## INTRODUCTION

---

The present issue of the Statistical Abstract contains all the leading tables of former issues, brought down to the close of either the fiscal or calendar year 1888, according to circumstances, and contains, moreover, a number of new tables, particularly in chapters IV, VI, VII, IX and XI.

Chapters VII and XI are entirely new, and will be found to contain much useful information respecting Agriculture, Education, Religion and Crime.

A copy of the Tariff, arranged in alphabetical order, thus doing away with the necessity of an index, will be found as an appendix, together with a list of decisions made by the Board of Customs between 1st June, 1888, and 31st March, 1889.

It is requested that any errors detected, if such exist, may be at once reported to Mr. S. C. D. Roper, Compiler of the Abstract, Department of Agriculture.

DEPARTMENT OF AGRICULTURE,

OTTAWA, May, 1889.

## STATISTICAL ABSTRACT AND RECORD FOR THE YEAR 1888

---

### Preliminary Remarks.

---

1. The Dominion of Canada consists of the Provinces of The Dominion of Canada. Ontario and Quebec (formerly Upper and Lower Canada), Nova Scotia, New Brunswick, Manitoba, British Columbia, Prince Edward Island and the North-West Territories, (which latter contain the vast territory formerly under the control of the Hudson's Bay Company), and therefore comprises the whole of the northern half of North America, with the exception of the United States Territory of Alaska on the west, and Labrador, which is under the control of the Government of Newfoundland, on the east. It is bounded on the north by the Arctic Ocean, on the west by the Territory of Alaska and the Pacific Ocean, on the south by the United States and on the east by the Atlantic Ocean.

2. The origin of the word Canada is obscure, but the derivation now generally accepted is that from an Indian word, "Kannatha," meaning a village or collection of huts, (Origin of the name 'Canada.' and it is supposed that Jacques Cartier hearing this word used by the Indians with reference to their settlements, mistook its meaning, and applied it to the whole country.

3. Canada has an area of about 3,470,257 square miles, or, Area. including its water surface, 3,610,000 square miles, and is about 3,500 miles from east to west and 1,400 miles from north to south.

4. Among its principal physical features are its inland The great lakes. lakes, which are remarkable for their size and number, and

contain more than half the fresh water of the globe. The largest of these, generally known as the great lakes, separate Canada from the United States, and consist of Lakes Superior, Huron, St. Clair, Erie and Ontario, and the following table gives their length, breadth, area and height above the sea:—

LAKES.	Length.	Breadth.	Area.	Height above Sea.
	Miles.	Miles.	Sq. Miles.	Feet.
Superior.....	420	160	32,000	630
Huron—with Georgian Bay...	280	190	24,000	578
St. Clair.....	26	25	320	570
Erie.....	240	80	10,000	565
Ontario.....	180	65	7,300	232
Michigan.....	320	80	25,600	578

Lake Michigan.

5. Lake Michigan is in the United States, but is connected with Lake Huron by the Strait of Mackinaw.

Lake navigation.

6. These lakes form a complete system of navigation from the head of Lake Superior to the Atlantic Ocean, a distance of 2,384 miles. Lake Superior is connected with Lake Huron by the Ste. Marie River and the Sault Ste. Marie Canal. Lake Huron flows into Lake St. Clair by the St. Clair River, and Lake St. Clair into Lake Erie by the Detroit River. Lake Erie flows into Lake Ontario by the Niagara River, fourteen miles from the mouth of which are the renowned Niagara Falls 160 feet in height. The two lakes are connected for the purposes of navigation by the Welland Canal. The St. Lawrence River, flowing out of Lake Ontario into the Gulf of St. Lawrence, forms the outlet of this system.

Lakes.

7. The other principal lakes in Ontario are the Lake of the Woods (1,500 square miles), Lake Nepigon, Nipissing and Simcoe, and the Muskoka Lakes Muskoka, Rosseau, Joseph and the Lake of Bays. In Quebec are Lake Temis-

comingue, which is on the borders of Ontario and Quebec, Lake St. John, Grand Lake and Lake Mistassini; and in the Territories and Manitoba are lakes Great Bear (10,000 square miles), Great Slave (12,000 square miles), Athabasca (3,000 square miles) Winnipeg, 280 miles long, 57 miles broad, 650 feet above the sea, and an area of 8,500 square miles; Winnipegosis, 120 miles long, 17 miles broad, 700 feet above the sea, and an area of 1,936 square miles, and Manitoba, length 120 miles, breadth 16 miles, elevation above sea 670 feet, and area 1,900 square miles.

8. The principal mountains are the Rocky Mountains in the west, which extend from the Arctic Ocean to the United States, and contain the highest points in the Dominion, among the chief being Mount Hooker, 16,760 feet, Mount Brown, 16,000 feet, and Mount Murchison, 15,700 feet, while there are several others of nearly the same height. The Canadian Pacific Railway crosses this range through the Kicking Horse Pass at an altitude of 5,300 feet above the sea. West of the Rocky Mountains, and between them and the Pacific Ocean, are the Cascade Mountains, which follow the coast from the Fraser River to Alaska, and in some places are as high as 10,000 feet. The other ranges of any size are the Wotschish and Notre Dame Mountains in Quebec, and the North and South Mountains and the Cobequid Mountains in Nova Scotia. Mountains.

9. The principal rivers are, in the Territories and Manitoba, the Mackenzie River, over 2,400 miles in length, the Copper Mine and Great Fish Rivers, which flow into the Arctic Ocean; the Saskatchewan, Assiniboine and Red Rivers, which flow into Lake Winnipeg, and the Churchill, Severn and Albany Rivers, which flow into Hudson's Bay. In Ontario and Quebec the St. Lawrence, with its tributaries the Ottawa, St. Maurice, Richelieu and Saguenay. In New Brunswick the St. John, Restigouche and Miramichi Rivers; and in British Columbia, the Fraser River, which flows into Rivers.

the Gulf of Georgia; the Peace River, which rises in that Province and flows into the Mackenzie River, and the Columbia River, over 1,200 miles in length, which flows through the United States into the Pacific Ocean.

Gulfs and bays.

10. The coast line of Canada is very much broken, and contains several large gulfs, bays and inlets, besides innumerable smaller ones. On the east the principal indents are the Gulf of St. Lawrence, the Bay of Fundy and Bay of Chaleurs; on the north, Hudson's Bay, which is really a large inland sea, being 1,000 miles long and 600 miles wide, with an area of 350,000 square miles; Baffin's Bay, the Gulf of Boothia, and Melville and Lancaster Sounds; and on the west the Strait of Juan de Fuca, the Gulf of Georgia and Queen Charlotte Sound.

Islands.

11. The largest islands on the west are Vancouver and Queen Charlotte Islands. The former is about 300 miles in length, has an area of about 20,000 square miles and contains Victoria, the capital of British Columbia; and on the east, Prince Edward Island, which forms the Province of that name; Cape Breton, which is part of the Province of Nova Scotia, being separated from the mainland by the Gut of Canso, and Anticosti, in the Gulf of St. Lawrence, on which the Dominion Government have important signal and wrecking stations. A great network of islands, the limits of which have not been well defined, extends along the entire north coast of Canada. It is known generally as the Arctic Archipelago.

Physical features.

12. The whole of the eastern part of Canada, from the Atlantic to the north-west boundaries of Ontario, was formerly one vast forest, and is still very extensively wooded, timber in various forms being one of the principal exports of the country. In the southern part of the centre of the Dominion is a vast tract of prairie land, covered with soil of great richness and adapted for the raising of cereals and roots.

of all kinds, while for grazing purposes it is unsurpassed, the climate being suitable for stock-breeding, and the pasturage excellent and almost unlimited. West of the Rocky Mountains is another great tract of forest land, the timber on which is invaluable, while the soil is very fertile, and the country, as it becomes cleared, is found to possess great agricultural capabilities.

13. The northern part of the centre of the Dominion, extending from the Rocky Mountains to Hudson's Bay, is very extensively wooded, and has generally been considered for the most part unfit for settlement, and only useful as a preserve for fur-bearing animals. But during the Session of Parliament of 1888 a committee of the Senate held an investigation into the capabilities of these regions, the result being that all previous ideas have been upset. The area inquired into was about 1,260,000 square miles, and of these it was estimated 860,000 square miles were fit for settlement and about 400,000 square miles useless for cultivation; 656,000 square miles were suitable for potatoes, 407,000 square miles for barley and 316,000 square miles for wheat. There is a river navigation of about 2,750 miles, 1,390 miles being suitable for stern-wheel steamers and 1,360 miles for light draught sea-going steamers. There are large auriferous deposits, as well as silver, iron, graphite, ochre, brick and pottery clay, mica, gypsum, lime and sandstone, "while the petroleum area is so extensive as to justify the belief that eventually it will supply the larger part of this continent." Furs are at present the chief commercial products of this region, which is the last great fur preserve of the world, and in view of the great danger of the extinction of animals whose furs become fashionable, the committee suggest the leasing of fur districts by the Government, with a limitation as to the catch of certain kinds of furs. Some idea of the size and importance of the fur trade may be obtained from the fact that the

The Mac-  
kenzie  
Basin.

Hudson's Bay Company offered for sale in 1887 upwards of 4,200,000 skins. The lakes and rivers abound in fish especially whitefish and lake trout. The committee point out that the valuable whale fisheries of the northern coast of Canada are being rapidly destroyed by foreign whalers and suggest that the Government should adopt some measures for their protection. The climate of this region in some places resembles that of western Ontario.

Climate. 14. The climate of Canada is dry, healthy and invigorating, and owing to the great area of the country extending over 20 degrees of latitude, or from the latitude of Constantinople to the North Pole, has a wide range of temperature. The extreme dryness of the atmosphere, however, makes both cold and heat less acutely felt than the readings of the thermometer would lead people to expect. In the Maritime Provinces the climate somewhat resembles that of the British Isles; in Ontario, Quebec and Manitoba the summers are warm and the winters cold, but the cold is pleasant and bracing, and the snow that generally covers the ground during the winter is of the greatest benefit alike to the farmer, the lumberman and the merchant. In the North-West Territories cattle graze at large all through the winter months; and on the Pacific slope, west of the Rocky Mountains, the climate is milder than in any other part of the Dominion.

Climate. 15. The popular idea in other countries for a long time was; and indeed to a certain extent still is, that Canada is a country of perpetual winter, and normally covered with snow, and Canadians themselves are to a large extent to blame for the continuation of the idea, by almost invariably representing Canadian winter scenes in their pictures, by writing descriptions of winter amusements and pastimes alone, and, if desirous of sending their portraits to friends in other countries, by being always represented in winter

costume, with probably a snow-covered forest or frozen lake in the back ground. The facts are, that the average winter is about four and a-half months, and though the spring may begin two or three weeks later than in England the conditions for rapid growth—warm sunshine and rain—are so favorable that the crops of the two countries are about equally advanced by the middle of July, and as during the last few years the country has become better known it is beginning to be understood that though the winters are at times severe they are healthy and enjoyable, while the summer weather is not surpassed in the most favored parts of Europe. That the climate is superior to that of England is admitted by all who have experienced both.

16. An examination of the following table, compiled from the report for 1885 (the last issued) of the Superintendent of the Meteorological Service, and giving the highest, lowest and mean temperature at 105 different places in Canada, will afford the best evidence of the truth of the foregoing remarks :

Temperature and  
rain fall,  
1885.

Extremes  
of mean  
tempera-  
ture.

17. According to the above figures the extremes of mean temperature in 1885 in the several Provinces were as follows:

	Max.	Min.
Ontario.....	44·87	32·22
Quebec.....	39·47	31·07
Nova Scotia.....	45·02	40·58
New Brunswick.....	42·10	38·10
Manitoba.....	33·75	30·24
British Columbia.....	50·03	45·45
Prince Edward Island.....	39·18	40·67
The Territories.....	42·67	27·51

The highest mean temperature was at Windsor, Ontario, and the lowest at Fort Chipewyan, N. W. T.

18. The following information respecting the weather of <sup>Tempera-</sup> 1888 has been taken from the *Monthly Weather Review*, a <sup>ture, 1888.</sup> useful publication issued by the Superintendent of the Meteorological Service at Toronto. The mean temperature and total precipitation at a station in Prince Edward Island, and at the capitals of the other Provinces and of the Territories, have been given, with remarks applicable to all parts of the Dominion. The first table gives the mean temperature at the places named in eleven months in 1887, returns for December not having yet been received:

MEAN TEMPERATURE AT THE UNDERMENTIONED PLACES IN CANADA.

\*Average only—mean not given.

The average means the average obtained for fourteen years' observation, except where otherwise mentioned. January was remarkable for the great cold that prevailed in almost every part of the Dominion, and the temperature was everywhere very much below the average, in northern Ontario as much as 8·07 (11 years only). Heron Bay, on the north shore of Lake Superior, reported a temperature of —62. February was more remarkable for the exceedingly rapid changes of temperature than for anything else, the temperature having been about the average, except in British Columbia and the North-West Territories (4 years). Heron Bay again returned the lowest reading:—65. In March the temperature was above the average in Quebec and the Maritime Provinces, and below in Ontario and the North-West Territories; in April and May it was everywhere below the average, except in British Columbia, complaints being made in the latter month of much damage done by late frosts. In June the temperature was above the average in Ontario, Quebec, New Brunswick and British Columbia, and below in Nova Scotia. A severe cyclone swept the Ottawa Valley on the 5th of this month, causing a great deal of damage. July was chiefly remarkable for a violent storm on the 11th and 12th, which was felt from the lakes to the Atlantic, and was almost unprecedented in violence for the time of year: the temperature was generally below the average. August and September were generally cold and wet, especially in Quebec, and the temperature was everywhere below the average, except in British Columbia. The temperature in October was 4·9 below the average at Toronto, 6·9 at Montreal, 3·0 in New Brunswick, and 1·04 at Halifax. In British Columbia it was 4·0 above. In November the temperature was about the average.

Rain and  
snow fall.  
1888.

19. The next table gives the total precipitation in inches during the year at the same places:—

PRELIMINARY REMARKS.

TOTAL PRECIPITATION IN INCHES AT THE UNDERMENTIONED PLACES IN CANADA, 1888.

PLACES.	Jan.	Feb.	Mar.	April.	May.	June.

Regina, N.W.T.....	1·29	1·35	.....	1·21	0·25
Victoria, B.C.....	0·34	0·42	1·01	3·35	3·69

The rainfall in the earlier months was generally below the average, particularly in April and May, but in August, October and November it very far exceeded the average, particularly in Quebec and the Maritime Provinces, where considerable damage was done to the crops.

20. The number of storm warnings issued during eleven months by the Meteorological Service was 814, of which 679, or 83·4, were verified. No warnings of this nature were issued during the month of June. Storm warnings.

The following table shows the number of storm warnings issued and verified in each year since 1877 :—

YEAR.	Number Issued.	Number Verified.	Percentage Verified.
1877.....	743	510	68·6
1878.....	860	673	78·3
1879.....	712	591	83·0
1880.....	889	736	82·8
1881.....	854	727	85·1
1882.....	841	658	78·2
1883.....	1,085	858	79·1
1884.....	798	663	83·2
1885.....	830	741	89·3
1886.....	966	799	82·8
1887.....	1,093	972	88·9
1888*.....	814	679	83·4

\*11 months.

It will be seen, therefore, that out of a total of 10,425 storm warnings issued during the last twelve years, 8,607, or 82·5 per cent., have been verified.

Weather predictions.

21. The total number of weather predictions of all kinds during the same time was 5,521, of which 77·4 per cent. were fully, and 91·8 per cent. fully and partly verified.

Minerals.

22. Minerals of almost every kind are known to exist in Canada, and their development in the future will constitute one of the chief sources of wealth for the country. Gold has been found extensively in Nova Scotia and British Columbia. In the former Province there are fifty-eight mines in working order, and in the latter there is scarcely a stream of any importance in which the "colour" of gold cannot be found, and paying mines exist in localities extending through ten degrees of latitude. The total value of gold exported from this Province since its admission into Confederation to 30th June, 1888, has reached the large sum of \$15,834,821. Gold has also been found in Ontario and Quebec, and it is not improbable that valuable discoveries of that metal are yet to be made in these Provinces. Iron

is found in considerable quantities in all the Provinces, and the supply is practically inexhaustible; that of Nova Scotia is particularly fine, and brings in the market nearly double the price of English iron. More complete details respecting the mineral resources of Canada are given in a subsequent chapter.

23. What may be called the natural industries of the Dominion are: In Prince Edward Island, agriculture, fishing and ship-building; in Nova Scotia, coal and gold mining, ship-building, agriculture, lumber and fishing, the fisheries of this Province being the most valuable and productive in the world; in New Brunswick, ship-building, lumbering, agriculture and fishing, the value of the fisheries being second only to that of Nova Scotia; in Quebec, agriculture, ship-building, lumbering, fishing and mining; in Ontario, agriculture, lumbering and mining; in Manitoba and the Territories, agriculture and stock-raising;—coal mining is expected to become a very important industry in these regions, it being estimated that there are about 65,000 square miles of coal-bearing strata east of the Rocky Mountains;—and in British Columbia, mining, lumbering, fishing and agriculture.

Natural  
industries.

24. The leading manufacturing industries, principally in Ontario and Quebec, are works for making all kinds of agricultural implements in iron and wood, waggons, carriages, and railroad rolling stock (including locomotives), cotton factories, woollen factories, saw-mills, tanneries, machinery, iron and hardware works, flax works, furniture, paper, soap, woodenware, boot and shoe, cloth and linen, door sash, stove, tobacco, meat and food preserving, and cheese factories. Sugar refining is extensively carried on in Halifax and Montreal.

Manufacturing  
industries.

25. According to what may be rather called tradition than history the shores of North America were visited on several

Discovery  
of Canada

occasions, as early as the tenth century, by parties of men, some of whom settled in what is now the State of Massachusetts, but were eventually either killed or expelled by the natives. The earliest authentic record of the arrival of Europeans on these shores is that of Sebastian Cabot, who reached some part of the coast of Labrador on the 21st of June, 1497, and two days afterwards discovered the Island of Newfoundland. Columbus did not reach the mainland until the following year, 1498, and Amerigo Vesputi, to whom the Continent took its name, until 1499. Cabot, therefore, is fairly entitled to be considered as the discoverer of what is now the Dominion of Canada. In 1517 Cabot made another voyage, and succeeded in making his way to what was afterwards called Hudson's Bay, but no further was done towards the exploration of the mainland until the expedition of Jacques Cartier in 1534, who landed at Gaspé on the 24th July in that year, and with this event Canadian history proper may be said to begin.

Principal  
events in  
Canadian  
history.

26. Commencing with the first voyage of Cartier, following are some of the principal events of importance in the history of this country:—

1534. July 24. Landing of Jacques Cartier at Gaspé.  
The Bay of Chaleurs was so named by him on account of the gale and the weather.
1535. July. Second visit of Cartier.  
August 10. Cartier anchored in a small bay at the mouth of the Saguenay River, which, in honour of the day, he named after St. Lawrence. The name was afterwards extended to the gulf and river.
1540. Third visit of Cartier.
- 1542-43. The Sieur de Roberval and his party wintered at Cap Rouge.
1598. The Marquis de la Roche landed 40 convicts on Sable Island, where they were left for five years without relief, and only twelve were left at the end of that time.
1603. First visit of Samuel de Champlain to Canada.
1605. Founding of Port Royal (Annapolis), Acadia (derived from an Indian word "Cadie," a place of abundance), by the Baron de Poutrincou.
1608. Second visit of Champlain. Founding of Quebec, the first permanent settlement of Canada. The name is said to be an Indian one, meaning a strait. 28 settlers wintered there, including Champlain.

1611. Establishment of a trading post at Hochelaga.
1613. St. John's, Newfoundland, founded.
1615. Champlain sailed up the Ottawa River, crossed Lake Nipissing and descended French River into Georgian Bay and Lake Huron, returning by Lake Ontario.
1620. Population of Quebec. 60 persons.
1629. July. Capture of Quebec by the English under Sir David Kirk. 117 persons wintered there.
1632. Canada ceded to France by the Treaty of St. Germain-en-Laye.
1635. December 25. Death of Champlain at Quebec.
1642. May 18. Ville Marie (Montreal) founded.
- 1642-1667. Frequent and serious wars between the French and the Iroquois Indians.
1667. Population of New France. 3,918.
1672. Count de Frontenac appointed Governor. Population. 6,705.
1689. August. Massacre at Lachine by Indians, and capture of the Fort at Montreal, which they held till October.
1690. Capture of Port Royal by Sir Wm. Phipps. and unsuccessful attack upon Quebec.
1692. Population of New France, 12,431.
1698. Death of Frontenac. Population, 13,355.
1701. August 4. Ratification of a treaty of peace with the Iroquois at Montreal.
1713. Treaty of Utrecht by which Hudson's Bay and adjacent territory, Nova Scotia (Acadia) and Newfoundland were ceded to the English.
1720. Population of New France 24,434. and of St. John Island (Prince Edward Island) about 100.
1739. Population of New France, 42,701.
1745. Louisbourg, Cape Breton, taken by the English.
1748. Restoration of Louisbourg to the French in exchange for Madras by the peace of Aix-la-Chapelle.
1749. The City of Halifax founded by Lord Halifax. 2,544 British emigrants brought out by the Hon. Edward Cornwallis, the first English Governor of Nova Scotia.
1752. March 23. Issue of the Halifax *Gazette*, the first paper published in Canada.
1755. Expulsion of the Acadians from Nova Scotia. about 6,000.
1758. July 26. Final capture of Louisbourg by the English.
1759. July 28. Capture of Fort Niagara by the English under General Prideaux, who was killed during the assault.
- June 25. Commencement of the siege of Quebec.
- September 12. Battle of the Plains of Abraham and defeat of the French by General Wolfe, who was killed on the field. Loss of the English, 700, and of the French, 1,500.
- September 13. Death of General Montcalm, commander of the French forces.
- September 18. Capitulation of Quebec to General Townshend.
1760. April. Unsuccessful attack on Quebec by General de Lévis.
- September 8. Capitulation of Montreal, and completion of the conquest of Canada. Population of New France, 70,000.

## STATISTICAL ABSTRACT.

1762. British population of Nova Scotia, 8,104.
1763. February 10. Treaty of Paris signed, by which France ceded and guaranteed to His Britannic Majesty in full right "Canada with all its dependencies." General Murray was the first Governor General of the Province of Quebec.
1764. June 21. Issue of the Quebec *Gazette*.<sup>\*</sup>  
In this year Pontiac, Chief of the Ottawas, organized a conspiracy for a simultaneous rising among the Indian tribes, and a general massacre of the British. The plan was successfully carried out in several places, where not a soul was left alive, but finally the Indians were forced to succumb.
1766. General Carleton, afterwards Lord Dorchester, appointed Governor General.
1770. St. Johns Island (Prince Edward Island) made into a separate Province, with Walter Paterson the first Governor. The first meeting of the House of Assembly took place in July, 1773.
1774. The "Quebec Act" passed. This Act gave the French Canadians the free exercise of the Roman Catholic religion, the enjoyment of their civil rights, and the protection of their own civil laws and customs. It annexed large territories to the Province of Quebec, provided for the appointment by the Crown of a Legislative Council, and for the administration of the criminal law as in use in England.
1775. Outbreak of the American Revolution, and invasion of Canada by the Americans; every place of importance rapidly fell into their hands, with the exception of Quebec, in an attack upon which Gen. Montgomery was defeated and killed on 31st December.
1776. Reinforcements arrived from England, and the Americans were finally driven out of Canada.
1778. First issue of the Montreal *Gazette*. This paper is still published.
1783. September 3. Signing of the Treaty of Paris, and definition of the boundary line between Canada and the United States, viz., the Great Lakes, the St. Lawrence, the 45th parallel of north latitude, the highlands dividing the waters falling into the Atlantic from those emptying themselves into the St. Lawrence and the St. Croix River.
1784. Population of Canada, 113,012. (United Empire Loyalists in Upper Canada not included).  
British population of Nova Scotia, 32,000 (about 11,000 Acadians not included).  
Separation from Nova Scotia, and erection into a new Province of New Brunswick—population, 11,457.  
About this time began the migration into Canada and Nova Scotia of the United Empire Loyalists, as they were called—that is, of those settlers in the American States who had remained faithful to the British cause. This migration lasted for several years, and though it is not possible to arrive at any exact figures, it is probable that the number altogether was not less than 40,000. The Loyalists were well treated by the British Government, and large grants of lands were made to them in various

---

<sup>\*</sup> This has generally been considered as the first paper published in Canada, but the Halifax *Gazette*, though lasting barely two years, has undoubtedly the claim to priority.

parts of the country. The banks of the St. Lawrence and shores of Lake Ontario in particular were settled by about 10,000, on lands allotted to them by the Government.

- 1785.** Re-introduction of the right of *habeas corpus*.
- 1791.** Division of the Province of Quebec into two Provinces, viz., Upper and Lower Canada. Each Province to have a Lieutenant-Governor, and a Legislature composed of a House of Assembly and a Legislative Council. The members of the Council were to be appointed by the Lieutenant-Governor for life, those of the Assembly to be elected by the people for four years.
- Population of the two Provinces, 161,311.
- 1792.** September 17. First meeting of the Parliament of Upper Canada at Newark (Niagara) under Lieutenant-Governor Simcoe. The House of Assembly consisted of sixteen members.
- December 17. Opening of the Legislature of Lower Canada, at Quebec, by Gen. Clarke. The House of Assembly consisted of fifty members.
- 1793.** Abolition of slavery in Upper Canada.
- 1796.** The seat of Government of Upper Canada removed from Niagara to York (Toronto).
- 1798.** The name of St. John's Island changed to that of Prince Edward Island, in honour of the Duke of Kent, the change to take effect in 1800. Population, 4,500.
- 1806.\*** November. Issue of *Le Canadien*, the first newspaper printed entirely in French.
- Population of Upper Canada, 70,718, and of Lower Canada, 250,000.
- 1812.** War declared between Great Britain and the United States.
- August 11. Surrender of Detroit by the Americans under General Hull to General Brock.
- October 13. Battle of Queenston Heights, and defeat of the Americans. Death of General Brock.
- November. Defeat of General Dearborn by Col. de Salaberry at Lacolle River.
- 1813.** April 25. Capture of York by the Americans.
- June 5. Battle of Stoney Creek and defeat of the Americans.
- September. Battle of Moraviantown. Retreat of the British, and death of the Indian chief Tecumseth.
- Battle of Chateauguay—Defeat of three thousand Americans under General Hampton by Colonel de Salaberry and four hundred French Canadian militia.
- September 25. Battle of Chrysler's Farm—Defeat and rout of General Wilkinson and the Americans by the Canadian militia under Col. Morrison.
- 1814.** Battle of Lundy's Lane, and defeat of the Americans.
- December 24. War terminated by the Treaty of Ghent.
- Population of Upper Canada, 95,000, and of Lower Canada, 335,000.
- 1818.** October 20. Convention signed at London regulating the rights of Americans in the British North American fisheries.
- 1821.** Commencement of the Lachine Canal.

1831. Population—Upper Canada, 236,702; Lower Canada, 553,134.
1836. July 21. Opening of the railroad from Laprairie to St. John's—the first railroad in Canada.
- 1837-38. Outbreak of rebellion in both Provinces. It was suppressed in Upper Canada by the Militia, and in Lower Canada by British troops.
1840. Death of Lord Durham, to whose exertions the subsequent union of the Provinces was mainly due.
1841. February 1<sup>st</sup>. Union of the two Provinces under the name of the Province of Canada, and establishment of Responsible Government. The Legislature was to consist of a Legislative Council and Legislative Assembly, each Province to be represented by 62 members, 42 elected by the people and 20 appointed by the Crown.  
Population of Upper Canada, 455,688.  
June 13. Opening of the first united Parliament at Kingston, by Lord Sydenham.
1842. Settlement of the boundary line between Canada and the United States by the Ashburton Treaty.
1844. Population of Lower Canada, 697,084.
1845. Large fires in the City of Quebec: 25,000 people rendered homeless.
1848. The St. Lawrence canals opened for navigation.
1849. Riots in Toronto and Montreal over the Rebellion Losses Bill, and burning of the Parliament Library at Montreal.
1850. The first sod of the Northern Railway turned by Lady Elgin.
1851. Transfer of the control of the Postal system from the British to the Provincial Governments, and adoption of a uniform rate of postage, viz., 3 pence per  $\frac{1}{4}$  ounce. The use of postage stamps was also introduced.  
Population of Upper Canada, 952,004; of Lower Canada, 890,261; of New Brunswick, 193,800, and of Nova Scotia, 276,854.
1852. Commencement of the Grand Trunk Railway.
1853. The number of members in the Legislative Assembly was increased from 84 to 130, being 65 from each Province.
1854. January 27. Main line of the Great Western Railway opened for traffic. Abolition of Seigniorial Tenure in Lower Canada, and settlement of the Clergy Reserves question.  
June 5. Reciprocity treaty with the United States, signed at Washington. It provided for mutual rights of fishing in certain Canadian and American waters, for the free interchange of the products of the sea, the soil, the forest and the mine: it allowed Americans the use of the St. Lawrence River and Canadian canals on the same terms as British subjects, and gave to Canadians the right to navigate Lake Michigan. This treaty was to last ten years.
1856. The Legislative Council was made an elective chamber.
1858. Adoption of the decimal system of currency. Selection by the Queen of the City of Ottawa as the Capital of the Dominion and permanent seat of Government.
1860. August 25. Opening of the Victoria Bridge by the Prince of Wales. This bridge crosses the St. Lawrence at Montreal, on the line of the Grand

Trunk Railway. It is the largest iron tubular bridge in the world, is 60 feet high in the centre, and nearly two miles in length.

September 1. Laying of the corner stone of the Parliament Buildings at Ottawa by the Prince of Wales. These buildings, together with the Departmental Buildings, have been erected at a total cost, up to 30th June, 1888, of \$4,612,538.

1861. Population of Upper Canada, 1,396,091; of Lower Canada, 1,111,566; of New Brunswick, 252,047; of Nova Scotia, 330,857; of Prince Edward Island, 80,857; of Vancouver's Island, exclusive of Indians, 3,024.

1866. March 17. Termination of the Reciprocity Treaty, in consequence of notice given by the United States.

June 1. Invasion of Canada by Fenians. Battle of Ridgeway, and retreat of the volunteers.

June 3. Withdrawal of the Fenians into the United States.

June 8. First Meeting of Parliament in the new buildings at Ottawa. At this meeting the final resolutions necessary to effect the Confederation of the Provinces were passed.

1867. February 10. The British North America Act passed by the Imperial Legislature.

July 1. Union of the Provinces of Canada, Nova Scotia and New Brunswick under the name of the Dominion of Canada. The names of Upper and Lower Canada were changed to Ontario and Quebec respectively.

Lord Monck was the first Governor General of the Dominion, and the first Parliament met on the 6th November, Sir John A. Macdonald being Premier.

1868. April 7. Hon. T. D'Arcy McGee, M.P., murdered at Ottawa.

July 31. The Rupert's Land Act passed by the Imperial Government providing for the acquisition by the Dominion of the North-West Territories.

1869. June 22. Bill passed providing for the Government of the North-West Territories.

October 29. Hon. Wm. Macdougall appointed Lieutenant-Governor.

Red River Rebellion.

November 19. Deed of surrender signed, Hudson's Bay Company to Her Majesty.

1870. March 4. Thomas Scott shot at Fort Garry.

August. Arrival at Fort Garry of the Expedition under Colonel (Lord) Wolseley, when the rebels were found to have dispersed.

May 25. Fenians crossed the frontier at Trout River in Quebec, but were driven back by the volunteers.

July 15. Addition of the North-West Territories to the Dominion and admission of the Province of Manitoba into the Confederation. This Province was made out of a portion of the newly-acquired Territory.

1871. May 8. Signing of the Treaty of Washington.

July 20. Admission of British Columbia into the Confederation.

Population of the Dominion, 3,485,761; of Manitoba, 18,995; of British Columbia, 36,224, and of Prince Edward Island, 94,021. Total, 3,635,024.

1872. Abolition of dual representation.
1873. May 2. Death of Sir George E. Cartier, in London.  
July 1. Admission of Prince Edward Island into the Confederation.
1876. Opening of the Intercolonial Railway from Quebec to Halifax.
1877. June 20. Great fire in St. John, New Brunswick.  
November 23. Award of Halifax Fisheries Commission of the sum of \$5,500,000 to be paid by the United States to the Imperial Government.
1879. Adoption of a Protective Tariff, otherwise called the National Policy.
1880. Death of the Hon. George Brown.  
October 21. Contract signed for the construction of the Canadian Pacific Railway. This contract was subsequently ratified by 44 Vic., c. 1 (1881).
1881. April 4. Population of the Dominion, 4,324,810.  
May 2. First sod turned by the Canadian Pacific Railway Company.
1882. June 22. Legality of the Canada Temperance Act confirmed by the Privy Council.  
August 23. The new seat of Government for the North-West Territories received the name of Regina.
1885. March 26. Outbreak of Rebellion in the North-West; commencement of hostilities at Duck Lake.  
April 2. Massacre at Frog Lake.  
April 14. Fort Pitt abandoned.  
April 24. Engagement at Fish Creek.  
May 12. Battle of Batoche, and defeat of the rebels.  
May 26. Surrender of Poundmaker.  
July 1. Termination of the fishery clauses of the Washington Treaty by the United States.  
July 2. Capture of Big Bear, and final suppression of the Rebellion. Total loss of the Militia and Volunteers under fire: killed, 38; wounded, 115. The rebel loss could not be ascertained. Estimated at about 29 killed and 11 wounded.  
November 7. Driving of the last spike of the Canadian Pacific Railway.
1886. May 4. Opening of the Indian and Colonial Exhibition in London.  
June 28. First through train left Montreal for Vancouver.
1887. April 4. Important Conference at London between representatives of the principal Colonies and the Imperial Government. Canada was represented by Sir Alexander Campbell and Mr. Sanford Fleming.  
November 15. Meeting of the Fisheries Commission at Washington.
1888. March 15. Signing of the Fishery Treaty at Washington.  
August. Rejection of the Fishery Treaty by the United States Senate.

