SMOKE, Mount Nemo, Ont.

BAKED TAMALE.—An excellent new supper dish, which with tea and fruit makes a meal for six. Boil until tender one small chicken, or that amount of any tender meat. The meat from soup bones is fine used this way, and veal is as good as chicken. In fact, you can use to advantage any tender left-over meat. Strain off the broth, remove the bones, and break into small pieces. Put into a frying-pan 2 tablespoons of lard or drippings, and when hot add 2 tablespoons flour, and let brown a little; then add the meat, salted to taste,

with 1 cup broth and 2 tablespoons of chili powder; stir and cook 10 minutes; set off to cool, and add a small cupful raisins (whole) and about the same of olives. Now make a stiff batter of 3 cups of cornmeal and 1 of flour, salted, into which is rubbed $\frac{3}{4}$ of a cup of lard or drippings, moistened with 1 beaten egg and 1 cup broth. Line a deep pan with the batter, and bake 1 hour.—M. I. DAVIS, Campo, Cal. By Courtesy of "Delineator."

DUCKS.—When roasted, use dressing as for turkey, with the addition of a few slices of onion; many cooks lay over the game slice of onions, which take away the fishy flavor, removing the onion before serving. Make a sauce with the dripping in the pan in which the game is roasted, and to which are put the chopped giblets, which are previously well cooked; thicken the gravy with brown flour moistened with water. Serve with currant jelly.—MRS. JOS. WOODROW, Richmond Hill, Ont.

ROAST GOOSE.—Stuff the roast in same manner as ducks; many cooks cover poultry with a paste of flour and water while baking, removing it before being served.—MRS. JOS. WOODROW, Richmond Hill, Ont.

ROAST TURKEY, OR CHICKEN.—Having picked and drawn the fowl, wash them well in 2 or 3 waters, wipe them dry, dredge them with a little flour inside and out, sprinkle on a little pepper and salt, prepare a dressing of bread and cracker crumbs; fill the bodies and crops of the fowls and then bake them from 2 to 3 hours; baste them frequently while roasting; stew the giblets in a saucepan. Just before serving chop the giblets fine, after taking up the chicken and the water in which the giblets are boiled, and the chopped giblets to a gravy of the roast fowl, thicken with a little flour which has been previously wet with the water; boil up and serve in a gravy dish. Roast chicken and turkey should be accompanied with celery and jellies.—MRS. JOS. WOODROW, Richmond Hill, Ont.

TO BOIL A TURKEY.—Make a stuffing for the craw of chopped bread and butter, cream, oysters and the yolks of eggs, sew it in and dredge flour over the turkey, and put it to boil in cold water, with a spoonful of salt and enough water to cover them well; let it simmer for 2½ hours, or, if small, less time; skim it while boiling. It looks nicer if wrapped in a cloth dredged with flour. Serve it with drawn butter, in which put some oysters.—MRS. JOS. WOODROW, Richmond Hill, Ont.

TO ROAST WILD FOWL.—Put an onion, salt and hot water into a pan, and baste for 10 or 15 minutes; change the pan, put in a slice of salt pork and baste with butter, and pork drippings very often; just before serving dredge lightly with flour and baste. Ducks take from 25 to 35 minutes. Do not draw or take off the heads of either, garnish with fried or toasted bread, lemon, parsley and currant jelly.—MRS. JOS. WOODROW, Richmond Hill, Ont.

TO STEW BIRDS.—Wash and stuff them with bread crumbs seasoned with pepper, salt, butter or chopped salt pork, and fasten them tight; line a stew-pan with slices of bacon, add a quart of water and a bit of butter the size of a goose egg, or else four slices of salt pork; add, if you like, sliced onions, sweet herbs and mace; stew till tender, then take them up and strain the gravy over them; add boiling water if the liquor is too much reduced.—MRS. JOS. WOODROW, Richmond Hill, Ont.

PIGEON PIE.—Make a fine puff paste, lay a border of it around a large dish, and cover the bottom with a veal cutlet, or a very tender steak free from fat and bone; season with salt, cayenne pepper and mace. Prepare as many pigeons as can be put in one layer of the dish; put in each pigeon a small lump of butter, and season with pepper and salt; lay them in the dish breast downwards and cut in slices a ½ dozen hard-boiled eggs and lay in with the birds; put in more butter, some veal broth, and cover the whole with crust;

bake slowly for an hour and a half.—MRS. JOS. WOODROW, Richmond Hill, Ont.

BOILED PIGEONS, OR SQUABS.—Young pigeons, or squabs, are rightly esteemed a great delicacy. They are cleaned, washed and dried carefully with a clean cloth, then split down the back, and broiled like chickens; season with pepper and salt and butter liberally in dishing them. They are in great request in a convalescent's room, being peculiarly savory and nourishing.—MRS. JOS. WOODROW, Richmond Hill, Ont.

PRAIRIE CHICKENS, PARTRIDGES AND QUAILS.—Clean nicely, using a little soda in the water in which they are washed, rinse and dry, then fill with dressing, sewing up nicely, binding down the legs and wings with cords; put in a steamer over hot water, and let them cook until just done; then place in a pan with a little butter until of a nice brown. They ought to brown nicely in about 5 minutes. Serve on a platter with sprigs of parsley alternating with currant jelly.—MRS. JOS. WOODROW, Richmond Hill, Ont.

QUAIL ON TOAST.—After the birds are nicely cleaned cut them open down the back, salt and pepper them, and dredge with flour; break down the breast and back bones so they will lie flat, and place them in a pan with very little water and butter in a hot oven, covering them up tightly until nearly done, then place in a spider in hot butter, and fry a moment till a nice brown; have ready slices of baker's bread toasted, and slightly buttered upon a platter. The toast should be broken down with a carving knife so that it will be tender; on this place the quail, make a sauce of the gravy in the pan, thicken lightly with browned flour and pour over each quail and the toast.—MRS. JOS. WOODROW, Richmond Hill, Ont.

MEATS

Meat is the flesh of animals used for food. The flesh of more mature animals is more nutritious and more easily digested than that of the younger.

Beef is the most nutritious meat, mutton ranks next. Pork is difficult to digest. Lamb is tender, but less valuable than mutton. Veal is the least nutritious and is indigestible.

Good meat is firm and bright red when first cut. The fat is firm and light yellow. Lean meat is muscle. Much used muscle makes rich, juicy, good-flavored meat, but is not always tender.

Cooking of Meat.—Meat is cooked: 1. To improve the flavor and appearance. 2. To kill any germs which may be present. 3. To soften the fibre. 4. To retain the juice by boiling, pan boiling, or roasting.—GLADYS HARRIS, 109 Park Street, Buffalo, N.Y.

RULES FOR ROASTING.—Put the roast in a very hot oven with pieces of fat or good dripping, and baste every ten minutes. Keep oven very hot for small roast; for large roast lower heat after first 15 minutes. Allow 15 minutes for each pound if meat is compact. A long, narrow, thin roast will take less time. After meat is well seared, salt and pepper may be added. Meat may be rubbed with flour if desired.—MACDONALD INSTITUTE.

ROASTING BEEF.—Wash beef clean and have oven real hot, and do not put water in pan as it toughens the meat. Cook it quickly by keeping oven hot. In making the gravy, do not wet the flour with water, just put flour in hot grease and it will not go lumpy.—MRS. A. STEIN, Aylesbury, Sask.

RULES FOR BOILING.—Cover meat with boiling water, boil about 15 minutes, then simmer till done. Tender meat takes 10 minutes to the pound. Tough meat 3 to 5 hours, no matter what size.—MACDONALD INSTITUTE.

THE COOKING OF TENDER MEAT.—

Roasting.—Wipe the meat and put in a roasting pan. Then put in a very hot oven; after ten minutes check the oven and continue to cook in even heat, basting occasionally with the fat in the pan. Allow ten minutes to every pound.

Broiling.—Hold the meat very near the fire first, turning every 10 seconds; then hold it further away from the fire and turn less frequently until cooked. Steak one inch thick should require 10 minutes' cooking.

Pan-broiling.—Heat the pan, then put the meat in, and turn it at once. Then every 10 seconds for one minute, and less frequently until done. Before taking it from the pan, season it; remove to a hot platter and spread butter over it.

Boiling.—Put the meat into boiling water and boil for five minutes, then simmer until tender. Allow from 2 to 3 hours for an ordinary piece.

Stewing.—Cut the meat into 2-inch pieces, cover with cold water and simmer until tender. Add any vegetable and seasoning desired, and thicken with gravy before serving. To develop higher flavor in meats, the piece may be rolled in flour and then stewed.—VERNA GIES, Heidelberg, Ont.

TO COOK TOUGH BEEF.—Cut ready for frying, put in pan on a hot fire; when nicely browned on both sides, shake pepper and salt and 2 tablespoons of flour, then cover with boiling water. Cook 2 hours; as water boils away add more.—MRS. N. T. DOBSON, 409 Boston St. E., Hamilton, Ont.

2.—Tough cuts of meat are rendered more appetizing by the combination of both moist and dry heat. (Dry heat first and moist heat last). To cook tough meat: 1. Aim to make tender by softening the connective tissues (by moist heat). 2. To cook without hardening or drying the muscle juices. 3. To develop a palatable flavor, browning the surface in dry heat.—MACDONALD INSTITUTE.

CANNING BEEF.—Cut the beef in pieces as you would to fry or stew, fill your sealer as full as you can, putting the fat and pieces that are not so nice on top. Put the lid on tight and put the sealers in the boiler in cold water and boil 3 hours. If the beef is old, boil longer. Don't let the water come over the top of the jars; when done, take sealers out and tighten as tight as you can; when cold it should be jellied. Keep in a cool place.—MRS. JOHN RAYMER, Sunnidale Corners, Ont.

GRAVY.—2 tablespoons flour to 1 cup boiling water or liquid. First mix flour with fat, then brown and stir in the boiling water. Scrape all the brown parts from the pan. Season with salt and pepper.

Another Method.—Mix flour smooth with a little cold water, stir into the fat and then add hot liquid; a little strained tomato may be added to either if desired.—MACDONALD INSTITUTE.

GRAVY—WHEN MEAT CANNOT BE HAD.—Brown a heaped tablespoon of flour in butter the size of an egg, then add about 3 cups of the water which has been drained from boiled potatoes (peeled), and pepper and salt to taste.—EVA E. RAMEY, Lynden, Ontario.

BEEF

BEEF BALLS.—Chop very fine 2 pounds of raw beef, or as much as needed, with some suet; season with salt and pepper; mix in a handful of flour, mould into balls and fry in hot drippings to a nice brown on both sides.—MRS. O. C. BUCHNER, Courtland, Ont.

BUBBLE AND SQUEAK.—Cut in pieces, convenient for frying, cold roast or boiled beef; add pepper and salt, and fry them. Have a cabbage boiled and chopped small and fry with a little pepper and salt. Keep stirring, that all may be equally done; sprinkle over cabbage, when taken from the fire, a very little vinegar; place

cabbage in centre of dish and arrange meat neatly round it.—MRS. A. CHRISTIE, 88 Birge St., Hamilton, Ont.

BEEF CECILS.—Chop 3 cups cold beef, add 2 cups bread crumbs, 1 egg, a small onion chopped fine, a little sage, pepper and salt to taste, enough milk to moisten the mixture that it will hold together in balls, flattened, and fry in drippings or butter.—MRS. W. E. KNOWLES, New Lowell, Ont.

BEEF CROQUETTES.—Chop the bits of cold beef very fine; to 1 cup of chopped meat add $\frac{1}{2}$ cup of cracker crumbs, 1 egg, pepper and salt (and a little chopped onion if desired). A little hot water or meat gravy may be needed to make crumbs stick together. Make into little cakes and fry in hot buttered pan.—MRS. W. H. BRADSHAW.