## CHAPTER I.

## CONSTITUTION AND GOVERNMENT.

27. The Imperial Act, 30 Vic., cap. 3, known as the British North America Act, 1867, defines the Constitution of the Dominion of Canada, which it declares to be similar in principle to that of the United Kingdom. The Executive Government and authority, as well as the command-in-chief of all naval and military forces of and in Canada, are declared to be vested in the Queen, who governs through the person of a Governor General, appointed by her for a term of five years.

28. The Governor General takes no active part in legislation, but governs through a Council, known as the Queen's Privy Council for Canada, to which belong all those who are or have been advisers of the Crown. The Executive Committee of the Privy Council consists of those members of the Dominion Parliament who are for the time being Ministers of the Crown, either as heads of the various administrative Departments, or as members of the Cabinet without portfolio, and who form the Government of the day. Members of the Privy Council are styled Honourable, and for life. The power of dismissing the Ministry or of removing members of the Privy Council lies with the Governor General.

29. The Governor General assents in the Queen's name to all measures passed by the Senate and House of Commons, but he may refuse such assent, and may reserve Bills for Her Majesty's consideration. He also has power to disallow Acts of the Provincial Legislatures within one year of their having been passed in the Province.

30. There is one Parliament for Canada, consisting of the Queen, represented by the Governor General; an Upper House styled the Senate, the members of which are appointed, and a Lower House, or House of Commons, the members for which are elected.

The  
Senate.

31. The Senate is composed of persons appointed for life by the Governor General under the Great Seal of Canada, and each member must possess the following qualifications: He must have passed the age of 30 years; be a British subject, born or naturalized; must reside in the Province for which he is appointed, within which also he must be possessed of real property of the value of \$4,000 above all encumbrances, and his real and personal property together must be worth \$4,000, clear of all liabilities. In the Province of Quebec, he must either reside or have his real property qualification in the electoral division for which he is appointed.

Condi-  
tions of  
tenure.

32. A Senator may resign his place, and his place also becomes vacant if, for two consecutive Sessions of Parliament, he fails to attend in the Senate; if he makes any declaration of allegiance to a Foreign Power; if he becomes bankrupt or insolvent; if he is convicted of treason or felony, or if he cease to possess the proper property qualifications. A Senator cannot be elected a member of the House of Commons without previously resigning his place in the Senate.

Additions  
to Senate.

33. The Governor General may at any time recommend to the Queen the addition of three or six members to the Senate, but if such addition is made, no further appointment shall be made except, on a like recommendation, until the Senate shall have been reduced to its normal number.

Speaker of  
Senate.

34. The Speaker of the Senate, who must be a Senator, and who in all cases has a vote, is appointed by the Governor General.

Senato-  
rial in-  
demnity.

35. Each Senator receives an indemnity of \$1,000 per annum.

Number of  
Senators.

36. The present number of Senators is 80, divided among the several Provinces, as follows: Ontario, 24; Quebec, 24; Nova Scotia, 10; New Brunswick, 10; Manitoba, 3; British

Columbia, 8 ; Prince Edward Island, 4 ; and the North-West-Territories, 2.

37. The House of Commons consists of 215 members, representing the several Provinces in the following numbers : House of Commons  
 Ontario, 92 ; Quebec, 65 ; Nova Scotia, 21 ; New Brunswick, 16 ; Manitoba, 5 ; British Columbia, 6 ; Prince Edward Island, 6 ; and the North-West Territories, 4. The Province of Quebec has the fixed number of 65 members, and the other Provinces are represented in such proportion, as ascertained at each decennial census, as the number 65 bears to the population of Quebec so ascertained.

The present number of members in the Provinces of Manitoba, British Columbia and Prince Edward Island were specially provided for in the Acts admitting them into the Confederation, but all subsequent readjustment will be in accordance with the above-mentioned provision.

38. The following is the proportionate representation of each Province at the present time, according to the latest census. Proportionate representation.

	Census year.	Population to each Member.
Ontario .....	1881	20,904
Quebec.....	1881	20,908
Nova Scotia.....	1881	20,979
New Brunswick.....	1881	20,077
Manitoba .....	1886	21,728
British Columbia.....	1881	8,243
Prince Edward Island.....	1881	18,148
The Territories .....	1885	12,090
Canada .....	.....	20,276

39. The members of the House of Commons are elected by the people for a term of five years, unless the House be sooner dissolved, and must be British subjects, but require no other qualification. They are paid an indemnity at the rate of \$10 per diem if the Session is less than 30 days, and a maximum amount of \$1,000 for any period over that time. The sum of \$8 per day is deducted for each day a member is absent during the Session, unless such absence is caused Term of office and indemnity.

by illness. They also receive a mileage allowance of 10c. per mile each way.

Qualifica-  
tions of  
Voters.

40. With the exception of the North-West Territories, the qualifications for voting at elections for members of the House of Commons are uniform throughout the Dominion, and are as follow: A vote is given to every male person (including Indians, but excluding persons of Mongolian or Chinese race) who is of the full age of 21 years, is a British subject by birth or naturalization, and is the owner, tenant or occupant of real property of the actual value, in cities, of \$300, in towns of \$200, and in counties or elsewhere of \$150; or is the tenant of any real property within the electoral district of the yearly value of not less than \$2 per month, \$6 per quarter, \$12 per half year or \$20 per annum; or is a resident within any electoral district, having an income derived from earnings or investments of not less than \$300 per annum; or is the son of a farmer or any other owner of real property which is of sufficient value to qualify father and son, or sons as the case may be, or is a fisherman and owner of real property and boats, nets and fishing tackle, or of shares in a registered ship, which together are of the actual value of \$150.; or is a person in receipt of a life annuity secured on real estate in Canada of not less than \$100. Possession or residence for one year is necessary, in most cases, for qualification.

What  
Indians  
may vote.

41. Indians in Manitoba, British Columbia, the District of Keewatin and the North-West Territories are not entitled to vote, and in other parts of Canada only those Indians who, not being otherwise qualified, are possessed of land on a reserve, with improvements of not less value than \$150, are entitled to vote.

Voting in  
N.W.T.

42. In the North-West Territories every person, other than aliens or Indians, is qualified to vote, who is a *bona fide* male resident and householder of adult age, and has resided

in the electoral district for twelve months previous to election.

By special provision, votes are given to persons in British Columbia and Prince Edward Island who, not being within the Dominion franchise, were, at the time of the passing of the Act (20th July, 1885), entitled to vote according to the then existing provincial laws, but only for as long as they shall be so qualified.

Voters in  
British  
Columbia  
and P. E.  
Island

In addition to the Indians mentioned, the judges of the court, whose appointments rest with the Governor General, are disqualified and incompetent to vote at elections for Dominion Parliament. Revising officers, returning officers, election clerks, and all counsel, agents, attorneys and advocates of candidates who may be paid for their services are disqualified from voting in the district in which they have been so engaged, but not elsewhere. The last general election was held in February, 1887, when the number of voters on the lists (except in the Territories, where there are no lists) was 983,599.

What persons  
dis-  
qualified.

Writs for new elections for the House of Commons are issued and made returnable as the Governor General shall determine, the date of the nomination, which shall be named in the writ, being also fixed by him. Within eight days after the receipt of the writ the returning officer shall post at each polling place in the district a proclamation setting forth the dates for the days of nomination and polling, and the latter, in the case of general elections, shall be every second day on the same day (except as is specially provided for in the Districts of Algoma, Ontario, and Cariboo, British Columbia), and of the official declaration of the return of the writ together with a list of the several polling places, such proclamation to be posted up at least eight days before the day fixed for the nomination. The polling day is to be the day after the day of nomination, except as specially

El. ction  
procedure

provided. Voting is by ballot, except in the Territories where it is open. The House of Commons is called together from time to time by the Governor General, but there shall be a Session of Parliament once at least in every year, so that twelve months does not intervene between the sitting of one Session and the first sitting of the next. The Speaker is elected at the commencement of each Parliament by the members from among themselves.

**Privileges  
of Parlia-  
ment.**

46. The privileges of the Senate and House of Commons are defined by the Parliament of Canada, but they may not exceed those enjoyed by the members of the Imperial House of Commons at the time of the passing of the British North America Act in 1867.

**Oath of  
allegiance**

47. Every member, both of the Senate and the House of Commons, must take the oath of allegiance before he takes his seat.

**Money  
bills.**

48. All bills for appropriating any part of the public revenue, or for imposing any tax or impost, must originate in the House of Commons, and must first be recommended by the Governor General. Bills relating to other matters may be introduced in either House. The concurrence of the Governor General, the Senate and the House of Commons is necessary before any measure can become law.

**Authority  
of Parlia-  
ment.**

49. The exclusive legislative authority of the Parliament of Canada, as provided by the British North America Act, extends to all matters connected with the following subjects :—

Public Debt.	Banking.
Trade and Commerce.	Savings Banks.
Taxation.	Weights and Measures.
Borrowing money on public credit.	Bills of Exchange.
Postal Service.	Interest.
Census and Statistics.	Legal Tender.
Militia and Military and Naval Service.	Bankruptcy.
Civil Service.	Patents.

Lighthouses, Buoys, &c.  
 Navigation and Shipping.  
 Quarantine and Marine Hospitals.  
 Sea Coast and Inland Fisheries.  
 Inter-provincial Ferries, and with  
 Foreign Countries.  
 Currency and Coinage.

Copyrights.  
 Indians.  
 Naturalization.  
 Marriage and Divorce.  
 Criminal Law.  
 Penitentiaries.

50. The administration of public affairs is at present divided into the following thirteen departments, viz: Finance, Justice, Public Works, Railways and Canals, Militia and Defence, Customs, Agriculture, Post Office, Marine and Fisheries, Inland Revenue, Interior, Indian Affairs and Department of Secretary of State. Provision has been made by legislation for the amalgamation of the Departments of Customs and Inland Revenue, the new Department to be known as that of Trade and Commerce, presided over by a Minister, designated accordingly, while in the place of the present Ministers of Customs and Inland Revenue two Comptrollers will be appointed, who shall vacate their offices on any change of Government, but shall not, necessarily, have seats in the Cabinet. This arrangement, however, has not yet been carried into effect. Each Department is presided over by a Minister, who may be a member of either the Senate or the House of Commons.

Adminis-  
 tration of  
 public  
 affairs.

51. The Lieutenant-Governors of the several Provinces are appointed by the Governor General. The forms of the Legislatures vary in the different Provinces. Quebec, Nova Scotia, New Brunswick and Prince Edward Island each has two Chambers (a Legislative Council and a Legislative Assembly), and a responsible Ministry. In Ontario, Manitoba and British Columbia there is only one Chamber (the Legislative Assembly), and a responsible Ministry. In Prince Edward Island the members of the Council are elected; in Quebec, Nova Scotia and New Brunswick they are appointed for life by the Lieutenant-Governor. In the North-West Territories there is a Legislative Assembly,

Provin-  
 cial Legis-  
 latures.

composed of twenty-two elected members, and three experts, appointed by the Governor General. There is yet a responsible Ministry. The following are the numbers of the members of the Provincial Legislatures:—

LEGISLATURES.	Legislative Council.	Legislative Assembly.
Prince Edward Island.....	13	
Nova Scotia .....	17	
New Brunswick .....	17	
Quebec.....	24	
Ontario.....		
Manitoba.....		
British Columbia.....		
The Territories.....		

Authority of Provincial Legislatures.

52. The Provincial Legislatures have the exclusive right to legislate on such matters as: the Constitution of the Province, taxation and raising money for provincial purposes, management and sale of provincial lands, establishment and management of prisons, hospitals, and municipal institutions, licenses, local works and utilities, property and civil rights in the Province, administration of justice, education, and general matters of a local or private nature in the Province.

Voters at Provincial elections.

53. The qualifications for voters at elections for Provincial Assemblies are determined by the several Legislatures, and vary accordingly. In the North-West Territories they are determined by the Dominion Parliament.

Naturalization.

54. Any person, an alien, who has resided for three years in this country can, after taking the oath of residence and allegiance before a judge, commissioner or magistrate having the same registered, obtain a certificate of naturalization, and become entitled to the privileges of a British subject. An alien woman when married to a British subject becomes thereby a naturalized British subject.

55. The following is a list of the Governors General of Canada since Confederation, with the dates of their respective appointments:—

Governors  
General  
of the  
Dominion

## GOVERNORS GENERAL OF CANADA SINCE 1867.

NAME.	Date of Appointment.	Date of Assumption of Office.
The Rt. Hon. Viscount Monck, G.C.M.G.....	June 1, 1867...	July 1, 1867
The Rt. Hon. Lord Lisgar, G.C.M.G. (Sir John Young).....	Dec. 29, 1868...	Feb. 2, 1869
The Rt. Hon. the Earl of Dufferin, K.P., K.C.B., G.C.M.G.....	May 22, 1872...	June 25, 1872

## HIGH COMMISSIONER FOR CANADA IN LONDON.

OFFICES—9 Victoria Chambers, London, S. W.

HON. SIR CHARLES TUPPER, BART., G.C.M.G.

SECRETARY—JOSEPH G. COLMER, C.M.G.

## PREVIOUS HIGH COMMISSIONERS.

Name.	Date of Appointment.
Hon. Sir Alexander T. Galt, G.C.M.G.....	May 11, 1880.
Hon. Sir Charles Tupper, G.C.M.G.....	May 30, 1883.
Hon. Sir Charles Tupper, G.C.M.G.....	May 23, 1888.

64. In January, 1887, Sir Charles Tupper resigned the High Commissionership, and came to this country to fill the position of Minister of Finance, which position he resigned in May, 1888, and was re-appointed High Commissioner.

The High Commissioner.

65. A list is given below of the sovereigns and rulers of the principal countries in the world, with dates of birth, titles and dates of assumption of office.

Sovereigns and rulers in principal countries.

66. It will be noticed that the Emperor of Brazil has reigned longer than any other monarch, having succeeded to the throne in 1831, at the age of six years. Queen Victoria comes next, succeeding in 1837, at the age of eighteen years. Since the death of William I, Emperor of Germany, William III of Holland, is the oldest sovereign. The King of Spain is the youngest sovereign in the world.

Oldest and longest reigning Sovereigns.

## CHAPTER II.

## POPULATION AND VITAL STATISTICS.

67. The last census of the Dominion of Canada was taken on the 4th April, 1881, and the following table is a comparative statement of the population at that date, and on 2nd April, 1871, the date of the preceding census:—

Census  
1871 and  
1881.

## POPULATION OF CANADA—1871 AND 1881.

Full particulars of the census of the Dominion in 1881 are found in the Statistical Abstracts for 1885 and 1886.

Census  
N.-W.T.  
1885, Ma-  
nitoba,  
1886.

68. A census of three of the Provisional Districts in the North-West Territories was taken in 1885, when the population was found to be 48,362, and a census of Manitoba was taken in 1886, showing a population of 108,640. Full particulars of these census returns will be found in the Statistical Abstract for 1887.

The popu-  
lation can  
only be  
estimated.

69. No information is available for ascertaining the increase of population since 1881 (except as above mentioned), with any great practical accuracy. The population used in different parts of this work is derived from logarithmical calculations based on census returns, and is believed to be sufficiently near the mark to be of value in the calculations for which it is used; but it will be readily understood that from the absence of returns of births and deaths and from the incessant movement of population, both ways, across the long frontier, of which it is impossible to keep any record, any statement, based on these assumptions, would be probably very much astray.

Progress  
of some  
principal  
cities and  
towns in  
Canada.

70. The following table will give some idea of the increase in population and value of property in some of the principal cities and towns in Canada. Forty-one places were applied to for particulars, but answers were only received from those given below, and thanks are due to the several clerks for furnishing the same. There has been an increase in the aggregate population of the places named, since 1881, of 42.77 per cent., and in the aggregate assessment of 47.41 per cent. The average rate of increase in population in all the cities and towns of the Dominion in 1881 as compared with 1888 was 33.0 per cent. With the exception of Winnipeg, where the increase has of course exceeded all normal rates, the greatest progress has been made by Toronto, the population of this city having increased 116.54 per cent., and the assessment 76.37 per cent.

RESS OF SOME OF THE PRINCIPAL CITIES AND TOWNS IN CANADA, BETWEEN THE YEARS 1881 AND 1888.

notes. † No returns. ‡ Real estate only. †† For year 1887.

The greatest care is taken by the Department of Agriculture in collecting immigration returns and making them accurate as possible, and under ordinary circumstances the returns would be most important factors in determining the increase in population; but standing alone, as they do, without the assistance of any system of ascertaining immigration, or of any system of collection of births and deaths, they are not reliable for that purpose, but at the same time contain much valuable information in themselves.

According to the returns furnished by the Department for 1888, the total number of immigrant arrivals was 174, of whom 85,708 were passengers for the United States and settlers, 1888.

States, while the remaining 88,766 expressed their intentions of remaining in Canada. These figures show a decrease, as compared with 1887, of 1,105 in the total number of arrivals, but an increase of 4,240 in the number of settlers in Canada. The following numbers are those of immigrant arrivals in each of the years named who stated their intentions of settling in Canada:—

## IMMIGRANT SETTLERS IN CANADA. 1880-1888.

1880.....	38,505
1881.....	47,991
1882.....	112,458
1883.....	133,624
1884.....	103,824
1885.....	79,169
1886.....	69,152
1887.....	84,526
1888.....	88,766

**Settlers in the North-West, 1888.** 73. The total number of persons reported as having gone into Manitoba and the North-West was 40,937, and 11,338 are said to have gone out, leaving a net settlement of 29,604 persons, which was an increase, as compared with 1887, of 7,919.

**Land settled upon in Manitoba, 1888.** 74. According to statistics collected by the Commissioner of the Hudson's Bay Company at Winnipeg, upwards of 600,000 acres of land were actually settled upon in Manitoba in 1888, the great bulk having been taken up in quarter-sections of 160 acres. This would mean that nearly 4,000 farmers have settled upon land in Manitoba during the past year, which, at the moderate estimate of three to a family, would mean an increase from this source alone of 12,000 souls.

**Discontinuance of assisted passages.** 75. No assisted passages were granted since 27th April, 1888, and while it is probable that considerable numbers were kept back who would have come at the cheaper rate, it is evident, from the figures given above, that the discontinuance of the policy did not materially check immigration, and the class of immigrants was decidedly above the

re. The average rate of passage during the year was £19.46, the previous assisted rate having been £4.60.)

The nationalities of the immigrants arriving at the ports of Quebec and Halifax were as follow :—

Nationalities.	Quebec.	Halifax.	Total.
.....	13,211	13,519	26,730
.....	1,809	754	2,563
.....	3,752	1,328	5,080
.....	403	749	1,152
Scandinavians.....	8,038	790	8,828
Irish and Belgians.....	255	1,014	1,269
Other countries.....	1,062	1,435	2,497
<b>Total.....</b>	<b>28,530</b>	<b>19,589</b>	<b>48,119</b>

Nationalities of immigrants.

It will be seen that Scandinavians still continue to arrive in large numbers, and they form a very desirable class of immigrants.

The nationalities of the numbers reported in each Province and Territory are given below :—

Provinces.	English.	Irish.	Scotch.	German.	United States.	Canadian.	Others.	Total.
.....	1,011	386	360	420	2,021	5,381	331	9,910

Ontario.....	134	.....	23	.....	65	584	63	869
New Brunswick.....	121	28	9	5	90	662	49	964
.....	126	18	38	21	63	150	230	646
Columbia.....	291	19	26	19	118	90	69	632
.....	35	6	35	.....	13	77	5	171
<b>Total.....</b>	<b>2,297</b>	<b>635</b>	<b>548</b>	<b>583</b>	<b>3,097</b>	<b>21,369</b>	<b>3,140</b>	<b>31,660</b>

The arrivals with settlers' goods, as reported by the Customs officials, showed an increase of 1,838 as compared with the previous year.

Customs arrivals.

with 1887, and the number of those, chiefly children, brought into Canada last year by charitable societies and individuals was 1,622, being 676 less than in the previous year. The following are the numbers brought out in this way during the last six years :—

	Number.
1883.....	1,218
1884.....	2,011
1885.....	1,746
1886.....	1,988
1887.....	2,298
1888.....	1,622

Arrivals  
by sea.

78. All the immigrants by sea arrived in steamers sailing vessels not having been for some years used for this purpose.

Difficulty  
of obtain-  
ing cor-  
rect re-  
turns.

79. The numbers of immigrants reported by the agents and by the Custom houses may be taken to be correct as far as they go, but there are not any means of ascertaining with accuracy the arrivals and departures from and to the United States. Where there is such a long line of open frontier there must always be a considerable movement of population on both sides, of which it is impossible to obtain any record. The nearest possible approximation would be to obtain a record of the *ins* and the *outs* on the principal routes of travel, the differences between which would be the net immigration or emigration, as the case may be.

Uncer-  
tainty of  
immigra-  
tion re-  
turns.

80. It is only possible to form a general idea of the numbers that yearly settle in each Province; the agents have no means at their command by which they can follow the immigrants after they once leave the agency, and the subsequent movements of many would probably considerably alter the figures given. The greatest care is taken by the Department and by the agents that all the returns shall be as accurate as possible, but the only ones that can be

thoroughly relied on, except the entries at Custom houses, which are a registration by names, are those of arrivals at the principal sea ports, as Quebec and Halifax, which are also a registration by names and callings, from the ships' passenger lists. No distinction is made in British Columbia between passengers and immigrants, and the figures for that Province can only be arrived at by estimation. The numbers of immigrants reported by the several agents, while correct in themselves, are subject to subsequent unascertainable movements, and should, therefore, be taken as approximate. The figures from which the totals for the Dominion are made up are those supplied by the agents at the various points of entrance, and are, therefore, of course, liable to similar alterations, for while a record is kept of all immigrants arriving, no account is taken of those emigrating from the country.

81. A comparative statement of the values of money and effects brought into Canada by immigrants during the years 1886, 1887 and 1888, according to the reports from the various agencies, is given below, to which is added the amount of money brought in by other arrivals reported by Custom houses :—

	1886.	1887.	1888.
Reported at Agencies.....	\$2,458,241	\$2,731,005	\$2,594,112
“ Customs.....	997,335	1,148,903	1,180,343
<b>Total.....</b>	<b>\$3,455,576</b>	<b>\$3,879,908</b>	<b>\$3,774,455</b>

Value of  
money  
and effects  
brought  
in by set-  
tlers.

And an examination of the following comparative table will show that the value of money and effects brought in by immigrants is a very important addition every year to the wealth of the country :—

VALUE OF MONEY AND EFFECTS BROUGHT INTO CANADA BY  
SETTLERS SINCE 1875.

	Value.
1875.....	\$1,344,573
1876.....	686,205
1877.....	632,269
1878.....	1,202,563
1879.....	1,152,612
1880.....	1,295,565
1881.....	4,188,925
1882.....	3,171,501
1883.....	2,784,881
1884.....	4,814,872
1885.....	4,143,866
1886.....	3,455,576
1887.....	3,879,908
1888.....	3,774,455

It must be remembered, however, that the means for obtaining information of this kind is very defective, and there can be little doubt that the actual value is considerably above the amount reported.

Occupations of immigrants.

82. The trades and occupations of the immigrants landed at Quebec and Halifax were as follow :—

	Quebec.	Halifax.	Total.
Farmers.....	1,469	2,098	3,567
Labourers.....	11,956	6,032	17,988
Mechanics.....	998	637	1,635
Clerks and Traders.....	70	263	333
Female Servants.....	No returns	1,659	1,659
	<u>14,493</u>	<u>10,689</u>	<u>25,182</u>

Demand for female help.

83. The various immigration agents report that the demand for female domestic and farm servants continues to increase, and the present supply is very inadequate to meet it. Persons of these classes, and also farm labourers, may emigrate with confidence that they will find situations on arrival.

84. The total expenditure in 1888 was \$182,951, and in 1887, \$313,773; there was the large decrease, therefore, in the year under consideration, of \$120,822.

85. The cost of settlers per head, not including arrivals reported through the Customs, was \$3.96, and including arrivals so reported, was \$2.55; the figures for the preceding year, 1887, being \$5.74 and \$3.96 respectively. The following table shows the cost per head of settlers since 1875:—

YEAR.	NOT INCLUDING CUSTOMS.		INCLUDING CUSTOMS.	
	Settlers.	Amount.	Settlers.	Amount.
		\$ cts.		\$ cts.
1875 .....	19,243	14 00	27,382	10 83
1876 .....	14,499	19 60	25,633	11 12
1877 .....	15,323	12 00	27,082	6 78
1878 .....	18,372	9 63	29,807	6 23
1879 .....	30,717	5 74	40,492	4 35
1880 .....	27,544	6 59	38,505	4 71
1881 .....	32,587	6 32	49,991	4 30
1882 .....	81,904	4 23	112,458	3 08
1883 .....	98,631	4 26	133,624	3 15
1884 .....	68,633	6 28	103,824	4 15
1885 .....	46,868	6 62	79,169	3 92
1886 .....	43,875	6 87	69,152	4 36
1887 .....	54,704	5 74	84,526	3 71
1888 .....	57,106	3 96	88,766	2 55

And it will be seen that the average cost per head is considerably less than it was some years ago.

86. According to Mr. Mulhall ("Fifty Years of Progress," p. 12) the number of persons who have emigrated from the United Kingdom during the fifty years of Her Majesty's reign has been 9,101,000, and their destinations have been as follow:—

United States.....	5,902,000
Australia.....	1,484,000
Canada.....	1,311,000
Cape, &c.....	404,000
	9,101,000

Emigration from United Kingdom, 1837-1887.

By far the largest proportion, viz., 64·85 per cent., went to the United States, and a slightly larger number went to Australia than came to Canada, the proportions being 16·30 per cent. and 14·40 per cent., respectively. Mr. Mulhall says that the components of the above number were :—

Irish.....	4,186,000
English.....	4,045,000
Scotch.....	870,000
	9,101,000

Area of Canada.

87. The area of Canada is estimated to contain 3,610,257 square miles. It is the largest of all the British possessions, embracing very nearly one-half of the whole Empire. The continent of Australia is the next largest, having an area of 2,944,628 square miles, and the area of Tasmania and New Zealand added to this makes the total area of the Australasian Colonies 3,075,030, or 535,227 square miles less than that of Canada. The total area of the British Empire is 7,999,618 square miles. The combined area, therefore, of Canada and the Australasian Colonies comprises very nearly seven-eighths of the whole Empire.

Area of Europe and Canada compared.

88. The area of the whole continent of Europe is 3,756,002 square miles. It is therefore only 145,745 square miles larger than the Dominion of Canada.

Area compared with Great Britain and United States.

89. The area of Great Britain and Ireland is 121,115 square miles, so that Canada is nearly thirty times as large as the whole of the United Kingdom. It is 600,000 square miles larger than the United States without Alaska, and about 18,000 square miles larger than both combined.

Area of the world.

90. The estimated area of the world is 52,511,004 square miles, and its estimated population 1,433,887,500. Canada, therefore, covers rather more than one-fourteenth part of this surface, but contains only about one two hundred and eighty-sixth part of the estimated population.

91. The following are the areas of the several Provinces and Districts. Areas of the Province, &c.

	Square Miles.
Ontario.....	181,800
Quebec.....	188,688
Nova Scotia.....	20,907
New Brunswick.....	27,174
Manitoba.....	60,520
British Columbia.....	341,305
Prince Edward Island.....	2,133
District of Keewatin.....	about 400,000
“ Alberta.....	“ 100,000
“ Assiniboia.....	“ 95,000
“ Athabasca.....	“ 122,000
“ Saskatchewan.....	“ 114,000
Remainder of the Territories.....	1,816,730
	3,470,257
Great lakes, rivers, &c., not included in above areas .....	140,000
	3,610,257

The area of the Province of Manitoba was originally 123,200 square miles, but a large portion was added to the District of Keewatin and to Ontario in 1883. The areas of the Provinces of Ontario and Quebec can only be considered as approximate, the northern boundaries of both Provinces not having yet been exactly defined. It will be seen that Canada has an area of inland water surface which is alone 18,885 square miles larger than the combined area of Great Britain.

92. Prince Edward Island is the smallest of all the Provinces, but is more than twice as thickly populated as any other Province, the proportion being 51.0 persons to the square mile. Nova Scotia comes next in density of population, with 21.0 persons. The following is the order in which the Provinces stand, according to density of population :

- |                       |                   |
|-----------------------|-------------------|
| Prince Edward Island, | Qubec,            |
| Nova Scotia,          | Manitoba,         |
| New Brunswick,        | British Columbia. |
| Ontario,              |                   |

Popu-  
lation and  
areas of  
British ;  
Posses-  
sions.

93. The following table, compiled principally from official sources, gives the population and area of the United Kingdom and its possessions, according to the latest available information :—

PART II.—VITAL STATISTICS.

---

Collec-  
tion of  
vital  
statistics.

96. Twenty-six towns made returns of mortuary statistics for the year 1887, and with the exception of certain figures collected by the Provincial Government, with more or less accuracy, these returns are the only means of information respecting the urban rate of mortality in Canada that are available, and they, moreover, comprise the only vital statistics of any nature collected by the Dominion Government, except such as are obtained at the taking of each census, and except those statistics of the French population of Quebec, which are taken by the Roman Catholic Church.

Deaths in  
certain  
towns in  
Canada.

97. The following table gives the number of deaths in twenty-six cities and towns in Canada, together with the ratio per 1,000 deaths at different ages. The figures are taken from the mortuary statistics, and, while fairly correct, must be accepted with a certain amount of reserve :—

POPULATION AND VITAL STATISTICS.

DEATH RATE IN SOME OF THE PRINCIPAL CITIES AND TOWNS IN CANADA, 1887.

CITIES.	Total Deaths.	Ratio per 1,000 of Population.	RATIO PER 1,000 DEATHS AT					Ages not given.
			1 to 5 years.	5 to 20 years.	20 to 40 years.	40 to 60 years.	Over 60 years.

98. Four new places, viz., Victoria, B.C., Brantford, Woodstock and Hull made returns in 1887. The heaviest death rate in the table was that of Hull, viz., 41.91 per 1,000 inhabitants, this very high rate being caused by excessive infant mortality, out of a total number of deaths of 503 not less than 385 being children under five years of age. Sorel, which had a death rate of 44.88 in 1886, stood second on the list with 35.89. Diphtheria and throat diseases were again extremely prevalent there, 35 per cent. of the deaths

Death rates compared.

having occurred from these causes, the proportion last year having been 30·36 per cent. The death rate in Montreal showed a marked increase, having risen from 27·99 in 1886 to 30·74 in 1887, principally owing to an increase in infant mortality. The healthiest places were apparently Chatham and Charlottetown, but the rates are so exceedingly low, 11·86 and 11·98, respectively, that it may well be doubted whether they represent complete returns.

Deaths of children.

99. The largest number of deaths are of course among children, but the rate in some places was much higher than it ought to have been, as can be seen from the preceding table. The highest rates will be found in places with a large French population; but it must also be remembered that among these French Canadians there is a correspondingly high birth rate. Out of a total number of deaths recorded of 17,522, 8,922, or 50·92 per cent. were of children under five years of age, and 5,793, or 33·06 per cent., of those under one year. This latter proportion was slightly smaller than in 1886, when it was 34·54 per cent. The four most fatal diseases to children under one year were, as before: atrophy and debility, 1,554; diarrhoeal affections, 1,475; diseases of the respiratory organs, 530; and premature birth, 325; making an aggregate of 3,884 deaths, or 67·04 per cent. of the total number. The proportion last year was 66·15 per cent.

Deaths of illegitimate children.

100. The number of deaths of illegitimate children returned was 996; but, as has been pointed out before, returns of this nature are practically at present of no value, and the natural desire for concealment on the part of the parents will always render it extremely difficult to obtain anything like correct returns. The fact that out of the whole number, 868, or 87 per cent., were returned from Montreal, Ottawa and Quebec, where there are special institutions for the reception

of illegitimate children, leaving only 128 to be divided among 23 towns, shows at once what little real truth there is in the figures. Out of the total number 45·78 per cent. were under one month and 87·35 per cent. under one year. There were no deaths of this description returned from the city of Hull, but the proportion of deaths of children under five years of age was no less than 689·86 per 1,000 deaths. According to Dr. Playter, "it is universally conceded by sanitarians that the mortality in the young affords the best indication of the degree of salubrity or sanitary condition of a locality." The number of cases of children still-born returned was 883.

101. The deaths from suicide reported amounted to 30, 19 being males and 11 females, 14 out of the 30 having occurred in Montreal and Toronto. The number returned in 1886 from 22 cities was 31. Deaths from suicide.

102. The following table gives the number of deaths from the eight most fatal diseases in the 26 cities making returns in 1887. As will be seen from the arrangements at the foot of the table, the order of fatality is slightly different from that of the preceding year. The most fatal disease is placed first:— Deaths from most fatal diseases.

## DEATHS FROM THE MOST FATAL DISEASES, 1887.

Atrophy and debility.	Atrophy and debility.
Diarrhœal affections.	Diarrhœal affections.
Lung diseases.	Phthisis.
Phthisis.	Lung diseases.
Cerebro-spinal affections.	Diphtheria.
Diphtheria.	Cerebro-spinal affections.
Throat affections.	Diseases of heart and blood vessels.
Diseases of the heart and blood vessels.	Throat affections.

Deaths of children from certain diseases.

103. Of the total number of deaths from atrophy and debility and diarrhœal affections 66·70 per cent. and 74·91 per cent., respectively, were of children under one year of

age. The proportion of deaths of children from diarrhœal affections remained about the same, since out of a total number of deaths of 1,969 from this cause, 1,872, or 95.07 per cent., were of children under five years of age, as compared with 95.77 per cent. in 1886,

104. Exclusive of the four new towns making returns, there was an increase of 54 in the number of deaths from phthisis, and a decrease of 28 in those from lung diseases, so that in the number of deaths from all kinds of affections of the lungs in the same 22 cities in 1886 and 1887 there was only an increase of 26, which figures compare favourably with those of 1886, when there was an increase of 200 deaths in 19 cities.

Deaths from phthisis and lung diseases.