2.—Chop sufficient cold cooked beef to make 1 pint, add to it 1 teaspoon salt, 1 teaspoon onion juice, a dash of cayenne, $\frac{1}{4}$ teaspoon pepper, and a grating of nutmeg. Put half a pint of milk over the fire, rub together 1 tablespoon butter and 2 tablespoons flour; add then to the hot milk, stir until you have a smooth, thick paste; take from the fire, mix with it the meat and let cool. When cool, form in croquettes, beat 1 egg, add to it a tablespoon warm water and beat again; dip the croquettes first into this, then roll in bread crumbs and fry them in smoking hot fat.—MRS. L. J. CRAIG, Hamtown, York Co., N.B.

thick layer of bread crumbs dressing as prepared for goose or duck; then roll up and tie with cord and dust with flour and roast in a covered meat pan till cooked, about $1\frac{1}{2}$ hours.—MISS FLORENCE L. SCOTT, Acton's Corners, Ont.

2.—Prepare dressing as for turkey, and after pounding a round of steak spread dressing over it; lap over the ends, roll steak tightly and tie closely, spread butter over steak after tying; lay on a rack in bake pan, baking as a turkey or duck, basting often; a $\frac{1}{2}$ hour in a brisk oven will bake; pour gravy over it and serve hot.—MRS. WM. CALVERT, Buttonville, Ont.

A FAVORITE DISH.—Cut in halves and boil sufficient potatoes, drain them, put into a baking tin, add a little butter, place 3 pounds beef or lean mutton in centre of potatoes; bake 1 hour, turn potatoes over occasionally; they will then be a golden brown.—MRS. WELCH, Grovelly Lane, North Birmingham, Rednal, near Bham, Eng.

HAMBURG STEAK.—For this use the tougher portion of the round, or, in fact, almost any of the poorer portions of the meat; chop $1\frac{1}{2}$ pounds of the raw meat very finely, add 2 cups of bread crumbs soaked in milk, 1 onion (minced), season to taste, add 2 eggs; make into a roll, put in a baking pan, pour over it some warm water in which a piece of butter has been melted, and bake, basting frequently. JACOB WAGG, Uxbridge, Ont.

BEEFSTEAK WITH ONIONS.—1 pound chopped raw beef, 1 chopped onion, pepper and salt, butter size of walnut; make into small balls, flatten these, fry in butter until brown on both sides.—MRS. FRANK MULHOLLAND, Craigvale, Ont.

HOW TO BROIL A PORTERHOUSE STEAK.—

Have steak cut 1 inch thick, cut off the tail-ends of 2 medium-sized steaks, trim off all excess fat, leaving the portions containing the T bone for broiling, place on broiler and broil over hot coals for about 7 minutes, then turn and broil the other side; if no broiler is at hand, heat thick frying pan very hot, smear with some of the fat and put steak in, turning the same as when broiler is used; season with salt and pepper; when cooked put on hot platter, putting bits of butter over meat; add a very little water to pan, and put in platter, but do not pour it over meat, as that toughens it; serve at once. Use the ends of meat which you cut off in a stew next day prepared as follows: Brown some of the fat and a little butter in pan, add the ends of meat cut in small pieces, let brown all over this, cook slowly till nearly done, when you add 3 potatoes, 1 large onion, 3 small carrots and a little turnip cut in diced pieces, with enough water added from time to time to keep from scorching; when nearly tender season, let cook for a few minutes, put on hot chop platter, garnish with parsley and rings of lemon and serve. Steak prepared in the above way will be found to be juicy and tender.—MRS. W. H. BOYD, Rodney, Ont.

STUFFED BEEFSTEAK.—Stuffed beefsteak can be prepared from a rather poor flank or round steak; pound well, season with pepper, salt, then spread with a nice dressing; pull out and tie closely with twine; put in a kettle a quart of boiling water, boil slowly 1 hour, take out and place in a dripping pan, adding water in which it was boiled, basting until a nice brown and make gravy of the drippings. 2.—Cut the slices not too thick, dip them in beaten egg and then in bread or cracker crumbs, or cornmeal, then fry a nice brown in piping hot fat; be careful in turning. Lay each piece on a hot platter, not heaped up, and garnish with greens. Then, the next day, take all the left-overs of the beef, put them through the mincing machine with a small onion, season with salt and pepper, put in a bake dish, cover over with mashed potatoes, then sprinkle the top with crumbs and bits of butter, a little pepper and salt, and brown in the oven. While preparing the potatoes, set the dish with the meat on the top of the stove with the gravy, if any left over, or use a good piece of butter and hot water, as the meat is dry. Or again heat the meat, onion and potatoes all together in a frying pan on the top of the stove. Either way is very good.—MRS. THIERRY, Glenboro, Man.

3.—Chop together left-over beef, 1 onion, 1 teaspoon sage, 1 teaspoon salt, a pinch of pepper, beat 1 egg, mix all together, put in small, flat cakes, dredge with flour and fry in hot butter or dripping.—MRS. PETER SLAGHT, Wilsonville, Ont.

Also by MRS. W. H. JULL, Burford, Ont.

4.—If cold roast beef is rare, broil quickly and serve with butter, salt and pepper, etc. If well done, warm up in a brown gravy, have the gravy hot and put the slices of meat in it; don't let them cook, as long cooking in a gravy will make any meat tough. Then with the remaining scraps of meat, with the bone and a few vegetables, make a stew with dumplings.—MRS. ROY MILLER, Box 198, Thamesville, Ont.

PORK

TO FRY DOWN PORK.—Take fresh pork, slice and fry as for table use, pack in crocks and cover with the hot dripping; be sure it gets well around the slices in

each layer, cover and weight to keep the pork well under the dripping. Have kept it for summer use for years, and find it as nice as if freshly cooked.—MRS. W. H. WARNER, Forest Rd. West, Cobourg, Ont.

PICKLE FOR PORK OR BEEF.—For every gallon of water add $1\frac{1}{2}$ pounds of salt, $\frac{1}{2}$ pound sugar, $\frac{1}{2}$ ounce saltpetre; mix liquid enough to cover the meat and leave meat in pickle for six weeks, then take out and smoke.—MRS. M. L. HARVEY, Sparta, Ont.

BRINE FOR BEEF OR PORK.—5 pounds brown sugar, 8 pounds salt, 1 teaspoon cayenne pepper, 1 tablespoon saltpetre, 5 gallons water. This is sufficient for 100 pounds meat. Pour on boiling hot.—MRS. JAS. MCKENZIE, Box 335, Portage la Prairie, Man.

TO PICKLE HAMS.—To 100 pounds meat use 20 pounds salt, 3 ounces soda, 2 ounces saltpetre, 1 ounce borax, 2 quarts syrup, and water enough to cover meat; boil all together; when cold pour over meat, let stand 4 to 6 weeks, according to size of hams; dry and sew in bags, paint with whiting.—MRS. W. ALLEWELL, Uptergrove, Ont.

TO SUGAR CURE PORK.—To 100 pounds of pork take 1 quart of salt, $\frac{1}{3}$ of a pound of brown sugar, 2 ounces black pepper, $1\frac{1}{2}$ ounces saltpetre, dissolved in $\frac{1}{2}$ cup warm water; then mix all together and rub both sides; let it stand 10 days and rub again. Do not let it freeze while this is being done; when smoked the pieces may be rubbed with molasses and sprinkled with black pepper.—MRS. JAS. E. TURNBULL, Camilla, Ont.

2.—For curing 100 pounds pork make a salt brine sufficient to cover meat and strong enough to carry an egg; dissolve in warm water 6 pounds table syrup, 4 ounces saltpetre, and just before pouring over meat add 2 ounces baking soda; leave hams and shoulders in three weeks, side meat half the time; wipe dry and rub with cornmeal, paint with essence of smoke, sew up in cotton bags and hang up in cool place.—MRS. ENOS L. METHERELL, Little Britain, Ont.

TO CURE PORK.—For 1,000 pounds of meat take 10 quarts of salt, 2 pounds brown sugar, 1 pound black pepper, 1 pound granulated saltpetre; mix all well together, rub on about $\frac{1}{3}$ of the mixture as soon as the meat is trimmed; in 2 or 3 days rub on about $\frac{1}{2}$ of the balance, in 5 or 6 days rub on the remainder; in about 2 or 3 weeks your meat is ready to be smoked.—MRS. ISAIAH HOOVER, Box 218, Stouffville, Ont.

SPICE CURED HAM.—To 100 pounds meat allow 10 pounds salt, 2 ounces saltpetre, 1 ounce cayenne pepper, 1 quart molasses or honey, 8 gallons soft water; boil and skim, pour on meat after a little cool; when you hang the hams up rub with molasses or honey and ground spices. Either honey or molasses can be used in this recipe with good results.—JEWEL A. CORBETT, Amherst Point, Cumb. Co., N.S.

BACON FRAZE.—Cook either breakfast bacon or salt pork in frying pan till nearly done; pour over it a batter made of 1 cup milk, 1 egg, and flour to thicken; cook till set, then put in oven to brown; turn over on flat dish. Very nice on a cold winter night with hot biscuits.—MRS. JOHN FISHER MONROE, Box 276, McDonald College, P.Q.

POTATOES AND BACON.—Cream potatoes in the usual way by cutting in cubes and warming in milk sauce; when they have simmered about five minutes, add some bacon which has been cut in tiny cubes and fried until nearly brown; bacon should be well drained before it is put with the potatoes; let bake a few minutes and serve. Potatoes creamed in the same way, only place a layer of potatoes, then a layer of grated cheese, and so on until a medium-sized basin is filled; always have a layer of the grated cheese on top; bake in the same way as the former; this will be found a splendid dish in case of unexpected company.—MRS. JACK PLATT, Millgrove, Ont.

FRIED PORK.—Have the pan hot greased, cut the slices less than a quarter of an inch thick, take off the rind, place on the pan; if fresh, add a little sugar, salt and pepper, will brown quicker and a nicer flavor; have a fork and spoon; cook thoroughly, press down all white places with a spoon until they are brown; when nicely browned both sides, lay on a platter; with the spoon pour a little gravy over each piece, and serve. On no account leave while cooking it if you want it right.—MRS. THOS. SMITH, Jamestown, Ont.

2.—Slice in nice thin slices and put in a bread pan; sprinkle with pepper and salt if fresh; put in the oven, turn when half cooked, then cook till a nice brown. I find it cooks more evenly this way than in the frying pan on the top of the stove.—MRS. A. HARDIE, Hurdville, Ont.

Serve with potatoes and nice gravy.—MRS. ELSIE CARTER, Kingsmill, Ont.

STUFFED ROAST RIBS.—Take a whole side of spare ribs, hack down the centre, but do not separate the pieces, wash and thoroughly dry; prepare a stuffing as you would for turkey, using about half a loaf of rather stale bread, slice and rub until finely crumbled, season with salt, pepper and sage, also an onion cut fine; rub on a tablespoon of butter and moisten the whole with a little cold water; lay the stuffing in the hollow ribs next to the backbone, pack firmly, then turn over the other half; now take a cord, and beginning at one end wind smoothly around, covering all the stuffing; tie firmly, put in pan with about $\frac{1}{2}$ cup of hot water; roast in a rather hot oven for an hour and a half; when done take out of the pan, lay on a platter, remove the cord, and it is ready to serve; for the gravy pour off some of the fat in the pan, add a tablespoon flour, rub smooth, pour in boiling water till of the right consistency, stirring all the time; let boil for a minute, season with salt and pepper, and serve with the roast.—MRS. A. McLAREN, Duart, Ont.

TO COOK A HAM.—Soak the ham in cold water for 12 hours, put it on to boil, allow 15 minutes for each pound, pour the water off, fill the pot with fresh water (boiling), put in a pint of vinegar, a tablespoon of whole allspice, teaspoon cloves; allow the ham to cook in this, 15 minutes for each pound; let it remain in this liquor till cold, skim it, make a paste of vinegar and mustard and cover the top with it; put bread crumbs and a little sugar on, then return to oven for a short time.—MRS. JAMES A. JAMIESON, Box 63, Thornton, Ont.

LEG OF MUTTON FOR VENISON.—Pick out a fine leg of mutton and let it hang twelve days in a cool place, then wash it thoroughly and put it in a dripping-pan on a grate, so it will heat through thoroughly but will not cook. Remove it from the pan and pour into the pan a quart of rich gravy. Cut the mutton from the bone in slices not quite $\frac{1}{2}$ inch thick, add a little tomato sauce or catsup and salt to suit taste, then lay in the

slices of meat and cook about 25 minutes, or until done. When nearly done, add 2 tablespoons barberry or currant jelly. Serve hot as soon as cooked. We have used this when venison could not be obtained on Christmas day.—E. F. P., Dorchester, Mass. By Courtesy of "The Delineator."

RICE WITH MEAT.—Boil 1 cup rice until tender in salted water, line a mould half an inch deep, chop fine

EGGS

TEST FOR FRESH EGGS.—1. A dull, rough appearance to the shells. 2. No rattle in the shell. 3. When put in cold water should lie flat on the side. 4. Candling shows the egg transparent. 5. Whites should be clear, thick and clinging to the yolk. 6. The yolk should be light, round yellow ball.

PRESERVATION OF EGGS.—1. Keep out of the air. 2. Keep in cold storage. 3. May be kept in crates, small ends down. 4. May be wrapped in paper and placed in a basket small end down.

LIME PICKLE FOR EGGS.—1 pound of lime and 1 pint of salt to 4 gallons water. Heat together to form a solution and pour the clear liquid off.—MACDONALD INSTITUTE, Guelph, Ont.

PACKING EGGS FOR WINTER USE.—Eggs will be needed for the home use and to sell during the cold winter months when hens are not laying. They can be packed in a manner which will keep them almost as fresh as when laid. Cover the bottom of a wooden box with barley which has been heated in the oven to thoroughly dry it, but not enough to cook or overheat it and destroy the life of the grain. Stand the eggs, small end down, in the barley, allowing none to touch each other; cover with barley and continue thus until box is filled. Cover well with barley, and put in a dry place. Do not place paper over or layers of paper between. A certain amount of air is needed to keep the eggs in a good condition, and the barley not only allows this to pass through, but avoids that glossy surface which packed eggs always have.—MRS. WM. NICHOL, Elgin Mills, Ont.

BAKED EGGS.—Break 6 or 7 eggs into a buttered dish, taking care that each is whole, and does not en-

croach upon the others so much as to mix or disturb the yolks; sprinkle with pepper and salt, and put a bit of butter upon each. Put into an oven and bake until whites are set. Nice for breakfast served on toast or alone.—MRS. JOS. WOODROW, Richmond Hill, Ont.

CREAMED EGGS.—Boil 5 fresh eggs 15 or 20 minutes, dip in cold water just an instant and shell, cut lengthwise in 4 slices on a hot, shallow vegetable dish set in range closet to keep warm. Make a sauce as follows: 1 tablespoon butter, 1 onion chopped fine, cook in the butter, add 1 tablespoon flour, rub smooth, may be browned if desired; add 1 pint of sweet milk and $\frac{1}{2}$ teaspoon salt, little pepper, cook till like gravy and pour over the eggs and serve hot. The same sauce poured over canned dried beef is excellent, and as we say, makes the beef go farther.—MISS MARGARET PETTIT, Freeman P.O., Ont.

CODDLED EGGS.—1 egg, $\frac{1}{3}$ cup milk, 1 tablespoon butter, salt and pepper. Scald the milk, add egg slightly beaten. Cook over hot water, stirring constantly, then add seasoning and serve on hot toast.—MACDONALD INSTITUTE.

DEVILLED EGGS.—6 eggs hard boiled, $\frac{1}{3}$ cup finely chopped ham or chicken, 1 or 2 tablespoons butter, $\frac{3}{4}$ teaspoon mustard, cayenne, $\frac{1}{4}$ teaspoon salt (omit with ham), 1 teaspoon vinegar. Cut the eggs in half transversely, remove the yolk, press through strainer, add ham and seasonings, moistening the mustard in vinegar; mould into balls, fit into whites and serve on a thick bed parsley or lettuce.—MISS REBA ROTHWELL, "Albermarle Farm," Gifford, Ont.

baking tin, dip upon it 6 tablespoons nice cream, 1 only in a place; upon each spoonful of cream drop 1 of the yolks whole (being careful not to break them), place in moderately hot oven to cook, and serve hot as omelet.—MRS. O. A. WILSON, Myrtle Station, Ont.

EGG OMELET.—6 eggs, whites and yolks beaten separately, $\frac{1}{2}$ pint milk, 1 teaspoon cornstarch, 1 teaspoon baking powder, and a little salt; add the whites beaten to a stiff froth last, cook in a little butter.—MRS. JOS. WOODROW, Richmond Hill, Ont.

2.—Take 4 eggs, separate whites and yolks, beat whites to very stiff froth, beat yolks and 4 tablespoons milk with a sprinkle of salt and pepper; have ready a frying-pan with tablespoon butter in it; when hot, stir both mixtures together quickly, turn into pan; when a nice brown on bottom, turn $\frac{1}{2}$ over on the other; let cook a minute longer, serve at once.—MRS. CHAS. JEFFERSON, North Sydney, C.B.

3.—1 tablespoon milk to every egg used, and 1 extra to the lot. For 3 people use 5 eggs, 6 tablespoons milk, beat eggs well, add milk, pinch salt and pepper; have pan hot, well greased with butter, and pour mixture in. After it begins to set, put in hot oven for few minutes, then loosen with knife and turn half over; to be eaten immediately.—MRS. LEANDER JOHNSON, Williamsdale, N.S.

4.—1 cup sweet milk, 1 cup cracker crumbs, soak the crumbs in the milk, beat 3 eggs to a froth, stir eggs into crackers and add a little salt; turn all into the hot frying-pan that contains a little melted butter. When the omelet is browned on one side turn and brown the other.—MRS. ALEX. DOHERTY, Ellesmere, Ont.

POACHED EGGS.—Break as many eggs as desired, one at a time, and drop carefully into a spider filled with boiling water; when the whites of the eggs are well set, slip a spoon carefully under and take out, laying a small piece of butter on each egg, a slight dash of pepper, and serve immediately.—MRS. JOS. WOODROW, Richmond Hill, Ont.

2.—Poach eggs in milk instead of the usual way, thicken milk with flour to form a sauce and pour over eggs.—*REAH F. KENDALL, Hawkstone, Ont.*

EGGS ON TOAST.—Put as much milk in a saucepan as will just cover the number of eggs needed; when on the point of boiling, drop in the eggs and let cook about 5 minutes; take out and put each egg on a slice of freshly made toast, lightly buttered; thicken the milk with a little flour, add pepper and salt. Pour over toast and serve hot.—*MISS N. GUNTER, Millbridge, Ont.*

SCRAMBLED EGGS.—6 eggs, 2 tablespoons sweet milk, $\frac{1}{2}$ teaspoon salt, $\frac{1}{4}$ teaspoon pepper, 2 tablespoons butter, beat the eggs, add the other ingredients, and mix thoroughly; melt the butter in a frying pan, pour in the mixture, stir constantly till cooked, and serve at once.—*MRS. W. EDWARDS, Box 101, Cookshire, Que.*

SCRAMBLED EGGS WITH POTATOES.—Take 2 cups cold mashed potatoes and 4 eggs, beat together until light, cook in hot buttered frying-pan, stirring constantly; season with pepper and salt before removing from fire.—*MRS. ROBT. McLELLAND, Chatsworth, Ont.*

SCOTCH WOODCOCK.—To 3 tablespoons butter melted add $1\frac{1}{2}$ tablespoons flour, cook till smooth and thick, then add 1 cup milk, $\frac{1}{4}$ teaspoon salt, pepper to suit taste, then add 4 hard-boiled eggs chopped fine; reheat and serve on toast or crackers. If after eggs are boiled hard they are put in cold water, they will not turn dark.—*MRS. D. McCLENNAN, Aylmer, Ont.*

A NICE SUPPER DISH.—Take 6 eggs or more, break into a bowl, beat lightly and season with pepper, salt, chopped onion, and sage, add $\frac{1}{2}$ teacup milk, and turn into a hot frying-pan in which you have heated a good tablespoon of butter, proceed as for scrambled eggs, only do not stir too much, as the larger the pieces of egg are, the nicer the dish will look. Take

a can of tomatoes and let it heat in a granite pan while your eggs are cooking, and season well with pepper and salt; turn the eggs out on a hot platter and pour the tomatoes over them. To be eaten hot.—MRS. J. A. KILLOUGH, Riverside Farm, Pense, Sask.

A QUICKLY PREPARED SUPPER DISH.—Melt in the oven $\frac{1}{4}$ pound of cheese, a small piece of butter, with 1 tablespoon milk, and pepper to taste; while the cheese is melting, toast 2 slices of bread and poach two eggs; butter the toast; when in a thick cream, pour the melted cheese over it and place an egg on each slice. Then strain off the water and let the milk drain in a cheesecloth bag for 10 hours. Remove and run through a grinder to make it fine and creamy, mix with sweet cream and season to taste. Celery salt gives a tasty flavor to cottage cheese.—GLADYS HARRIS, 109 Park Street, Buffalo, N.Y.

Put over the fire and stir constantly until it begins to thicken and coat the spoon; take at once from the fire, and pour over soda biscuits, strips of buttered toast, or shredded wheat biscuits arranged on a hot platter. Variations: The mixture may be enriched by adding 1 teaspoon butter. 2. If a large quantity is made flour may be substituted for some of the eggs, using 2 teaspoons for each egg omitted. In this case the milk should be thickened with the flour, the cheese and seasonings stirred in and the beaten egg stirred in just before taking from the fire.—MACDONALD INSTITUTE, Guelph, Ont.

Stand over hot water, or on a cooler part of the stove, add the cheese and stir until it is well mixed in. This may be used to pour over cooked macaroni or cauliflower, or as the foundation of a dish of baked macaroni and cheese. If the cheese is too new, the sauce will not be well flavored. This may be converted into a cheese soup by adding one cup more milk and seasoning to taste.—MACDONALD INSTITUTE, Guelph, Ont.

ED. ATKINSON, Box 352, Whitby, Ont.

2.—Sift into a bowl 1 cup flour, 1 saltspoon each of salt, paprika and baking powder, add 1 cup grated cheese. Mix thoroughly, then add a $\frac{1}{4}$ cup of butter and chop the ingredients together until of the consistency of meal. Mix to a paste with ice-water (use as little as possible), turn on to the pastry board and roll into a sheet about a quarter of an inch thick. Melt the butter, add the flour and stir over the fire until frothy; add the milk and stir constantly until it thickens and boils; stir in the seasonings and cheese; stir in the beaten egg-yolks and take from the fire at once. Stand the saucepan aside and let the mixture cool. Beat the egg-whites stiff, add a little to the cheese mixture and stir it in; add remainder, fold it in lightly but thoroughly, turn the whole into a buttered baking dish and bake in a moderate oven. The time required for baking depends upon the oven and the depth of the mixture in the dish. It usually takes about an hour. If the oven is in the least too hot stand the baking dish in a pan of boiling water while baking. Variations.—1. This may be converted into a sweet soufflé by omitting the cheese and seasonings, and using $\frac{1}{2}$ cup sugar and any desired flavoring instead. 2. This may be converted into a meat soufflé by using chopped ham or tongue or finnan haddie, instead of the cheese. 3. Put 6 cups water and $1\frac{1}{2}$ teaspoons salt on to boil; break macaroni into inch pieces, and when water boils hard, drop in macaroni; keep boiling hard till macaroni is tender. Grate cheese; make white sauce

and when macaroni is tender, drain through a colander and put into a baking dish. Put cheese and sauce with the macaroni, cover with crumbs and bake for about 15 minutes.—MISS M. K. McDONALD, Guelph, Ont.

2.—Put into a saucepan about $\frac{1}{2}$ pound of macaroni broken an inch in length, with water sufficient to boil tender, add a little salt; when done, drain and put into a well-buttered dish in layers, with grated cheese sprinkled very liberally over each layer, using pepper, salt and butter; when the dish is full pour over one cup sweet cream. Bake in a moderate oven about 25 minutes, and serve hot.—MRS. A. EGO, Markdale, Ont.