105. There was an increase of 181 in the number of deaths from diphtheria, but this was owing to the alarming number of deaths in Montreal, the fatality from this disease having increased in this city 109 per cent. during the year, the numerical increase being 256. It would appear, however, that with the exception of Montreal there was an actual decrease in deaths from this cause. Diphtheria is particularly fatal to children, and out of 1,169 deaths, 1,065 or 91.10 per cent., were of children under 11 years of age. Without taking in the four new towns making returns, there was, as predicted last year, a large increase in the number of deaths from typhoid fever. Typhus fever is still classified with typhoid and enteric fevers, but typhus being practically unknown in this country, any deaths under this head may fairly be put down to typhoid. As pointed out last year \* the difference between them (typhus and typhoid) has for a long time been thoroughly well established, and it would be advantageous to treat them as what they are, separate and distinct diseases. Typhoid fever is a disease essentially the outcome of want of cleanliness or improper sanitary arrange-

Deaths from diphtheria.

From typhoid fever.

\*Statistical Abstract, 1887, p. 115.

ments, and is strictly a preventable disease ; and it is apparent that the proper amount of care and precaution is not yet exercised, either individually or by the authorities, that is required to reduce the danger from this disease almost to a minimum, which the experience of other countries proves can be done.

Deaths from typhoid fever in certain cities.

Peterboro' .....	0·69	Halifax .....	0·15
Sherbrooke .....	0·68		

The proportion of deaths in the aggregate population of the 26 cities making returns was 0·55 per 1,000 persons living.

107. The proportion of deaths from zymotic or specially preventable diseases to the total number of deaths was 23·71 per cent., or very nearly one-fourth, and the proportion to the aggregate population was 0·55 per cent., or 5·53 per 1,000 persons living ; and the following table shows how they were distributed among the various cities. To what an extent these diseases can be subdued by proper sanitary measures is shown by the figures for the city of London in 1887. Whereas the above mentioned figures relate to an aggregate population of only 751,670, it appears from the Fiftieth Report of the Registrar-General of England that in London with a population of 4,300,000, the number of deaths in 1887 from typhoid fever was only 0·14 of the population, and of deaths from zymotic diseases 0·53 per cent., or 3·30 per 1,000 living, and in proportion to the total number of deaths, 17·27 per cent.

## CHAPTER III.

## FINANCE.

The fiscal year.

109. The fiscal year of the old Province of Canada used to be identical with the calendar year, and terminate on the 31st December; in 1864, however, a change was made, and it was decided to commence the fiscal year on the 1st July and end it on the 30th June. At Confederation the same plan was adopted for the Dominion, and has since been maintained. As, therefore, all financial and commercial returns, and, as a general rule, departmental reports, are made up to the 30th of June in each year, the fiscal year beginning on the 1st July and ending on the 30th June, is the one spoken of and referred to throughout this work, except where specially mentioned.

Conversion of foreign currency.

110. In all cases where figures relating to foreign countries have been used their values have been first changed into pounds sterling, and then converted into currency at the rate of \$4.8666. For the sake of convenience, cents have been omitted from most of the tables, and only used with reference to amounts per head, and similar calculations.

111. The receipts from the sources of the ordinary revenue of the country are paid into what is called the Consolidated Fund, and payments thereout are made to cover the ordinary expenses. These receipts and payments therefore constitute what may be considered as the regular income and expenditure of the country, and the figures relating thereto are among the principal indicators of its financial and commercial condition.

Consolidated Fund.

112. The ordinary revenue is derived from a variety of sources, which may, however, be divided into two classes, viz., "Taxation" and "Other sources." The amounts raised by taxation consist solely of Customs and Excise duties, and those raised from Other Sources consist of money derived from the postal service, railways, public works, &c. The ordinary expenditure provides for the charges for debt and provincial subsidies, charges on revenue, and the current expenses of the country.

Sources of revenue.

113. The following figures give the ordinary revenue and expenditure for the year ended 30th June, 1888:—

Revenue and expenditure, 1888.

Revenue.....	\$35,908,463
Expenditure.....	36,718,495
Expenditure in excess of revenue..	\$ 810,032

114. The revenue was \$153,470 in excess of that of the preceding year, and there was an increase in the expenditure amounting to \$1,060,815. The increase in revenue was derived entirely from receipts from various sources, there being a decrease in the receipts from Customs duties of \$272,875 and from Excise duties of \$236,714. The increase in expenditure will be found to be general, under the various heads, with the exception of Legislation, where there was a decrease of \$169,878.

Increase and decrease.

115. The following table gives the receipts and payments on account of the Consolidated Fund—that is, the ordinary revenue and expenditure of the country—for the last 21 years, and shows the surplus or deficiency in each year.

The Consolidated Fund, 1868-1888.

1888.....	35,908,463	36,718,495		810,032

Surplus  
and deficit  
of reve-  
nue.

116. In thirteen years out of the twenty-one that have elapsed since Confederation there has been a surplus of revenue, and in the remaining eight an excess of expenditure. The total amount of surplus during the period has been \$30,375,863, and of deficit \$16,854,848, being a net excess of revenue over expenditure of \$13,521,015. The revenue raised in 1888 was the largest ever raised, and was \$22,220,585 in excess of that of 1868, the first year after Confederation, being an increase of 162 per cent. After deducting the war expenditure from the expenditure of 1886 (in that year it was charged to the Consolidated Fund and subsequently to capital account) it will be seen that the ordinary expenditure was the largest since Confederation, exceeding that of 1868 by \$23,282,402, being an increase of 172 per cent. The

expenditure has therefore increased in a somewhat larger proportion than the revenue, but when the difficulties and expenses attending the opening up of new country are considered, it will be seen to be inevitable that at the beginning the expenditure should increase in faster proportion than the revenue, and in connection with the increase in expenditure the large extent of additional territory brought under control since Confederation must not be overlooked.

117. The following is a detailed comparative statement of the various receipts on account of the Consolidated Fund from all sources in the years 1887 and 1888, showing the increase or decrease in each item :—

Increase and decrease under various heads.

118. As previously stated, the increase in revenue was derived entirely from receipts from Other Sources, and the amount realized under this head had only been exceeded once before, viz., in 1886, by \$219,535. There was an increase in receipts from railways of \$327,819 as compared with \$210,409 in 1887, but there were decreases under all the other branches of public works. The revenue derived from

the Post Office was materially larger, showing an increase of \$358,667 as compared with an increase of \$111,907 in 1887, but there was a decrease in revenue from money orders of \$48. The decrease of \$13,267 in telegraph receipts was due to the fact of the British Columbia lines having been taken over by the Canadian Pacific Railway Company, and these lines were the only ones belonging to the Government the revenue from which exceeded the expenditure thereon. The decrease also in interest on investments was large, amounting to \$58,862.

119. The following is a comparative statement of the principal items of ordinary expenditure in the years 1887 and 1888. Heads of expenditure.

NOTE.—The items of exceptional expenditure are printed in italics.

Increase  
and de-  
crease of  
expendi-  
ture under  
various  
heads.

120. There was an increase of \$140,384 in the amount of interest paid on the public debt, and of \$9,604 in the charges of management, and in the total charges for debt and subsidies of \$561,531. The amount of investments for sinking funds was larger by \$346,125 than in the preceding year; this fund, it will of course be remembered, consists of money set aside for the redemption of the public debt, and is therefore, though entered as an expenditure, practically a reduction of liability. There was a decrease in the amount expended for legislation of \$169,878, principally under the heads of Election Expenses and the Franchise Act. There was an increase of \$46,767 in the amounts expended for civil government, the principal changes being an increase of \$13,965 in the Post Office, of \$7,643 in the Department of the Interior, and of \$5,906 in that of Marine and Fisheries.

The total increase of expenditure on public works was \$28,800, the largest item being \$128,043 on harbours and rivers. The total increase in other expenditure amounted to \$275,469. The expenditure for the Experimental Farm, including buildings, amounted to \$150,491. The exceptional expenditure, viz., for the Colonial Exhibition and the Imperial Institute, was \$141,017.

121. There was a total increase of \$413,737 in charges on revenue, the largest being under the heads of Railways and Post Office, and in the expense of collecting the Customs and Excise duties. There was a slight increase in the total cost of collection of revenue in 1888 as compared with the two preceding years, the proportion to the revenue collected being in 1886, 21·79 per cent., in 1887, 23·49 per cent., and in 1888, 23·93 per cent.

122. There was a decrease of \$379,491 in the amount of subsidies authorized by Parliament, paid to railways, the total amount paid being \$1,027,042, as follows:—

Albert Southern Railway.....	\$ 18,429
Baie des Chaleurs " .....	50,300
Buctouche and Moncton Railway.....	20,573

	\$1,027,042

Charges  
on and  
collection  
of  
revenue.

Particu-  
lars of  
subsidies  
to rail-  
ways.

Expenditure on subsidies and capital account.

123. The total amount of subsidies voted by Parliament towards the construction of railways, on which payments have been made or liabilities still exist, was, on the 1st November, 1888, \$10,918,665 ; of this amount the sum of \$4,558,533 had been already paid, leaving \$5,289,753 still due, \$1,070,379 not having been earned, owing to over-estimate of mileage or forfeiture by lapse of time. The above amount of \$10,918,665 had been voted among 85 companies, but as, on the 1st November, 1888, no contracts had been entered into by 26 companies, it is not at all probable that the full amount will ever become payable. In addition to the above money subsidies, grants of land have been made to 11 companies in Manitoba and the North-West Territories, amounting to 19,787,744 acres, of which quantity 81,058 acres have been patented. The average grant was 6,400 acres per mile, and the estimated number of miles subsidised was 2,908. A loan was also authorized to one company, in 1886, of \$15,000, of which \$14,548 have been paid and \$452 are still due. Under the provisions of an Act passed during the Session of 1888, 11,316 tons of used rails were loaned to seven different companies under certain conditions. The total amount paid on Capital Account was \$4,680,793, or, less the contribution of the Imperial Government of \$243,333 for the Esquimalt Graving Dock, \$4,437,460, or \$2,479 less than in 1887. The amount was made up as follows :—

Canadian Pacific Railway.....	\$ 52,099
Cape Breton .. .. .	689,451
Carleton Branch .. .. .	504
Intercolonial .. .. .	742,203
Oxford and New Glasgow Railway.....	280,332

Dominion Lands.....	135,048
North-West Rebellion Losses.....	539,930
	<hr/>
	\$4,680,793
Less Contribution of Imperial Government for Esqui-	
malt Graving Dock.....	243,333
	<hr/>
	\$4,437,460

24. The sum of \$300,770 was laid out in investments, Investments. a decrease of \$354,665 as compared with 1887. The investments were as follows :—

Albert Railway Company.....	\$ 3,112
Quebec Harbour Commission.....	22,711
Fredericton and St. Mary's Bridge Railway Company...	274,947
	<hr/>
	\$ 300,770

25. The total expenditure on capital account and sub- Total ex-  
penditure  
on capital  
amount  
and rail-  
way sub-  
sidies. sides to railways, together with the sums invested as above, amounted to \$5,765,272, being a decrease of expenditure under these heads, as compared with the preceding year, of \$6,635. The subsidies to railways authorized at the last session of Parliament amounted to \$946,700, as compared with \$2,187,600 voted at the previous Session, being a decrease of \$1,240,900, and on 1st November, 1888, in one only had contracts for construction been signed.

26. The revenue for 1888 was estimated at \$36,000,000, Estimated  
revenue  
and ex-  
penditure,  
1888. which was \$91,537 more than the amount actually realized, but the expenditure, including Supplementary Estimates, was put at \$37,072,707, which was \$354,212 more than was expended.

27. Silver and copper were imported during the year at Silver and  
copper  
imported. a profit of \$75,826, which was \$2,939 more than the total expenditure of the Finance Department, including contingencies.

28. The several amounts received and expended under Heads of  
revenue  
and ex-  
penditure,  
1867-1888. principal heads of ordinary revenue and expenditure in the year since Confederation are given in the following table :—

Manitoba, not included in estimated population until 1871.  
 British Columbia, " " 1872.  
 Prince Edward Island, " " 1874.  
 The Territories " " 1881.

130. Though the revenue was the largest raised since Confederation, the amount per head was less than in the years 1887, 1888 and 1882 by 11 cents, 70 cents and 32 cents respectively, and the expenditure per head was 7 cents more than in 1887, and with the exception of 1886 and 1885, was in advance of any other year in the table.

Provincial revenues and expenditures, 1887.

131. The following table gives the revenues and expenditures of the several Provinces for the year 1887, with the amount of each per head of population respectively. The total receipts and payments are given in each case :—

REVENUES AND EXPENDITURES OF THE PROVINCES IN CANADA, 1887.

Provinces.	Revenue.	Per Head.	Expenditure.	Per Head.
	\$	\$ cts.	\$	\$ cts.

\*31st December, 1887.

†30th June, 1887.

Excess of Provincial revenue or expenditure.

132. The expenditure exceeded the revenue in four out of the seven Provinces, the excess being largest in British Columbia. The revenue was highest in proportion to population in Manitoba, and lowest in Nova Scotia; the expenditure was also lowest in Nova Scotia, but highest in British Columbia. Revenue exceeded expenditure in Ontario, Quebec and New Brunswick.

Revenues in Australasian colonies.

133. The following statement gives the revenues and expenditures in the United Kingdom and British Possessions, principally in the year 1887, with the proportion of each per head of population :—

Revenues  
in Austra-  
lasian  
Colonies.

134. The expenditure exceeded the revenue in 25 out of the 36 countries and colonies named in the list, but the total revenue was \$1,021,822 in excess of expenditure. In proportion to population, both the revenues and expenditures of the Australasian Colonies, are very high, the chief explanation of which is that "a considerable revenue is derived from the usufruct of the unsold lands, which is not generally the case elsewhere; the revenues also are swelled by the large sums which are received annually from the alienation of Crown Lands, and from the working of the State railways." \* "The practice of treating money derived from the sale of Crown Lands as revenue obtains in all the Australian Colonies, and the money so raised forms one of the largest items of their annual income." † Canada will undoubtedly in a few years be deriving a large revenue from the sale of Dominion Lands, provided that the practice of treating such moneys as revenue will be in force, but all the principal railways are in the hands of private companies. Both in India and Cape Colony, as well as in Australasia, the railways are principally owned by the Government, producing a corresponding difference in the amount of revenue.

Revenues  
and ex-  
pendi-  
tures in  
foreign  
countries.

135. The ordinary revenues and expenditures in some of the principal foreign countries, as nearly as they could be ascertained, have been given in the following table :—

---

\* Victorian Year Book, 1884-5, p. 131. † Wealth and Progress of New South Wales, p. 383.

## REVENUES AND EXPENDITURES IN FOREIGN COUNTRIES.

\* Not including the revenues and expenditures of the several States.

France has both the largest revenue and the largest expenditure of any country in the world, considerably exceeding that of the United Kingdom. In 1887 it will be seen that the two amounts were almost identical, the proportion per head of population being the same; the same remark applies to Japan. Expenditure was in excess of revenue in eleven out of the eighteen countries about which particulars are given.

136. As stated above in paragraph 112, the sources from which the ordinary revenue is derived may be divided into two classes, viz., 1, Taxation; 2, Other Sources. And the

Amount derived from taxation and other sources.

following figures give the amount raised in each class in 1888 :—

Revenue raised by taxation.....	\$28,177,413
"    "    from other sources .....	7,731,050
Total.....	<u>\$35,908,463</u>

Receipts  
from tax-  
ation.

137. As compared with the preceding year, there was a decrease in receipts from taxation of \$509,589 and an increase from other sources of \$663,059, and of the total revenue 78·47 per cent. was derived from taxation, as against 80·23 per cent. in 1887. The receipts from taxation being derived solely from Customs and Excise duties, it follows, in the absence of any extreme increase in the tariff, that the more prosperous the country, and the larger its trade, the greater will be the amount derived from taxation, and as the largest part of the revenue is obtained in this manner, in the years of the largest revenues the amount of taxation per head of population will also be found to be largest. It will be seen, however, that in 1882, when the amount derived from taxation was \$628,367 less than in the year under review, the amount paid per head was 55 cents more, and it will also be noticed that the proportion of revenue raised by taxation in these days of a protective tariff is not so large as it was in the years when a revenue tariff was in force.

Amounts  
raised by  
taxation,  
1868-1888.

138. The following table gives the amount raised by taxation in each year since 1st July, 1867, also the average amount of such taxation paid per head of population, and the proportion of total revenue :—

## TAXATION—1868 TO 1888.

YEAR ENDED 30TH JUNE	TAXATION				Percentage of Total Revenue
	Gross Amount.	Increase.	Decrease.	Average per Head.	
	\$	\$	\$	S cts	
1868.....	11,700,681			3 47	85.48
1869.....	11,112,573		588,108	3 26	77 28

1877.....	17,697,924		916,491	4 41	80.23
1878.....	17,841,938	144,014		4 37	79 74
1879.....	18,476,613	634,675		4 46	82.05
1880.....	18,479,576	2,963		4 38	79.29
1881.....	23,942,138	5,462,562		5 51	80.79
1882.....	27,549,046	3,606,908		6 22	82 32
1883.....	29,269,698	1,720,652		6 48	81.77
1884.....	25,483,199		3,786,499	5 53	79.98
1885.....	25,384,529		98,670	5 40	77.39
1886.....	25,226,456		158,073	5 26	76.03
1887.....	28,687,002	3,460,546		5 88	80.23
1888.....	28,177,413		509,589	5 67	78.47

139. The largest amount derived from taxation in any one year during the period was in 1883, when the amount was \$582,696 in excess of that of 1887, in which year, however, the next largest amount was raised; the smallest amount raised was in 1869, viz., \$11,112,573, or \$16,476,732 less than in 1888. Comparing the first and last years of the above period of twenty-one years, it will be found that while the total receipts have increased 140 per cent. the amount paid per head of population has only increased 63 per cent., while the proportion to total revenue has decreased 7.01 per cent. No change of any consequence was made in the tariff during the Session of 1888.

140. The following table gives the amounts raised from Customs and Excise duties during the last twenty-one years, together with the proportion of each to population:—

Amounts raised by Customs and excise duties, 1868-1888.

## TAXATION BY CUSTOMS AND EXCISE DUTIES, AND PROPORTION TO POPULATION—1868-1888.

YEAR ENDED 30TH JUNE.	Customs.	Amount per Head.	Excise.	Amount per Head.
	\$	\$ cts.	\$	\$ cts.
1868.....	8,578,380	2 54	3,002,588	0 89
1869.....	8,272,879	2 42	2,710,028	0 79
1870.....	9,334,212	2 70	3,619,622	1 05
1871.....	11,841,104	3 36	4,295,944	1 22

1887.....	22,378,801	4 59	6,308,201	1 29
1888.....	22,105,926	4 44	6,071,487	1 22

Proportion derived from Customs.

141. It will be seen that considerably the largest part of the whole amount of taxation is derived from Customs duties, the proportion in 1887 and 1888 being 78 per cent., in 1886 it was 76 per cent., in 1885, 74 per cent., and in 1884 78 per cent. This is a larger proportion than in either the United Kingdom and most of the colonies, or in many European countries and United States.

Collection of Customs revenue.

142. The expenses of collection of Customs revenue were only 3.84 per cent. of the amount realized, a slightly higher proportion than that in 1887, but considerably lower than the average since Confederation, which has been 4.65 per cent. The fact, however, that the expenses of collection in 1868 were 5.99 per cent. of the sum received, shows that the proportion does not always increase with the amount,

and that it relatively costs more to collect a small Customs revenue than a large one. Considering the large area of the Dominion, and the length of its frontiers, together with the large number of ports of entry it is necessary to keep up, the cost of collection must be considered as being moderate. In the United Kingdom in 1888 it was 4.76 per cent.

143. There being no system of direct taxation in this country, and the use of articles on which Excise duties are collected being to a very large extent optional, it follows that the Customs duties alone form that part of the general taxation of which everyone must pay a share, and it will therefore be satisfactory to notice from the foregoing table that the proportion of increase in receipts from Customs duties has been far larger than that of population, showing that the ability to purchase has increased in much greater ratio than the burden of taxation, the increase in the receipts from Customs being 157 per cent. since 1868, and in the amount per head 75 per cent. Indirect  
taxation.

144 In the United Kingdom in 1888 the proportion per head was \$2.55, in the United States in the same year it was \$3.65, in both cases being a smaller proportion than in this country, while in some of the Australian colonies it was very much higher; for instance, in New South Wales it was \$10.04, in New Zealand \$10.86, and in Queensland \$15.27 per head. These latter figures are for 1887. Customs  
duties per  
head in  
some fo-  
reign  
countries.

145. The following are statements for the last twenty-one years of the amounts received from the principal heads under which taxation has been levied by means of Customs and Excise duties. As the tariff has undergone many changes during the period, notably in 1879, no comparisons can be strictly made from year to year, and the figures must always be considered with reference to the tariff in force at the time:— Heads of  
taxation,  
1868-1888.

\*Less deductions.

146. The duties on bill stamps, &c., were all repealed in 1882, the amount received in that year up to the date of repeal having been \$82,616, and the total amount received since Confederation, \$2,686,850. The receipts from sugar duties in 1888 were \$301,592 more than in 1887, and were larger than in any other year in the table. The duty on tea was taken off in 1882, causing a large reduction of revenue.

Duty on  
bill  
stamps  
and  
Receipts  
from  
sugar  
duties.

147. The consumption of tea and sugar per inhabitant has been generally considered one of the best standards by which to judge the condition of the people, it having been found that the consumption of these two articles indicates more clearly than almost anything else their well-being, or otherwise; and judging the condition of the inhabitants of Canada by this test, it will be found that there has been a steady and satisfactory improvement. In 1868 the consumption of sugar was 15 lbs. per head, in 1877 it was 23 lbs. per head, and is now no less than 41 lbs., an increase of 18 lbs. per head in the last ten years, and nearly double the quantity consumed in 1877. As far as information is available, it would appear that the *per capita* consumption of sugar in Canada is larger than that of almost any other country, with the exception of the United Kingdom and the United States, a fact that speaks well for the condition of the working classes in this country. In the United Kingdom the amount was 73 lbs. per head, having increased from 15 lbs. per head in 1840; in the United States it was about 45 lbs., not very much more than in this country. The consumption of tea in Canada has also very largely increased; in 1868 it was 2 lbs. per head, in 1877 it was 3½ lbs. per head, and is now about 4 lbs. per head. In England the consumption in 1887 was 4.95 lbs. per head.

Consump-  
tion of tea  
and sugar.

148. The amount of taxation in the United Kingdom, and in such other British possessions for which the figures for

Taxation  
in British  
Posses-  
sions.

any recent period were available, are given, as nearly as could be ascertained, in the following table :—

TAXATION IN PRINCIPAL BRITISH POSSESSIONS.

COUNTRY.	Year.	TAXATION.		
		Amount.	Per Head.	Per-centage of Total Revenue.
		\$	\$ cts.	
United Kingdom .....	1887	370,426,000	9 93	83·85
India.....	1887	136,628,182	0 68	37·70
Cape of Good Hope .....	1881	8,175,074	7 79	56·00
Natal.....	1882	1,353,405	3 28	42·28
Canada.....	1887	28,687,002	5 88	80·23
New South Wales .....	1887	12,710,930	12 68	34·39
Victoria.....	1887	13,607,983	13 56	43·14
South Australia.....	1887	3,156,739	10 07	32·20
Queensland.....	1887	6,515,678	18 37	44·15
Western Australia.....	1887	919,367	22 03	50·00
Tasmania.....	1887	1,827,438	13 05	63·11
New Zealand.....	1887	9,128,771	15 31	54·16

A larger percentage of revenue is raised in Canada than elsewhere, with the exception of the United Kingdom ; but, India and Natal excluded, the amount raised per head by taxation is, in all the countries, very much larger than in the Dominion. In New Zealand it is three times, and in Western Australia and Queensland nearly four times as much.

Taxation in foreign countries. 149. The following table gives the amount of taxation in some of the principal foreign countries :—

Spain.....	1887	146,054,379	8 05	88·2
<b>ASIA.</b>				
Japan.....	1887	64,983,402	1 70	81·3
<b>AMERICA.</b>				
Mexico.....	1887	29,000,000	2 77	81·1
United States.....	1888	345,454,111	5 75	91·1

150. The actual figures for 1886 not being available, most of the above figures are taken from the estimated revenue for 1887. The United States, it will be seen, raised the largest proportion from taxation, over 91 per cent. having been derived from this source; Spain, the Netherlands and Portugal raising the next largest proportions. Belgium only raised half its revenue in this manner, and Russia two-thirds; all the other countries raise over 70 per cent. It will be observed that of the countries given in the two tables, the amount raised by taxation is largest in France, the United Kingdom and the United States in the order named, and that with the exception of the Australasian Colonies, the amount per head in France is larger than in any other country named. The percentage of taxation to revenue is

Proportion of taxation to revenue in foreign countries.

lower in South Australia, New South Wales and India, than in any other country named, either colonial or foreign.

**Gross Public debt, 1888.** 151. The gross public debt of the Dominion of Canada on 30th June, 1888, amounted to \$284,513,842; on the same date in 1887 it was \$273,187,626. There was, therefore, an increase during the year in the gross amount of liabilities of \$11,326,216.

**Net public debt, 1888.** 152. The net public debt on the same date in 1888 was \$234,531,358, and in 1887 \$227,314,775, being an increase in the actual net liabilities of \$7,216,583. This increase is to be accounted for as follows:—

Particulars of increase.	Excess of Expenditure over Receipts.....	\$810,031.24
	Expenditure on Capital Account:—	
	Railways and Canals.....	\$2,798,704.45
	Public Works.....	963,778.02
	Dominion Lands.....	135,047.82
		<hr/>
		3,897,530.29
	Paid on account of Railway Subsidies.....	1,027,041.92
	"    Rebellion Expenses.....	539,929.87
	Debentures of the Montreal Harbour Commissioners, issued on account of the improvement of the St. Lawrence, cancelled.....	2,735,504.10
	Debentures of the Quebec Harbour Commissioners cancelled.....	\$378,670.05
	Less—Sinking Fund, applicable to the payment of the Quebec Harbour Debt.....	223,929.23
		<hr/>
		154,740.82
	Balance of Transfers to Consolidated Revenue Fund (Profit and Loss).....	882.25
		<hr/>
		\$9,155,660.49
	Less—Amount invested in the Sinking Funds of the various Loans in London.....	1,939,077.79

Increase  
in debt.

154. With the exception of the years 1871 and 1882 there has been an increase in the amount of debt in every year since Confederation, the total increase amounting to \$158,802,717, being an average annual increase of \$7,562,084. The assets, it will be seen, show an increase in 1888 of \$4,109,632.

Proportion of  
revenue  
to debt.

155. In 1868 the debt was equivalent to five and one-half years' revenue; in 1872 it would only have taken four year's revenue, and in 1888 it would have required six years and six months of revenue to pay off the debt. It will be seen, therefore, that the debt has increased in a somewhat greater ratio than the revenue, the proportion of increase being 209 per cent. and 162 per cent. respectively.

Objects of  
the debt.

156. The principal objects upon which this large increase of debt has been laid out have been the following, viz., the assumption by the Dominion of the debts of the various Provinces on their entering the Confederation, the construction of the Intercolonial and Canadian Pacific Railways, and of numerous public works, the enlargement and improvement of canals, harbours and rivers, and the acquisition and management of the North-West Territories.

Assump-  
tion of  
Provin-  
cial debts.

157. The combined debt of the four Provinces, which was assumed by the Dominion at the time of Confederation was \$77,500,000. In 1869 a further allowance of \$1,186,756 was made to Nova Scotia, and since that date additional Provincial debts have been assumed or allowed by the Dominion to the extent of \$30,743,392, making a total assumption of Provincial debts of \$109,430,148, leaving therefore the sum of \$125,101,210 as the actual net liability created by the Dominion Government since Confederation. For it must be remembered that the allowance of these debts to the Provinces was in accordance with arrangements made at that time, and that though the amount of the public debt

has been thereby increased, no new liabilities have been actually created, inasmuch as these debts, if not taken over by the Dominion, would still be owing by the Provinces, and this assumption of Provincial debts has been therefore a simple transfer of liability, and the burden on the people has not been increased, but has been made actually lighter, since the Government were enabled to change the high interest-bearing bonds of the Provinces for their own bonds at a lower rate

158. The following are particulars of the Provincial debts assumed by the Dominion at Confederation :

Canada .....	\$ 62,500,000
Nova Scotia.....	8,000,000
New Brunswick.....	7,000,000
	\$ 77,500,000
Debts subsequently assumed or allowed :	
Nova Scotia (1869).....	1,186,756
The old Province of Canada (1873).....	10,506,089
Province of Ontario.....	2,848,289
“ Quebec.....	2,549,214
“ Nova Scotia.....	2,343,059
“ New Brunswick.....	1,807,720
“ Manitoba.....	3,775,606
“ British Columbia.....	2,029,392
“ Prince Edward Island.....	4,884,023
	Total Provincial debts assumed.....\$ 109,430,148

Particulars of Provincial debts assumed.

159. On the Canadian Pacific Railway has been expended \$61,812,884, on the Intercolonial Railway \$32,792,127, and on miscellaneous public works \$39,239,996, making a total of \$133,845,007. Not only therefore is the whole debt thus accounted for, but it will be seen that under the above three heads alone there has been spent the sum of \$8,744,661 more than the total actual increase of the debt since Confederation.

Increase of debt accounted for.

Expenditure on capital account since Confederation.

160. The total expenditure on capital account since Confederation has been \$173,961,906, made up as follows:—

Debts allowed to Provinces.....	\$ 30,743,392
Canadian Pacific Railway.....	61,812,884
Miscellaneous Public Works.....	39,239,996
Intercolonial Railway.....	32,792,127
North-West Territories.....	3,753,848
Dominion Lands .. .. .	2,858,777
Eastern Extension Railway.....	1,286,552
Prince Edward Island Railway.....	218,088
Short Line Railway.....	209,357
Cape Breton Railway.....	765,952
Oxford and New Glasgow Railway.....	280,932

\$173,961,905

Increase of Debt..... 158,802,716

Expenditure in excess of increase of Debt.. \$ 15,159,189

Expenditure on public works.

161. Including the expenses attendant on the acquisition of the North-West Territories, the following amounts, including expenditure charged to revenue, have been spent on public works since Confederation:—

Railways.....	\$103,142,392
Canals.....	32,847,148
Lighthouses and Navigation.....	8,284,580
Acquisition and Management of the North-West.....	5,356,035
Government Buildings and Miscellaneous Public Works.....	20,115,734

\$169,745,889

Prior to Confederation there was expended on Railways and Canals..... 52,944,175

On Public Works..... 10,690,917

Making a total expenditure on Public Works of... \$233,380,173

Government expenditure on public Works 1868-1888.

162. The following table shows the amounts spent by the Government in each year since Confederation on the construction of Railways, Canals, Public Buildings and other works:—

**GOVERNMENT EXPENDITURE ON THE CONSTRUCTION OF PUBLIC  
WORKS OF CANADA SINCE 1ST JULY, 1867.**

YEAR ENDED 30TH JUNE.	Railways	Canals.	Public Buildings.	Other Public Works	Total.

1888.....	2,815,536	1,186,650	1,091,012	2,788,374	7,881,572
<b>Total.....</b>	<b>103,142,392</b>	<b>32,847,148</b>	<b>12,539,261</b>	<b>15,861,053</b>	<b>164,389,854</b>

163. In addition to the large amount shown to have been expended upon construction, there has also been spent for working expenses, staff, maintenance and repairs, the sum of \$51,608,190, which amount, has however, been to a large extent provided for out of corresponding revenue.

Expenditure for working expenses, &c.

164. The Parliament Buildings at Ottawa, which are acknowledged to be among the finest on the Continent of America, have been erected at a total cost, up to the 30th June, 1888, of \$4,278,461; and the sum of \$117,346 during 1886, of \$98,058 during 1887 and of \$118,673 during the past year, having been spent on the new Departmental Building in Wellington Street. The total expenditure on construction of the Parliament and Departmental Buildings to 30th June, 1888, has been \$4,612,538.

Cost of the Parliament Buildings, Ottawa.

Details of  
assets.

165. In 1868 the assets amounted to \$17,317,410, and in 1888 to \$49,982,483, showing an increase of \$32,665,073. The assets only include interest-bearing investments, loans, cash and banking accounts, no account being taken of unsold lands belonging to the Government, or of the railways, canals, public buildings and other public works which it either owns or has assisted in construction, which are the material results of the large expenditure of public money. The following are details of the assets on 30th June, 1888 :—

Sinking Funds.....	\$20,993,654
Quebec Harbour Debentures.....	2,845,000
Montreal Harbour and Turnpike Bonds.....	452,200
Northern Railway Bonds .....	73,000
St. John River and Railway Extension Company.....	433,900
Canadian Pacific Railway Land Grant Bonds.....	29,000
North Shore Railway Bonds.....	970,000
Bank Deposits.....	5,030,000
Sundry Investments.....	734,801
<b>Total Interest-bearing Investments.....</b>	<b>\$31,561,555</b>
Province accounts.....	7,545,150
Miscellaneous accounts.....	1,405,216
Banking accounts.....	5,560,394
Specie reserve .....	3,897,636
Silver coinage accounts.....	12,532
<b>Total assets.....</b>	<b>\$49,982,483</b>

Interest  
bearing  
assets.

166. In 1868 the interest-bearing assets amounted to a sum of \$15,853,720, or about 91 per cent. of the whole amount. In 1888 they were \$31,706,604, or about 63 per cent. of the whole.

Rates of  
interest  
payable  
on debt  
and assets.

167. The reduction in high-interest bearing debts, consequently the decrease in the rate of interest now payable has been very considerable, as shown by the following table in which the amounts given are those of the actual interest paid and received, and of the actual net interest ; and the average rate of net interest is the average rate of the interest actually paid on the gross debt, after deducting that received on assets :—

# STATISTICAL ABSTRACT, 1888.

(ERRATUM ON PAGE 121, ON THE BOTTOM LINE.)

Average rate of Net Actual interest paid, 1888.

For 3.79 read 3.12.

AVERAGE INTEREST ON THE DEBT AND ASSETS OF CANADA FROM 1ST JULY, 1867, TO 30TH JUNE, 1888.