3.— $\frac{1}{4}$ pound macaroni broken in small pieces and cooked about 20 minutes in a quart of salt water, turn into colander and pour cold water over it, let drain; put layer of cheese (broken in small pieces) in bottom of baking dish, then a layer of macaroni; repeat until dish is full, covering the top with rolled bread or cracker crumbs and little pieces of butter; pour over the whole enough milk, heated (about $1\frac{1}{2}$ cups), to moisten. Bake until brown.—MRS. E. R. GOODEVE, Mono Mills, Ont.

4.—Break macaroni into inch lengths and cook in boiling salted water (1 teaspoon to 1 quart) 20 minutes. Drain and cover with cold water and drain again. VEGETABLES

Vegetables, as they are ordinarily spoken of, may be classified as:—

1. Fresh:

- (a) Starchy, viz , potatoes, parsnips.
- (b) Non-starchy, as beets, carrots, cabbage, etc.

2. Dried:

The ripened condition of some seeds, as peas, beans and chestnuts.

Fresh vegetables, although chiefly water (they contain over 80 per cent. water) are very valuable to the body on account of the large amount of mineral matter they contain, which goes to purify the blood and regulate the body. Besides this valuable mineral matter, the fibrous framework of the vegetable gives bulk to the food, which assists in eliminating the waste from the body, thus helping to keep the body in a healthy condition. Some of the fresh vegetables, such as potatoes, beets, carrots, etc., contain starch or sugar, which produce heat and energy in the body; but it is not for these substances that they are chiefly valuable as a food. The starch and sugar necessary for the body may often be more cheaply obtained from other sources, such as bread, cereals, etc. Therefore the chief value of the vegetable is in the mineral matter it contains.

Dried vegetables contain more nourishment than the fresh vegetables, for they contain all the mineral matter they had when fresh, and also a fair amount of building material and starch stored in them for the nourishment of the young plant. This building material goes to repair the daily wear and tear of the body, and the starch furnishes a certain amount of energy.

THE COOKING OF VEGETABLES

The great value of vegetables as a food makes it desirable to prepare and serve them in as digestible

and appetizing a condition as possible. There are four methods of cooking commonly applied to vegetables: Boiling, simmering, steaming and baking, and the nature of the vegetable determines the method of cooking. Steaming is an expensive method of cooking vegetables, as a stronger fire is necessary to create steam, yet for watery vegetables steaming is to be preferred, less water being absorbed by the vegetable in the cooking. Baking is suitable for only a few of the vegetables, for instance, potatoes and squash.

Strong-smelling vegetables, for example, cabbage, onions, cauliflowers, etc., should be simmered or cooked below boiling point and should be closely covered. There is a difference of opinion about this method of cooking strong-smelling vegetables, some authorities claiming that they should be boiled uncovered, but after experimenting with both methods, Macdonald Institute has decided that for the average household it is better to simmer them, closely covered. By this method less odor is carried through the house and there is little difference in the flavor.

To obtain good results in cooking fresh vegetables it is important that they should be crisp and firm. If not taken directly from the garden they should be crisped in cold water before cooking. Soak cabbage and cauliflower by inverting them in salted water to remove grubs or other insects which may be encased in them. When boiling or simmering vegetables they should be put on to cook in boiling, salted water, using two level teaspoons of salt to one quart of water, and having enough water to entirely cover the vegetables. In the case of potatoes better results are obtained by sprinkling the boiled potatoes with salt immediately after they are thoroughly drained. The salt tends to draw out the moisture, making them drier.

It is very important that vegetables should be cooked until tender, but overcooking breaks up and wastes the vegetables and, in some cases, develops undesirable flavors. As soon as the vegetables are tender, whether boiled or simmered, they should be thoroughly drained and seasoned. They may be served

with butter or a sauce. A large amount of the mineral salts and other substances contained in the vegetable are dissolved out by the boiling or simmering, and, if cut in small pieces, more is dissolved out. Therefore the water drained from the vegetables should be used for sauces and soups. All measurements used in the following recipes are level:

VEGETABLE SAUCE.—1 cup vegetable water, 2 tablespoons butter, 2 tablespoons flour, $\frac{1}{4}$ teaspoon salt, sprinkle pepper. Melt butter, add flour and stir over the fire until frothy. Add vegetable water and stir constantly until it thickens and boils a minute. Pour over the vegetable, allowing 1 cup of sauce to 2 cups of vegetable pulp.

The water drained from vegetables may take the place of the water and some of the vegetables used in meat soups. The vegetable water saved at dinner time may be made into a nourishing soup for supper, by the addition of milk and any of the left-over vegetable, using the following proportions: 2 cups vegetable water, 2 cups milk, 1 cup cooked vegetable, 2 tablespoons butter, 4 tablespoons flour; salt and pepper. Mix the flour with $\frac{1}{2}$ cup of the cold vegetable water or milk. Add this to the heated vegetable water and milk, stirring constantly until it thickens. Add the butter and vegetable finely divided. Season and simmer ten minutes.

This is one way of using left-over vegetables. Another way is to scallop the left-over vegetables, using the following method:

Make a cream sauce, using the same ingredients as for vegetable sauce, substituting milk for the vegetable water. To each cup of cooked vegetable use one cup of cream sauce. Place in alternate layers in a baking dish, having the top layer sauce. Sprinkle with crumbs that have been mixed with a small quantity of melted butter. Brown in the oven. The food value of the scallop may be increased by sprinkling grated cheese over each layer.

The fresh vegetables also include the salad greens or the green vegetables that are eaten raw; for example

lettuce, celery, cucumbers, watercress, radishes, etc. These may be used alone for salads or in combination with fresh meat or cooked vegetables. The salad greens should be thoroughly washed and put in cold water to become crisp. After they are crisp they may be folded loosely in a clean, damp towel or put into a covered granite pail and kept in a cool place until needed. In this way they may be prepared some time before using, and with a salad dressing prepared beforehand, a salad for supper can be prepared in a very short time. The oil or cooked dressings may be served with the salad. The dressing adds to the nourishment and flavor of the salad. French dressing is largely used for vegetable salads, but none of the dressings except the French dressing should be added to the salad until just before serving time.—If added too soon they tend to wilt the crisp vegetables and the dressing becomes watery.

THE COOKING OF DRIED VEGETABLES.

The important point in cooking dried vegetables, ripe peas, beans and lentils, which are rich in muscle-making material, is not to cook them at too high a temperature. This tissue-building substance, or legumen, is similar to egg white or meat, and like these it is toughened by strong heat. To avoid this they should be cooked below boiling point or simmered. On account of the dense, tough texture of these vegetables and the small amount of water they contain, the time required for cooking may be shortened by soaking them over night. The soaking also improves the flavor by dissolving out a bitter substance from them. If they are soaked or cooked in hard water the lime has a tendency to harden the legumen, thus making them less digestible. Therefore, if only hard water is obtainable soften it by boiling and allowing it to cool before using or by the addition of baking soda, one-quarter teaspoon to one quart of water.

If the tough outer covering of beans is removed before serving it makes them more digestible.

The dried vegetables may be served as a vegetable to accompany meat, or they may be made into a soup,

the latter being the more digestible way of serving them, for in the preparation the tough outer skin is removed and the pulp finely divided.

The preparation and cooking of vegetables may be summed up in the following general rules:

A. PREPARATION.

1. Unless fresh vegetables are taken right from the garden they should soak in cold water fifteen minutes to one hour before cooking.

2. Wash and pare, peel or scrape the vegetable and cut to a convenient size.

3. Dried vegetables should soak in cold water at least twelve hours before cooking.

B. COOKING.

1. All fresh vegetables should be put on to cook in boiling, salted water—one level teaspoon to a pint.

Potatoes are made drier by sprinkling the salt on them immediately after they are drained.

2. Strong-smelling vegetables should cook at simmering point; the others may boil gently.

3. All dried vegetables should be put on to cook in cold, soft water, and simmered until tender.

4. All vegetables should be cooked until tender to the centre, but no longer.

5. Drain thoroughly as soon as tender.

6. The vegetable water, excepting from potatoes and dried vegetables, should be saved for soups and sauces, as it contains most of the valuable mineral matter of the vegetable.—MACDONALD INSTITUTE, Guelph, Ont.

CREAM SAUCE.—2 tablespoons butter, 1 cup milk, 2 tablespoons flour, $\frac{1}{4}$ teaspoon salt, a little pepper. Melt the butter and flour together and stir until they froth, add the milk and stir constantly until it thickens and boils, add the salt and pepper. If it must stand any time before serving, it should be closely covered and stirred occasionally to prevent a skin forming on the top. When a large quantity is made, $\frac{2}{3}$ of the milk may be scalded and added after the first third is stirred in.

TOMATO SAUCE.—Make the same as cream sauce, using 1 cup strained tomatoes instead of the milk.—**MACDONALD INSTITUTE**, Guelph, Ont.

2.— $\frac{1}{2}$ can tomatoes, 2 teaspoons sugar, bit of bay leaf, 8 peppercorns, $\frac{1}{2}$ teaspoon salt, 4 teaspoons flour, 4 teaspoons butter, 1 cup stock. Cook first 5 ingredients together until tomatoes are soft, strain and add stock; melt butter, add flour, and when browned add liquid gradually.—**GLADYS HARRIS**, 109 Park Street, Buffalo, N.Y.

WHITE SAUCE.—1 tablespoon butter, 1 tablespoon flour, 1 cup milk; boil all together, mixing the flour with a little of the cold milk.—**MRS. R. D. NORDWELL**, Homestead Farm, Hillsburg, Ont.

CANNED VEGETABLES.—8 cups of vegetables, peas, beans or corn, $\frac{1}{2}$ cup salt, $\frac{1}{2}$ cup sugar, 3 cups water; boil for 20 minutes, then fill jars and seal. On opening jar put on in cold water and let them come to a boil, and then drain it off.—**MARY WELLMAN**, Glasgow, Ont., via Stouffville.

ASPARAGUS ON TOAST.—Cut the tough, hard end from the asparagus, wash carefully, tie in bunches, set the bunches on end in a saucepan of boiling, salted water, having the tender ends above the water; cover and boil gently for $\frac{1}{2}$ hour, drain, slightly moisten pieces of toast with a little of the water in which asparagus was cooked, spread with butter. Arrange these on a hot dish. Untie the bunches of asparagus and place them on the toast; put a little butter over the tender ends of the stalks and serve very hot.

NOTE.—The cooked asparagus may be served in a cream sauce, or a sauce made with some of the water in which it was cooked.—**MACDONALD INSTITUTE**, Guelph, Ont.

BEANS.—To those who tire of baked beans, or whose stomachs cannot digest beans and pork, try the following: Boil 2 cups common beans until they crack, drain, add melted butter, pepper and salt; mash with

potato masher, put in your pudding pan or baker, add the liquid from a can of tomatoes, cover thickly with ground peanuts, then a layer of bread or cracker crumbs with dots of butter, bake in oven until brown. Good either hot or cold.—MRS. LEANDER JOHNSON, Williamsdale, N.S.

BAKED BEANS.—1 quart beans (Lima or white beans), $\frac{1}{2}$ pound salt pork, 2 tablespoons molasses, 1 cup boiling water, 1 tablespoon salt, 2 tablespoons sugar, $\frac{1}{2}$ tablespoon mustard, $\frac{1}{8}$ teaspoon pepper. Wash and soak beans over night; in the morning pour off the water and rinse well, cover with fresh water, bring to boiling point and simmer until skins will burst; this is best determined by taking a few in the hand and blowing on them; if skins burst, beans are cooked; drain beans and throw away the water, scald rind of pork, scrape and cut in two; half of it put in bottom of bean crock, the other half reserve for the top. Put beans in the crock and over them pour the seasoning mixed with 1 cup boiling water, add enough more boiling water to cover beans; bake in covered bean pot in a slow oven 6 or 8 hours, uncovering the pot the last hour that pork rind may become brown and crisp.—MRS. JOS. A. RENNELL, Milliken, Ont.

BEANS.—1 pint or more of beans, cover with water, heat and boil from 10 to 30 minutes, drain after this parboiling; now cover well with water, flavor with celery tops, parsley or onion, using one or all to suit taste, season with celery salt (table salt may be used). If desired for soup, boil till soft; if for baking, when the skins curl back they are ready for the oven. Use no meats or fats.—E. G. HARRIS, 109 Park St., Buffalo, N.Y.

BOSTON BAKED BEANS.—Pick over and wash 1 quart white beans, put on with 2 quarts boiling water and 1 teaspoon soda; cook until soft, adding water from time to time while cooking, then drain and add 1 cup cream, 2 cups sweet milk, $\frac{1}{2}$ cup brown sugar, 2 tablespoons molasses, salt and pepper to taste; put

in a dripping pan and place on top of the beans a few slices of fresh pork; bake until a rich brown. Delicious.—MRS. WM. SNIVELY, Boston, Ont.

2.—1 pound pork sliced, 1 tablespoon mustard, $\frac{1}{2}$ cup sugar, pepper and salt; boil 1 quart beans until skins break open, place 2 or 3 slices of meat in bottom of bean pot, add a layer of beans, a little mustard, sugar, pepper and salt if pork is fresh; continue until bean pot is full, leaving a little pork for top; fill bean pot with water, bake all day in a moderate oven, adding water occasionally. Serve hot.—MRS. C. HARDY, Aylmer, Ont.

MOCK BAKED BEANS.—5 cups beans washed and soaked over night, put into a crock, slice 3 nice sized onions and place on top of beans, add butter size of a walnut, heaping teaspoon salt, cover with water and add more from time to time as required to keep them covered. Place on top of the stove uncovered all day, and do not allow to boil. Serve as baked beans.—MRS. ISAIAH DUFFY, Shenston, N.B.

TO CAN BEANS.—Fill jars with beans, cover with cold water, screw on the tops, then set jars in cold water, being careful to have something between them and heat slowly till boiling, and boil $\frac{1}{2}$ hour; set off, and let cool in the water, screw up tight and set in cellar; these are nice to pickle in winter, drain off water, and add vinegar, salt and pepper to taste.—MRS. ISAIAH HOOVER, Box 218, Stouffville, Ont.

CREAMED LIMA BEANS.—1 cup dried Lima beans, $\frac{1}{2}$ teaspoon salt, $\frac{3}{4}$ cup cream, $\frac{1}{2}$ tablespoon butter, sprinkle pepper. Soak over night, drain and cook slowly in salted water until soft, drain, add cream, salt and pepper. Re-heat before serving. When cooked they may be popped from their skins before adding the cream.—MACDONALD INSTITUTE, Guelph, Ont.

CANNED FRUITS AND JELLIES

CANNING.—Canning fruit is preserving sterilized fruit in sterilized airtight jars; sugar being added to give sweetness. Fruit may be canned without sugar if perfectly sterilized—that is, freed from all germs.

DIRECTIONS FOR CANNING.—Fruit for canning should be fresh, firm, of good quality, and not over-ripe. If over-ripe, some of the spores may survive the boiling, then fermentation will take place in a short time. Sterilized jars are filled to overflowing with boiling fruit. Add boiling water if there is not enough fruit to overflow the jars. Insert a silver spoon or knife between the fruit and jar to remove all air bubbles, then quickly put on rubbers and screw on covers. Let stand until cold, then screw again. Wipe jars with a wet cloth, label and keep in a cool, dry place.

TO STERILIZE JARS.—The jars should first be tested to see if they are airtight. To test: Half-fill with water, adjust rubber and top, invert and see if the jar leaks. Do not use a jar that leaks, as it is not airtight. Wash jars and covers, place in a pan of cold water and heat gradually to the boiling point. Remove as needed and fill while hot. While filling jars, place them on a warm plate. Dip the rubbers in boiling water but do not allow them to stand in it. New rubbers must be used each year.—GLADYS HARRIS, 109 Park Street, Buffalo, N.Y.

JELLY.—1 cup sugar, 1 egg, 1 cup cold water, 2 tablespoons flour, add juice and grated rind of one lemon.—MRS. GEO. S. SHARPE, Lower Millstream, King's County, N.B.

JELLY MAKING.—When large fruits are used, cut them in pieces, place in a granite or aluminum kettle

with scarcely enough water to cover. Cover tightly and boil slowly until soft. When cooked sufficiently, turn into jelly bag, which has been soaking meanwhile in hot water, and drain in a place free from draughts. Do not squeeze the fruit, as a clear jelly cannot be made if the pulp is mixed with the juice. Measure the juice and to each pint allow a pound of granulated sugar. Place juice on stove and sugar in a pan in the oven to heat. Stir sugar occasionally. Boil juice steadily and not too rapidly for 20 minutes, turn the sugar into the juice and boil all together for 3 minutes, when it will be ready to pour into glasses, which should be hot to prevent breaking. Always select fruit that is not over-ripe. Have all utensils hot to prevent waste of jelly. If these directions are carefully followed, a perfect jelly will be the result. Raspberries and strawberries need the addition of currants, pears and peaches need apples, plums or quinces to make a perfect jelly.—MRS. W. S. STOKES, Britton, Ont.

JELLY.—Wash fruit, remove stems and decayed part; cook, with enough water to cover, until tender. Drain, add 1 cup sugar for each cup juice. Boil until it jells on cool saucer. Heat sugar first.—MRS. MILTON SAVAGE, Elgin Mills, Ont.

SOUR JELLY.—As above, adding $\frac{1}{2}$ tablespoon lemon juice. Delicious moulded with sardines and served with mayonnaise.—MRS. MILTON SAVAGE, Elgin Mills, Ont.

TO MAKE CRABAPPLE JELLY IN QUANTITIES.—If one has a large family to cook for, there is little use in making jelly in small amounts except what may be wanted for special occasions. If one wishes to make a lot, begin early, before the crabs are ripe, and by making a kettle full each day, or when convenient, you will be surprised to see how much can be made, and with very little trouble. Before beginning provide yourself with two strong jelly bags made of cheese cloth, also have two large earthen or graniteware bowls; then in the morning or afternoon, fill your preserving kettle

WHITE SWAN BAKING POWDER contains no alum

with crabs picked fresh from the tree, pour in enough cold water to just come to the top of the apples, and set on the stove to boil until the apples are quite soft; then putting your large bowl, containing the bag, on the table with the kettle beside it, take a cup and dip the apples into the bag and then tie very tightly with a strong string. The bowl with the bag in it can then be carried to the pantry or cellar, where there is no dust or flies, and the bag can be hung up on a strong nail and left to drip into the bowl all night. Next day boil the juice for about 20 minutes and then add the sugar, allowing one pound sugar to one pint juice. Boil until it will jelly when a little is cooled in a saucer. Large-mouthed quart glass jars are very convenient to put the jelly in. Have them heating in the oven and the boiling jelly can be poured in without danger of breaking them. The kettle can be again filled with apples and another bowl of juice got ready for next day and the same process gone through from day to day. One kettle full of apples will make about 3 or 4 quarts jelly. The children will enjoy this in winter, especially when served with cream.—MRS. J. E. McQUAT, Lachute, Que.

PLAIN APPLE JELLY.—Take $\frac{1}{2}$ a bushel of sound, firm greening apples, cut from core, skin left on, cover with cold water, wash clean, put in a granite kettle with water to not quite cover, and cook till all are broken up; empty in a jelly bag made with thin cotton, let drip over night, then return to the fire. Cut up one fresh lemon, tie loosely in a thin cloth, put in the juice and let boil briskly half an hour; skim and take out the lemon, add pound for pound granulated sugar, heat sugar in the oven before adding, let boil 10 or 15 minutes, and the jelly will be ready to put up in glasses. This makes a large quantity of lovely jelly.—MRS. JOSEPH WASS, Sunny Bank Farm, Oakville, Ont.

SPICE JELLY.—1 peck crabapples, 7 cups vinegar, 5 cups water, 1 ounce whole cinnamon, 1 ounce whole allspice, $\frac{1}{2}$ ounce whole cloves. Boil and strain, then add 1 pound sugar to 1 pint of juice and boil until it jells.—MRS. D. SINCLAIR, Salmon Arm, B.C.

TOMATO JELLY.—1 can tomatoes, rub through sieve. Soften 3 tablespoons of gelatine in 2 tablespoons cold water, add a cup of boiling water and stir and when gelatine is dissolved, strain and mix with tomatoes; season with pepper, salt and sugar to taste. Have ready a large cup of shelled walnuts, mix into the mixture when it begins to thicken and pour into mould. Half this recipe is sufficient unless for a large quantity.—MRS. H. A. VAN DUSEN, Tara, Ont.

2.—Juice of 1 can tomatoes, 2 tablespoons vinegar, 1 box gelatine, pepper, salt, sugar to taste. Let it come to a boil, then put in mould. Soak gelatine in tomato juice. Graduate your gelatine by quantity of juice in can.—MRS. P. T. GALBRAITH, Waterford, Ont.

A GOOD PRESERVING RECIPE.—1 cup water to every $\frac{3}{4}$ pounds sugar, melt and let boil 15 minutes, skim, then for every $\frac{3}{4}$ pound sugar, put in 1 pound fruit; boil briskly for 7 or 8 minutes.—MRS. JOHN HART, Barryvale P.O., Ont.

IDA COLDPITTS, Bible Hall, Truro, N.S.

PIES AND PASTRY

PASTRY.

The soft flours are generally used for making pastry, and are, consequently, called pastry flour. It does not follow, however, that good pastry cannot be made from the stronger flours. In fact, experiments made in Macdonald Institute have clearly shown that it is possible; but more shortening must be used to get results obtainable from the softer winter wheat flour. The greater gluten content, expansive powers, and good color of the stronger flours are not necessary requisites for pastry purposes; and, consequently, it would not appear to be good practice to purchase these more expensive flours and then use larger quantities of shortening in order to obtain the same results that may be secured by the use of the cheaper flours and less shortening. Practically the matter resolves itself into one of cost.

SHORT PASTRY.

1 pound flour.
 $\frac{1}{2}$ pound shortening.
Ice-cold water.

The shortening may be a mixture of butter and sweet lard or sweet dripping.

If the fingers are cool, the shortening may be rubbed into the flour; otherwise, it should be cut into it with two knives until thoroughly mixed with the flour.

Mix into a dough with the ice water, using only enough to hold it together. It should be so dry that it will not stick to the bowl anywhere.

Turn out on the floured board, and knead only enough to make the ball smooth, when it is ready to cut into pieces for rolling out to line pie-plates, etc.

The quantity of shortening may be lessened for a plainer pastry.

FLAKY PASTRY.

1 pound flour.
 $\frac{1}{2}$ to $\frac{3}{4}$ cup butter.
Ice-cold water.

Rub 2 ounces of the butter into the flour. Cut the remainder into $\frac{1}{2}$ -inch dice, and stir through the flour. Mix the water in with a broad-bladed knife, using only enough to hold the flour and butter together in shreds. If the quantity is difficult to mix without cutting through the butter lumps, flour the board, lift out the part that mixes first, and proceed to mix the rest. The object is to avoid any further breaking of the butter lumps. Turn the mixture out on the board in a pile, pack it together with the hands, and roll out into a sheet. Use a broad-bladed knife, and fold it into three or four layers, tucking in all the loose shreds about the edges. Be sure it is not sticking to the board, turn it around, and roll out again. Fold and roll out again. Fold in half and set away to chill, if necessary, before rolling it out to line pie-plates, etc.

This requires a hot oven at first to puff it, but a cooler one to complete the baking.

PUFF PASTRY.

$\frac{1}{2}$ pound flour.
 $\frac{1}{2}$ pound butter.
Ice-cold water.

Wash the butter, form it into a flat, round cake, and put it away to chill. Make the flour into a stiff dough with ice water, and knead until perfectly smooth. It should be firm enough to roll out without much contraction, but should not be dry. Roll into two pieces a trifle larger than the butter pat; place the butter on one, moisten the edge, place the other on top, and press the edges together. Put aside to chill. Roll it out in one direction only, until about three times as long as broad, fold into three or four layers, turn around and roll again in the other direction, then set aside to chill. Roll and chill twice more in the same way, but fold it in half the last time. It is then ready to roll out and cut into shape for baking.