YEAR EXPIRED 30TH JUNE.	Actual Interest paid on Debt.	Increase or Decrease.	Average Rate of actual Interest paid.	Actual Interest received on Assets.	Increase or Decrease.

1888	9,823,313	+ 140,985	3.15	932,025	- 58,861

Reduction  
in rate of  
interest.

168. It will be seen that the average rate of interest actually paid on the net debt has decreased from \$4.51 per cent. in 1867 to \$3.79 per cent. in 1888. The rate, it will be noticed, is 61 cents per cent. higher than in 1887, which will be easily accounted for, when the sudden fall in the rate of interest received on assets, viz., from \$4.59 per cent. in 1886 to \$1.86 per cent. in 1888, is considered. This fall is due to the re-payment of the loans to the Canadian Pacific Railway, and other high interest-bearing investments. While the rate of actual net interest paid has slightly increased, there has been a further reduction in the net rate of interest paid on the gross debt of 9 cents, caused by the redemption of some of the small loans bearing high rates of interest. The total reduction in the rate since Confederation has been \$1.19 per cent.

Proportions of  
debt, as-  
sets and  
interest  
per head.

169. The following table gives the proportions per head of estimated population, of the gross and net debt, of the assets, and of the interest on the same paid and received in each year since Confederation:—

YEAR ENDED 30TH JUNE,	Gross Debt per Head.	Total Assets per Head.	Net Debt per Head.	Interest paid per Head.	Interest received per Head.	Net Interest paid per Head.
	\$ cts.	\$ cts.	\$ cts.	\$ cts.	\$ cts.	\$ cts.
1868.....	28 74	6 27	22 47	1 33	0 04	1 29

1888.....	57 22	10 05	47 17	1 98	0 19	1 79

NOTE.—Estimated population will be found on page 99 ante.

170. There was an increase of \$1.19 per head in the gross debt and 64 cents per head in the assets, but owing to the reduction in the rate of interest the gross interest paid per head remained the same, and there was an increase in the net amount of interest per head of only 1 cent. While the amount per head of the net debt was more than double what it was at Confederation, the net interest paid per head has only increased 39 per cent.

Increase in amount per head of debt and assets.

171. The fixed charges, that is, the charges for debt, sinking fund and subsidies to Provinces, amounted in 1868 to 58 per cent. of the revenue; in 1888 they had been reduced to 45 per cent.; in 1887 they were 44 per cent. A large item among the liabilities that does not bear interest is the amount of Dominion notes in circulation; in 1867 they amounted only to \$2,113,700; on 30th June, 1888, to \$16,249,318; and on the 31st December, 1888, to \$16,632,467.

Fixed charges.

Dominion notes.

172. From the foregoing pages it will be clearly seen that, with the exception of the debts allowed to Provinces, which allowances were rendered more or less necessary by the conditions of Confederation, and which debts, it must be remembered, were themselves originally incurred for the purposes of public improvements, the whole of the public debt has been created by the construction of public works of great utility and national importance; the principal portion having been spent on railways and canals, facility of transport being the essence of progress, not only in a new but in any country, and these are the reasons that place the debts of Canada and other British colonies, whose debts have been contracted for similar purposes, on so entirely a different footing to those of European countries and the United States, the debts of which have accumulated solely by aggressive and defensive wars.

The debt created solely for public improvements.

173. Notwithstanding the large debts that have been incurred by Canada and the Australasian Colonies, the credit of these countries is not only remarkably good, but is

New Canadian Loan.

continually improving, and their stocks are eagerly sought after in European markets. In order to meet the subsidies to railways authorized by Parliament and to provide for the payments on capital account, a loan for £4,000,000 at 3 per cent. was placed on the English market in June, 1888, at a minimum of £95., which produced £3,802,096, the total amount of tenders reaching £12,000,000, and the average price realized being £95. 1s. This was the first 3 per cent. loan ever placed in the English market by any British colony, and Canada has therefore been the first colony to float both 3½ and 3 per cent. loans. In January, 1889, the Victorian Government placed a loan of £3,000,000 on the market at 3½ per cent., the minimum price being fixed at £100. Tenders amounting to £6,558,500 were received, at an average price of £103. 6s. This was the first time that Victoria had attempted to borrow at 3½ per cent., and it will be seen that the loan was favourably received.

Particulars of Canadian Loans since Confederation.

174. The following table gives particulars of the several Canadian Loans since Confederation, and it will be seen from it how the credit of the country has steadily improved.

PARTICULARS OF CANADIAN LOANS SINCE CONFEDERATION.

<b>Total</b> .....		5,502,552,002	20 93	5 42

Total  
public  
debt of the  
British  
Empire.

176. The total public debts of Great Britain and her possessions amount to \$5,502,552,002, of which Great Britain owes 62 per cent., India 16 per cent., the Australasian Colonies 14 per cent., and Canada 4 per cent. The debt of Great Britain was reduced by \$149,424,000 during the year. With the exception of the Australasian Colonies, the amount per head in the United Kingdom was higher than in any of her colonies, and with the exception of New Zealand and South Australia, the multiple of revenue was also the highest. At the time of Confederation five years and six months of the revenue would have been required to pay off the net debt of Canada; in 1888 it would have taken six years and six months.

Expendi-  
ture on  
railways  
in Austr-  
lia and  
Cape  
Colony.

177. The proportions of debt to population in the Australasian Colonies and also in Cape Colony are very large, but while, as in Canada, the whole amounts have been incurred in the construction of public works, by far the largest portion has been expended on railways, which in those colonies are almost altogether the property of the State, and there is consequently a very much larger revenue available for the payment of interest derived directly from the expenditure of loans, than there is in this country, where the money has been spent on works directly productive, to the country, but only indirectly so to the State revenue. In proportion, moreover, to the wealth and general trade, more particularly of the Australasian Colonies, their populations are very scanty.

Propor-  
tion of  
colonial  
debts to  
assets.

178. It is doubtful whether the calculations as to the amount of debt per head of population really possess as

much value as is generally ascribed to them ; what may seem an enormous amount *per capita* for a country to carry may be relatively a far smaller burden than a much reduced amount in another country, and, therefore, if possible, the debt of a country should be compared with its wealth and resources, which would afford a far more accurate, in fact, the most accurate idea possible, of its actual financial position ; but unfortunately the wealth of a country can only be estimated approximately, and in no two cases can such an estimate be expected to agree, the absence of certainty therefore doing away with the value of such calculations. If the value of the enormous resources of the principal colonies could be put into figures the present debts, large as they appear to be, would seem justified by the assets set against them, and it must be remembered that the development of natural wealth in this or any other country is absolutely impossible without an expenditure, more or less large, first being made, in order to provide the means of bringing that wealth within reach of its proper markets. Mr. Mulhall calculates that the debt of the United Kingdom is 8 per cent., of the Australasian Colonies 20 per cent., and of Canada  $6\frac{1}{2}$  per cent. of the national wealth of each country respectively. If these figures are at all correct, Canada's position is a very favourable one.

Public debts in foreign countries.

179. The public debts of some of the principal foreign countries are given below:—

PUBLIC DEBTS IN FOREIGN COUNTRIES.

Debts of foreign countries.

180. The national debt of France is the largest in the world, and it is possible that it even exceeds the enormous total given above, as it is difficult to ascertain its exact amount. The debt of the German Empire is the Federal

debt alone, exclusive of the debts of the several States, which amount to \$1,813,623,148. Though the amount per head of debt is larger in France, the Netherlands and Portugal, yet the country of Peru is actually in a worse financial position than any other on the list; it would take more than 31 years of its revenue to pay off the debt, while it owes for unpaid interest the sum of \$87,054,155. Of European countries the least burdened with debt is Switzerland, as hardly 8 months of revenue would suffice to discharge its liabilities; it moreover possesses assets amounting to \$8,600,000. Persia is the only recognized country in the world which has no public debt. The debt of the United States increased \$17,010,846 during the fiscal year 1888, but if the cash in the Treasury on the 1st July, 1888, be deducted, the amount of debt is reduced to \$1,165,584,656, being a decrease in the net debt of \$113,844,080.

181. In 1887 the debts of the several States forming the United States, exclusive of public debt, and of all county, city and municipal debts, amounted to \$228,347,462, a sum larger than the whole net debt of Canada. In 1880 the combined net State, county and municipal debt of the several States and Territories amounted to \$1,056,584,146, and in addition to this the several cities of the United States have debts amounting in the aggregate to about \$550,000,000. If the national debt is added to the above figures a total liability is produced of \$3,552,716,402, being about \$59 per head of the present population, which amount, however, is, of course, not divided equally, but varies with the locality, some of the States having no debt at all. If the States debts alone are added to the national debt, the amount will be found to be about \$32 per head.

Debts of  
the United  
States.

182. The total debt of the Province of Quebec, including temporary loans, on 30th June, 1887, was \$19,456,378, with assets amounting to \$10,220,119, leaving a net debt of \$9,236,259; the debt of Nova Scotia on 1st January, 1888, was

Provin-  
cial debts.

\$1,012,000, with assets \$403,689 ; the debt of New Brunswick on 31st December, 1887, was \$1,991,700, with assets \$596,4 and the debt of British Columbia on the 30th June, 1887, \$1,157,001, with assets \$797,165. The total net provin debts therefore amounted to \$11,599,657. If this amount added to the public debt the amount per head of the population will be \$49.50. No figures are at present available for determining either the county or municipal debts in Canada, or the debts of its several cities, except those given on page 63 ante.

Superannuation.

183. Under the provisions of the Civil Service Superannuation Act, 1883, retiring allowances are granted to members of the Civil Service, coming within the scope of Act, who have served for not less than ten years and have attained the age of sixty years, or become in some manner incapacitated from properly performing their duties, or whose office may be abolished for the better promotion of efficiency or otherwise.

Calculation of allowances.

184. These allowances are calculated on the average yearly salary received during the then last three years, as follows: for ten years but less than eleven years' service an allowance of ten-fiftieths of such average salary ; for eleven years less than twelve years' service an allowance of eleven-fiftieths and a further allowance of one-fiftieth for each additional year of service up to thirty-five years, when the maximum allowance of thirty-five-fiftieths may be granted, but no allowance is made for any service over thirty-five years.

To whom applicable.

185. These provisions practically apply to all office clerks and employés of the Inside and Outside Civil Service including those of the Senate, House of Commons and Library of Parliament.

Assessment of salaries.

186. As a provision towards making good the above allowances, a reduction is made of two per cent. per annum on all salaries over \$600, and of one and a-quarter per cent. on those under that amount.

187. All persons under sixty years of age, in receipt of a superannuation allowance, and not mentally or bodily disabled, are liable to fill, if required, under pain of forfeiture of such allowance, any public position in any part of Canada for which their previous services have rendered them eligible. No such position, however, is to be lower in rank or salary than the position retired from. Liability to serve.

188. Provision is also made for the granting of gratuities in cases where an allowance has not been earned by duration of service. Gratuities.

189. The total amount paid out on account of superannuation allowances and gratuities in 1888 was \$212,743, and the following table shows the manner in which that sum was divided among the different departments and divisions:— Amount paid in 1888.

## SUPERANNUATION ALLOWANCES AND GRATUITIES—1888.

**Pensions.** 190. Pensions, which are of a different nature to superannuation allowances, are also granted in accordance with various Acts of Parliament to retired judges, and to a certain number of persons, or their widows and children, for military services. The total amount paid under this head in 1888 was \$120,334, being \$18,225 more than in the preceding year.

CHAPTER IV.

TRADE AND COMMERCE.

**Weights and measures.** 191. The legal weights and measures of Canada are the Imperial yard, Imperial pound avoirdupois, Imperial gallon and the Imperial bushel.

**Measures by weight determined.** 192. By Act of 42nd Vic., cap. 16, it was provided :—That in contracts for sale and delivery of any of the undermentioned articles the bushel should be determined by weighing, unless a bushel by measure be specially agreed upon, the weight equivalent to a bushel being as follows :—

Wheat .....	60 lbs.	Castor beans.....	40 lbs
Indian corn.....	56 "	Potatoes .....	60 "
Rye .....	56 "	Turnips .....	60 "
Peas .....	60 "	Carrots .....	60 "
Barley .....	48 "	Parsnips .....	60 "
Malt .....	36 "	Beets.....	60 "
Oats .....	34 "	Onions.....	60 "
Beans.....	60 "	Bituminous coal.....	70 "
Flaxseed. ....	50 "	Cloverseed .....	60 "
Hemp .....	44 "	Timothy .....	48 "
Blue grass seed .....	14 "	Buckwheat.....	48 "

And by the same Act the British hundredweight of 112 pounds, and the ton of 2,240 pounds, were abolished, and the hundredweight was declared to be 100 pounds and the ton, 2,000 pounds avoirdupois, thus assimilating the weights of Canada and the United States.

**Customs valuations.** 193. Customs valuations upon goods imported subject to *ad valorem* duties are made at the fair market value thereof, when sold for home consumption in the principal markets

of the country whence they were exported. The values of goods subjects to export duty are to be their actual cost, or the value which they truly have at the port and time of exportation.

194. The classification of goods in the following table is the same as that previously adopted in this work, the principle being that articles of a like nature shall be classed together. A copy of the tariff at present in force, arranged in alphabetical form and with reference numbers to the orders in the following table, will be found at the end of this book, so that the duty (if any) payable on any article, as well as the order in which it is placed in the table, can be immediately ascertained.

Classification of imports and exports.

Export duty .....		31,397		21,773

\* From 4th April, 1888.

Imports and exports, 1887 and 1888. 195. The total value of imports and exports, and amount of duty collected in 1888, as compared with 1887, was as follows :—

	Imports.	Exports.	Duty Collected.
1887.....	\$112,892,236	\$89,515,811	\$22,469,705
1888.....	110,894,630	90,203,000	22,209,641

There was therefore a decrease in the value of imports of \$1,997,606, and an increase in the value of exports of \$687,189, making a decrease in the total trade of \$1,310,417, while the decrease in duty collected amounted to \$260,064.

Decrease in values and increase in quantities. 196. The value of the total trade is still considerably below the returns for 1882 and 1883, but the decline in values in many of the principal articles of merchandise has been so marked that there is good reason to suppose that at prices of a few years ago the trade of 1888 would have been in excess of the highest point yet reached. That the decline in values has exceeded the decrease in the volume of trade to a considerable extent will be apparent on examining the following comparative statement of the quantities and values of the principal articles of food exported during the years of 1882 and 1888 respectively, from which it will be seen that with scarcely an exception the percentage of increase or decrease in value was respectively considerably smaller or larger than the corresponding percentage in quantities.

QUANTITIES AND VALUES OF PRINCIPAL ARTICLES OF FOOD EXPORTED FROM CANADA, 1882 AND 1888 COMPARED.

197. Some figures were quoted in the Statistical Abstract, 1887, p. 197, which had been prepared by Mr. Giffen, comparing the values of the imports and exports of Great Britain in 1886 with what they would have been at the prices of 1873, and showing that instead of 350 millions the imports would have been over 500 millions, and the exports 350 millions instead of 212½ millions. The following table of the principal articles imported into Canada in 1887, showing their actual import value in that year, and the value they would have had at the import prices of 1873, corroborates the foregoing statement. It will be seen that the imports at the prices of 1873 would have been 57.20 per cent higher, and if a reduction in some articles is allowed for, and an average increase of 45 per cent. is taken, it will be found that the imports of 1887 would have amounted to \$163,693,742, a much larger sum than has yet been recorded, showing that the trade of the country has increased to a large extent, although at present values the progress is not apparent in figures.

Prices in 1887 and 1873 compared.

198. The following figures, showing the course of the average prices of certain articles, were given by Mr. Sauerbeck in the "Statist" of 26th January, 1889:—

Year	Average prices, 1873-1888.
1867-1877.....	100
1873.....	111
1879.....	83
1880.....	88
1881.....	85
1882.....	84
1883.....	82
1884.....	76
1885.....	72
1886.....	69
1887.....	68
1888.....	70

The increase in 1888 he attributes principally to the artificially high price of copper.

199. The following table gives the value of the total imports and exports, and of the aggregate trade in every year since Confederation. The excess of imports over exports, or otherwise, is also shown, as well as the value of the aggregate trade per head of population in each year:—

IMPORTS AND EXPORTS, AND TOTAL TRADE OF CANADA, 1868 TO 1888.

YEAR ENDED 30TH JUNE.	Total Imports.	Total Exports.	Excess of Imports.	Excess of Exports.	Total Imports and Exports.	Value of Total Trade per Head.

\* Average.

200. The value of imports has been exceeded eight times and the value of exports four times since Confederation, and in seven years during the same period the total trade was also larger than in 1888. The average value per head during the twenty-one years has been, of imports \$25.24, of exports \$20.25 and of the total trade \$45.49, so that in 1888 imports were \$2.93, exports \$2.11, and the total trade \$5.04 below the average. The amount of the total trade per head was considerably below that of several previous years, though the total aggregate trade was \$14,655,170 above the average.

Canadian  
and American  
trade  
compared.

201. The amount of trade done by the United States is only exceeded by three countries in the world, and is therefore many times larger than the trade of Canada, but in proportion to population, the trade of the Dominion is considerably in advance of that of the United States, as is shown by the following statement :—

FOREIGN TRADE OF CANADA AND THE UNITED STATES  
PER CAPITA, 1888.

COUNTRY.	Imports.	Exports.	Total Trade.
Canada .....	22 30	18 14	40 45
United States.....	12 05	11 58	23 65
Excess per head in favor of Canada.....	10 25	6 56	16 80

Excess of  
imports.

202. During the last twenty-one years the exports have only once exceeded the imports, viz., in 1880, in very other year there having been an excess of imports. The average annual excess of imports has been \$20,304,895; therefore the excess in 1888 was \$386,735 above the average.

Whether a continual excess of imports is or is not prejudicial to the interests of a country is a complex and much debated question. The imports into the United Kingdom have for many years largely exceeded the exports, yet that country is steadily augmenting its wealth. India, on the other hand, has had a large excess of exports for

several years, and yet is by no means in a prosperous financial condition. The numerous financial transactions between England and her colonies also tend to increase the excess of imports, as Mr. Coghlan says: \* " The loans raised in " England do not come as coin but as merchandise, and " form the greater part of the excess of imports over exports " which is so marked a feature of these colonies."

203. The next table gives the value of imports, exports and duty collected, per head of population, and the value of goods entered for consumption, in each year since Confederation :—

Goods entered for consumption, duty collected, &c.

VALUE OF IMPORTS AND EXPORTS PER HEAD IN CANADA AND DUTY COLLECTED: ALSO VALUE OF GOODS ENTERED FOR CONSUMPTION, 1868 TO 1888.

Articles on which export duty is collected, viz.:—Pine, oak and spruce logs, and shingle and stave bolts.

\* Wealth and Progress of New South Wales, page 412.

Duty collected. 204. With two exceptions, viz., in 1883 and 1887, the amount of duty was the largest ever collected, and was 151 per cent. larger than that collected in 1868, though the amount per head shows an increase only of 70 per cent. There was a considerable decrease in the duty collected on exports.

Comparative value of goods entered for consumption. 205. In goods entered for consumption there was a decrease of \$2,792,328, as compared with the preceding year, but an increase of \$3,244,406 as compared with 1886. The value per head of these imports in 1887 was \$21.67, and in 1888 \$20.68, a decrease of 99 cents per head. The value of similar goods in the United States in 1888 was \$11.86 per head, being \$8.82 per head less than in Canada.

Summary of imports 1886, 1887 and 1888. 206. A comparative summary of the value of the principal articles imported in the last three years will be found in the following table, dutiable goods being distinguished from those admitted free:—

<b>Free goods</b>	<b>28,887,803</b>	<b>27,412,836</b>	<b>33,110,593</b>
<b>Dutiable goods</b>	<b>75,536,758</b>	<b>85,479,400</b>	<b>77,784,037</b>
<b>Grand total</b>	<b>104,424,561</b>	<b>112,892,236</b>	<b>110,894,630</b>

Decrease  
in duti-  
able and  
increase  
in free  
goods.

207. There was a decrease in the value of dutiable goods of \$7,695,363 as compared with 1887, caused in a large measure by the duty having been taken off anthracite coal, and also by reduced importations of cotton and woollen manufactures. In free goods there was an increase of \$5,697,757, principally in consequence of the addition of anthracite coal to the free list, and also by an increase of \$1,643,254 in imports of coin and bullion. Among dutiable articles the principal increases were in imports of grain of all kinds, provisions, sugar of all kinds, manufactures of copper, watches, coffee, and spices, and the principal decreases were in manufactures of cotton (these imports are steadily decreasing every year) and wool, of flax, hemp, and jute, and of iron and steel, also in manufactures of leather, living animals, carriages and parts of the same.

Among free goods the largest increase was of course in anthracite coal; there were increases also in fish from Newfoundland, lumber and timber, cotton wool and waste, raw silk, unmanufactured tobacco and green coffee, while the principal decreases were in logs and round timber, animals for improvement of stock, raw hides, unmanufactured wool and tea.

Consump-  
tion by  
Pro-  
vinces.

208. The following table gives the value of goods entered for consumption (dutiable being distinguished from free) in each Province in 1888, and the amount of duty collected thereon:—

VALUE OF GOODS ENTERED FOR CONSUMPTION BY PROVINCES, 1887.

PROVINCES.	Dutiable Goods.	Free Goods.	Total.	Duty Collected.
	\$	\$	\$	\$
Ontario.....	28,289,778	13,382,654	41,672,432	7,611,188
Quebec.....	27,513,522	13,735,813	41,449,335	9,521,055
Nova Scotia.....	5,270,317	2,586,447	7,856,764	2,126,480
New Brunswick.....	3,783,823	2,274,261	6,058,084	1,431,175
Manitoba.....	1,473,511	276,537	1,750,048	457,354
British Columbia.....	2,674,941	729,266	3,404,207	861,468
Prince Edward Island.....	399,930	200,136	600,066	167,175
The Territories.....	40,002	16,162	56,164	11,997

209. The dutiable goods entered for consumption were **\$8,474,855** less than in the preceding year, while free goods similarly entered were more by **\$5,682,527**. The percentage of duty on goods entered for consumption was **21.57**, being higher than in any year since Confederation, the next highest having been in 1887, viz., **21.24**. The percentage of duty on the total value of imports was **20.03**, being also the highest during the last 21 years. Of the total amount of duty collected **\$8,972,740**, or **40** per cent. were collected on goods from Great Britain, and **\$7,109,234**, or **32** per cent. on goods from the United States. The next largest amounts were on goods from the British West Indies and Germany, the sums being **\$1,581,322** and **\$1,214,748** respectively.

210. The figures in the preceding table must only be taken as indicative of the channels by which goods enter the Dominion, and not as by any means representing the individual consumption of each Province. Quebec, containing the principal ports of entry by the St. Lawrence, and Ontario the principal ports of entry for goods from the United States, it is clear that a very large portion of the duty collected is really paid by the other Provinces, and it is probable that the largest portion of the duty collected in the Province of Quebec is actually paid by the Province of Ontario. The same remarks apply more or less equally well to exports, the Province of Prince Edward Island being now the only Province whose returns can be considered as applying almost exclusively to that Province.

Percent-  
ages of  
duty.

212. Without reference to the intervening fluctuations in amount, the percentages of increase in the various classes of domestic exports in 1888, as compared with 1868, were as follow :—

Percentages of increase in domestic exports.

Produce of the mine.....	184.1 per cent.
“ fisheries.....	132.1 “
“ forest.....	16.6 “
Animals and their products.....	25.6 “
Agricultural products.....	19.9 “
Manufactures.....	164.6 “

213. The increase in the value of domestic exports in 1888 was as follows :—Produce of the fisheries, \$917,373 ; animals and their products, \$472,360 ; produce of the mine, \$304,978 ; produce of the forest, \$818,068 ; manufactures, \$1,081,310 ; miscellaneous articles, \$129,516 ; and in foreign exports, \$254,061. There was a decrease in exports of agricultural products of \$3,389,875.

Increase in domestic exports, 1888.

Exports of  
Canadian  
produce,  
1867-1888.

214. The value of the exports of articles the produce or manufacture of Canada during the last twenty-one years, together with their value per head of population, and percentage of total exports, in each years, will be found in the following table :—

EXPORTS OF CANADIAN PRODUCE—1868-1888.

YEAR ENDED 30TH JUNE.	Total Value.	Value per Head.	Percentage of Total Exports.

In three years, only since Confederation has the value of exports of Canadian produce in 1888 been exceeded, viz., in 1881, 1882 and 1883, and the percentage of total exports, though a trifle lower than in 1887, had only been exceeded in three years, viz., 1882, 1886 and 1887. The value per head, however, was much lower than the value in many previous years.

Value of  
principal  
exports,  
1886, 1887,  
1888.

215. The following table gives the value of the principal articles, the produce of Canada, exported during the last three years.

Increase  
and  
decrease  
in various  
articles.

216. Out of the 72 articles enumerated in the foregoing table there was an increase in 42, the principal increase being in exports of coal, salmon, shingles, sleepers and railroad ties, cheese, eggs, barley, hay, potatoes, agricultural implements (which show an increase of \$107,159 over 1887, and of \$138,561 over 1886) furs (an increase of \$396,322), manufactures of iron and steel, ships sold to other countries (an increase of \$146,197), and manufactures of wood.

There were decreases, on the other hand, principally in gold, some kinds of fish, cattle, sheep and swine, butter, wool, beans, oats, peas and wheat, flour, oatmeal and leather.

The total increase in exports of Canadian produce, less coin and bullion, and estimated amount short at inland ports, was \$333,730.

217. Special tables with reference to the exports of agricultural produce will be found in the subsequent chapter on agriculture. Agricultural produce.

218. The following table gives the value of exports, the produce of Canada, in each class, during the last five years, showing the countries to which exported, and distinguishing between British possessions and foreign countries:— Value of exports, the produce of Canada, and countries to which exported, 1884-1888.

VALUE OF EXPORTS, THE PRODUCE OF CANADA, DURING THE YEARS 1884 TO 1888, INCLUSIVE, SHOWING THE COUNTRIES TO WHICH EXPORTED, AND DISTINGUISHING BETWEEN BRITISH POSSESSIONS AND FOREIGN COUNTRIES.

British possessions.....	71·67	72·60	68·88	69·04	68·60
Foreign countries.....	28·33	27·40	31·12	30·96	31·40

## AGRICULTURAL PRODUCTS

British possessions.....	36·49	41·00	48·84	55·41	32·47
Foreign countries.....	63·51	59·00	51·16	44·59	67·53

## MANUFACTURES.

British possessions.....	54·69	55·21	47·66	51·64	53·26
Foreign countries.....	45·31	44·79	52·34	48·36	46·74

It will be seen from the above that of the total exports of the produce of the mine during the five years contained in the table, the average proportion that went to foreign countries each year was 82·20 per cent., and to British possessions 17·80 per cent. Of the produce of the fisheries, the average proportion was to foreign countries 62·36 per cent., and to British possessions 37·64 per cent. Of the produce of the forest, the average proportion is almost identical, viz., to British possessions 50·19 per cent., and to foreign countries 49·81 per cent. By far the largest portion of exports of animals and their produce goes to British possessions, the average proportion being 70·16 per cent., and to foreign countries only 29·84 per cent. In agricultural products the average was, to British possessions 42·84 per cent., and to foreign countries 57·16 per cent., while in manufactures the proportion was slightly in favor of British possessions, being 52·49 per cent., and to foreign countries 47·51 per cent.

Trade  
with Unit-  
ed King-  
dom and  
United  
States  
1887 and  
1888.

220. In view of the great interest now being taken in the trade relations of Canada and the United States, the following tables, showing the relative values of the several articles imported from and exported to Great Britain and the United States during the years 1887 and 1888, will, it is believed, prove both of interest and value.

RELATIVE VALUES OF THE ARTICLES IMPORTED FROM GREAT BRITAIN AND THE UNITED STATES IN THE YEARS 1887 AND 1888.

†Includes Danish, French and Spanish West Indies. ‡Not elsewhere specified.

Trade with Great Britain and United States.

222. The exports to Great Britain exceeded the imports therefrom by \$651,367, and the imports from the United States were in excess of the exports by \$12,941,725. The trade with the United States showed the large increase of

\$9,419,333 and formed 48·77 of the total trade; while the trade with the United Kingdom, decreased \$10,220,285, and only formed 39·54 per cent. of the whole trade, the two forming 88 per cent. of the total imports and exports, which was the same proportion as in 1887.

223. According to Canadian figures our trade with the United States, exclusive of coin and bullion, formed 6·91 per cent. of their total trade, and according to American official figures 5·95 per cent. of their total imports were exports from British North America (including Newfoundland), and 5·04 per cent. of their exports were imports into the same. There is, however, and probably there always will be, a large discrepancy between the two sets of figures, owing to the carelessness in valuation of exports on both sides of the line.

Proportion of Canadian trade to total trade of United States.

224. Almost all the exports went to the United Kingdom and United States, the proportion of the whole being 91·63 per cent., slightly lower than in 1887, and 5·79 per cent. went to Newfoundland, South America and the West Indies. The exports to exceeded the imports from seven countries only, viz., United Kingdom, British West Indies and South America, Newfoundland, Portugal, Norway and Sweden and Australasia. The imports from British possessions were \$41,333,585 and the exports to the same \$43,789,883. being an excess of exports of \$2,456,298, and forming altogether 42·33 per cent. of the total trade, as compared with 46·97 per cent. in 1887.

Destinations of exports.

Excess of exports.

225. The next table is a comparative statement of the imports from foreign countries in 1887 and 1888. This table has been extended, and now gives particulars of the imports from every country where the value was over \$100.

Value of imports by countries, 1887 and 1888.

Increases and decreases. 226. Out of the 41 countries in the table there was an increase in the value of imports from 19, the largest increase

being from the United States, viz.. \$4,507,467, and the largest decrease was from Great Britain, viz., \$5,733,423. The imports from France continue steadily to increase, and the trade with the Spanish West Indies also shows a large increase. The principal decreases were from Germany, Japan, China, Brazil and Dutch East Indies.

227. A similar comparative statement of exports will be found below :—

230. With the exception of the United Kingdom and India, the aggregate trade of Canada is larger than any other British Colony; but in proportion to population the trade of the Australasian Colonies is far in advance of that of any other British possession. The value of diamonds exported through the post office is now included in the exports of the Cape of Good Hope, which will account for the apparently large increase. Their value in previous years is shown in the following statement, which gives the value of diamonds passed through the Kimberley post office since 1876, by which some idea can be obtained of the richness of the fields:—

1876.....	\$ 8,796,656	1882.....	\$19,430,177
1877.....	10,280,478	1883.....	13,346,347
1878.....	13,007,354	1884.....	13,662,139
1879.....	13,853,604	1885.....	12,116,340
1880.....	16,390,432	1886.....	17,056,479
1881.....	20,324,183	1887.....	20,646,687
		Total.....	<u>\$178,910,876</u>

Value of diamonds exported from the Cape of Good Hope.

231. The value of the total trade of the United Kingdom and her possessions was \$5,122,737,727, as compared with \$4,864,405,038 in 1886, being an increase of \$258,332,689; in 1886 there was a decrease of \$165,035,705 as compared with 1885. The total imports exceeded the total exports by \$378,134,321, the excess of imports into the United Kingdom having amounted to \$396,460,094, showing that, exclusive of that country, there was an excess of exports of \$18,325,773.

Value of total trade of British Possessions.

232. The following is a list of British possessions in which imports and exports were respectively in excess in 1886:—

<i>Imports exceeded Exports in</i>	
<b>United Kingdom.</b>	Bahamas.
<b>Straits Settlements.</b>	New South Wales.
<b>Ceylon.</b>	Victoria.
<b>Natal.</b>	Western Australia.
<b>St. Helena.</b>	Tasmania.
<b>Canada.</b>	Turk's Island.
<b>Bermudas.</b>	Trinidad.

Excess of imports and exports respectively in British Possessions.

*Exports exceeded Imports in*

India.	British Guiana.
Mauritius.	Jamaica.
Lagos.	Windward Islands.
Gold Coast.	Leeward Islands.
Cape of Good Hope.	South Australia.

\* Including Merchandise, Specie and Bullion.

234. The total trade of the United Kingdom is the largest in the world, Germany and France taking second and third places; and the following is the order in which the principal countries doing the largest trade stand, with the amount of that trade in each case :—

United Kingdom.....	\$3,129,221,528
Germany.....	1,643,773,512
France.....	1,549,199,922
United States.....	1,525,663,790
Netherlands.....	815,609,955
Italy.....	783,049,400
India.....	759,799,631

Aggregate trade of principal countries.

235. In proportion to population the largest trade among foreign countries is done by the Netherlands, the amount per head being considerably larger than that of any other country, the countries next in order being Switzerland, Belgium and Uruguay; but with the exception of the Netherlands, the *per capita* value of the trade in the Australasian Colonies is higher than elsewhere. Exports exceeded imports in Russia, Spain, Austria, Hungary, Greece, Japan Egypt, Chili, Mexico and Brazil.

Value of trade per head in various countries.

236. The United Kingdom takes the largest share of the exports of the United States: in 1860 the proportion was 52·50 per cent. and in 1888 52·38 per cent.; in the latter year 8·60 per cent. went to other British possessions, making a total export to British possessions of 60·98 per cent. In return for this, however, the States only imported 24·58 per cent. from the United Kingdom in 1888 as compared with 39·17 per cent. in 1860, and 11·08 per cent. from other British possessions as compared with 10·84 per cent. in 1860, so that while the imports from other British possessions have slightly increased, the imports from the United Kingdom show a decrease of 14·59 per cent. since 1860.

Exports of the United States.

237. The following is a comparative statement of the imports into British possessions during the years 1886 and

Imports into British Possessions.

1887, showing in each year the amount and proportion per head that came from Great Britain and other countries, respectively :—

Total.....	508,041,852	2 23	478,638,082	2 10

238. The total amount imported from Great Britain was \$16,814,249 more than in 1886, but the proportion to the total imports was slightly less, being 51.49 per cent., as compared with 52.00 per cent. in the preceding year. The excess of imports from Great Britain over imports from other countries has been as follows in the years named, viz.: in 1884, \$72,871,510; in 1885, \$74,073,065, in 1886, \$36,833,675; and in 1887, \$29,403,770, showing a very considerable falling off in

Imports into British Possessions from Great Britain and foreign countries compared.

the last two years. The imports from Great Britain exceeded those from other countries in eleven colonies and the largest importers were India, Canada, Victoria, New South Wales and Cape of Good Hope, in the order named. The Straits Settlements only imported \$19,274,755 from Great Britain and \$104,579,591 from other countries.

239. The portion of imports from British possessions to the total imports into the United Kingdom has remained much about the same for a number of years, as shown by the following figures, though later years show a slight tendency to increase :—

PROPORTION OF IMPORTS FROM BRITISH POSSESSIONS TO TOTAL IMPORTS INTO THE UNITED KINGDOM.

1871 .....	22·03 per cent.
1875 .....	22·57 “
1880 .....	22·50 “
1884 .....	24·56 “
1885 .....	22·75 “
1886 .....	23 40 “
1887 .....	23·13 “

But the proportion of exports to Great Britain to the total Colonial exports has steadily decreased during the same period, with the exception of a very small increase in 1887.

PROPORTION OF EXPORTS TO THE UNITED KINGDOM TO THE TOTAL EXPORTS FROM BRITISH POSSESSIONS.

1871 .....	50·45 per cent.
1875 .....	49·47 “
1880 .....	46 46 “
1884 .....	43·33 “
1885 .....	42·84 “
1886 .....	41·54 “
1887 .....	41·80 “

240. In 1887 the exports from Great Britain to foreign countries were \$967,132,186 and to British possessions \$399,240,199, being a lower proportion than in preceding years, as the following figures show :—

PROPORTION OF EXPORTS TO BRITISH POSSESSIONS TO TOTAL EXPORTS FROM THE UNITED KINGDOM.

1871 .....	19·59 per cent.
1875 .....	27·22 “
1880 .....	28·46 “
1884 .....	29·83 “
1885 .....	31·47 “
1886 .....	30 55 “
1887 .....	29·22 “

241. The total foreign trade of British possessions has increased very largely since 1871 ; but, as will be seen from the following figures, the trade with foreign countries has increased in a greater ratio than that with the United Kingdom, which has been steadily decreasing :—

Similar proportion of total trade.

PROPORTION OF THE TRADE WITH THE UNITED KINGDOM TO THE TOTAL FOREIGN TRADE OF BRITISH POSSESSIONS.

1871 .....	51.41 per cent.
1875 .....	52.33 "
1880 .....	49.36 "
1884 .....	46.72 "
1885 .....	48.44 "
1886 .....	45.31 "
1887 .....	44.14 "

242. The following table, taken from Mulhall's "Fifty Years of National Progress," p. 30, shows the distribution of the trade of the United Kingdom at various dates, and shows also that the trade with India and the Colonies has increased in a very much greater degree than that with foreign countries :—

Distribution of the trade of the United Kingdom 1840-1885.

DISTRIBUTION OF THE TRADE OF THE UNITED KINGDOM, 1840-1885.

## CHAPTER V.

## POST OFFICE AND TELEGRAPHS.

Transfer  
of Post  
Office to  
Colonial  
Govern-  
ments.

244. By an Act of the Imperial Parliament, 12-13 Vic., chap. 66, the management of the Postal systems in the Colonies of British North America was transferred to the various Provincial authorities, and up to the time of Confederation each Province controlled its own system, under its own laws and regulations.

Post Office  
Act 1868.

245. After Confederation these various laws were allowed to remain in force until the 1st April, 1868, when the Post Office Act, 31 Vic., chap 10, came into effect, establishing uniform rates and regulations for the Dominion.

Postal  
agree-  
ment with  
United  
States.

246. In 1875 an agreement was made with the United States, by which a common rate of postage between the two countries was adopted, each country retaining all money collected, and no accounts being kept between the two post offices in regard to International correspondence.

Forma-  
tion of  
Postal  
Union.

247. The Universal Postal Union was formed at a meeting held at Berne in 1874, and the first treaty was signed on 9th October in that year; the countries represented being the several countries of Europe, the United States and Egypt. The object of the Union was to form all the countries of the world into one single postal territory, and to establish, as far as possible, uniform reduced rates of postage, and also to further the interchange of correspondence, by arranging that every country should be bound to convey the mails of other countries by its land or sea services at the lowest possible rates. At a meeting, held in Paris, in May, 1878, the regulations were revised and embodied in a convention which came into force on 1st April, 1879.

248. At this meeting Canada was admitted a member from the following 1st July, and letters, newspapers and other printed matter, samples and patterns, became subject to uniform postage rates and regulations for all places in Europe, and for all other countries that were members of the Union. The existing postal arrangements with the United States were allowed to remain undisturbed, being of a more liberal and advantageous character than the ordinary regulations of the treaty.

Admission of Canada into Postal Union.

249. The third Congress was held at Lisbon, in February, 1885, and Canada was represented by the delegates of the British Post Office. No material change was made in the Convention of 1879.

Third Meeting of Postal Union.

250. All the States of Europe and America, some countries of Asia and Africa, and all the British Colonies and possessions, except the Australasian Colonies and South Africa, are now included in the Union.

Countries that have joined it.

251. A new agreement between the United States and Canada was signed at Washington on 12th January, 1888, to come into effect on the following 1st March and to supersede the agreement of February, 1875. The principal change in the agreement was the establishment of a parcel post between the two countries, subject to certain regulations for the protection of Customs with respect to articles liable for duty. All the principal provisions of the agreement of 1875 were retained.

New Postal agreement with the United States.

252. The following table gives the number of post offices in the Dominion, and the estimated number and number per head of letters and post cards sent in each year, from 1st July, 1867, to 30th June, 1888 :—

Number of letters, &c. 1868-1888.

NUMBER OF POST OFFICES IN CANADA AND ESTIMATED NUMBER  
AND NUMBER PER HEAD OF LETTERS AND POST  
CARDS SENT, 1868 TO 1888.

\*Including post cards.

Increase  
in number  
of letters,  
&c.

253. During the past year 137 new offices were opened, and the total number of post offices is now considerably more than double the number at Confederation, there having been an increase of 4,033. The increase in the number of letters sent, as compared with 1887, was, in registered letters, 20,000; and in total letters of all kinds, 5,900,000; being a total increase of letters posted of 2,600,000, more than the increase of 1887 over 1886, which was 3,300,000. The total number of letters sent in 1888 was 62,100,000 more than was sent in the first year of Confederation, being over three times as many. The number of letters sent per head of estimated population was, according to the above

ures, a little over 16. Post cards, which were first issued 1871 have now reached the large total of 16,586,000, the rease over 1887, being 230,000 as compared with an rease of 1,247,000 in 1887 over 18 '6. There was a increase 340,000 in the number of free letters sent.

254. The next table gives the number of newspapers, books, periodicals and parcels sent during the same period :—

NEWSPAPERS, PERIODICALS, BOOKS, CIRCULARS, PARCELS, &c., 1868 TO 1888.

YEAR ENDED 31 <sup>ST</sup> MARCH,	Newspapers and Periodicals posted otherwise than from Office of Pub- lication	Newspapers and Periodicals posted from Office of Pub- lication.	Books, Circulars, Samples and Patterns, &c.	Parcels.	Total.	Number per Head.

7.....	10,340,000	53,906,326	20,000,000	820,000	85,066,326	17.45
8.....	10,850,000	55,948,591	17,810,000	763,900	85,372,491	17.17

255. In the figures in the first column for the years 1868 1877 inclusive, are included all newspapers and periodicals sent by mail, whether from the office of publication or

Postal rates on newspapers.

otherwise. In 1877 a change was made in the regulations, and all newspapers, periodicals, &c., sent from the office of publication, were carried at the rate of 1 cent per lb., and the number carried has, since that date, been estimated in the above table at nine newspapers to one pound. By an Act that came into operation on the 1st June, 1882, all such newspapers were entirely exempted from postage, and have since been carried free of charge, and as no attempt is now made to ascertain the number so carried the figures given for the years 1883 to 1888, inclusive, can only be considered as approximate. There was a considerable decrease in the number of books, circulars, &c., carried in 1888, as compared with the previous year, amounting to 2,190,000.

256. In proportion to area the post offices are distributed as follows :—

Proportion of post offices to area.

Prince Edward Island .....	1 post office to	7 sq. miles.
Nova Scotia .....	1 “	15 “
New Brunswick.....	1 “	25 “
Ontario .....	1 “	62 “
Quebec .....	1 “	136 “
Manitoba .....	1 “	178 “
British Columbia.....	1 “	2,645 “
The Territories.....	1 “	5,662 “

257. The number of letters and post cards sent in the several Provinces during the last five years, as estimated in the official reports, are given below :—

Number of letters, &c., by Provinces 1884-1888.

POST OFFICE AND TELEGRAPHS.

Manitoba, Keeweenaw & N.-W. Territories.....	1884	383	220,000	110,000	3,600,000	350,000	20'80
	1885	404	230,000	110,000	3,700,000	400,000	19'21
	1886	424	250,000	140,000	3,800,000	350,000	21'42
	1887	463	264,000	150,000	4,200,000	380,000	19'05
	1888	484	272,000	127,000	4,500,000	460,000	18'93

58. The number of letters per head increased in each province, with the exception of Manitoba and the Territories. Estimated increase and decrease.

ories, in which there was a small decrease, the total number of letters sent having only increased by 300,000. The largest number of letters, both numerically and in proportion to population, were sent in Ontario, and, with the exception of Prince Edward Island, fewer letters per head were sent in Quebec than anywhere else. The above figures, however, are, as will readily be seen, only estimated on averages, and must be taken, therefore, as only giving a very approximate idea of the distribution of correspondence in this country.

Postal  
revenue  
and ex-  
penditure,  
1868-1888.

259. The following table gives the postal revenue and expenditure for every year since Confederation, and the proportion each year per head of population :—

POSTAL REVENUE AND EXPENDITURE OF CANADA FROM  
1868 TO 1888.

Reasons  
for excess  
of expend-  
iture.

260. The expenditure has exceeded the revenue continuously during the last twenty-one years, but the excess of ex-

penditure appears to be on the decrease, having been \$72,587 less than in 1887, and \$128,792 less than in 1886. The revenue, moreover, showed a satisfactory increase of \$147,884. When the long distances that have to be covered in this country are considered, as well as the comparatively scanty population of many parts of it, particularly in the North-West Territories and British Columbia, it will easily be understood that it must be some time yet before the revenue can either balance or exceed the expenditure. The successful development of the country has required and will for some years require continual additions to and extensions of the postal system, and in order to provide postal facilities *pari passu* with the progress of settlement, it is from time to time necessary to establish offices, the expenditure for which must for a number of years be in excess of the revenue derived therefrom. The Postal Service, however, is managed on sound economical principles, and the importance of carrying out the principle of providing every part of the country with postal communication is so well recognized that exception is seldom or ever taken to these deficits, it being well understood that as the population increases and the country progresses, it cannot be very long before this service is at least self-sustaining, the revenue from the older and wealthier Provinces covering the excess of expenditure in newer districts.

261. As confirmatory evidence of the foregoing, it will be found that the higher rate of increase of revenue referred to in the Statistical Abstract, 1887, p. 251, has been maintained, the revenue of 1888 having increased 5.68 per cent. and the expenditure only 2.17 per cent. The number of stamps issued to Postmasters during the year was 125,411,050, as compared with 118,349,660 in 1887, an increase of 7,061,390 and almost the whole postal revenue is derived from this source, the amount received from the sale of stamps in 1888 having been \$2,728,026.

Larger proportionate increase of revenue than of expenditure.

Postal  
operations  
1868-1888.

262. The following comparative statement shows, not only the extended operations, but also the increased efficiency of the service since 1868, inasmuch as a much larger quantity of mail matter is carried at the same expense :—

POSTAL OPERATIONS IN CANADA COMPARED, 1868 AND 1888.

YEAR.	Number of Offices.	Number of Money Order Offices	Miles of Post Route	Miles Travelled.	Amount paid for conveyance of Mails.	Number of Letters, &c.	Number of Newspapers, &c.	Total Cost per Head.
					\$			\$ cts.
1868.....	3,638	515	27,674	10,622,216	543,109	18,100,000	18,884,800	0 31
1888.....	7,671	944	56,264	24,749,188	1,691,310	96,786,000	85,372,491	0 71

Cost of  
transmission  
1868-  
1888.

263. In 1868 the conveyance of mails over 10,622,216 miles cost per mile  $5\frac{1}{10}$  cents, and the transmission of 36,984,800 letters, newspapers, &c., cost  $1\frac{4}{10}$  cents apiece ; in 1888 the conveyance of mails over 24,749,188 miles cost  $6\frac{2}{10}$  cents per mile, and the transmission of 182,158,491 letters, newspapers, &c.,  $\frac{9}{10}$  of 1 cent apiece, so that there is a decrease in the cost of each article carried of  $\frac{1}{2}$  of 1 cent ; and it must not be overlooked that, if newspapers were carried now at the old rate of 1 cent per lb., between \$50,000 and \$60,000 would be added to the revenue each year.

Free  
delivery.

264. The system of free delivery of letters by carriers in the principal cities was commenced in 1875, and it was estimated that the total number delivered in this manner in 1888 was : letters, 30,245,748 ; and newspapers, 11,068,460. The number of carriers employed was 289.

Postal  
revenue  
and ex-  
penditure  
by Prov-  
inces 1884-  
1888.

265. The next table gives the postal revenue and expenditure in each Province since 1884 :—

POSTAL REVENUE AND EXPENDITURE OF CANADA, BY PROVINCES, 1884 TO 1888.

1. It appears that 57 per cent. of the total revenue was derived from the Province of Ontario, and 47 per cent. of the expenditure was paid out in that Province, the proportions being as follows:—

Revenue	57 per cent.
Expenditure	47 per cent.

Excess of expenditure in various Provinces.

being almost identical with those of 1887. The excess of expenditure has during the last three years steadily decreased in all the Provinces, with the exception of British Columbia, Manitoba and the Territories, and as would naturally be expected, the expenditure in the last-named places was in proportion to revenue and population much heavier than elsewhere. At the present rate of progress it is probable that the revenue in Ontario will soon exceed the expenditure, and the postal system in that Province become self-sustaining.

Number of registered letters 1868-1888. 267. The following are statements of the number of registered letters in each year since 1868, with particulars of their disposal since 1879:—

## REGISTERED LETTERS IN CANADA, 1868 TO 1888.

YEAR.	Estimated Number of Registered Letters.	Number per Head.	Failed to reach Destination	Sent to Dead Letter Office.	HOW DISPOSED OF.			
					Delivered to Address	Returned to Writers or Offices of origin.	Remaining in Office or with Post-master for delivery.	Failed of delivery and found to contain no Value.

1887...	3,560,000	0·73	166	21,612	4,833	15,525	122	1,152
1888...	3,580,000	0·72	197	19,618	6,345	11,788	684	891

268. Out of 3,580,000 registered letters estimated to have been sent in 1888, only 197 containing money failed altogether to reach their destination. The contents of 74 were made good by the officials held responsible for the loss, 6 were accidentally destroyed in transit, 31 were stolen, in 39 the contents were said to be missing, and 25 were contained in mails which were said never to have arrived. The increase in the total number sent was 20,000, a smaller increase than for many years, and the number that miscarried increased by 31. One letter in every 18,172 letters registered miscarried, a much larger proportion than in 1887, when it was one in 21,446 letters.

Register'd letters that miscarried.

269. The numbers of letters and other articles sent to the Dead Letter Office in each year, since Confederation, are given below :—

Number of letters sent to the Dead Letter Office 1868-1888.

LETTERS, POST CARDS, CIRCULARS, BOOKS, PARCELS, &c., RECEIVED AT THE DEAD LETTER OFFICE IN CANADA DURING THE YEARS 1868 TO 1888.

YEAR.	Total Number.	How Disposed of.

Dead letters that failed of delivery.

270. There was an increase of 83,187 in the number of letters sent to the Dead Letter Office, but, as the total number of letters increases, this result is only to be expected. The number of letters containing money or other valuables received at the office was 23,899, and the value of the contents was estimated at \$590,074. Of the number of letters received, 122,397 were letters originating in Canada, and returned as undelivered from the United States and other countries.

Operations of the money order system 1868-1888.

271. The following statement shows the general operations of the money order system, year by year, from 1st July, 1867, to 30th June, 1888. It will be seen that there has been a steady and satisfactory increase:—

OPERATIONS OF THE MONEY ORDER SYSTEM IN CANADA.  
1868 TO 1888.

YEAR ENDED 30TH JUNE.	Number of Offices.	Number of Orders Issued.	Amount of Orders issued in other Countries, payable in Canada.		Losses sustained.
			\$	\$	
1868.....	515	90,163	3,352,881	90,579	2,355

1880.....	775	306,088	7,207,337	698,651	286
1881.....	786	338,238	7,725,212	1,002,735	209
1882.....	806	372,248	8,354,153	1,194,029	110
1883.....	826	419,613	9,490,900	1,236,275	59
1884.....	866	463,502	10,067,834	1,262,867	882
1885.....	885	499,243	10,384,211	1,185,751	4,295
1886.....	910	529,458	10,231,189	1,245,957	25
1887.....	933	574,899	10,328,984	1,495,674	1,179
1888.....	944	630,968	10,916,618	1,726,011	3,113

272. There was an increase in the number of orders sent of 56,069, being 10,628 more than the increase in 1887, and there was also an increase in the amount sent of \$587,634, but the average value of each order has been still further reduced. In 1868 it was \$37.18; in 1885, \$20.79; in 1886, \$19.32; in 1887, \$17.96; and in 1888, \$17.30. It may be argued from this, that as the country progresses and banking facilities increase for the business and wealthier classes, the money order system is used almost entirely by the working classes, who keep no banking accounts, and the large increase in the volume of business done is a significant sign of the improved condition of the people.

Increase in number of orders and decrease in average amount.

273. The number of money order offices in operation increased by 11. They are distributed among the Provinces in the following order:—

Money order offices by Provinces.

Ontario.....	505	British Columbia.....	24
Quebec.....	148	Manitoba.....	19
Nova Scotia.....	132	The Territories.....	14
New Brunswick.....	92	Prince Edward Island.....	10

274. The revenue from fees, profit on exchange, &c., amounted to \$81,077, and the expenditure for salaries, &c., in connection with the system, to \$83,309, being an excess of expenditure of \$2,232.

Excess of expenditure.

275. Of the total amount of orders issued in Canada, \$8,520,776 were payable in Canada and \$2,395,842 were payable in other countries, being an increase in each case of \$426,889 and \$160,745, respectively; and of the total transactions with other countries, \$2,395,842, were sent out of the country and \$1,726,011 came in.

Orders payable in Canada and elsewhere.

276. The next table shows the money order transactions between the Dominion and other countries since Confederation.

Money order business with other countries 1868-1888.

† Including all those British Possessions and a few foreign countries between which and Canada there is not a direct money order exchange.

From the above table it is seen that the principal money order business with other countries is transacted with the United States, the United Kingdom and Newfoundland. Since the year 1876, inclusive, the amount of money sent by this system to the United Kingdom has exceeded the amount payable in Canada by \$5,077,449; during the same period, however, the amount sent to the States has only exceeded the amount received by \$129,555, while the amount received from Newfoundland has exceeded that sent to the Island by \$260,439.

277. With the exception of Newfoundland, it will be seen that more money is sent from this to other countries than is received, and this may be taken as showing that immigrants settling in Canada soon improve their circumstances, and are able to send money to their friends at home, instead of having to apply to them for help.

Excess of money sent from Canada over amount received.

278. The sum of \$126,533 was paid as a subsidy to the Montreal Ocean Steamship Company (Allan Line) for the twelve months ending 31st March, 1888, for the conveyance of mails to and from the United Kingdom. This mail service has been performed by this company continuously since May, 1856, until the close of 1885, since which time the "Vancouver" and "Oregon," of the Dominion Steamship Company, have assisted in the service, about one passage in three being made by one of these vessels. In the first year of service, viz., 1856, the average passage westward was 12 days 20½ hours, and eastward 11 days 2 hours.

Ocean mail service.

279. The Imperial Government having decided to grant a subsidy of \$300,000 (£60,000) per annum towards a line of steamships between British Columbia and China and Japan, and the present contract with the Allan Line for the conveyance of mails between this country and Great Britain being about to expire, the Government propose to provide an additional subsidy for the improvement of the Atlantic Mail Service, and will also subsidize the line from British Columbia, so that a fast line of travel may be established in connection with the Canadian Pacific Railway between Great Britain, the East and the Australasian Colonies.

Subsidy to steamship line between British Columbia and China and Japan

280. The following particulars of the passages in 1867-68 and in 1887-88 will be interesting for comparison :—

Comparisons of passages 1867 and 1888

## WINTER SEASON.

YEAR.	Average Passage to Liverpool.			Number of Passengers.	Barrel Bulk.	Average Passage to Portland.			Number of Passengers.	Tons of Freight.

1868 .....	9	20	34	5,044	241,877	To Quebec. 10 15 57			14,073	28,398
1888 .....	8	10	0	5,006	649,978	8	16	5	14,687	57,387

\* The bulk of cargo was loaded at Portland and Baltimore.

Fastest passages.

281. The fastest passage from Quebec to Liverpool in 1868 was made in 8 days 14 hours 15 minutes and in 1888 in 7 days 19 hours 47 minutes. In the latter year the passage from Liverpool to Quebec was made in 7 days 18 hours 5 minutes, but the average of the eastward voyages was the highest during the season.

Number of letters sent in principal countries.

282. The following table gives the numbers and number per head of letters and post cards sent in the principal countries of the world. The figures have been taken partly from official sources and partly from the Statesman's Year Book, and the calculations have been made in this office. Attention is again called to the extraordinary quantity of mail matter sent in the Australasian Colonies. The Australasian trade is undoubtedly very large in proportion to population, and the correspondence may be expected to be accordingly large, but it does not seem likely that it should be so much larger than, and out of all proportion to that of any other civilized country and the high figures are probably caused by some defect in the system of enumeration, by which duplication occurs, or it may be by a more perfect

system than in use elsewhere. The system adopted in Canada does not do justice to the correspondence of the country, as no notice whatever is taken of the foreign correspondence coming into this country, which is exceedingly large

Mail matter in United States, 1888. 283. The number of newspapers delivered during 1888 in the United States was 1,063,100,000, of registered letters 13,677,169, of dead letters 6,217,876, and of pieces of other matter of 3,578,000,000, making a total number of pieces of 6,801,995,045.

---

PART II.—TELEGRAPHS.

Government telegraph lines. 284. The principal telegraph lines in Canada are in private hands, and the Government only own and operate those lines which have been built by them in furtherance of the public service, between places where the traffic could not be expected to be sufficient to compensate private outlay, but where public interests required that there should be communication, especially in connection with the signal and other stations established by the Marine Department along the shores of the Gulf of St. Lawrence, the Maritime Provinces and British Columbia, and also for the advancement of settlement in the North-West Territories.

Situation of lines. 285. There were 1,590 miles of land lines and 174 miles of cable along the St. Lawrence and eastern coasts, 869 miles of land lines in the Territories, and 294 miles of land lines and 41 miles of cable in British Columbia. The principal cable lines on the eastern coasts are in connection with the Island of Anticosti and the Magdalen Islands; and in British Columbia, across the Straits of Georgia, and between Vancouver's Island and Washington Territory.

Purchase of British Columbia lines by the Canadian Pacific Railway. 286. In consequence of the completion of the Canadian Pacific Railway through British Columbia, and the establishment of its accompanying telegraph system, which would necessarily be in competition with the lines operated by the Government over the same territory for the benefit of the

public, it was decided to accept an offer made by the Canadian Pacific Railway Company for the purchase of the existing Government lines along the railway route, and the lines were accordingly sold to the company for the sum of \$15,780.

27. The following table gives the length of the various lines controlled by Government on 30th June 1888 :—

State lines only. † Indo-European Telegraph Company's lines only.  
‡ Not including shipping and weather reports.

Total tele-  
graph  
mileage in  
the world.

290. According to the American Almanac for 1888 the total length of telegraph lines in the world is 719,415, of which the United States owns the largest portion, or just about one-fourth, but though that country possesses 147,954 miles of line more than the United Kingdom, the difference in the number of messages sent is small, and the Western Union Telegraph Company of America, which possesses 156,814 miles of line and 524,641 miles of wire, sent 2,849,109 messages less than were sent in Great Britain. There are, it will be seen, only six countries that possess a greater telegraphic mileage than Canada, and with the exception of one or two of the Australasian colonies, no other country possesses the same telegraphic facilities in proportion to population.

Canadian  
Telegraph  
compan-  
ies.

291. The telegraph business of Canada is in the hands of the Great North-Western Telegraph Company, the Canadian Pacific Railway Company, and, in the Maritime Provinces, the Western Union Telegraph Company. The following are particulars concerning them in 1888:—

COMPANY.	Miles of Line.	Miles of Wire.	Number of Messages.	Number of Offices.
Great North-Western Tel. Co .....	17,783	32,963	3,007,856	1,493
Canadian Pacific Railway Co.....	5,800	17,800	630,000	590
Western Union.....	2,966	7,545	389,725	184
Total.....	26,549	58,308	4,027,581	2,267

Press messages are not included in the number sent by the Canadian Pacific Railway Company, particulars not being available.

Tele-  
phones.

292. The telephone system of Canada is almost entirely in the hands of the Bell Telephone Company of Montreal,

which has 299 offices, 15,692 sets of instruments in use, 4,343 miles of poles, and 15,448 miles of wire. No exact record is kept of the messages sent, but the average daily number is about 86,130. The above figures do not include Nova Scotia, New Brunswick, Prince Edward Island or British Columbia, all of which are worked by separate companies, particulars of which are not at hand. The longest distance in which audible speaking has been accomplished by the telephone is between New York and Chicago, over one thousand miles, and the next longest distance, between Paris and Marseilles, 562½ miles.

---

## CHAPTER VI.

### CANALS AND INLAND REVENUE.

293. The collection of revenue derivable from the various canal systems is under the control of the Department of Inland Revenue, while their construction, repairs and maintenance are attended to by the Department of Railways and Canals. Super-  
vision of  
Canals.

294. The total revenue from all sources from the several systems amounted, in 1888, to \$351,193, as compared with \$353,110 in 1887, showing a decrease of \$1,917. Canal  
revenue.

295. The system of inland navigation in Canada is the largest and most important in the world. The St. Lawrence system alone, in conjunction with the great lakes, extends for 2,260 miles, viz., from the Straits of Belle Isle to Port Arthur, at the head of Lake Superior; of this distance 71 miles are artificial navigation by means of canals, and 2,189 miles open navigation; from Port Arthur to Duluth, which is the principal port in that section of the United States for St. Law-  
rence  
system.

the produce of the Western States, is a further distance of 124 miles, making altogether 2,384 miles. When it is considered that, by this means, unbroken water communication is afforded from Port Arthur and Duluth to Liverpool, a total distance of 4,618 miles, the importance of this system, and the necessity for its thorough maintenance will be at once understood.

Direct  
voyage  
between  
Liverpool  
and  
Chicago.

296. The arrival at Chicago on the 29th June, 1888, of the steamer "Rosedale," with clearance papers from London, naturally excited considerable interest, as it not only proved to Americans the possibility of sending grain direct from Chicago elevators to Liverpool without transshipment, but also proved to Canadians a like possibility of sending the products of the North-West direct from the elevators of Port Arthur. The passage occupied 35 days, and the steamer was the first one that ever traversed the direct route from London to Chicago.

Sault Ste.  
Marie  
Canal.

297. Lake Superior and Lake Huron are connected by the Ste. Marie River, which is not capable of navigation, owing to the numerous rapids. This difficulty was overcome by the construction of a canal on the United States side of the river, which is rather more than one mile in length, and has one lock 515 feet long and 80 feet wide, with a rise of about 18 feet. Traffic through this canal has, however, increased to such an extent that the Dominion Government are proceeding to build a canal on the Canadian side, and through Canadian territory. It will be about two-thirds of a mile in length, have a mean width of 150 feet, and a depth of 18 feet below the lowest water line. There will be one lock, 600 feet long and 85 feet wide, with a rise of about 18 feet. The contracts for the work are let, and require the whole undertaking to be ready for use in May, 1892.

298. The present canal was open for navigation for 210 days during the year 1888, and the amount of freight that passed through during that time was 6,411,423 tons, valued at \$92,298,000, being an increase, as compared with 1887, of 916,774 tons in freight and of \$13,261,242 in value. The registered tonnage that passed through during the season was 5,130,659 tons, being an increase over 1887 of 233,061 tons. If the canal was kept open for the whole year the tonnage passing through would exceed that passing through the Suez Canal, which will accommodate the largest vessels, and is open to the commerce of the whole world, as is shown by the following figures: In 1887 the tonnage passing through the Suez Canal was 8,430,043, while if the same rate of traffic had been maintained for the whole year through the Sault Ste. Marie Canal as was reported for the season of navigation, the total tonnage would have amounted to 8,917,574 tons.

Traffic  
through  
Sault Ste.  
Marie  
Canal.

299. In addition to this, the canals on the St. Lawrence system are the Welland, from Port Colborne on Lake Erie to Port Dalhousie on Lake Ontario,  $26\frac{3}{4}$  miles in length by the enlarged or new line, with 26 locks, and a total rise of 326 $\frac{1}{2}$  feet; and, along the St. Lawrence, the Galops,  $7\frac{1}{2}$  miles in length, with three locks and a rise of  $15\frac{1}{2}$  feet; the Rapide Plat, 4 miles in length, with 2 locks and a rise of  $11\frac{1}{2}$  feet; Farran's Point, three-quarters of a mile long, with 1 lock and a rise of 4 feet; the Cornwall,  $11\frac{1}{2}$  miles in length, with 6 locks and a rise of 48 feet; the Beauharnois,  $11\frac{1}{2}$  miles in length, with 9 locks and a rise of  $82\frac{1}{2}$  feet, and the Lachine Canal,  $8\frac{1}{2}$  miles in length, with 5 locks and a rise of 45 feet.

Canals on  
St. Law-  
rence  
system.

300. The difference in level between Lake Superior and tidewater is about 600 feet. The total number of locks on this system is 53, and the total height directly overcome by locks is 533 feet. The greatest navigable depth is 14 feet,

Height of  
Lake  
Superior  
above the  
sea, and  
navigable  
depth of  
canals.

and that at present is only to be found in the Welland Canal, which was open for the first time for 14 feet navigation during the season of 1888. The greatest available depth in the other canals is at present 12 feet, but all improvements are now made with a view to having a uniform depth of 14 feet throughout the systems.

Ottawa  
and  
Rideau  
Canals.

301. The other canal systems of the country are as follows:—The Ottawa, which connects Montreal and the city of Ottawa, and the Rideau, which in conjunction with the Ottawa system, affords communication between Montreal and Kingston, a total distance of 246 miles. The lockage on this system (not including that of the Lachine Canal) is 509 feet, 345 rise and 164 fall, and the number of locks is 55. The Rideau Canal was originally built by the Imperial Government for military purposes. It was begun in 1826 and finished in 1834, at a cost of \$3,860,000.

Chambly  
Canal.

302. The Richelieu and Lake Champlain system, or Chambly Canal, extends from the junction of the Rivers St. Lawrence and Richelieu, 46 miles below Montreal, into Lake Champlain, a distance of 81 miles. There are 10 locks, and a rise of 79 feet. By the Lake Champlain Canal communication is obtained with the Hudson River, and thence to New York, to which place from the boundary line is a distance of 330 miles.

Burling-  
ton Bay  
Canal.

303. The Burlington Bay Canal, half a mile in length, connects Burlington Bay and Lake Ontario, giving access to the port of Hamilton. There are no locks on this canal.

St. Peter's  
Canal.

304. St. Peter's Canal, Cape Breton, Nova Scotia, gives access from the Atlantic to the Bras d'Or Lakes. It is 2,400 feet long, and has one tidal lock. The rise and fall of the tide is 4 feet.

305. The Trent River system is only efficient for local use. The scheme of making use of these waters to effect a system of through water communication between Lakes Huron and Ontario has been in contemplation for many years, but up to the present time only certain sections have been made navigable, or fit for the passage of timber. The total distance between the lakes is 235 miles, and about 155 miles of this are available for light draft vessels.

Trent  
River  
system.

306. The Murray Canal has been built through the Isthmus of Murray, giving connection westward between the Bay of Quinté and Lake Ontario. It is  $4\frac{1}{2}$  miles in length, and has no locks, and is expected to be open for traffic during the season of 1889.

Murray  
Canal.

307. The total amount spent on canals by the Imperial Government previous to Confederation was \$4,173,921, and by the Provincial Governments, \$16,028,840. At the time of Confederation all the systems became the property of the Dominion Government, who have expended the further sum of \$32,226,002, making a total amount spent for construction and enlargement alone of \$52,428,764, the amount expended for repairs not being included in these figures.

Expendi-  
ture on  
canals.

308. The following table is a statement of the number, tonnage and nationality of vessels that passed through the several Canals during the season of navigation in each of the years 1883 to 1887, inclusive, and of the number of passengers and tons of freight carried, and tolls received.

Traffic  
through  
Canals,  
1883-1887.

566,680	22,874	3,414,632	82,914	2,820,525	303,035	- 44,927	

Decrease  
in traffic.

310. There was a general decrease under each head, except that of passengers, in 1887 as compared with 1886, though there was a small increase in each case as compared with 1885. There was a decrease in the number of Canadian vessels of 853, of United States vessels of 264, in the number of tons of freight carried of 148,568 tons and in the amount of tolls of \$44,927. The increase in the number of passengers was 4,152. There was a decrease in the total tonnage of vessels passing through of 198,934 tons.

311. The following table gives the quantities in tons of the principal articles of freight carried through the Canadian canals during the seasons of navigation in 1886 and 1887.

CANALS AND INLAND REVENUE.

Amount expended on construction to 30th June, 1888.

In addition to the above expenditure on construction, an amount of \$9,993 has been spent on the survey of the Verte Canal, and of \$8,145 on the Sault Ste. Marie making the total previously given of \$52,428,764.

The functions of the Department of Inland Revenue are the collection of excise duties, and of canal, slides, boom and ferry tolls, also fees for the inspection of food, gas and weights and measures, as well as administering the laws relating to the same. The total revenue that accrued to the Government during 1888 was \$6,504,399, which was \$478,886 more than in the preceding year, as is shown by the following table, which gives the amount that accrued under each head in each year since 1884:—

Inland Revenue.

## HEADS OF ACCRUED INLAND REVENUE, 1884-1888.

HEADS OF REVENUE.	1884.	1885	1886.	1887.	1888.

Manufactures in bond.....	50,005	53,312	+ 3,307
Seizures.....	2,029	13,066	+ 11,037
Other receipts.....	12,332	13,062	+ 1,631
Total.....	6,466,151	6,010,561	— 455,589

It will be seen that there was an increase under every head, except those of spirits and malt liquor.

317. The number of proof gallons of spirits manufactured in 1888 was 5,514,589, as compared with 5,119,506 gallons in 1887, being an increase of 395,083 gallons, and the quantity taken for consumption was 2,326,327 gallons, being less by 538,608 gallons than the quantity taken in 1887, and was 715,237 gallons less than the average consumption of the four preceding years. The decrease in consumption is said to be partly attributed to the increase in the excise duty from \$1.00 to \$1.30 per gallon.

Quantity of spirits manufactured.

318. The increase in the quantity of spirits manufactured is attributed to the new provision of the Inland Revenue Act, which came into force on 1st July, 1887, by which the sale of spirits which have not been manufactured at least twelve months is prohibited, distillers in consequence finding it necessary to increase their stock.

Increase in manufacture of spirits.

319. In the production of the above mentioned quantity of spirits 94,243,866 lbs. of grain and 90,499 lbs. of molasses were used, making a total quantity of raw material of 94,334,365 lbs.

Materials used.

320. The quantity of malt manufactured during the year was 54,282,943 lbs., and entered for consumption 48,640,467 lbs., being a decrease and increase, as compared with 1887, of 379,861 lbs. and 6,610,027 lbs., respectively. Distillers used 4,606,544 lbs. of the quantity entered for consumption, and the remainder was employed in the production of 15,944,002 gallons of malt liquor.

Manufacture of malt.

321. There was an increase of 431,441 lbs. in the quantity of tobacco entered for consumption, as compared with 1887, but the amount was below the average of six years, as shown by the following figures :—

Consumption of tobacco.

TOTAL AMOUNT OF TOBACCO ENTERED FOR CONSUMPTION IN  
CANADA—1883-1888.

	Lbs.
1883 .....	8,965,416
1884 .....	10,072,745
1885 .....	11,061,589
1886 .....	8,507,216
1887 .....	8,816,593
1888 .....	9,248,034
	56,671,593
Average.....	9,445,265

Consumption of Canadian tobacco. 322. The quantity of Canadian tobacco taken for use during the last six years has been :—

	Lbs.
1883 .....	377,197
1884 .....	326,804
1885 .....	495,721
1886 .....	390,691
1887 .....	517,816
1888 .....	676,335
	2,793,564
Average.....	467,261

The amount of home consumption, therefore, in 1888, was 209,074 lbs., above the average for six years.

Consumption of spirits, wine, beer and tobacco per head. 323. According to the report of the Minister of Inland Revenue, the following has been the annual consumption per head in the Dominion, since Confederation, of spirits, wine, beer, and tobacco :—

## ANNUAL CONSUMPTION PER HEAD IN CANADA OF SPIRITS, WINE, BEER AND TOBACCO, FROM 1868 TO 1888.

YEAR.	Spirits.	Wine.	Beer.	Tobacco.
	Galls.	Galls.	Galls.	Lbs.
1868.....	1·60	0·17	2·26	1·73
1869.....	1·12	0·11	2·29	1·75
1870.....	1·43	0·19	2·16	2·19
1871.....	1·57	0·25	2·49	2·05
1872.....	1·72	0·25	2·77	2·48
1873.....	1·68	0·23	3·18	1·99
1874.....	1·99	0·28	3·01	2·56
1875.....	1·39	0·14	3·09	1·91
1876.....	1·20	0·17	2·45	2·31
1877.....	0·97	0·09	2·32	2·05
1878.....	0·96	0·09	2·16	1·97
1879.....	1·13	0·10	2·20	1·95
1880.....	0·71	0·07	2·24	1·93
1881.....	0·92	0·09	2·29	2·03
1882.....	1·00	0·12	2·74	2·15
1883.....	1·09	0·13	2·88	2·28
1884.....	0·99	0·11	2·92	2·47
1885.....	1·12	0·10	2·63	2·62
1886.....	0·71	0·11	2·83	2·05
1887.....	0·74	0·09	3·08	2·06
1888.....	0·64	0·09	3·24	2·09
Average.....	1·19	0·14	2·60	2·11

324. According to the above figures the consumption of spirits is decidedly less than it was in 1868, and was less last year than in any other year in the table. The consumption of wine also has decreased, but that of beer and tobacco has increased. Decrease in consumption.

325. The average amount per head paid annually in Canada for duty on spirits since Confederation has been \$1.05 and on tobacco 40 cents; on beer and wine it only amounted to 10 cents and 6 cents in each case. The report of the Minister of Inland Revenue gives the amounts per head by Provinces, but it is not possible to obtain any correct figures regarding the actual consumption in each Province, for the Province that has the greatest number of breweries and distilleries will show the largest consumption. Average duty on spirits, beer and wine and tobacco.

tion, without reference to the fact that a large quantity of that liquor, paying duty in one Province, is actually consumed in another.

Consumption of spirits and beer in various countries. 326. The following table, which, with the exception of the figures for Canada, has been taken from the Victorian Year Book, 1886-87, gives the annual consumption of beer and spirits per head in various countries :

ANNUAL CONSUMPTION OF SPIRITS PER HEAD IN VARIOUS COUNTRIES

COUNTRIES.	Gallons.	COUNTRIES.	Gallons.
Holland.....	2.08	Germany.....	0.95
Queensland.....	1.85	New Zealand.....	0.92
Western Australia.....	1.46	Canada.....	0.85
New South Wales.....	1.39	France.....	0.70
United States.....	1.34	South Australia.....	0.70
Sweden.....	1.27	Tasmania.....	0.69
Victoria.....	1.12	Austria-Hungary.....	0.53
Switzerland.....	1.04	United Kingdom.....	0.59

ANNUAL CONSUMPTION OF BEER PER HEAD IN VARIOUS COUNTRIES.

COUNTRIES.	Gallons.	COUNTRIES.	Gallons.
United Kingdom.....	28.71	Queensland.....	9.55
Germany.....	19.38	Switzerland.....	8.15
Holland.....	19.05	Austria-Hungary.....	6.83
New South Wales.....	16.70	France.....	4.53
Victoria.....	16.41	Canada.....	3.05
United States.....	10.74	Sweden.....	2.52
Tasmania.....	10.00		

The figures for Canada are the average consumption for the last three years. The consumption of intoxicating liquors in Holland is very large, and allowing for increased potency of spirits is considerably in excess of that of any other country.

## CHAPTER VII.

## AGRICULTURE.

327. Canada is essentially an agricultural country, and in spite of the extensive mineral resources which are waiting for development, the agricultural industry must always be the most important one, for while the value of imports and exports of animal and agricultural produce may be exceeded by that of other industries, the number of persons depending on agriculture for a livelihood far exceeds the number depending on any other pursuit.

The agricultural industry.

328. The crops in 1888 in Ontario and Manitoba, the two great grain-growing Provinces of the Dominion, were fairly good. The dry, cold weather in the spring severely affected the fall wheat in Ontario, and reduced the quantity, but the ripening season was so favourable that the quality was good. Spring wheat was a superior crop, and above the average of seven years. The total wheat crop in this Province was placed at 20,284,346 bushels. Oats, barley and peas were about an average crop in each case; from some places, however, returns of heavy crops were made—oats as high as 70 bushels, barley 38 bushels, and peas 30 bushels per acre. Root crops were generally good.

Crops in Ontario, 1888.

329. In Manitoba the prospects of a harvest exceeding in richness the harvest of 1887 were, during the summer, exceedingly good, but unfortunately an early autumn frost touched the grain more or less, over a large area, and its value was correspondingly depreciated. The rise in the price of wheat, however, tended very considerably to reduce the loss to the farmers, the average price ranging from 75 cents to 80 cents per bushel, while in 1887 the average was 55 cents per bushel. No complete returns of the wheat crop are available, but the following estimate, which has been kindly furnished by Mr. C. N. Bell, the Secretary of the Board of Trade at Winnipeg, is probably about as correct as it will be

Crops in Manitoba, 1888.

possible to get one: Total wheat crop, 7,000,000 bushels, of which about 2,000,000 bushels will be required for seed and food, and the remaining 5,000,000 bushels exported either as wheat or flour. The area under wheat cultivation in 1888 showed an increase of 20 per cent. over 1887, and it is probable that the increase in 1889 over 1888 will be about the same, or 40 per cent. more than in 1887. No figures are at hand for estimating the yield of other grains, but the harvest is said to have been good. There was an increase of 10 per cent. in the area under oats, and of 25 per cent. in that under barley.

Crops in  
Quebec  
and Mari-  
time Pro-  
vinces.  
1888.

330. In Quebec and the Maritime Provinces the season was unusually wet, and though a large quantity of hay and grain was harvested in good condition, considerable damage was done by the rains. The apple crop of Nova Scotia was very good.

Average  
yield in  
Ontario.  
1882-1888.

331. Ontario is now the only Province that makes any regular collection of agricultural statistics, since the admirable system for several years in force in Manitoba, has, it is much to be regretted, been discontinued by the Provincial authorities. The following figures, therefore, giving the average yield per acre of the crops mentioned during the last seven years, apply only to Ontario:—

AVERAGE YIELD PER ACRE OF THE UNDERMENTIONED CROPS IN ONTARIO—1882-1888.

Crops.	Average Bushels per Acre.	Crops.	Average Bushels per Acre.
Fall wheat.....	19·8	Buckwheat.....	22·2
Spring wheat.....	15·7	Beans.....	21·1
Barley.....	26·1	Potatoes.....	121·5
Oats.....	35·7	Mangold-Wurtzel.....	437·1
Rye.....	16·4	Carrots.....	333·4
Peas.....	20·7	Turnips.....	391·6
Corn.....	67·5		

332. The complete returns of the wheat crop in Manitoba in 1887 place the total yield at 14,000,000 bushels and the average yield at 32·4 bushels per acre. It is calculated that this quantity was raised by 16,000 farmers, giving an average each of 875 bushels.

Manitoba  
wheat  
crop, 1887.

333. The total wheat crop of Canada in 1887 may be placed at 39,463,623 bushels, and the amount of wheat and flour imported for home consumption was 324,452 bushels, making a total of 39,788,075 bushels. Of this quantity 3,914,329 bushels were exported, and, at the rate of 2 bushels to the acre, 4,473,930 bushels were retained for seed, leaving 31,399,816 bushels available for home consumption, being at the rate of 6·31 bushels per head of population. The consumption per head in the United States varies in different parts, but an average of 4½ bushels *per capita* has been fixed by American statisticians for the whole Union. The consumption in the United Kingdom is about 5½ bushels per head. In view of the heavy wheat crop in Manitoba in 1887, the small quantity exported from the Dominion in 1888 may be noticed with surprise, but it must be remembered that there was a deficiency in Ontario of over 6,000,000 bushels, and Manitoba wheat was largely used to supply this, over 8,500,000 bushels having been moved down to the east by the Canadian Pacific Railway, with scarcely any delay.

Wheat  
crop of  
Canada,  
1887.

334. The following tables give the values and quantities of imports for home consumption and exports of Canadian produce of wheat, flour and other breadstuffs, and also the total imports and exports of the same articles in each year since Confederation :—

Imports  
and ex-  
ports of  
wheat and  
other  
bread-  
stuffs,  
1867-1888.

Amount entered for consumption only as regards New Brunswick. † Not separated other grain. ‡ Rye included. § The produce of Canada only.

Effect of  
National  
Policy.

335. The very marked effect which the imposition in 1879 of a small duty upon wheat and flour had upon the imports of the same will be visible at once on examining the first two of the preceding tables, and it may be estimated that in consequence of the adoption of that policy upwards of \$5,000,000 have been annually retained in the country which would otherwise have gone into the pockets of foreigners.

Price of  
wheat.

336. During the week ended 1st October, 1887, the price of wheat in London was the lowest touched for 125 years, viz., 28s. 5d. per quarter, or 86 cents per bushel; and the steady fall of late years is shown in the following table, which gives the average price of wheat in London and the average export price in New York for 18 years from 1871:—

LONDON.				NEW YORK			
Year.	Price.	Year.	Price.	Year	Price.	Year	Price.
	\$ cts.		\$ cts.		\$ cts.		\$ cts.

1878.....	1 41	1887.....	0 99	1878.....	1 33	1887.....	0 89
1879.....	1 33	1888.....	0 96	1879.....	1 06	1888.....	0 85

During the months of August and September wheat took a sudden rise, consequent on reports of bad harvests in some of the wheat-producing countries, and the average price in London during those months was \$1.09 per bushel. It has since fallen again, though the average export price in New York in December, 1888, was \$1.10 per bushel.

Wheat  
crop in  
principal  
exporting  
countries,  
1888.

337. The principal wheat-exporting countries are the United States, Russia, British India, the Argentine Republic, and the Australasian Colonies, and the following figures give the estimated crop in those countries in 1888:—

	Bushels.
United States.....	415,868,000
Russia.....	239,400,000
British India.....	269,591,000
Argentine Republic.....	28,378,000
Australasian Colonies.....	39,729,200

338. The total estimated production of the world is placed at 2,045,202,460, being about 36,000,000 bushels less than in 1887. Wheat production of the world.

339. The United Kingdom is the largest importer of wheat, and the British demand has a most important effect on the price of wheat almost all over the world. The following table, taken from the report on the Foreign Commerce of the United States, 1888, shows the share of the principal countries in the import of wheat into the United Kingdom, during the years 1871 to 1887, inclusive :— Share of principal countries in import of wheat into United Kingdom.

TABLE SHOWING THE PROPORTIONATE QUANTITIES OF WHEAT IMPORTED INTO THE UNITED KINGDOM FROM THE PRINCIPAL WHEAT-EXPORTING COUNTRIES, 1871-1887.

YEAR.	IMPORTED FROM.							
	Russia.	Germany.	British North America.	United States.	Chili.	British India.	Australia.	Other Countries.
	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.
1871	35·37	9·60	8·52	35·22	1·33	0·50	0·84	8·62

1874	11·76	8·13	8·71	55·16	4·47	2·18	2·35	7·24
1875	17·06	11·11	6·83	44·29	1·51	2·24	2·13	14·83
1876	17·17	6·72	5·35	42·81	1·95	6·35	5·48	14·17
1877	17·33	11·03	5·14	37·16	1·28	9·62	0·71	17·73
1878	15·32	10·91	5·03	56·27	0·09	3·04	2·62	6·72
1879	11·12	6·52	7·33	61·12	2·04	1·22	3·15	7·50
1880	4·33	4·12	6·63	65·42	2·12	4·72	6·74	5·92
1881	5·75	4·34	4·49	64·05	1·64	10·29	4·64	4·80
1882	12·01	6·91	3·87	55·72	2·13	10·51	3·83	5·02
1883	15·91	6·25	2·87	47·57	2·72	13·30	3·30	8·08
1884	8·34	4·95	3·96	53·74	1·60	12·06	8·11	7·24
1885	14·86	4·61	2·58	47·90	2·00	14·98	6·69	6·38
1886	6·03	3·43	6·20	58·05	2·74	17·75	1·31	4·49
1887	7·51	2·90	6·67	61·45	2·99	11·52	1·83	5·13

The United States share of the exports was larger in 1887 than in any year since 1881, while there was a very marked decrease in the proportion from British India. The proportions from other countries, it will be seen, have been very variable.

Import of  
wheat into  
United  
Kingdom  
in 15  
years.

340. The actual quantity of wheat imported into Great Britain during the last 15 years has been 1,818,848,575 bushels, giving an annual average of 121,256,572, and this enormous quantity has come from the undermentioned countries in the following proportions:—

COUNTRIES.	Quantity.	Average Annually.	Per- centage.
	Bushels.	Bushels.	
United States.....	929,656,838	61,977,122	51.12
Russia.....	246,991,629	16,466,109	13.57

Total.....	1,818,848,575	121,256,572	100.00

Wheat in  
India.

341. The future of India as a wheat exporting country is a question very much in dispute, some inclining to the view that it is ultimately destined to supplant the United States, others again maintaining that there is no chance of exportation increasing to any extent. Certain it is that the increase in the area under wheat cultivation has not been large during the last ten years. In 1879 it was 25,512,407 acres, and in 1887, 26,735,484 acres, and shows signs of decline, as the area in 1885 was 28,228,740 acres. The yield is also very small, averaging about nine bushels to the acre, and is not increasing, the total produce in 1884 being estimated at 251,690,880 bushels, and in 1887 at 238,585,947 bushels.

342. The yield in the United States is claimed by some to be showing signs of decreasing, indicating exhaustion of the land, though the decrease is only slight at present. The average yield per acre for the years 1880-1887, inclusive, was 12.1 bushels, and for the preceding ten years 12.4 bushels. The value of the yield per acre has, however, decreased very much, from \$13 to \$10.06, a decline and loss of 22 per cent.

Wheat  
yield in  
United  
States.

343. The following table gives the wheat crop of the world in 1888. The figures, which are taken from the March, 1889, report of the United States Department of Agriculture, are partly official and partly estimated. The figures for Canada are probably slightly below the mark.

Wheat  
crop of  
the world,  
1888.

Barley.

344. Considerable interest has been taken lately in the question of the possibility of creating a market in England for Canadian barley, and as this country is, without doubt, admirably adapted for growing this grain, the subject deserves serious consideration. The United Kingdom imported, during the ten years, 1878–1887, inclusive, 291,820,921 bushels of barley, being an annual average of 29,182,092 bushels, and of the total quantity only 1,704,864 bushels came from Canada, the principal exporting countries being Russia, Roumania, Germany, France and Chili. During the same period Canada exported 83,876,366 bushels, of which 79,516,441 bushels, or 95 per cent., went to the United States, the reason of this being, not so much because it was the nearest market, as because the Americans use for malting purposes, the four and six-rowed barley, which are the kinds chiefly grown in Canada, while English brewers confine themselves exclusively to two-rowed barley for malting, and only use the other kinds for grinding purposes. If, however, the cultivation of two-rowed barley was fairly established in this country, the English market would be found far more remunerative to the farmer than the American,

the price given being very much higher, good malting barley fetching from \$1.10 to \$1.30 per bushel. The average export price of barley to the United States during the same ten years was 71 cents per bushel.

345. Experiments are now being conducted at the Experimental Farms to ascertain which are the best kinds to grow, and which the best soils to be used, and when the result of these is made known it will only require care and attention on the part of the farmer, to produce barley that will fetch nearly double the price in the English that is at present obtained in the United States market. The importance of this question is enhanced by the fact that there is no longer the same American demand for Canadian barley as formerly, owing to a new process of brewing having been discovered, by which the dark and cheaper western States barley can be used, and though the product is not so good it answers the purpose for the general public, and is more profitable to the manufacturer; and also owing to the fact that farmers in the Western States are more largely beginning to grow barley.

Experiments in barley

346. There was a considerable increase in all kinds of stock imported into Canada from Europe for breeding purposes during 1888, as will be seen by the figures for the last five years in the following table:—

Imports of stock from Europe, 1884-1888.

NUMBER OF CATTLE, SHEEP AND PIGS IMPORTED FROM EUROPE, 1884-1888.

YEAR.	Cattle.	Sheep.	Pigs.
1884.....	1,607	473	26
1885.....	1,356	255	37
1886.....	601	328	16
1887.....	162	488	10
1888.....	229	2,016	86

Particulars of breeds imported.

347. Of the above number 60 head of cattle and 862 sheep were for the United States, and all others for Canada. The particulars of the breeds were as follow :—

CATTLE.			
Shorthorns .....	10	Kerry .....	2
Galloways .....	126	Polled Angus.....	48
West Highlands.....	1	Jersey .....	5
Herefords.....	3	Holstein.....	11
Devons.....	11	Ayrshire .....	12

Yorkshire.....	67	Essex.....	5

Several animals died in quarantine, but no disease of a contagious nature appeared in any of them.

Imports of stock 1887 and 1888.

348. The following comparative figures of the total importation of stock into Canada during 1887 and 1888 show that there was a considerable increase in the latter year, principally attributable to the large number of sheep and pigs imported at Victoria, B.C.

	1887.	1888.
Horses .....	412	846
Cattle.....	549	454
Sheep.....	6,539	30,626
Pigs.....	262	2,468

The increase in the number of sheep imported into Manitoba was considerable, amounting to 1,842, and shows that the industry of sheep-raising is on the increase in that Province.

Exports of horses, cattle and sheep, 1874-1888.

349. There was an increase in the number of horses, and a falling off in the number of cattle and sheep exported from Canada during 1888, as will be found in the following table,

which gives particulars of the export trade of live stock since 1874:—

HORSES, CATTLE AND SHEEP EXPORTED FROM CANADA,  
1874 TO 1888.

<b>Total.....</b>	<b>210,853</b>	<b>23,137,757</b>	<b>993,423</b>	<b>49,364,094</b>	<b>4,607,522</b>	<b>16,394,353</b>

Some idea can be formed of the extent and importance of this trade when it is seen that the value of the horses, cattle and sheep exported during the last 15 years has reached the enormous sum of \$88,896,204, and as the above table shows, the dimensions of the trade are, subject to fluctuation, continually increasing.

350. Previous to 1872 no meat, either live or dead, was exported from this country to Great Britain, except a certain quantity of salted beef, and the export of live cattle may be said to have commenced in that year—the first shipment being made through the United States, owing to there being no vessels trading to Canada suitable for the purpose. Since that time, however, vessels have been built

Live cattle export trade to Great Britain.

specially fitted for the carrying of live stock; and this circumstance, by reducing the rates of freight, has contributed largely towards keeping the business a fairly remunerative one, in spite of the fall in prices and the reduced demand, owing to a much larger home supply.

Exports of  
live cattle  
to Great  
Britain  
and  
United  
States.  
1872-1888.

351. The following table shows how rapidly the trade with Great Britain has increased since its inception, and the great difference in the value of the exports to that country and to the United States shows how much more important is the trade with the former country. This difference in value is, of course, explained by the fact that only first-class beasts, specially fed, are as a rule shipped to England, while all sorts and conditions of animals are sent across the line.

353. The mutton supplied from Australasia and South America appears to find more favor in the English market than that from this country, and the demand for Canadian mutton is not increasing ; but it speaks well for the quality of Canadian beef, when it is able, in the face of the keenest competition, to not only hold its own, but to find the demand for it steadily growing, and it is a trade which

Canadian beef.

deserves to be encouraged in every possible manner. When the enormous amount of meat, live and dead, annually imported into Great Britain, is considered, it will be understood that there is at present practically no limit to the expansion of the trade in this country, and it rests entirely with the farmers themselves as to what dimensions it shall attain. Too much attention cannot be given to the using of thoroughbred bulls, and the following extract from Dr. McEachren's report would seem to indicate that not only are the farmers alive to the importance of this, but also that buyers on the other side are quite ready to take advantage of the results: "It is pleasing to notice in the animals forwarded from all parts of the Dominion for exportation, the unmistakable evidences of thoroughbred crosses, the results of using pedigreed bulls, and, as a consequence, British feeders are beginning to find that they can put no cattle bought in open market into their stalls for feeding, that will pay them as well as Canadian store cattle."

Importance of using thoroughbred bulls.

354. The Australasian Colonies and the Argentine Republic are among the principal competitors in this trade, the quantity of dead meat shipped from Australia and New Zealand being very large and constantly increasing. In 1887 the quantity of beef and mutton exported was 614,409 cwt.

Shipments of meat from Australasia.

355. The Argentine Republic is taking active measures to increase its share of the meat trade, since in 1887 it passed a law according bounties to the extent of \$500,000 a year for three years, on the exportation of live and dead meat, and since then its Congress has authorized the Government to guarantee interest at the rate of 5 per cent. on a capital of \$8,000,000 for ten years, to be invested in establishments devoted to the export of beef. The number of cattle in the Republic is estimated at 20,000,000, and their value at

Meat exports of the Argentine Republic.

\$150,000,000, while the value of the land devoted to cattle-breeding is placed at \$600,000,000.

356. It will thus be seen how keen the competition is likely to become, but at the same time there seems no reason to doubt but that Canada, with the limitless prairies of the North-West for a breeding ground, will continue to successfully hold her own in this trade, and the shortness of the voyage, as compared with those from South America and Australasia, should be an important factor in assisting her to maintain a prominent position on the English market.

Favourable position of Canada.

357. The experiment, which was tried in 1887, of shipping cattle to Great Britain direct from the ranches, was so successful that it was repeated on a larger scale in 1888, 4,500 head having been sent over, and though the results in all cases were not satisfactory, owing to want of judgment in the selection of some of the animals, still the fact has been established that well-bred and properly selected steers, under proper management, can be landed in any seaport market in Great Britain in good condition, and sold at remunerative prices. The practicability of sending dead meat to England in refrigerators is now engaging the attention of stock-raisers in the North-West.

Shipment of live cattle to Great Britain from the Ranches.

358. The following tables give the quantities and values of provisions exported from Canada in each year since 1873, and the countries to which they were shipped.

Exports of provisions from Canada, 1874-1888.

359. The exports of provisions in 1888, both in quantity and value, were larger than in any other year in the table, and there has been a steady and persistent increase for several years. By far the largest share goes to Great Britain. In 1888, of the whole value the proportion was 80 per cent., and it will be seen that the quantity shipped to England was larger than in any previous year. Increase in exports of provisions.

360. The quantities of bacon, hams, &c., and of beef exported, have decreased very considerably since 1874, the export of live cattle having taken the place of the former trade in salted beef, and the enormous number of hogs raised in the western States has apparently discouraged the Canadian farmer, and led him to turn his care to other things; but sufficient attention is not paid to the raising of pork in this country. It can be made very profitable, and it is to be Decrease in exports of pork, &c.

regretted that its production is not cultivated on a larger scale.

Decrease  
in exports  
of butter.

361. The decrease in the exports of butter has been very considerable, amounting to 63 per cent., and is attributable almost entirely to carelessness on the part of the farmers in not producing an article of sufficiently high quality to obtain a ready sale in the English market. It has been said that the deterioration in quality and decrease in quantity are largely due to the establishment of cheese factories, which absorb the new milk; but be that as it may, there is plenty of room in Canada for the production of large quantities of first-class butter as well as of cheese, and as the export of this article could be made a source of considerable profit, it is a subject well worthy the attention of agricultural societies throughout the Dominion.

Imports of  
butter  
into  
United  
Kingdom.

362. The total quantity of butter imported into Great Britain in 1887, according to British Customs returns, was 169,471,008 lbs., and of this quantity only 3,659,376 lbs. came from Canada. The Australasian Colonies, particularly New Zealand, are turning attention to shipping butter and cheese to England, and are meeting with considerable success, the shipments of butter from New Zealand having increased from 71,120 lbs. in 1886 to 776,944 in 1887, and it is evident that if these colonies can make this trade remunerative, how much more so could Canada, when the gain in distance and consequently in freight charges is considered.

Exports of  
cheese.

363. The exports of cheese have steadily increased, and in 1888 were 250 per cent. more than in 1874. It almost all goes to the United Kingdom, and it will not be long before more cheese will be imported into that country from Canada than from anywhere else. In 1887 the largest amount supplied was by the United States, viz., 85,223,040 lbs., Canada coming next with 70,883,232 lbs.

364. The increase in the number of eggs exported has also been large. These go almost entirely to the United States. Exports of eggs.

365. In order to furnish some idea of the enormous quantities of food annually imported into Great Britain, the following table is given, showing the quantities of the principal articles of food imported in 1887, distinguishing between Canada and the United States, and other British possessions and foreign countries:-- Imports of food into United Kingdom.

IMPORTS OF PROVISIONS INTO THE UNITED KINGDOM, 1887.

Flax (Flaxseed) has been included in error in the table on page 271.

..... NUMBER OF HORSES that have been exported from this country since Confederation is 282,147, of which 272,084 have gone to the United States, 5,189 to Great Britain and 4,874 to other countries. The total number imported during the same period, principally for improvement of stock, is 31,968. Number of horses exported.

Horse-  
breeding.

367. Horse-breeding prevails more or less generally in Canada, but it is being made a special industry in Alberta, N.W.T., where it is rapidly becoming of importance, and it is expected that in a few years a large number of serviceable horses will be available. Though owing to the jealousy of British agriculturalists, the Imperial Government has discontinued, for the present, the purchase of horses in Canada for the army, there is not much doubt that the demand will be ultimately revived, and it is to be hoped that Canadian farmers will employ the interval in profiting by the advice and remarks of the officers sent out to purchase, with reference to the style of animal required, that when the time does come again, as it inevitably will, a far larger supply will be found available than was the case in the first instance: and even if the animals thus produced are not required for army purposes, they will be found greatly improved for general purposes. The market is sure to come, and there is likely to be much money made out of the trade.

Horses  
and cat-  
tle in  
Canada  
and U.S.

368. The total number of horses in Canada in 1888 was about 1,099,279, and of cattle, 3,791,908. In the United States at the same time the number was of horses, 13,663,294, and of cattle, 50,331,042.

Ranches  
N.W.T.

369. The number of ranches in operation was 108, comprising 3,252,378 acres, and the quantity of stock in the district of Alberta and Assiniboia was, as far as returns were available, 108,361 cattle, 23,868 horses and 31,435 sheep. The actual numbers are undoubtedly larger. Forty-four leases were cancelled during the year, and there has been a great falling off in the number of applicants for leases since April, 1887, when the Government decided to grant them only by public competition. The cattle industry was very successful during the year, the winter having been very favourable for stock.

370. Much progress was made during the year in the organization and equipment of the Experimental Farms. Work was commenced on the several branch farms, and actively carried on. The farm for the Maritime Provinces is situated at Nappan, Nova Scotia, and contains 300 acres, about forty acres of which were under crop during 1888, while a number of fruit and ornamental trees were planted, and under-draining and general preparation of the land was energetically carried on. Farm buildings are now in course of erection. In Manitoba a farm consisting of 640 acres, within a mile and one-half of Brandon, was chosen, having a large area of soil, fairly representing the grain-growing districts of the Province, and every variety of soil required for experimental purposes. Possession was not had until July, 1888, but since then a large area has been prepared for crop in the present year, and a considerable amount of fencing, road-making and general improvements done. In the North-West Territories a section of land containing 682 acres, near the town of Indian Head, was chosen, the site presenting a rare combination of desirable features for experiments in agriculture, horticulture and forestry. Possession was had early in the spring, and operations were carried on vigorously all through the summer. Several very useful results in grain tests were obtained, particularly in two-rowed barley, Golden Melon and Thanet, two well known varieties of this kind giving 34 bushels to the acre and 54 lbs. to the bushel, and 56 bushels to the acre and 54 lbs. to the bushel, respectively, the grain being plump and bright. Experiments were made also with early ripening oats and wheat. Twenty thousand forest trees and shrubs, 2,397 fruit trees and vines, as well as 700 maple trees, were planted. In British Columbia a site near Agassiz station, on the Canadian Pacific Railway, containing 300 acres, was chosen. Possession was not had until very late in the season, and nothing could be done beyond clearing some undergrowth and ploughing 20 acres for this year's crop.

Central  
Farm  
Ottawa.

371. On the Central Farm near Ottawa experiments were made during 1888 with 49 varieties of barley, 74 of spring wheat, 100 of fall wheat, 20 of rye, 53 of corn, and many different varieties of root crops, and the results of these experiments will be published as soon as compiled. The number of samples received for testing was 795, consisting of 446 specimens of wheat, 80 of barley, 146 oats, 26 peas, 59 grass seeds, 6 rye, 5 Indian corn, and 27 vegetable seeds. Several samples of soil were also received and analyzed. Sample bags, to the number of 2,150, and containing either Ladoga wheat, barley, oats or forest tree seeds, were sent out, each accompanied with instructions, and a set of questions to be answered regarding results.

Grain  
from  
India.

372. A special selection of early-ripening sorts of wheat and barley grown in six different parts of India is now on its way to the farm, having been sent over by the Government of that country, and these grains will be tested at the several farms during the coming season.

---

## CHAPTER VIII.

### RAILWAYS.

Govern-  
ment aid  
to public  
railway  
compan-  
ies.

373. In India and in all of the principal British Colonies, with the exception of Canada, the railways have been principally, and in some cases entirely, built by the Government with public money, and large portions of the public debts have been incurred for that purpose, but in this country the Government have only built such lines as were required by public policy, those being the Intercolonial and Prince Edward Island Railways; the first being built in accordance with the wishes of the Imperial Government, and the second to fulfil the pledges made to Prince Edward Island when that Province entered Confederation. The Govern-

ment, however, has always been active in encouraging private enterprise, and in that way has expended no less a sum than \$134,278,219 in the shape of bonuses at different times to different railways, which sum represents a considerable portion of the public debt, and which, as previously mentioned, though directly productive to the country at large, brings in no immediate return to the Government. In addition to the above, the Government has at various times made loans to railways, the amount of such loans at present outstanding being \$20,920,085. The Provincial Governments have also contributed aid to the extent of \$23,342,758, and various municipalities to the extent of \$13,044,224.

374. The first railway in Canada was opened on the 21st July, 1836, between Laprairie and St. Johns, in the Province of Quebec, its length being 16 miles, but such little progress was made in railway development, that when the first sod of the Northern Railway was turned by Lady Elgin in 1850 there were but 71 miles in operation, in the whole of what is now the Dominion of Canada. Slow though this country undoubtedly was at one time in the matter of railway construction, it has of late years made very considerable progress. In 1867 there were 2,258 miles in operation, and on 30th June, 1888, 12,163 miles, with a total of 12,701 miles completed, being an increase in the 21 years since Confederation of 9,905 miles. In 1868 the paid-up capital amounted to \$160,471,190, and in 1888, to \$727,180,449.

Railway  
develop-  
ment in  
Canada.

375. The following table gives the sources from which the various sums have been derived that make the total capital paid, the amount derived from each source, and the amount of each per mile of completed railway:—

Particu-  
lars of  
capital  
paid.

## PARTICULARS OF RAILWAY CAPITAL PAID, 1888.

SOURCE OF CAPITAL.	Amount.	Amount per Mile.
	\$	\$
Ordinary share capital.....	231,623,391	18,237
Preference do .....	95,870,491	7,548
Bonded debt.....	228,617,728	18,000
Aid from Dominion Government.....	132,155,546	10,405
do Ontario do .....	5,947,008	468
do Quebec do .....	9,611,986	757
do New Brunswick do .....	4,122,628	325
do Nova Scotia do .....	1,678,637	132
do Manitoba do .....	1,945,000	153
do British Columbia Government.....	37,500	3
do Municipalities.....	13,044,224	1,027
Capital from other sources .....	2,426,309	199
Total .....	727,180,449	57,254

Proportion of details of capital to total.

376. The proportion that each amount bears to the total capital is as follows:—

	Per cent.
Ordinary share capital.....	32·
Bonded debt.....	31·
Dominion Government aid.....	18·
Preference share capital.....	13·
Provincial Government aid.....	3·
Municipal aid.....	2·
Other sources.....	0·3

Nearly 25 per cent. of the total capital has thus. it will be seen, been contributed by State and Municipal aid.

Railway statistics 1875-1888.

377. Though returns of a certain kind were annually made to the Government, they were, previously to 1874-75, more or less incomplete, and only since that year have any accurate statistics been collected. The following table gives the train mileage, number of passengers and tons of freight carried, and the receipts and expenditure of all railways in the Dominion for each year since the 1st July, 1874:—

## RAILWAYS.

277

YEAR ENDED 30TH JUNE.	Miles in Opera- tion.	Train Mileage.	Number of Passen- gers.	Tons of Freight.	Earnings.	Working Expenses.
					\$	\$
1875.....	4,826	17,680,168	5,190,416	5,670,836	19,470,539	15,775,532
1876.....	5,157	18,103,628	5,544,814	6,331,757	19,358,084	15,802,721

1882.....	7,530	27,846,411	9,352,335	13,575,787	29,027,790	22,390,709
1883.....	8,726	30,072,910	9,579,948	13,266,255	33,244,585	24,691,667
1884.....	9,375	29,758,676	9,982,358	13,712,269	33,421,705	25,595,341
1885.....	10,150	30,623,689	9,672,599	14,659,271	32,227,469	24,015,351
1886.....	10,697	30,481,088	9,861,024	15,670,460	33,389,382	23,177,582
1887.....	11,691	33,638,748	10,698,638	16,356,335	38,842,010	27,624,683
1888.....	12,163	37,391,206	11,416,791	17,173,759	42,151,153	30,652,048

378. It will be seen that there was a very marked increase indeed in the business of the railways in 1888, and the totals in each column are considerably larger than they have ever been before. The earnings per mile in 1880 averaged \$3,418; in 1884, \$3,490; in 1885, \$3,175; in 1886, \$3,106; in 1887, \$3,322, and in 1888, \$3,465, being an increase of \$143 per mile as compared with the year before, making a further break in the tendency which was manifesting itself for the earnings to decrease as the mileage was extended. The average amount of working expenses per mile in 1886 was \$2,166; in 1887, \$2,363, and in 1888, \$2,520, showing an increase of \$157 per mile, and there was no improvement in the proportion of net receipts to capital cost; in 1886 it was 1.41 per cent.; in 1887, 1.64 per cent., and in 1888, 1.58 per cent. There was an increase in train mileage of 3,752,458 miles, in the number of passengers carried of 718,153, in the tons of freight carried of 817,424, and in the net receipts of \$282,779.

Particu-  
lars of  
increases.

379. The following is a comparative statement of the business done by Canadian railways in the years 1887 and 1888, particulars of the principal lines being given separately:—

Business  
of Cana-  
dian rail-  
ways, 1887  
and 1888.

Proportion of expenses to receipts.

380. There was an increase in proportion of working expenses to receipts of 1 per cent. in public railways, and of 3 per cent. in Government railways. The proportion of total expenses to receipts was also 1 per cent. higher, though it has decreased since 1884, when it was 76 per cent. The proportion, however, is still higher than in many other countries. In the United Kingdom, in 1887, it was 52 per cent.; in the Australasian Colonies in 1886, 60 per cent.; in India, in 1886, 49 per cent., and in most European countries it ranges from 50 to 55 per cent. The Canada Southern and the Canada Atlantic were the two roads whose expenses bore the smallest proportion to receipts, and the Central Ontario and Manitoba and North-Western the largest. The causes for the excess of expenses on Government railways are alluded to in par. 406. The Northern and North-Western Railway is now merged in the Grand Trunk system.

The Canadian Pacific system has the greatest number of miles in operation, but the traffic on the Grand Trunk system is considerable the largest, running as it does through the most populous and best settled portion of the Dominion.

Principal sources of receipts and expenditure.

381. The following table gives the principal sources of receipts and expenditures on the most important railroads, as well as the earnings and expenses per mile. Owing to the absence of details in the case of one road, a difference will be found in the total expenditure, as compared with the totals of the principal sources, of \$4,320 :—

**SUMMARY STATEMENT OF EARNINGS ON CANADIAN  
RAILWAYS, 1888.**

RAILWAYS.	EARNINGS FROM			Total.	Earnings per Mile.
	Passenger Traffic	Freight Traffic.	Mails, Ex- press and other Sources.

<b>Total.....</b>	<b>6,793,262</b>	<b>13,337,968</b>	<b>10,516,496</b>	<b>30,652,046</b>	<b>2,520</b>

\* Including \$4,320, of which no details are given.

**382.** The receipts from freight traffic formed 62.64 per cent., and from passenger traffic 30.00 per cent. of the total, while of working expenses 43.51 per cent. were for work-  
Proportions of principal sources to total.

ing and repairs, 34·30 per cent. for general working expenses, and 22·16 per cent. for maintenance of line, &c. Both receipts and expenses were considerably larger per mile on the Canada Southern Railway than on any other road, the traffic being very heavy in proportion to the length of the line.

Proportion of net revenue to capital cost.

383. The proportion of net revenue to capital cost was very small, being only 1·58 per cent., and considerably lower than in many other countries and colonies, as seen by the following figures :—

PROPORTION OF NET REVENUE TO CAPITAL COST OF RAILWAYS IN VARIOUS BRITISH POSSESSIONS AND FOREIGN COUNTRIES.

BRITISH POSSESSIONS.		FOREIGN COUNTRIES.	
	Per cent.		Per cent.
United Kingdom.....	1·00	Germany.....	4·68
India.....	5·30	France.....	4·65
Canada.....	1·58	Belgium.....	4·03
Victoria.....	4·36	Austria-Hungary.....	3·98
New South Wales.....	2·97	Italy (State lines).....	3·70
South Australia.....	2·50	Switzerland.....	3·67
New Zealand.....	2·36	United States.....	3·77
Queensland.....	1·62		
Tasmania.....	0·42		
Western Australia.....	0·91		

The figures for Canada are probably somewhat below the true proportion, as the capital cost includes expenditure on lines in progress and completed, but not yet in operation, and consequently unproductive.

Quantities of principal articles of freight carried 1888.

384. The next table gives some particulars of the quantities of the principal articles of freight carried by **Canadian Railways** in 1888 :—

**RAILWAYS.**

283

<b>Total.....</b>	<b>414,096</b>	<b>2,483,197</b>	<b>7,870,495</b>	<b>17,173,759</b>

The Grand Trunk system carried 40·18 per cent. of the total freight, a larger proportion than in 1887, when it was 39·48 per cent., and, as in the preceding year, the Canada Southern carried the next largest proportion viz., 15·34 per cent.; the proportion in 1887 was 15·77 per cent. The proportion of freight, however, to the length of road, was much higher on the Canada Southern, being 7,280 tons per mile, as compared with 2,231 on the Grand Trunk.

Cost of principal railways in Canada.

385. The following table shows the total cost, and cost per mile, of some of the principal roads in Canada. The cost of rolling stock is, in most cases, included:—

COST OF PRINCIPAL RAILWAYS IN CANADA.

\* Windsor Branch included.

Expenditure on Grand Trunk and North-West Coal and Navigation Company.

386. The expenditure on the construction and equipment of the Grand Trunk system has, it will be seen, been very much in excess of that on any other road, the expenditure on the main line during its original construction having been exceptionally heavy. The North-Western Coal and Navigation Company's road, which connects the coal mines on the Belly River with Medicine Hat, and which has a gauge of 3 feet only, is the road that, according to the above table, has been built at the least expense, which is probably explained by the fact of its running through a level prairie country, and that no outlay was required for the purchase of land. The difference in gauge also probably reduced the expenditure.

387. The total average cost per completed mile of all the railways in Canada is \$57,254, which it will be seen from the following table compares favourably with the figures for some principal countries:—

Average cost of railway construction in Canada and some foreign countries.

COST OF RAILWAY CONSTRUCTION IN PRINCIPAL COUNTRIES.

COUNTRIES.	Cost per Mile.	COUNTRIES.	Cost per Mile.
	\$		\$
United Kingdom.....	210,289	United States.....	54,301
Belgium.....	177,672	Australasia.....	46,336
France.....	134,826	Cape Colony.....	44,856
Germany.....	103,349	Tasmania.....	39,328
Russia.....	97,333	New Zealand.....	36,811
Victoria.....	66,951	Queensland.....	33,540
India.....	63,266	South Australia.....	29,404
New South Wales.....	62,021	Western Australia.....	22,236
Canada.....	57,254		

388. The following is a statement of the number of accidents in connection with the railways in Canada, including Government railways, for the last 13 years:—

Railway accidents in Canada.

	Killed.	Injured.
1876.....	109	304
1877.....	111	317
1878.....	97	361
1879.....	107	66
1880.....	87	102
1881.....	99	147
1882.....	147	397
1883.....	169	550
1884.....	227	796
1885.....	157	684
1886.....	144	571
1887.....	178	633
1888.....	231	775

389. There was a very large increase in the number of persons killed in 1888, amounting to 53, but of the total number 181 lost their lives by carelessness, disregard of regulations, or some other cause preventable by their own

Causes of accidents.

actions, leaving as the number killed from causes over which they had no control, or for which they were not responsible, 100—76 of whom were railway employés. The number killed was larger than in any year for which statistics are available, and with the exception of 1884 the number injured, viz., 775, was also the largest. The large number of 20 passengers were killed, 8 by collisions, 6 by getting off trains in motion, 4 falling from cars, and 2 by being on the track. It is probable that the last 12 were all accidents preventable by the persons themselves, and were not such as the railway companies could in any way be held responsible for. No less than 110 persons, 84 of whom were persons other than passengers and employés, were killed through walking on the track. The total number of employés killed was 107, and of other persons 104.

Passengers killed per million carried in Canada.

390. In calculating the safety of railway travelling in Canada none of the passengers killed in 1887, and only 8 in 1888, should, strictly speaking, be included, since the companies were in no way responsible for their deaths; but even if the whole number is taken, it will be seen from the following figures, that this country stands very well as regards safe travelling:—

PASSENGERS KILLED PER MILLION CARRIED—1875-1888.

YEAR.	Passengers Killed per Million Carried.	YEAR.	Passengers Killed per Million Carried.
1875.....	2.11	1882.....	1.07
1876.....	0.90	1883.....	0.52
1877.....	0.82	1884.....	4.60
1878.....	1.40	1885.....	0.82
1879.....	1.38	1886.....	0.81
1880.....	1.55	1887.....	1.08
1881.....	0.72	1888.....	1.78
Average for the whole period, 1.37.			

These figures, however, are capable of a large amount of improvement, the safety of travelling having been by no means yet reduced to the minimum that is both desirable and practicable, as is shown by the figures for the United Kingdom in 1888, which say that only 1 passenger in every 6,064,000 was killed during the year from any cause whatever.

391. The next table gives some particulars concerning the passengers and freight carried relatively to population and length of line in each year from 1875 :—

Passengers and freight per head of population and miles of line.

PASSENGERS AND FREIGHT CARRIED PER HEAD OF POPULATION AND MILES OF LINE OPEN IN CANADA, 1875-1888.

YEAR.	PASSENGERS.		FREIGHT.	
	Per Head of Population.	Per Mile of Line open.	Tons per Head of Population.	Tons per Mile of Line open.
1875 .....	1.34	1,055	1.46	1,175
1876 .....	1.40	1,075	1.60	1,228
1877 .....	1.51	1,090	1.71	1,231
1878 .....	1.58	1,049	1.93	1,283
1879 .....	1.57	1,006	2.01	1,288
1880 .....	1.53	938	2.36	1,442
1881 .....	1.60	956	2.78	1,662
1882 .....	2.12	1,242	3.06	1,802
1883 .....	2.12	1,098	2.94	1,520
1884 .....	2.17	1,043	2.98	1,432
1885 .....	2.06	953	3.12	1,444
1886 .....	2.06	922	3.27	1,465
1887 .....	2.19	914	3.36	1,401
1888 .....	2.30	938	3.45	1,412

As regards population, both passenger and freight traffic have increased in a faster ratio, but in both cases it will be seen that the total mileage has increased in a faster proportion than has the traffic carried over it.

Freight per head of population in principal countries.

392. The following table, the figures of which are mostly taken from "Wealth and Progress of New South Wales," p. 361, will give some idea of the tonnage moved per head of population in some of the principal countries of the world :—

TONS OF FREIGHT CARRIED PER HEAD OF POPULATION IN SOME PRINCIPAL COUNTRIES.

COUNTRIES.	Tons per Head.	COUNTRIES.	Tons per Head.
Scotland.....	9.5	France.....	2.5
England and Wales.....	8.4	Ireland.....	0.8
United States.....	7.6	British India.....	0.8
Belgium.....	6.5	Japan.....	0.8
Germany.....	5.3	Spain.....	0.6
Canada.....	3.4	Italy.....	to
New South Wales.....	3.3	Russia.....	0.4
Australia.....	3.0		

Proportion of traffic to cost.

393. The cost of a railway, it has been said, should not be more than ten times its annual traffic—that is, that the annual traffic should be 10 per cent. of its capital cost.\* If this standard is applied to Canadian railways their cost will be found to very far exceed the limit, as in 1888 the gross receipts only amounted to 5.80 per cent. of the total capital expenditure, the theoretical cost having been \$421,511,530, and the actual cost \$727,180,449. In the United Kingdom, France and Belgium, the cost of railways is above this standard, while in Germany and the United States it is slightly below it.

Gauge of Canadian Railways.

394. Almost all the railway companies in the Dominion use a gauge of 4 feet 8½ inches. The only exceptions are the Carillon and Grenville, and Cobourg, Peterboro' and Marmora roads, with a gauge of 5 feet 6 inches; the Prince Edward Island Railway, with a gauge of 3 feet 6 inches,

\*Railway Problems, p. 25.

and the Northwestern Coal and Navigation Company, where the gauge is 3 feet.

395. The quantity and description of rolling stock in the years 1887 and 1888 will be found in the next table. With the exception of first-class and platform cars, there is an increase under each head :—

ROLLING STOCK OF RAILWAYS IN CANADA, 1887 AND 1888.

YEAR.	Loco- motives.	Sleeper and Parlour Cars.	First Class Cars.	Second Class and Em- igrant Cars.	Baggage, Mail and Express Cars.	Cattle and Box Cars.	Plat- form Cars.	Coal and Dump Cars.
1887.....	1,633	74	762	514	62	24,399	13,136	3,057
1888.....	1,653	79	759	568	505	27,870	12,992	3,047
Increase...	20	5	.....	54	43	3,471	.....	.....
Decrease...	.....	.....	3	.....	.....	.....	144	10

396. The above table represents the rolling stock in use. To ascertain the quantity owned, the following numbers of cars hired must be deducted in each year :—

YEAR.	Loco- motives.	Sleeper and Parlour Cars.	First Class Cars.	Second Class and Em- igrant Cars.	Baggage, Mail and Express Cars.	Cattle and Box Cars.	Plat- form Cars.	Coal and Dump Cars.
1887.....	46	8	35	16	23	376	345	50
1888.....	39	8	17	15	23	2,952	242	.....

397. Full particulars respecting the building, &c., of the Canadian Pacific Railway, will be found in the Statistical Abstracts for 1886 and 1887.

Railways  
in British  
Posses-  
sions.

398. The following table gives the railway mileage in British possessions, together with the number of persons and of square miles of area to each mile :—

RAILWAYS IN BRITISH POSSESSIONS, 1888.

COUNTRIES.	Miles of Railway.	Number of Persons to each Mile.	Square Miles of Area to each Mile.

Malta.....	8	20,084	15

Proportion of  
railway  
develop-  
ment to  
area.

399. Canada, it will be seen, has over 3,000 miles of railway more than all the Australasian Colonies combined, but on the assumption that a railway only opens up country to the extent of about 20 miles on either side, there is yet a vast amount of country waiting for development, as on that basis there are only 508,040 square miles of this country within ordinary reach of railway facilities—only about one-seventh of the total area. In the Australasian Colonies only about one-ninth of the area has been thus developed.

Total rail-  
way mile-  
age of the

400. The total railway mileage open for traffic, of the British Empire, is 58,402, which on the estimated area of

8,235,151 square miles, gives an average of one mile of railway to every 141 square miles, and on the assumption in the preceding paragraph allows for rather less than one-third of the area of the whole Empire being within reach of railway accommodation. British Empire.

401. The next table gives particulars of the railways in the principal foreign countries in 1887 and 1888 :— Railways in foreign countries.

RAILWAYS IN PRINCIPAL FOREIGN COUNTRIES, 1887 AND 1888.

COUNTRIES.	Miles of Railway	Number of Persons to each Mile.	Square miles of Area to each Mile.

Turkey.....	1860	4 October.

Government railways and their financial position.

404. The railways owned by the Dominion Government are the Intercolonial, Windsor Branch, Eastern Extension and Prince Edward Island Railways, with a total mileage in operation of 1,217 miles; and the following statement shows the financial position of each road on the 30th June, 1888:—

\*Hazell's Annual, 1889, p. 556.

## RAILWAYS.

293

FINANCIAL POSITION OF GOVERNMENT RAILWAYS IN CANADA,  
1887-88.

RAILWAYS.	Capital Paid Up.	Earnings.	Expenses.	Profit.	Loss.	Percentage of Expenses to Earnings.
	\$	\$	\$	\$	\$	
Intercolonial.....	45,145,424	2,912,784	3,276,441	.....	363,658	112·4
Eastern Extension	1,284,496	70,552	90,955	.....	20,402	128·9
Windsor Branch.....	.....	24,553	24,040	513	.....	97·9
P. E. Island.....	3,741,781	158,364	229,640	.....	71,276	145·0
Total.....	50,171,701	3,166,253	3,621,076	513	454,823	114·3

405. There was a very decided increase in excess of expenditure over earnings on Government railways during 1888, the percentage of expenses to earnings being 114·3, as compared with 110·9 in 1887, and the total excess being \$454,823, as compared with \$311,902. The excess was mainly attributable to a large amount spent on improvements on both the Intercolonial and Prince Edward Island Railways, which would ordinarily be placed to capital account. The total cost, direct and indirect, of snow clearance on the Intercolonial Railway was \$93,000, the direct cost having been \$67,000.

406. The excess of expenses over receipts on Government lines may be attributed principally to two causes, one being that both the Intercolonial and Prince Edward Island Railways were built from national considerations, and for the advancement of public convenience, the first road running through districts sparsely settled, and therefore requiring considerable time for the development of traffic, while it will probably be many years before the travel on the Prince Edward Island Railway will be sufficient to cover expenses; and the other being that while every effort is made to secure economy and profit, the public interests are first considered, and many things are done which, while advantageous to the public, are, to say the least, unremuner-

ative to the Government. For instance, the coal from the Nova Scotia mines is, with a view to developing that industry, carried by the Intercolonial Railway at almost an actual loss. The difficulty also of keeping the track of the Intercolonial free from snow during the winter will always be the source of an expense to which other roads are not liable in the same degree.

Windsor Branch.

407. The Windsor Branch is owned and maintained by the Government, but it is operated by the Windsor and Annapolis Railway, who pay one-third of the gross earnings to the Government. The Government's share is generally sufficient to cover the cost of maintenance, and during 1888 the profits amounted to \$513. The road runs from Halifax to Windsor, a distance of 32 miles.

Intercolonial railway.

408. The main line of the Intercolonial Railway runs from Point Lévis, Quebec, to Halifax, a distance of 688 miles, and in connection with the Canadian Pacific Railway now forms part of the through route between the Atlantic and Pacific Oceans. The extensions consist of 206 miles, making a total length of 894 miles.

Traffic on the Intercolonial Railway 1878-1888.

409. The following are figures of the traffic during the past 11 years:—

TRAFFIC ON THE INTERCOLONIAL RAILWAY, 1878-1888

YEAR.	Earnings.	Freight.	Passengers.
	\$	Tons.	No.
1878.....	1,378,947	522,710	618,957
1879.....	1,292,100	510,861	640,101
1880.....	1,506,298	561,924	591,483
1881.....	1,760,394	725,577	631,245
1882.....	2,079,262	838,956	779,894
1883.....	2,370,921	970,961	878,600
1884.....	2,353,647	1,001,163	920,879
1885.....	2,368,154	970,069	914,785
1886.....	2,383,201	1,008,545	889,864
1887.....	2,596,010	1,131,334	940,144
1888.....	2,912,784	1,275,995	986,194

It will be seen that the traffic has increased very considerably, the figures for 1888 being in all cases the largest during the period, yet the financial results continue to be unsatisfactory, partly owing to the heavy expenses each winter necessarily incurred in keeping the line open, and partly to the extremely low rate at which coal is carried from Nova Scotia into Quebec and Ontario, as well as to the number of improvements that have been charged to working expenses. The quantity of coal carried has increased very rapidly, from 570 tons in 1879 to 192,022 tons in 1887, but it is carried at so low a rate as to be unremunerative to the railway.

410. The train mileage was 4,939,253, an increase of 426,654 miles, and the expenses per mile of railway were \$3,723, an increase of \$457 per mile. Train mileage and expenses per mile.

411. The Eastern Extension Railway is 80 miles in length and extends from New Glasgow to Port Mulgrave on the Strait of Canso, and connects with Cape Breton by means of a ferry. It is worked by the officers of the Intercolonial Railway. There was a decrease both in freight and passenger receipts, and the expenditure for renewals of bridges, &c., was very heavy. Expenditure for these purposes may be expected to be costly for the next few years. Eastern Extension Railway.

412. The Prince Edward Island Railway runs the whole length of the island, a distance of 154½ miles, and including extensions, has a total length of 210½ miles. There was an increase both in the passenger and freight traffic during 1888. In proportion to its cost, the traffic on this road is very light, and it will probably be several years before the earnings equal the expenditure. Prince Edward Island Railway.

413. A line of railway between the Oxford station, on the Intercolonial, and Brown's Point on the Pictou Town Branch, Oxford and New Glasgow railway.

and a branch from Pugwash Junction to Pugwash Harbour, being respectively  $67\frac{1}{2}$  and  $4\frac{1}{2}$  miles in length, are now being built, and are likely to be soon completed.

Cape Breton Railway.

414. A line of railway is also now in course of construction by the Government through the Island of Cape Breton a distance of 98 miles, from Point Tupper, at the Strait of Canso to Sydney. This road will form part of what is known as the Short Line, in which expression is comprised a scheme for connecting Montreal with Canadian Atlantic ports by the shortest route. Connections will be made by this line with the coal mines of Sydney and North Sydney, which will thus be placed in direct communication with the Intercolonial system. The road will connect with the Eastern Extension Railway by means of a ferry between Point Tupper and Port Mulgrave, and is expected to be ready for traffic in the autumn of 1889.

Government expenditure on construction, &c., 1884-1888.

415. The following table shows the amounts spent by the Government during the last five years on the construction, staff and maintenance of railways :—

**MARINE AND FISHERIES.**

**PART I.—MARINE.**

416. The special object of this Department is the protection of our mercantile marine, and of the shipping that frequent our coasts; it is therefore of the highest consequence that it should be made as efficient as possible, and it is gratifying to know that no pains are spared in order to bring about this result, and to provide security to shipping equal to that of the most advanced of countries.

The Marine Department.

417. An examination of the following table will give some idea of the progress made since Confederation. In it are shown the number of light stations, lighthouses, fog-whistles and fog-horns in every year from 1868 to 1888,

Number of light-houses, &c., 1868-1888.

inclusive. The light stations in Newfoundland that are maintained by the Dominion are included in these figures:

NUMBER OF LIGHTHOUSES, &c., IN CANADA, 1868-1888.

YEAR ENDED 31ST DECEMBER.	Light Stations.	Lighthouses	Fog-Whistles.	Automatic Fog-Horns.
1868.....	198	227	2	.....
1869.....	219	233	2	.....
1870.....	240	278	4	.....
1871.....	264	297	8	.....
1872.....	280	314	13	.....
1873.....	316	363	17	.....
1874.....	342	384	18	.....
1875.....	377	444	22	.....

1886.....	534	625	23	16
1887.....	561	658	23	24
1888.....	569	664	23	27

Increase  
in num-  
ber.

418. It will be seen that there was no less than 371 light stations, 437 lighthouses, 21 fog-whistles and 27 fog-horns more than there were in 1868, without taking into account the large number of bell-buoys, buoys and beacons that have also been supplied since then.

Total  
number of  
lights  
whistles,  
&c., 1888.

419. The total number of light-stations in the Dominion on 1st December, 1888, was 569; of lights shown, 664; of steam fog-whistles and automatic fog-horns, 50; and of lightkeepers, engineers of fog-whistles, assistants and crews of lightships, 722; while the whole number of persons employed on the outside service was 1,486. The lights, beacons, &c., were distributed among the several divisions as follow:—

420. The Ontario division, extending from Montreal to Manitoba, contained 181 lights, including two in Manitoba. There were also 266 buoys and 19 beacons. Two new lights and several buoys and beacons were added during the year. The total cost of maintenance for the year was \$85,688, and of construction, \$6,342. Ontario  
Division.

421. The Quebec division is a large and important one, comprising, as it does, the Richelieu River and Lake Memphremagog, the River and Gulf of St. Lawrence, the Strait of Belle Isle, the north-west coast of Newfoundland and the Labrador coast. In this division there were 151 lights, 8 lightships, 2 supplied with steam fog-whistles, 9 steam fog-whistles, 9 fog-guns, 111 buoys, 59 beacons, and 9 life-saving canoes for service in the ice. The lights were supplied by the steamers "Druid" and "Napoleon III." The expenditure for maintenance was \$125,788, and for construction, \$2,287. Quebec  
Division.

422. The Nova Scotia division, likewise a very important one, contained 160 light-houses, showing 170 lights, 1 lightship, 12 steam fog alarms, 2 fog bells, 3 signal gun stations, 10 automatic signal buoys, 6 bell-buoys, 98 iron can buoys, 620 other buoys, 8 stationary beacons, 8 lifeboat stations, 3 humane establishments and 3 signal stations. The lights were supplied by the steamer "Newfield." Three new lights were established and put into operation, and two new ones erected. The amount expended for maintenance was \$133,009, and for construction, \$2,533. Nova  
Scotia  
Division.

423. In the New Brunswick division there were 108 light-houses, including 1 lightship and 13 fog alarms. One new light was established during 1888. The expenditure for maintenance was \$73,465, and construction, \$1,542. New  
Brunswick  
Division.

424. Prince Edward Island division contained 47 lights and 1 fog alarm. The expenditure for maintenance was Prince  
Edward  
Island  
Division.

\$14,796. The schooner "Prince Edward," which was built for the purpose, delivered the annual supplies.

British  
Columbia  
Division.

425. British Columbia division contained 10 light-houses and 2 fog alarms; these were supplied by the steamer "Sir James Douglas." The expenditure for maintenance was \$19,604, and for construction, \$6,918.

Government  
steamers.

426. The Department has 8 steamers, the property of the Government, under its control, for the purpose of supplying the different lights, laying down and taking up buoys, attending to wrecks, &c., &c., besides the steamer "Sir James Douglas," which discharges the duties of this Department on the Pacific coast. The total cost of maintaining these vessels during 1888 was \$150,659.

Communi-  
cation  
with  
Prince  
Edward  
Island.

427. The "Northern Light" which formerly maintained communication between Prince Edward Island and the mainland, having been found no longer efficient for the service, a new vessel, called "The Stanley," was built at Glasgow specially for this service, the contract price being \$141,138 (£29,000). This steamer commenced running last winter, and has given great satisfaction.

Harbour  
Police.

428. A police force has been established for a number of years at the harbours of Montreal and Quebec, for the purpose of keeping order and restraining crimping, to meet the expenditure for which a tax of 3 cents per ton is levied on all vessels at either port, paid once a year by vessels under 100 tons and twice a year by vessels over that amount. The force in 1888 consisted of 69 men, 30 at Quebec and 39 at Montreal, and the total number of arrests made was 758, being 220 less than in the preceding year. There was an excess of expenditure over receipts of \$16,206, and during the past 19 years the total expenditure has exceeded the total receipts by \$196,593.

429. In order to provide for the treatment of sick and distressed mariners, all vessels over 100 tons register are required to pay a duty of 2 cents per ton three times a year, vessels under 100 tons only paying once in the same period ; fishing vessels are also now entitled to the same benefits as other vessels, provided the dues are paid before leaving on a fishing voyage. No vessel not registered in Canada and employed exclusively in fishing is subject to the payment of this duty. These provisions do not apply to Ontario, but a parliamentary grant of \$500 is made to each of the General Hospitals at Kingston and St. Catharines for the care of seamen. At Montreal sick seamen are cared for at the General and Notre Dame Hospitals, at Quebec at the Marine and Immigrant Hospital, and Marine Hospitals are established at St. John, St. Andrews, Miramichi, Richibucto, Bathurst and Sackville, in New Brunswick, and at Yarmouth, Pictou, Sydney, Lunenburg and Point Tupper, in Nova Scotia. Seamen are also cared for at the Provincial and City Hospital, Halifax, and the Charlottetown Hospital, Prince Edward Island. The total amount received from dues in 1888 was \$41,669, being a decrease of \$665 as compared with 1887. The total expenditure was \$49,545, being \$7,876 in excess of receipts. A considerable number, however, of immigrants and residents are cared for at the Marine Hospital, Quebec, and if the amount expended for them be deducted the receipts would be in excess to the extent of \$5,222. The total excess of expenditure over receipts during the past twenty years has been \$7,483.

Provisions  
for sick  
and dis-  
tressed  
mariners.

480. The total number of steamboats in the Dominion was 1,014, with a gross tonnage of 175,985 tons ; 83 were added to the number during the past year, with a gross tonnage of 9,162 tons, and 100 lost or put out of service. The receipts on account of the Steamboat Inspection Fund during the last 19 years have exceeded the expenditure by \$13,358. During the year 894 certificates were granted to engineers

Number  
and in-  
spection of  
steam-  
boats.

**Masters and mates examination.** 431. Since the 16th September, 1871, when the Act came into operation, 1,622 candidates have passed and obtained masters' certificates, and 1,066 certificates as mates; of certificates of service, 942 have been issued for masters and 375 for mates. The receipts from fees amounted to \$999, and the expenditure to \$5,060. Since 1871 the expenditure has exceeded the receipts by \$35,515.

**Inland and coasting certificates.** 432. During the calendar year 99 candidates for inland and coasting certificates passed and obtained masters' certificates of service, and 26 mates' certificates of service, while 68 obtained masters' and 35 obtained mates' certificates of competency.

**Wrecks and casualties 1888.** 433. The total number of wrecks and casualties to sea-going vessels of all nations that occurred in Canadian waters and to Canadian sea-going vessels in other waters during the eleven months ended 30th November, 1888, as reported to the Department, was 175; the tonnage involved was 60,157, and the amount of loss, so far as ascertained, \$620,314. The number of lives lost was 45. The disasters to all vessels in Canadian inland waters and to Canadian vessels on American inland waters were 17, involving 3,906 tons, and causing loss to the extent of \$78,575, but no lives were lost. It is not possible to make any just comparison of the returns for 1888 with those of previous years, as the Department does not receive particulars of all disasters in time to include them in its annual report, which will explain the difference in the figures for 1887 in the following table as compared with the figures given for the same year in last year's Statistical Abstract. Returns for eleven months only in 1888 have, so far, been made.

**Number of wrecks, &c., 1870-1888.** 434. The following is a comparative statement of loss for each year since 1870, all casualties, whether at sea or on inland waters, being included in the table :—

COMPARATIVE STATEMENT OF WRECKS AND CASUALTIES,  
1870 TO 1888.

YEAR ENDED 31ST DECEMBER.	Casualties.	Tonnage.	Lives Lost.	Damage.
.....	335	.....	210	\$ 901,000
.....	274	81,035	81	2,100,000

.....	346	144,726	198	2,753,667
.....	377	150,277	54	1,950,799
.....	335	149,395	91	1,662,688
1 months ended 30th Nov.....	192	64,063	45	698,889
<b>Total.....</b>	<b>6,986</b>	<b>2,548,559</b>	<b>4,398</b>	<b>51,254,216</b>

45 persons were lost by the wreck of the White Star SS. "Atlantic."

i. It will be seen that the loss of life was considerably Decrease in loss of life and property. in 1886 than in any other year in the table, while the amount of damage in 1887 was much smaller than any previous year, 1870 only excepted, and since the amount of shipping involved is continually increasing, it would appear that the improved protection by means of lights, buoys, &c., and the greater attention now paid to the qualifications both of masters and mates, were having beneficial effects in diminishing risks both to life and property. Particulars of the principal casualties in 1888 are not yet available.

ii. The proceedings of the Meteorological Service are Meteorological service. set out on page 13. The Superintendent, in his report, draws attention to the value of the excellent meteorological statistics collected by the Provinces of Ontario and Manitoba and it is very much to be hoped that the other Provinces will speedily follow their good example.

Expenditure 1888.

437. The following is a general summary of the expenditure of this department during the year ended 30th June, 1888. The expenditure in 1887 amounted to \$937,052; there was, therefore, a decrease of \$53,802 :—

EXPENDITURE OF DEPARTMENT OF MARINE, 1888.

Departmental salaries.....	\$ 32,729
Maintenance of lights.....	464,471
Construction of ".....	19,675
Dominion steamers.....	150,659
Examination of masters and mates.....	5,064
Hudson Bay expedition.....	185
Marine hospitals.....	49,445
Meteorological service.....	59,986
Signal service.....	4,441
Rewards for saving life, purchasing life-boats, &c.....	6,825
Georgian Bay survey.....	19,424
Water police.....	37,279
Steamboat inspection.....	21,430
Winter mail service, Prince Edward Island.....	7,740
Miscellaneous.....	3,897
<b>Total.....</b>	<b>\$883,250</b>

Number of registered vessels in Canada 1888.

438. The following table gives the number of vessels and number of tons on the registry books of the Dominion on 31st December, 1888. All sailing vessels, steamers and barges are included :—

NUMBER OF VESSELS, &c., ON THE REGISTRY BOOK OF CANADA ON 31st DECEMBER, 1888.

PROVINCE.	Number of		Gross Tonnage, Steamers	Total Net Tonnage.
	Vessels	Steamers.		
New Brunswick.....	1,009	85	10,150	239,333
Nova Scotia.....	2,851	86	13,245	485,709
Quebec.....	1,498	303	72,689	178,530
Ontario.....	1,330	652	89,118	139,501
Prince Edward Island.....	218	15	3,324	26,588
British Columbia.....	167	101	14,708	14,349
Manitoba.....	69	43	4,908	5,744
<b>Total.....</b>	<b>7,142</b>	<b>1,285</b>	<b>207,142</b>	<b>1,069,643</b>

439. There was a decrease as compared with 1887 of 36 in the number of vessels, and of 40,605 tons in the total tonnage, and assuming the average value to be \$30 a ton, the value of the total tonnage would be \$32,689,260, being a decrease in value of \$1,218,150. There was an increase of 45 in the number of steamers, and of 28,953 tons in steamers tonnage.

Decrease  
in num-  
ber and  
value.

440. The next statement shows the number of vessels and of tons on the register in each year from 1873 :—

Vessels  
on the  
register  
1873-1888.

YEAR.	Vessels.	Tons.	YEAR.	Vessels.	Tons.
1873.....	6,783	1,073,718	1881.....	6,394	1,310,896
1874.....	6,930	1,158,363	1882.....	7,312	1,260,777
1875.....	6,952	1,205,565	1883.....	7,374	1,276,440
1876.....	7,192	1,260,893	1884.....	7,254	1,253,747
1877.....	7,362	1,310,468	1885.....	7,315	1,231,856
1878.....	7,469	1,333,015	1886.....	7,294	1,217,766
1879.....	7,471	1,332,094	1887.....	7,178	1,130,247
1880.....	7,377	1,311,218	1888.....	7,142	1,089,642

441. The following is a list of new vessels built and registered in each Province in 1888 :—

New ves-  
sels built  
1888.

	Number.	Tonnage.
Nova Scotia.....	116	12,965
Ontario.....	62	5,095
New Brunswick .....	32	2,530
Quebec.....	23	2,669
British Columbia.....	18	448
Prince Edward Island.....	12	1,412
Manitoba.....	1	11
<b>Total.....</b>	<b>264</b>	<b>25,130</b>

There was an increase of 41 in number and of 2,614 in tonnage, as compared with the preceding year. Assuming the value of the new vessels to be \$45 per ton, the total value would be \$1,130,850.

Decrease  
in demand  
for wood-  
en ships.

442. Now that wood has been so completely superseded by iron and steel in the construction of ships, the demand for wooden ships is rapidly decreasing, and the decline in this industry has been very marked in consequence, and as far as can be seen, nothing can happen to revive it. It is not correct, therefore, as in some cases has been done, to attribute this decline in Canada to the policy of the Government, for it has been brought about by causes entirely outside the control of this or any other Government, and it is equally impossible that it can be revived by any Governmental action. Such questions as these are, at the present time, in the hands of scientific men, and it may be that iron and steel will yet be equally superseded by some other material.

Shipping  
of Canada  
1887 and  
1888.

443. The following table is a comparative statement of the total shipping of Canada, inland as well as sea-going, in the years 1887 and 1888:—

COMPARATIVE STATEMENT OF ALL VESSELS (BOTH SEA-GOING AND INLAND) ARRIVED AT AND DEPARTED FROM CANADIAN PORTS (EXCLUSIVE OF COASTING VESSELS) IN 1887 AND 1888.

NATIONALITIES.	Number of Vessels.	Tons Register.	FREIGHT.		Number of Men.
			Tons Weight.	Tons Measurement.	
1887.					
British .....	2,679	2,657,619	1,152,966	426,424	70,169
Canadian .....	30,960	6,245,632	2,100,091	1,380,949	276,057
Foreign.....	24,296	5,187,747	1,233,342	1,167,792	343,630
Total.....	57,935	14,090,998	4,486,399	2,975,165	589,796
1888.					
British.....	3,316	3,326,417	1,341,407	581,945	96,853
Canadian .....	33,395	6,182,697	2,296,748	1,440,009	266,388
Foreign.....	27,592	5,708,194	1,181,602	1,441,217	278,639
Total.....	64,303	15,217,308	4,819,757	3,463,171	641,880

444. There was an increase, it will be seen, of 6,368 in the number of vessels, of 1,126,310 tons in the number of tons register, of 833,358 tons in the number of tons of freight, and of 51,115 in the number of men employed.

Increase  
in ship-  
ping.

445. The next table gives comparative particulars of all sea-going vessels entered and cleared at Canadian ports in 1887 and 1888:—

Sea-going  
vessels  
entered  
and clear-  
ed at  
Canadian  
ports 1887  
and 1888.

SEA-GOING VESSELS ENTERED AND CLEARED AT CANADIAN PORTS, 1887 AND 1888.

NATIONALITIES.	Number of Vessels.	Tons Register.	QUANTITY OF FREIGHT		Number of Men.
			Tons Weight.	Tons Mea- surement.	
1887.					
British .....	2,679	2,657,619	1,152,946	426,424	70,109
Canadian .....	12,901	2,314,109	845,082	941,324	104,652
Foreign .....	10,570	3,390,708	683,601	945,844	148,169
Total .....	26,150	8,362,436	2,681,629	2,313,592	322,930
1888					
British .....	3,316	3,326,417	1,341,407	581,945	96,033
Canadian .....	13,828	1,862,295	809,918	849,483	86,846
Foreign .....	13,663	4,009,091	733,205	923,325	181,902
Total .....	30,807	9,197,803	2,884,530	2,354,753	364,781

446. There was a very decided increase in the shipping of this country during the past year, due partly to the improvement of trade and partly to the increased bulk of merchandise. It has been argued that during the years our trade was decreasing our shipping was increasing, and therefore the shipping returns could not be correct, but it was overlooked that though through the decline in values the monetary value of our trade had decreased, yet the quantity had materially increased in bulk, as pointed out in

Increase  
in ship-  
ping of  
Canada.

Chapter IV, p 161. British vessels formed only 10 per cent. of the total number, but they carried 46 per cent. of the total freight, 28 per cent. being carried by Canadian, and the balance by foreign vessels.

British and Colonial shipping 1887.

447. The following is a statement of British and Colonial shipping for 1887. The figures are all taken from official sources:—

SHIPPING IN BRITISH POSSESSIONS, 1887.

COLONY.	Tonnage of Vessels Entered and Cleared.	COLONY.	Tonnage of Vessels Entered and Cleared.
United Kingdom.....	65,161,774	Tasmania.....	735,299
Hong Kong.....	9,169,534	Mauritius.....	615,839
Malta.....	6,815,636	British Guiana.....	661,190
Gibraltar.....	10,499,851	Newfoundland.....	596,788
Canada.....	8,362,436	Gold Coast.....	554,656
Straits Settlement.....	8,355,004	Western Australia.....	492,830
India.....	7,172,193	Lagos.....	518,643
New South Wales.....	4,322,758	Sierra Leone.....	360,637
Ceylon.....	4,142,357	Natal.....	466,791
Victoria.....	3,858,243	Bermudas.....	199,008
Queensland.....	3,273,980	Honduras.....	219,856
Windward Islands.....	2,242,726	Turk's Island.....	205,392
South Australia.....	1,677,883	Bahamas.....	227,738
Cape of Good Hope.....	1,666,080	Gambia.....	117,436
Leeward Islands.....	1,435,472	St. Helena.....	125,806
Trinidad.....	1,253,599	Fiji.....	91,767
New Zealand.....	983,357	Falkland Islands.....	86,366
Jamaica.....	895,216	Labuan.....	62,726

Gibraltar being merely a port of call, it will be seen that Hong Kong is the only British Possession outside of the United Kingdom that has a larger shipping trade than Canada, though the combined shipping of the Australasian Colonies considerably exceeds that of this country.

Registered tonnage of the world.

448. The following table shows the number and tonnage of merchant vessels (both steam and sailing) owned by the principal countries of the world, according to the latest available returns. The figures have been taken partly from

official sources, and partly from the Statesman's Year Book, 18:9:—

REGISTERED TONNAGE OF THE PRINCIPAL COUNTRIES IN THE WORLD.

COUNTRIES.	Vessels.	Tonnage.	Average tons to each Vessel.
United Kingdom.....	17,723	7,123,754	402

\* Licensed and enrolled vessels not included.

449. Canada, it will be seen, stands fourth in the list, but if the licensed and enrolled vessels belonging to the United States which are employed in the river and home trade were included, that country would take second place, its total tonnage amounting to 4,105,844 tons. To such an extent has the American mercantile marine declined that, whereas in 1856, 75.2 per cent. of the United States imports and exports were carried in American bottoms, in 1888 the proportion was only 13.48 per cent., the value carried having increased in the same period 138 per cent.

United States shipping.

PART II.—THE FISHERIES.

450. The following are summary comparative statements of the total yield and value of the fisheries, and also of the value of the same by Provinces, in 1887 and 1888:—

Yield and value of the fisheries of Canada 1887 and 1888.

Manitoba and North-West Territories.....	129,084	180,677
Total.....	18,386,103	17,418,510

451 There was a decrease in total value as compared with the preceding year of \$967,593, the decrease in the value of canned lobsters being again very large. There was an increase, however, of 2,638 tons in the quantity of lobsters, alive or in shell returned, which are shipped principally to United States markets. This trade is rapidly assuming large proportions, and is said to be fairly profitable, as well as being less exhaustive to the fishery. There was a decrease in 1887 in the quantity of smelts caught of 1,286,470 lbs., and a further decrease in 1888 of 2,199,646 lbs., showing that this particular industry has been seriously exhausted by over-fishing. The decreases by Provinces were: New Brunswick, \$617,644; Nova Scotia, \$562,751; Prince Edward Island, \$160,564; and British Columbia, \$72,692—while there were

Decrease  
in value.

increases in Ontario of \$308,019; Quebec \$86,445, and Manitoba \$51,593.

Yield and exports of the fisheries 1868, 1888.

452. The following table, showing the value of the yield and of the exports of the fisheries since Confederation, will give some idea of the great importance of this industry:—

VALUE OF THE YIELD AND OF THE EXPORTS OF THE FISHERIES IN CANADA, 1868-1888.

YEAR.	Total Value of the Yield of the Fisheries in the Dominion of Canada.	Value Exported.
	\$	\$
1868.....		3,357,510
1869.....	4,376,526	3,242,710
1870.....	6,577,391	3,608,549
1871.....	7,573,199	3,994,275
1872.....	9,570,116	4,386,214
1873.....	10,754,997	4,779,277
1874.....	11,681,886	5,292,368
1875.....	10,350,385	5,380,537
1876.....	11,147,590	5,500,969
1877.....	12,029,957	5,874,360
1878.....	13,215,678	6,853,975
1879.....	13,529,254	6,928,871
1880.....	14,499,979	6,579,656
1881.....	15,817,162	6,967,715
1882.....	16,824,092	7,682,079
1883.....	16,958,192	8,909,118
1884.....	17,766,404	8,591,654
1885.....	17,722,973	7,960,001
1886.....	18,679,288	6,843,388
1887.....	18,386,103	6,875,810
1888.....	17,418,510	7,793,183
Total.....	264,879,682	127,192,229

The yield of the fisheries in 1888 was four times as much as it was in 1869, but the exports were not much more than double the value of 1868, showing that a very much larger quantity proportionately is now taken for home consumption, owing presumably to greater facilities of transportation.

Yield of the fisheries by Provinces since 1869.

453. The next table gives the value of the yield by Provinces in each year since 1869. The Province of Nova Scotia has produced during the period 48 per cent., or nearly one-half of the total yield; New Brunswick 19 per cent., and Quebec 14 per cent., the three Provinces having yielded 81 per cent. of the total.

The figures in the foregoing table will probably be found interesting, as giving some idea of the enormous quantities of some kinds of fish that are taken annually, though they are almost too large to convey any really correct impression.

Quantities and values of certain kinds of fish 1869, 1888.

454. The next table is a summary of the quantities and values of the same fish, taken during the period:—

**CANADIAN FISHERIES.**

QUANTITIES AND VALUES OF CERTAIN KINDS OF FISH TAKEN DURING THE YEARS 1869-1888.

		Bag-net fishing prohibited, except under license.				
Lobsters .....		July 15 to Dec 31.	July 1 to Dec. 31.	July 1 to Dec. 31.	July 15 to Dec. 1.	
		On Atlantic coast, from Cape Canso to boundary line, U. S., July 15 to Dec. 31, in remaining waters of Nova Scotia and New Brunswick.				
Sturgeon .....				Aug. 31 to May 1.		May 1 to June 15.
Oysters .....		June 1 to Sept. 15	June 1 to Sept. 15	June 1 to Sept. 15.	June 1 to Sept. 15.	

**NOTE**—The following Regulations, applicable to the Province of British Columbia, were enacted by Order in Council, dated 26th Nov., 1888:—

1. Net fishing allowed only under licenses.
2. Salmon nets to have meshes of at least 6 inches extension measure.
3. Drift nets confined to tidal waters. No nets to bar more than one-third of any river. Fishing to be discontinued from 6 a.m. Saturday to 6 a.m. Monday.
4. The Minister of Marine and Fisheries to determine number of boats, seines or nets to be used on each stream.
5. The close season for trout is fixed from the 15th Oct. to 15th March.

## SYNOPSIS OF FISHERY LAWS.

Net fishing of any kind is prohibited in public waters, except under leases or licenses.

The size of nets is regulated so as to prevent the killing of young fish. Nets cannot be set or seines used so as to bar channels or bays.

A general weekly close-time is provided, in addition to special close seasons.

The use of explosive or poisonous substances, for catching or killing fish, is illegal.

Mill dams must be provided with efficient fish passes. Models or drawings will be furnished by the Department on application.

The above enactments and close seasons are supplemented in special cases, under authority of the Fisheries Act, by a total prohibition of fishing for stated periods.

## CHAPTER X.

## MINERAL STATISTICS.

Classified  
list of the  
minerals  
of Canada.

455. There is hardly a mineral of value, with the exception of tin, that is not known to exist in greater or lesser quantity in some part of the Dominion, but its mineral wealth is to all intents at present an unknown quantity ; many parts of the country where minerals are known to be, being, as yet, practically unexplored. Some idea, however, of the rich and varied resources of the country may be gathered from the following classified list of the economic minerals of Canada, as arranged in the Geological Museum at Ottawa, where specimens of all of them are exhibited :—

(1.) *Metals and their Ores*.—Native iron, magnetic iron ore, iron sand, hematite, ilmenite or titaniferous iron ore, limonite (including bog iron ore), spathic iron ore, clay ironstone, native copper, sulphides of copper, sulphide of zinc, sulphide of lead or galena, native silver and ores of silver, gold, platinum, sulphide of antimony, oxysulphide of antimony, and sulphide of bismuth.

(2.) *Materials used in the Production of Heat and Light*.—Anthracite, bituminous coal, lignite or brown coal, Albertite, bituminous shale, petroleum, peat.

(3.) *Minerals applicable to certain Chemical Manufactures, and their Products*.—Iron pyrites, sulphuric acid, &c., pyrrhotine or magnetic iron pyrites, apatite or phosphate of lime, magnesite or carbonate of magnesia, calcite or carbonate of lime, chromic iron, oxides of manganese.

(4.) *Mineral Manures*.—Gypsum, shell-marl.

(5.) *Mineral Pigments and Detergents.*—Iron ochres, &c., barytes or heavy spar, soap clay.

(6.) *Salt, Brines, and Mineral Waters.*—Salt and brine, mineral waters.

(7.) *Minerals Applicable to Common and Decorative Construction.*—Limestones, dolomites, sandstones, granite and syenite, gneiss, Labradorite rock, marbles (limestones), serpentines, breccias, slates, flagstones, common lime, hydraulic lime, bricks and brick clays, drain tiles.

(8.) *Refractory Materials, Pottery Clays, and Pottery.*—Plumbago or graphite, soapstone, potstone, mica rock, mica, asbestos, fire clays, sandstone (refractory), pottery clay, and pottery.

(9.) *Materials for Grinding and Polishing.*—Whetstones, hones, bath-brick, Tripoli, grindstones, millstones.

(10.) *Minerals applicable to the Fine Arts and to Jewellery.*—Lithographic stone, porphyrites, Labradorite, albite, Perthite, jasper, conglomerate, amethystine, quartz, agates, Canadian precious stones.

(11.) *Miscellaneous.*—Sandstone for glass-making, moulding sand and clay, carbonaceous shale, artificial stone.

456. The principal drawbacks to mining development hitherto have been want of capital, and the fact that a number of the enterprises that have been started have been purely of a speculative character, which has thrown suspicion on genuine undertakings, and driven investors to place their funds elsewhere: but as the explorations of the Government Geological Survey are continually making better known the extent and locality of minerals, and the fiscal policy of the Government is calculated to stimulate pro-

Draw-  
backs to  
mineral  
develop-  
ment.

duction, public attention is becoming more attracted to our mining resources, and it may not be long before the mining industry becomes second in importance only to that of agriculture.

Mining districts of the Dominion.

457. Nova Scotia, British Columbia, Quebec, the north and west portions of Ontario, and some parts of the North-West Territories, are essentially the mining districts of the Dominion. Coal has been found in Manitoba, but no metalliferous ores have at present been discovered there, and though a number of minerals and metals are known to exist in New Brunswick, none of them have yet been found in any very large quantities, and mining is only carried on to a small extent. There is no mining in Prince Edward Island.

Sources of information.

458. The figures relating to Canada used in this chapter have been taken almost entirely from a statistical report on the minerals of Canada, compiled by Mr. L. Coste, of the Geological Survey. The figures relating to the United States and foreign countries have been principally taken from "The Mineral Resources of the United States, 1887," by David J. Day, Chief of Division of Mining Statistics and Technology in the United States.

Mineral production of Canada 1886 and 1887.

459. The following statement of the mineral production of Canada in 1886 and 1887, the latest years for which complete returns are available, will give some idea of the present value of an industry which is still in its infancy :—

MINERAL STATISTICS.

921

Iron ore..... Lbs.			5,476,950	70,669
Iron ore..... Tons.	4,000	24,000		
Iron ore..... 1,000.	12,416	142,617	14,658	230,068
Iron ore..... Tons.	400	600	75	600
Estimated value of mineral products not returned.....				1,610,499
<b>Total.....</b>		<b>10,529,361</b>		<b>15,000,000</b>

It would appear from the foregoing table that there had been an increase of nearly \$5,000,000 in the value of mineral production in Canada in 1887 as compared with 1886, but as that year was the first in which such information had been attempted to be collected, the increase must be considered as owing in a great measure to the more complete returns obtained in 1887.

Exports of minerals 1887. 460. The total value of the exports of minerals and mineral products mined or manufactured in Canada in 1887 was \$4,669,365, being \$838,544 more than in 1886. The values of the principal articles exported was as follow :—

Asbestos.....	\$ 158,829
Coal.....	1,695,783
Copper ore.....	109,336
Gold.....	920,329
Gypsum.....	146,542
Iron and steel (about).....	412,000
Phosphates.....	433,217
Silver.....	205,884
Stone and marble.....	67,995
Iron ore.....	42,634
Other articles.....	476,816
Total.....	<u>\$4,669,365</u>

And the countries to which they were principally exported were :—

United States.....	\$3,358,005
United Kingdom.....	623,216
Other British possessions.....	179,001
Germany.....	46,851
Sandwich Islands.....	27,664
St. Pierre.....	15,978
Argentine Republic.....	11,879
Other countries.....	37,896
Total.....	<u>\$4,300,490</u>

The difference in amounts is owing to the total values being given for the calendar year and the export values for the fiscal year. It will be seen that 78 per cent.

of the exports went to the United States, and 18 per cent. to the United Kingdom and British possessions.

461. The total value of imports of minerals and products chiefly manufactured therefrom, in 1887 was \$27,166,966, of which amount \$9,547,052 was for coal, and \$11,000,000 for iron and steel, the two forming 75 per cent. of the whole sum.

Value of  
imports  
1887.

462. The most important mineral, in point of value, produced in Canada in 1887, was coal, the quantity being 2,368,891 tons, valued at the point of production at \$4,758,590, being an increase, exclusive of New Brunswick and Manitoba, returns from which were not included in the figures for 1886, of 266,474 tons.

Production of  
coal 1887.

463. Almost all the coal at present is produced in the Provinces of Nova Scotia and British Columbia, but the coal deposits in the North-West Territories will soon be extensively developed and the output very materially increased. These deposits are inexhaustible, the coal-bearing area being estimated at 65,000 square miles, and the quantity of fuel known to underlie some portions of this area at from 4,500,000 to 9,000,000 tons per square mile. This coal varies from lignite to bituminous coal, and in the Rocky Mountains anthracite coal has been found, beds of which are being worked near Banff, on the Canadian Pacific Railway, by the North-West Coal and Navigation Company and the Canadian Anthracite Company. All the coal supplied to the Canadian Pacific Railway at Brandon and points west is now exclusively the product of Canada, and the Canadian Anthracite Company are finding a constant demand for their coal in the San Francisco market, and as the Banff mines are nearer to that city than are any of the United States anthracite coal fields, it is probable they will become the principal source of supply for that class of fuel. Anthracite

Coal producing  
portions  
of the  
Dominion

coal has been found cropping out in Queen Charlotte Island, B.C., but though a considerable sum has been spent in prospecting and mining, no good results have as yet been accomplished.

Production of coal by Provinces 1887.

464. The following table shows the production of coal by Provinces in 1887 :—

PRODUCTION OF COAL IN CANADA, 1887.

	Tons. .	Value.
		\$
Nova Scotia.....	1,871,338	2,923,966
British Columbia.....	413,360	1,653,440
North-West Territories.....	73,752	156,777
New Brunswick.....	10,040	23,607
Manitoba.....	400	800
<b>Total.....</b>	<b>2,368,890</b>	<b>4,758,590</b>

Production of coal in Nova Scotia and British Columbia since 1874.

465. The next table shows the production of coal in the Provinces of Nova Scotia and British Columbia in each year since 1874 :—

PRODUCTION OF COAL IN NOVA SCOTIA AND BRITISH COLUMBIA, 1874 TO 1887.

YEAR.	Nova Scotia.	British Columbia.	Total.
	Tons.	Tons.	Tons.
1874.....	977,446	81,000	1,058,446
1875.....	874,905	110,000	984,905
1876.....	794,803	139,000	933,803
1877.....	848,395	154,000	1,002,395
1878.....	863,081	171,000	1,034,081
1879.....	882,863	241,000	1,123,863
1880.....	1,156,635	268,000	1,424,635
1881.....	1,259,182	228,000	1,487,182
1882.....	1,529,708	282,000	1,811,708
1883.....	1,593,259	213,000	1,806,259
1884.....	1,556,010	394,070	1,950,080
1885.....	1,514,470	365,000	1,879,470
1886.....	1,682,924	326,636	2,009,560
1887.....	1,871,338	413,360	2,284,698
<b>Total.....</b>	<b>17,405,019</b>	<b>3,386,066</b>	<b>20,791,085</b>

The above figures, to all intent, represent the production of the Dominion to the close of 1887, though a small quantity of coal has been mined in New Brunswick in each year, of which particulars are not available.

466. The next statement gives the quantities of coal being the produce of Canada, exported from Nova Scotia, British Columbia and New Brunswick, respectively, during the years 1874 to 1887, inclusive :—

Exports of  
coal from  
Canada  
1874-1887.

EXPORTS OF COAL FROM NOVA SCOTIA, BRITISH COLUMBIA AND  
NEW BRUNSWICK, 1874-1887.

YEAR.	Nova Scotia.	British Columbia.	New Brunswick.	Total.
	Tons.	Tons.	Tons.	Tons.
1874.....	252,124	51,001	7,606	310,731
1875.....	179,626	65,842	4,527	249,995
1876.....	126,520	116,910	4,946	248,376
1877.....	173,389	118,252	9,669	301,310

1882.....	216,954	179,552	15,606	412,112
1883.....	192,795	271,214	15,641	479,650
1884.....	222,709	245,478	1,767	469,954
1885.....	176,287	250,191	1,260	427,738
1886.....	240,459	274,466	17	514,942
1887.....	207,491	356,657	1,341	565,489
<b>Total.....</b>	<b>2,648,843</b>	<b>2,689,060</b>	<b>103,540</b>	<b>5,441,443</b>

Coal produced in the North-West Territories and exported to the United States, would be included in British Columbia exports. Newfoundland, the United States and the West Indies are the principal markets for Nova Scotia coal.

467. All the coal exported from British Columbia may be considered to have gone to the United States, principally to San Francisco, the receipts at that port in 1887 amounting

British  
Columbia  
coal.

to 252,810 tons. The coal of this Province is of a very high quality and commands a better price at San Francisco than any American coal. In an analysis published by the State Mineralogist of California, in 1887, the relative values for steam of British Columbia and Washington Territory coal were given as: Wellington, 1,407; Nanaimo, 1,335; and Seattle 1,330. (Statistical Abstract, 1887, p. 344).

Imports of coal 1885, 1886 and 1887. 468. The imports of coal into the Dominion during 1885, 1886 and 1887 were as follows:—

PROVINCES.	1885.	1886.	1887.
	Tons.	Tons.	Tons.
Ontario .....	1,492,159	1,587,372	2,180,356
Quebec .....	355,158	343,150	413,370
Nova Scotia.....	25,516	20,046	23,040
New Brunswick.....	45,500	43,767	36,435
Manitoba.....	12,200	3,497	1,834
British Columbia.....	870	615	777
Prince Edward Island.....	1,990	1,783	2,673
<b>Total .....</b>	<b>1,933,693</b>	<b>2,000,230</b>	<b>2,658,485</b>

Coal production of the world. 469. The following table shows the coal produced by the principal countries of the world, for the most part in 1886 and 1887:—

COAL PRODUCTION OF THE WORLD.

COUNTRY.	Year	Quantity.	COUNTRY.	Year.	Quantity.
		Tons.			Tons.
Great Britain.....	1887	162,119,812	India, Bengal.....	1886	951,001

Long tons of 2,240 pounds are used with reference to Great Britain, the United States, Australia, India, New Zealand and Russia, and the metric ton of 2,204 pounds for continental countries. The increase as compared with a similar table in 1886 was 5,016,631 tons.

470. Next in importance, as regards value, among the minerals now being worked in Canada, is gold, the production of which is at present confined almost entirely to British Columbia and Nova Scotia, though a small quantity is annually produced in Quebec, and gold has been obtained from some parts of Ontario. It may be that when the country north and west of Lake Superior is fully explored valuable deposits of gold may be found, as it is known to exist in many localities, and has been found in several places in small quantities. A small amount of gold is also obtained each year from the Saskatchewan River, near Edmonton. Gold was first discovered in British Columbia in 1857 in the Thompson River, near Nicoamen, and in Nova Scotia in 1860, near Tangier Harbour, since which date the value of the production in the latter Province has been \$8,455,736. British Columbia, since 1858, has produced \$50,983,226, as near as can be ascertained, but as only an estimate can be made of the quantity carried away in private hands, the actual amount is probably larger.

471. The following table gives the value of the gold production in the Dominion in 1887:—

PRODUCTION OF GOLD IN CANADA. 1887.

PROVINCE.	Value.
British Columbia.....	\$ 694,559
Nova Scotia.....	413,614
North-West Territories, including Yukon District.....	62,100
Ontario.....	6,760
Quebec.....	1,604
<b>Total.....</b>	<b>1,178,637</b>

Gold mining in Canada

Gold production in Canada 1887.

Value of gold per ounce. 472. The total number of ounces produced was 66,271, at an average value of \$17.78 per ounce. The produce in 1886 was 76,879 ounces, valued at \$1,330,442, or an average value of \$17.30 per ounce. This is below what is generally taken as the average value per ounce, viz., \$19.50, or £4 sterling. It will be seen that there was a reduction in value of \$151,805 and in quantity of 10,608 ounces as compared with 1886—the falling off being chiefly in British Columbia.

Gold production in Canada since 1862. 473. The value of the gold production in the three principal gold-producing Provinces since 1862 is shown below :—

VALUE OF PRODUCTION OF GOLD IN BRITISH COLUMBIA, NOVA SCOTIA AND QUEBEC, 1862-1887.

YEAR.	British Columbia.	Nova Scotia.	Quebec.	Total.
	\$	\$	\$	\$
1862.....	4,246,266	141,871		4,660,585

The production of gold in the Province of Quebec has been regular since 1862, but figures were not available before 1877. The total quantity of quartz crushed in Nova Scotia since 1862 has been 585,069 tons, which has yielded an average of \$14.45 per ton.

474. The world's annual production of gold is variously estimated. For 1886, the Director of the United States Mint gives it at \$98,764,235; Hazell's Annual, 1889, at \$95,211,500; Dr. A. Soelbeer (American Almanac, 1888,) at \$97,761,000.

World's  
production  
of  
gold.

475. The gold produce in Australasia in 1886 was 1,389,048 oz. (Victorian Year Book, 1886-87, p. 471), which, if valued at £4 per ounce, would represent a total value in our currency of \$27,040,134. The gold produce in the United States in 1887 was 1,596,500 ounces, valued at \$33,147,000. According to Mr. Hayter, the total quantity of gold raised in the Australasian Colonies from 1851 (the year of the first discovery of gold) to 1886 has been 81,024,307 ounces, which may be valued at \$1,577,273,176, and according to Mr. Day the total value of the gold produce of the United States since 1804 has been \$1,776,855,670. From 1804 to 1848, however, the amount is only placed at \$13,243,475.

Production  
of  
gold  
in  
Australa-  
sia  
and  
United  
States.

476. Iron ore is to be found in great abundance and variety in all the Provinces of the Dominion except Manitoba; but owing, presumably, both to lack of enterprise and capital, it has no where been mined to any great extent. Even in Nova Scotia, which possesses ore of extreme purity, and which is the only Province in the Dominion where fuel and ore are to be found in close proximity, the production is practically limited to the Acadia Mines, at Londonderry.

Iron ore.

477. The total production in Canada in 1887 was 76,330 tons, valued at the mines at \$146,197, and was produced as

Production  
of  
iron  
ore  
in  
Canada  
1887.

as follows:—

PROVINCES.	Tons.	Value.
Nova Scotia.....	43,532	\$76,181
Ontario.....	16,598	36,218
Quebec.....	13,404	26,808
British Columbia.....	2,796	6,990
<b>Total .....</b>	<b>6,330</b>	<b>\$146,197</b>

being an increase, as compared with 1886, of 6,622 tons in quantity and \$19,215 in value, 57 per cent. of the quantity and 52 per cent. of the value being from Nova Scotia. Iron mining in Ontario was confined to the mines of the Kingston and Pembroke Mining Company, and some mines in the District of Hastings. In Quebec, operations were principally carried on near Drummondville and Three Rivers.

Exports of  
iron ore  
from  
Canada  
1867-1887.

478. The following table gives the quantity and value of iron ore exported from Canada since Confederation :—

EXPORTS OF IRON ORE FROM CANADA, 1867-1887.

YEAR.	Quantity.	Value.	YEAR.	Quantity.	Value.

1878.....	4,315	8,846			

Number of  
furnaces  
in blast.

479. There were four furnaces in blast during the year— one at Londonderry, N.S., two at Drummondville, Que., and the Radnor furnaces near Three Rivers, and the amount of pig iron produced was 24,827 tons. The quantity of pig iron imported was 48,250 tons, so that the quantity consumed was about 73,077 tons, valued at \$986,296.

480. Mr. Coste estimates that, taking into consideration the quantities of cast-iron, iron and steel manufactured in other countries and imported into Canada, there was a total consumption equivalent in pig iron, in 1887, to about 356,000 tons. "If made in the country this quantity of pig iron would represent a value of about \$5,000,000; it would necessitate a yearly supply of \$1,000,000 tons of ore, and before the ore could be melted into pig iron, and further made into the different articles of iron and steel which are now imported, it would require about 3,000,000 tons of coal." When it is considered that this large amount of ore and fuel can be furnished by Canadian mines, the necessity of extensively developing our iron resources becomes at once apparent.

Total consumption of iron in Canada.

481. The following table gives the world's production of pig iron and steel, principally in 1887. Tons of 2,240 pounds are used with reference to Great Britain, the United States, Russia and "Other Countries," and metric tons of 2,204 pounds for continental countries. :—

The world's production of iron and steel.

THE WORLD'S PRODUCTION OF IRON AND STEEL. 1887.

Other countries (estimated).....	160,000	35,000
<b>Total.....</b>	<b>22,170,959</b>	<b>9,506,335</b>

The world's production of iron ore in 1887 was 49,032,480 tons.

Production of iron and steel in United Kingdom and United States.

482. Great Britain and the United States combined produced 63 per cent of the total quantity of pig iron, and 68 per cent. of the total quantity of steel, produced in the world, while of steel alone it will be seen that the United States is now the largest producer, having surpassed Great