WHITE SWAN YEAST CAKES make light, white, sweet and health-giving bread

The oven for baking should be rather hot at first, then cooler, to permit of baking the pastry thoroughly without burning. One-quarter of the butter may be replaced with lard.

The cook books indicate many different ways of making puff pastry, and all of them are good in skilful hands. Skill is attained only through practice and the judgment of experience.

It would seem important to exercise care, as follows:

1. To make the dough of just the right consistency.
2. To prevent any softening of the butter during the rolling operations. If the maker can work in a temperature just above freezing, no special chilling is necessary.
3. To roll lightly, but evenly, to avoid crushing layers together.
4. To regulate the oven carefully to secure the strong heat necessary to puffing the layers and yet avoid burning.—MACDONALD INSTITUTE, Guelph, Ont.

of paste over enclosed butter, the left side under; turn half way round, cover and let stand 5 minutes; pat and roll $\frac{1}{4}$ inch thick, having paste longer than wide, lifting often to prevent sticking and dredging board slightly with flour; fold from ends towards centre, making 3 layers; cover and let stand 5 minutes. Repeat twice, turning paste half-way round each time before rolling. Now fold from end to centre and double, making four layers; put in cold place to chill, or fold in a towel. Put in dripping pan and place between pans of crushed ice. The baking is as important as the rolling. After shaping, chill thoroughly before baking. The oven must be very hot, the greatest heat coming from the bottom, that the paste may rise before it begins to brown. While rising it is often necessary to decrease the heat by opening check to stove or placing a basin of ice water in the oven; turn the paste frequently that it may rise evenly; but do not open door for first five minutes, when it has risen its full height; slip a pan under sheet on which paste is baking. Puff paste should be baked on a tin sheet covered with a double thickness of brown paper or a dripping pan may be used.—MRS. JOHN WOODS, Richmond Hill, Ont.

JELLIED APPLES.—Pare and slice thin 1 dozen or more tart apples. Place in a pudding dish alternate layers of apples and sugar, add a dust of cinnamon. Pare and core as many apples as will cover the bottom of the baking dish, and pour sago over them. Cook in a moderate oven until the apples are done. If the apples are large they can be quartered, and the baking dish can be about $\frac{1}{2}$ filled with them, and the sago put over them the same way.—By Courtesy of WOMEN'S INSTITUTE BRANCH of Dept. of Agriculture.

BAKED APPLE SAUCE.—Pare, quarter and core large apples and pack in an earthen jar with brown sugar, cover closely and bake slowly in a moderate oven until the contents have been shrunken to about half their original bulk and are rich, red and luscious.—By Courtesy of WOMEN'S INSTITUTE BRANCH of Dept. of Agriculture.

APPLE SALAD.—6 good tart apples chopped fine, 1 onion chopped fine, put together and put the following sauce on it when cold: $\frac{1}{2}$ cup vinegar, 1 teaspoon mustard, $\frac{1}{4}$ teaspoon pepper, $\frac{1}{4}$ teaspoon salt, 1 teaspoon cornstarch, 1 tablespoon sugar, butter size of an egg. Boil on the stove till thick, and put by till cool. This is a most delicious salad when eaten with cold roast beef.—MINNIE E. SPEERS, Holly, Ont.

SCALLOPED APPLES.—2 cups stale bread crumbs, 2 tablespoons butter, 2 cups sliced apples, 2 tablespoons sugar, grated rind and juice of $\frac{1}{2}$ a lemon. sugar, add a few grains of salt; beat very stiff the whites of 3 eggs, then pour in the apples, beating constantly; chill and serve with custard made with yolks of eggs, $\frac{1}{2}$ cup sugar and 2 cups milk. If wished to look especially nice, add a few dots of bright jelly.—MRS. GEO. H. PEARSON, Richview, Ont.

BANANA FRITTERS.—Make a very thin paste with 2 ounces flour, 1 ounce cornstarch, 1 ounce sugar, little milk. Cut the bananas into small pieces, dip them in

the batter, fry in plenty of smoking fat, very hot; drain on paper. Serve hot on a napkin with sugar dusted over.—MRS. BLACK, Westville, N.S.

BANANA SALAD.—Peel bananas and cut in two lengthwise, then cut across in quarters. Roll each quarter in boiled dressing—then in finely chipped walnuts. Serve on lettuce leaves.—By Courtesy of WOMEN'S INSTITUTE BRANCH of Dept. of Agriculture.

BANANA WHIP.—1 cup cut-up banana, 1 cup granulated sugar, the white of 1 egg. Whip together with a silver fork about 15 minutes, or until it is firm and white. This is an excellent substitute for whipped cream, and can be used in a great variety of ways. Strawberries will whip in the same way and make very delicious filling for strawberry shortcake.—By Courtesy of WOMEN'S INSTITUTE BRANCH of Dept. of Agriculture.

BOSTON CREAM.—2 pounds white sugar, 2 quarts water, boil 10 minutes; when cold add 2 ounces tartaric acid, 10c. bottle vanilla, whites of 3 eggs beaten stiff.—MAUDE A. HUNTER, Welland, Ont.

BAVARIAN CREAM.—2 cups any fruit syrup, 2 teaspoons Knox gelatine, or 1 ounce sheet gelatine, $\frac{1}{2}$ cup cold water, 2 cups cream. Put the gelatine to soak in the cold water; when thoroughly softened, dissolve over hot water and stir it into the fruit syrup. Stand the syrup bowl in a pan of cold water and stir it occasionally while whipping the cream. When the syrup begins to thicken, fold in the whipped cream, turn into a wet mould and set away to get perfectly cold before serving. Variations.—1. $1\frac{1}{2}$ cups thin custard sauce and $\frac{1}{2}$ cup sugar, with any desired flavoring, may be substituted for the fruit syrup. 2. Chocolate syrup may be substituted for the fruit syrup, allowing $1\frac{1}{2}$ cups milk, $\frac{1}{2}$ cup sugar, a pinch of ground cinnamon, and a little vanilla for it, and cooking all together in a double boiler. 3. 1 cup maple syrup, and 1 cup milk may be substituted for the fruit syrup. 4. Cream

a la Vincent is made with a custard substituting the fruit syrup. The custard is made of 2 cups milk, 6 egg yolks, 3 bay leaves, $\frac{2}{3}$ cup sugar, a pinch of ground ginger and vanilla to taste. 5. If cream is scarce, 1 cup cream may be omitted, and 3 egg whites beaten stiff and folded in with the smaller quantity of whipped cream.—MACDONALD INSTITUTE, Guelph, Ont.

RED CURRANT SNOW.—Use 2 cups boiling water, 2 tablespoons of cornstarch and 1 cup sugar; when cooked thick remove from fire and add the juice of 2 cups of red currants crushed and pressed through the colander. Beat the whites of 2 eggs, add a little sugar and pour over all.

NOTE.—Raspberries, strawberries and other fruits can be used in the same way.—By Courtesy of WOMEN'S INSTITUTE BRANCH of Dept. of Agriculture.

COFFEE DESSERT.—Mix into a double boiler $1\frac{1}{2}$ cups strong coffee, 1 cup milk, $\frac{2}{3}$ cup sugar, $\frac{1}{4}$ teaspoon salt, 1 tablespoon gelatine, reserve $\frac{1}{2}$ sugar, and while ingredients are heating, beat this with the yolks of 3 eggs, into which stir the boiling mixture, return to boiler until it begins to thicken, remove from fire, stir in stiffened whites and 1 teaspoon vanilla; turn into a mould dipped in cold water.—MRS. J. A. HOOVER, Forestville, Ont.

CUSTARD.—Yolks of 3 eggs, $\frac{3}{4}$ pint milk, sugar to sweeten, cook in double boiler until consistency of thick cream; cool and serve with pudding.—MRS. JOHN COWAN, Pilot Mound, Man.

BOILED CUSTARD DESSERT.—3 pints milk, let come to a scald, 2 heaping tablespoons cornstarch wet with a little milk, 2 eggs beaten very light, and 1 small cup sugar; pour in the cornstarch when the milk is scalding, but before it boils; then add the sugar and beaten eggs, and 1 teaspoon vanilla. This is very nice warm.—MRS. OTIS C. PARRY, Tillsonburg, Ont.

CUP CUSTARD.—Beat 4 eggs to a light froth, add $\frac{1}{2}$ cup granulated sugar, a little salt, 1 quart milk, and

flavor with nutmeg; put the custard in 5 cups, place in a pan of boiling water and then cook them until firm in the centre; when done stand away to cool and then serve it in the cups.—ADDIE A. GRANT, Maynooth Sta., Ont.

BAKED CUSTARD.—1 egg, $\frac{1}{2}$ cup milk, 1 tablespoon sugar, pinch salt, flavoring. Beat the egg just enough to mix it thoroughly; stir in the sugar and salt, milk and flavoring, and stir until the sugar is dissolved. Turn into a baking dish and bake in a hot oven until the point of a knife will come out of the centre with nothing on it. If the oven is at all hot the baking dish must be set in a pan and boiling water poured around it before putting it in the oven. A baked custard should cut exactly like a delicate jelly, have no sponge-like holes in it, and have no watery liquid about it. A spongy, watery custard has been over-baked. Variations.—1. Some people heat the milk before adding it to the eggs in order to hasten the baking, but this is apt to destroy the jelly-like consistency which marks the perfect baked custard. 2. The above proportions make a custard of sufficient firmness to hold its shape when served as a hot dessert, or to turn out of a mould when cold. 3. For a cold custard or to be eaten out of cups, $\frac{2}{3}$ cup of milk may be used instead of $\frac{1}{2}$ cup. 4. The flavoring may be varied in the same way as custard sauce is.—MACDONALD INSTITUTE, Guelph, Ont.

CHARLOTTE RUSSE.—2 cups cream, $\frac{3}{8}$ cup sugar, lady fingers or stale sponge cake, flavoring to taste, 1 teaspoon Knox gelatine, or 1 ounce sheet gelatine, $\frac{1}{3}$ cup cold water or milk. Line a mould or dish holding about 6 cups with lady fingers or strips of sponge cake, always remembering that the side next the dish will be the outside when served. The cake may require trimming to fit into the dish, and lady fingers may have to be stuck together with white of egg or dissolved gelatine to keep them in place. Put the gelatine to soak in cold water or milk, whip the cream, beat in the sugar and the flavoring. Stand the gelatine over hot water

and dissolve it, then rapidly mix it with the whipped cream, and turn it into the cake-lined dish. Set away to get perfectly cold before turning out to serve.—MACDONALD INSTITUTE, Guelph, Ont.

MOCK CHERRIES.—Take equal parts of cranberries and raisins, cover with water and cook until tender, add sugar to taste. On account of the large quantity of natural sugar in the raisins very little additional sugar will be required.—MRS. ANNIE RODD, Charlottetown, P.F.I.

STEWED CRANBERRIES.—1 quart cranberries, 1 quart water, cook 10 minutes, 1 pint sugar, cook 10 minutes, and remove from stove.—MRS. GEO. S. SHARPE, Lower Millstream, King's Co., N.B.

RICE WITH DATES.—Wash $\frac{1}{2}$ cup rice, cook in large quantity of salted water until nearly tender, drain thoroughly and put into double boiler with $\frac{1}{2}$ cup pitted dates; cook until tender. Serve with cream. This is a very wholesome and palatable dish for dessert.—MRS. ANNIE RODD, Charlottetown, P.E.I.

STUFFED DATES.—Shelled walnuts and as many dates as you care to use. Stone the dates, place walnut in centre, and roll date in granulated sugar. This recipe is easily made, and is nice for Xmas candy.—MRS. W. R. BLAKLEY, Mabee P.O., Norfolk Co., Ont.

DATE WHIP.—1 pound dates, stone and take ends off, boil in water, watching not to burn, stir until it gets smooth and let cool. Whites of 4 eggs well beaten, $\frac{3}{4}$ cup white sugar, stir all into dates, then put in oven until light brown; serve with whipped cream.—MRS. H. B. OHRT, 20 Farnham Ave., Toronto.

FLOATING ISLAND.—Take 3 eggs, save the whites for top, beat together 2 tablespoons cornstarch, 1 cup sugar, add yolks eggs and a little salt; take 1 quart of milk, and let come to a boil; stir in sugar, cornstarch, and other ingredients; cool; put in vanilla to taste; then beat the whites and cook on boiling water.—MISS ETTA LAWRENCE, Spencerville, Ont.

JUNKET.—1 cup milk, 1 tablespoon sugar, $\frac{1}{4}$ junket tablet, 1 tablespoon cold water. Put the junket tablet to soak in the cold water; heat the sugar and milk to blood heat, but no hotter or the tablet's power to coagulate the milk will be destroyed. (A good way to test the heat of the milk is to hold the wrist near the saucepan, dip a spoon in the milk and let a drop fall at once on the wrist; if the drop gives no sensation of cold or warmth the milk is just blood warm). Crush and dissolve the tablet in the water, stir the whole into the milk, and pour at once into the serving dish. Let stand in a warm room until it sets, then move carefully to a cold place to chill before serving with cream or fruit syrup. If junket is jarred or stirred in the making or after, it will separate into curds and whey. Variations.—1. Junket may be flavored with any of the usual flavorings, but it must be added before the junket tablet is stirred into the milk. 2. Many different kinds of junket are described in the little recipe book which accompanies each box of junket tablets.—MACDONALD INSTITUTE, Guelph, Ont.

LEMON DESSERT.—Serve cold. Juice of 1 lemon, 1 cup white sugar, 2 cups water, 2 tablespoons cornstarch, 1 teaspoon butter, pinch of salt, 2 eggs. When water comes to boil, add beaten yolks, cornstarch and lemon juice; beat the whites stiff, and add to mixture when it begins to bubble. Beat all briskly.—MRS. JAS. MCKENZIE, Box 335, Portage la Prairie, Man.

MERINGUES.—Whip the whites of 2 eggs until very stiff, add $\frac{1}{4}$ pound granulated sugar, pinch of salt, $\frac{1}{2}$ teaspoon lemon juice; mould with dessert spoon on buttered paper and dry in a slow oven. When dry, scrape the inside part out and fill with Devonshire or whipped cream. When strawberries or raspberries are in season, garnish with these; when not in season, use glace cherries, chopped pistachio nuts or cocoanut.—MRS. L. SELBY, c/o J. G. BORLAND, Claremont, Ont.

MILK SPONGE.— $2\frac{1}{4}$ cups milk, $\frac{1}{4}$ cup cornstarch, 2 tablespoons sugar, pinch salt, flavoring, whites 2

small eggs. Put 2 cups milk to heat in a double boiler. Mix the cornstarch, sugar, salt and remaining milk, and stir them into the scalding milk. Stir constantly until it thickens, then cover closely and cook 15 minutes, stirring occasionally. Beat the egg whites stiff, add the flavoring to the milk mixture, and then stir in the egg whites. Mix thoroughly but quickly, and stir as little as possible. Pour at once into a wet mould and set away to chill thoroughly before turning it out to serve. Serve with a custard sauce made with the egg yolks, or with a red syrup from canned fruit such as cherries or raspberries.—Variations.—1. Chocolate sponge may be made by adding $\frac{1}{4}$ cup grated chocolate (unsweetened) to milk before scalding it. Flavor with a tiny pinch of ground cinnamon and a little vanilla. 2. Many different sponges may be made by using 2 cups of the syrup from any tart canned fruit instead of the scalded milk and $\frac{1}{4}$ cup water to mix the cornstarch instead of the milk and sugar. The fruit syrup must not be too rich.—MACDONALD INSTITUTE, Guelph, Ont.

ORANGE SALAD.—Cut and dice oranges, pineapple, bananas, shred thin malagama grapes and chopped nuts. Dressing.—1 cup cream, 1 teaspoon flour, whites of 2 eggs beaten stiff, 2 tablespoons lemon juice, 2 tablespoons melted butter, 2 tablespoons sugar, small saltspoon salt, a pinch cayenne pepper, 1 teaspoon mustard; beat the cream to boiling point, stir in flour previously wet with cold milk. When half cold beat in the whipped eggs, set aside to cool; when quite cold whip in melted butter, pepper, salt and mustard. When salad is ready to cream, whip in lemon juice. Fill in shells of oranges.—MRS. H. B. OHRT, 20 Farnham Ave., Toronto.

PEACH CREAM.—Chop 3 large peaches fine. Add 1 cup icing sugar; beat white 1 egg stiff; mix together and beat $\frac{1}{2}$ hour.—By Courtesy of WOMEN'S INSTITUTE BRANCH of Dept. of Agriculture.

PEACH TAPIOCA.—1 cup tapioca, soak 1 hour in cold water and drain; add enough water to the syrup

poured from a can of peaches to make in all 3 cups; add the soaked tapioca and $\frac{1}{4}$ cup sugar and a little salt to this liquid. Cook till thoroughly clear, line a mould with the peaches, dust with sugar, and fill with the tapioca; serve with whipped cream.—By Courtesy of WOMEN'S INSTITUTE BRANCH of Dept. of Agriculture.

PRUNE WHIP.—Boil 1 pound prunes until tender and dry, remove the pits and crack, then chopping the nut with the prune pulp; add the beaten whites of 5 eggs, and 1 cup white sugar, and bake in a moderate oven for 20 minutes.—MRS. D. E. THOMSON, Ardtrea, Ont.

RHUBARB AND ORANGE COMPOTE.—1 pint bottle rhubarb, 3 oranges, 1 cup sugar. STRAWBERRY WHIP.—Crush 1 cup strawberries in 1 cup fine granulated sugar. Beat the white of 1 egg stiff; mix together and beat 20 minutes. Sprinkle with strawberries. Raspberries may be used in the same way.—By Courtesy of WOMEN'S INSTITUTE BRANCH of Dept. of Agriculture.

JELLIED WALNUTS.—1 tablespoon gelatine, $\frac{1}{4}$ cup cold water, $\frac{1}{3}$ cup boiling water, $\frac{3}{4}$ cup sugar, $\frac{1}{2}$ cup orange juice, 3 tablespoons lemon juice. Soak gelatine in cold water 10 minutes, make a syrup of cold water until slightly yellow, pour syrup over gelatine to dissolve it; add lemon juice. Cover bottom of shallow pan with half of the mixture. When firm, place on it, 1 inch apart, halves of English walnuts, cover with remaining mixture. Chill, cut in squares for serving.—MRS. JOHN WOODS, Richmond Hill, Ont.

FRUIT SALADS.—1.—3 oranges, 3 bananas, $\frac{1}{2}$ pound white grapes, 1 cup strawberries, 1 pineapple, juice of $\frac{1}{2}$ lemon, $\frac{1}{4}$ pound English walnuts. Cut the oranges between pulp and skin and remove each section.

WALDORF SALAD.—Select $\frac{1}{2}$ dozen rather tart apples, pare and slice evenly in salad dish, mix with 1 cup or more diced celery and 1 cup chopped English walnuts. May also be served in cups made of hollowed apples.—MRS. H. O. LUNSFORD, Mikado, Sask.

FROZEN DESSERTS

DIRECTIONS FOR FREEZING.

First.—Scald the can and dasher, then cool.

Second.—Prepare the ice by putting it into a canvas bag and pounding it with a mallet until fine, or the ice may be shaved.

Third.—Place the can containing the mixture to be frozen in the tub, cover and adjust the top. Turn the crank and be sure the can fits in socket, then pack, using three level measures of crushed ice to 1 measure of rock salt. Pack it down solidly, a piece of broom handle kept for this purpose is convenient. Continue until the ice and salt come to the top of the can or a little higher than the mixture in the can. The mixture increases in bulk during the freezing, so never fill the can more than $\frac{3}{4}$ full.

Turn the crank slowly at first, then steadily and more rapidly until the mixture is frozen. Then draw off the water, wipe the cover carefully, remove the dasher, scraping the mixture into the can, and pack solidly, using a long-handled spoon. Replace cover, putting a cork in; repack in tub, this time using four measures of ice to one of salt, cover with bag or papers and allow to stand 1 hour before serving. Snow may be used in place of ice in the same proportions.

To remove the frozen mixture, wipe the salt carefully from the can and lid, using a cloth wet in cool water. Run a knife around the edge of the mixture and invert (upside down) on a serving dish.—GLADYS HARRIS, 109 Park Street, Buffalo, N.Y.

ICE CREAM.—Make a custard of the yolks of 3 eggs and 3 cups milk, add $\frac{1}{2}$ cup white sugar. Let the custard get cold, then beat the 3 whites of eggs stiff and beat them into 4 cups sweet cream; add the custard, sweeten to taste, flavor with vanilla and freeze.—MRS. E. B. PALMER, Norwich, Ont.

2.—1 pint milk, yolks 2 eggs, 6 ounces sugar, 1 tablespoon cornstarch; scald till thick. When cold, add 1

CRANBERRY FRAPPE.—1 quart cranberries, 2 cups sugar, 2 cups water, juice 2 lemons. Cook cranberries and water 8 minutes, force through a sieve, add sugar and lemon juice, freeze to a mush equal portions of ice and salt.—MRS. JOHN WOODS, Richmond Hill, Ont.

remove the dasher. Pack mixture in a mould, return to ice and salt; let stand 1 hour.—MRS. JOHN WOODS, Richmond Hill, Ont.

Dissolve the sugar in the water, whites of 10 eggs well beaten, 2 cans pineapple grated, a little gelatine dissolved in hot water. Put the whites of eggs in last. Freeze the same as ice cream.—MRS. W. W. SNIVELY, Townsend Centre, Ont.

HONEY COOKING RECIPES

CONTRIBUTED BY WOMEN'S INSTITUTE BRANCH OF
DEPT. OF AGRICULTURE.

HONEY-GEMS.—2 quarts flour, 3 tablespoons melted lard, $\frac{3}{4}$ pint honey, $\frac{1}{2}$ pint molasses, four heaping teaspoons brown sugar, $1\frac{1}{2}$ level tablespoons soda, 1 level teaspoon salt, $\frac{1}{3}$ pint water, $\frac{1}{2}$ teaspoon extract vanilla.

HONEY-JUMBLES.—2 quarts flour, 3 tablespoons melted lard, 1 pint honey, $\frac{1}{4}$ pint molasses, $1\frac{1}{2}$ level tablespoons soda, 1 level teaspoon salt, $\frac{1}{4}$ pint water, $\frac{1}{2}$ teaspoon vanilla.

These jumbles and the gems immediately preceding are from recipes used by bakeries and confectioners on a large scale, one firm in Wisconsin alone using ten tons of honey annually in their manufacture.

HONEY-CAKE OR COOKIES without Sugar or Molasses.—2 cups honey, 1 cup butter, 4 eggs (mix well), 1 cup buttermilk (mix), 1 good quart flour, 1 level teaspoon soda or saleratus. If it is too thin, stir in a little more flour. If too thin it will fall. It does not want to be as thin as sugar-cake. I use very thick honey. Be sure to use the same cup for measure. Be sure to mix the honey, eggs and butter well together. You can make it richer if you like by using clabbered cream instead of buttermilk. Bake in a rather slow oven, as it burns very easily. To make the cookies, use a little more flour, so that they will roll out well without sticking to the board. Any kind of flavoring will do. I use ground orange peel mixed soft. It makes a very nice gingerbread.—MARIA FRASER.

AIKIN'S HONEY-COOKIES.—1 cup extracted honey, 1 pint sour cream, scant teaspoon soda, flavoring if desired, flour to make a soft dough.

SOFT HONEY-CAKE.—1 cup butter, 2 cups honey, 2 eggs, 1 cup sour milk, 2 teaspoons soda, 1 teaspoon ginger, 1 teaspoon cinnamon, 4 cups flour.—CHALON FOWLS.

GINGER HONEY-CAKE.—1 cup honey, $\frac{1}{2}$ cup butter or drippings, 1 tablespoon boiled cider, in $\frac{1}{2}$ cup hot water (or $\frac{1}{2}$ cup sour milk will do instead). Warm these ingredients together, and then add 1 tablespoon ginger and 1 teaspoon soda sifted in with flour enough to make a soft batter. Bake in a flat pan.—CHALON FOWLS.

FOWLS' HONEY FRUIT-CAKE.— $\frac{1}{2}$ cup butter, $\frac{1}{2}$ cup honey, $\frac{1}{3}$ cup apple jelly or boiled cider, 2 eggs

well beaten, 1 teaspoon soda, 1 teaspoon each of cinnamon, cloves and nutmeg, 1 teacup each of raisins and dried currants. Warm the butter, honey and apple jelly slightly, add the beaten eggs, then the soda dissolved in a little warm water; add spices and flour enough to make a stiff batter, then stir in the fruit and bake in a slow oven. Keep in a covered jar several weeks before using.

FOWLS' HONEY LAYER-CAKE.— $\frac{2}{3}$ cup butter, 1 cup honey, 3 eggs beaten, $\frac{1}{2}$ cup milk. Cream the honey and butter together, then add the eggs and milk. Then add 2 cups flour containing $1\frac{1}{2}$ teaspoons baking powder previously stirred in. Then stir in flour to make a stiff batter. Bake in jelly-tins. When the cakes are cold, take finely flavored candied honey, and after creaming it spread between layers.

FOWLS' HONEY-COOKIES.—3 teaspoons soda dissolved in 2 cups warm honey, 1 cup shortening containing salt, 2 teaspoons ginger, 1 cup hot water, flour sufficient to roll.

HONEY NUT-CAKES.—8 cups sugar, 2 cups honey, 4 cups milk or water, 1 pound almonds, 1 pound English walnuts, 3 cents' worth each of candied lemon and orange peel, 5 cents' worth citron (the last 3 cut fine), 2 large tablespoons soda, 2 teaspoons cinnamon, 2 teaspoons ground cloves. Put the milk, sugar and honey on the stove to boil 15 minutes; skim off the scum, and take from the stove. Put in the nuts, spices and candied fruit. Stir in as much flour as can be done with a spoon. Set away to cool, then mix in the soda (don't make the dough too stiff). Cover up and let stand over night, then work in flour enough to make a stiff dough. Bake when you get ready. It is well to let it stand a few days, as it will not stick so badly. Roll out a little thicker than a common cookie, cut in any shape you like.

This recipe originated in Germany, is old and tried, and the cake will keep a year or more.—MRS. E. SMITH.

HONEY-DROP CAKES.—1 cup honey, $\frac{1}{2}$ cup sugar, $\frac{1}{2}$ cup butter or lard, $\frac{1}{2}$ cup sour milk, 1 egg, $\frac{1}{2}$ table-spoon soda, 4 cups sifted flour.

HONEY SHORT-CAKE.—3 cups flour, 2 teaspoons baking powder, 1 teaspoon salt, $\frac{1}{2}$ cup shortening, $1\frac{1}{2}$ cups sweet milk. Roll quickly, and bake in a hot oven. When done, split the cake and spread the lower half thinly with butter, and the upper half with $\frac{1}{2}$ pound of the best flavored honey. (Candied honey is preferred. If too hard to spread well it should be slightly warmed or creamed with a knife). Let it stand a few minutes, and the honey will melt gradually, and the flavor will permeate all through the cake. To be eaten with milk.

HONEY TEA-CAKE.—1 cup honey, $\frac{1}{2}$ cup sour cream, 2 eggs, $\frac{1}{2}$ cup butter, 2 cups flour, scant $\frac{1}{2}$ tea-spoon soda, 1 tablespoon cream tartar. Bake 30 minutes in a moderate oven.—MISS M. CHANDLER.

HONEY FRUIT-CAKE.— $1\frac{1}{2}$ cups honey, $\frac{2}{3}$ cup butter, $\frac{1}{2}$ cup sweet milk, 2 eggs well beaten, 3 cups flour, 2 teaspoons baking powder, 2 cups raisins, 1 tea-spoon each of cloves and cinnamon.

HOT WATER LAYER OR LOAF-CAKE.—1 cup sugar, 1 cup flour, heaping teaspoon butter; stir all together and add $\frac{2}{3}$ cup boiling water, add 2 beaten eggs, $\frac{1}{2}$ cup flour and teaspoon baking powder.—MRS. WM. MARR, Forks Road, Ont.

HOT WATER SPONGE CAKE.—1 cup sugar, 1 cup flour, 1 egg, 2 teaspoons cream tartar, 1 teaspoon soda, $\frac{1}{4}$ cup hot water. Sift flour and cream tartar together, whip sugar and egg to a cream, then add sifted flour, add soda in hot water last. Bake in a hot oven.—MRS. CLARA FISHER, Auburn, N.S.

SUGGESTIONS.

In making cake it is desirable that the materials be of the finest quality. Sweet, fresh butter, eggs and good flour are the first essentials. The process of putting together being also an important feature, it would be well to observe the following directions: Never allow the butter to oil, but soften it by putting in a warm place before you commence preparations for your cake; then put it into an earthen dish (tin, if not new, will discolor your cake as you stir it), beat the sugar and butter to a cream; add the yolks of the eggs and flour. Spices and liquors may be added after the yolks of the eggs are put in and fruit should be put in with the flour. The oven should be hot for small cakes.—MRS. THOS. SMITH, Jamestown, Ont.

In cases of emergency for the Young Housewife, if too far from the store and want moulds for your Christmas cake, get some cardboard; shape it any size you like, set them on pie plates—they answer the purpose. Tomato or salmon cans make pretty moulds for small loaves of bread for tea; cut in pretty round rings.—MRS. GRACE GOULTER, Shanty Bay P.O., Ont

When this has been cooled so that it can be handled, add a teaspoon tartaric acid, and same quantity of extract of lemon, and work them into the mass until evenly distributed, and no more, as it will tend to destroy the transparency of the candy.—MRS. MISCELLANEOUS

WARM DRINKS

CHOCOLATE.—Scrape chocolate fine, mix with a little cold water and the yolks of eggs well beaten; add this to equal parts of milk and water, and boil well, being careful that it does not burn, sweeten to taste, and serve hot.—MRS. JOHN WOODS, Richmond Hill, Ont.

COCOA.—Cocoa is a tasty drink when properly made, and one of the least injurious. For 1 cup take 2 level teaspoons of cocoa and the same quantity of sugar, stir together and add water drop by drop, stirring constantly until a smooth, even paste has been secured. The success of the drink depends largely upon the care used in thus mixing the water and cocoa. Place $\frac{1}{2}$ cup milk over fire and allow it to heat until it begins to simmer around the sides of the pan, add the cocoa and allow it to come to the boiling point. Then remove from the fire and beat vigorously for 2 or 3 minutes. This beats the air into it and removes the heaviness of the cocoa, making it a lighter and more refreshing drink. This makes 1 cup.—MISS BLANCHE STONE, 505 Brunswick Avenue, Toronto.

COFFEE SECRETS.—The almost imperceptible flavor of vanilla is a great improvement to coffee; add a teaspoon of vanilla extract to coffee for four persons just before serving.

A pinch of salt in coffee helps to give a delicate flavor.

In France and Norway coffee is roasted fresh every morning on a covered shovel kept in constant motion over the fire; a piece of butter the size of a walnut and a dessertspoon of powdered sugar to three pounds of green coffee added while roasting is said to bring out

both flavor and aroma and to give the caramel taste so enjoyed by tourists in those countries.

White of an egg (the yolk should never be used) clears the coffee, but too much spoils the flavor.

Coffee essence, very useful in travelling or camping, may be made as follows: $\frac{1}{4}$ pound of ground coffee put in a percolator and simmer in 1 pint of boiling water; allow it to filter, not boil, for about 20 minutes; when cool, cork tightly in bottle or can.

2 tablespoons in a breakfast cup of hot milk makes a delicious and easily prepared drink.—H. A. T., Buffalo, N.Y.—By Courtesy of "Delineator."

FOUR WAYS OF MAKING COFFEE:

II. BOILED COFFEE WITH BOILING WATER.—Proportions.—2 ounces coffee to 1 pint of water. Method.—Beat dry coffee well into 1 raw egg mixed with 4 tablespoons of cold water. Add boiling water and boil 3 minutes. Place where it will keep hot for 10 minutes and serve.

III.—STEAMED COFFEE.—Proportions.—2 ounces coffee to 1 pint of water. Method.—Beat dry coffee into 1 raw egg mixed with 4 tablespoons of cold water. Add boiling water; set coffee-pot on trivet in kettle of boiling water and steam 20 minutes.

CANADIAN COFFEE.—Take 2 tablespoons ground coffee and wet it with a little cold water. Pour over this a cup of boiling water. In another pan have an equal quantity of milk and allow it to scald, or until it begins to bubble around the edges of the pan. When the coffee boils, add the scalded milk and allow to boil until it foams up, then add a few drops of cold water to settle the grounds, and serve.—MRS. WM. T. HUFFMAN.

TEA.—Allow 1 teaspoon of tea to each person. Have the teapot hot and then put in the tea; pour over this boiling water until steeper is a little more than half full; cover tightly and let it stand where it will keep hot, but not boil. Let it steep thus for 10 or 15 minutes and then, if desired, pour into a separate tea urn, adding more boiling water, in proportion of 1 cup of water for every teaspoon of dry tea used. Have hot water kettle of copper, brass or ordinary pitcher, if it will keep water almost at boiling point, and weaken tea to suit taste. Do not use water for tea that has boiled long. Spring water is the best for tea, and filtered water the next best.

TEA A LA RUSSE is made in the same way and served with a slice of lemon either in cup and tea poured over it, or placed on saucer beside cup. Rind is always left on. No cream is used in this tea.—MRS. JOSEPH WOODROW, Richmond Hill, Ont.

BREAKFAST CEREALS

GENERAL RULES FOR COOKING CEREALS

1. Cook in boiling salted water— $\frac{1}{4}$ teaspoon salt to 1 cup of water.
2. Quantity of dry cereal to 1 cup of water—
 - (a) $\frac{1}{4}$ cup oatmeal, rice or cracked grain.
 - (b) $\frac{1}{2}$ cup rolled oats or any flaked cereal.
 - (c) 3 tablespoons cornmeal, farina or any granular cereal.

METHODS OF COOKING:

Whole or Cracked Grains.—Put salt and water in the top part of a double boiler and place directly over fire. When it boils, add cereal and stir frequently until it has boiled 10 minutes. Cover closely and set the top in the lower part of double boiler. Cook 3 to 12 hours. **NOTE.**—Rice will cook in $\frac{3}{4}$ of an hour.

Flaked Cereals.—Put salt and water in a pot and add cereal when the water boils. Stir constantly until it thickens, then boil gently for $\frac{1}{2}$ hour, stirring often to prevent burning. **NOTE.**—These are much nicer if cooked the same as whole grains.

Granular Cereals.—Put salt and water in top part of a double boiler and place directly over fire. When it boils hard, sprinkle in the cereal, stirring quickly all the time. Stir and boil until it thickens. If quantity decreases, add more boiling water. Cover closely and set the top in the lower part of double boiler. Cook from 1 to 4 hours.

Breakfast cereals may be cooked the day before they are used, but should be left in the pot and should not be stirred while reheating. A tablespoon of water poured over the top after it is cooked will prevent a skin forming over the top.—MACDONALD INSTITUTE, Guelph, Ont.

TO PREVENT RED ANTS.—Put 1 pint of tar in an earthen vessel, pour on it 2 quarts of boiling hot water and place it in your closet.

TO REMOVE TAR.—Rub well with clean lard, afterwards wash with soap and warm water. Apply this to either hands or clothing.

TO TAKE INK OUT OF LINEN.—Dip the part in pure tallow melted, then wash out the tallow and the ink will disappear.
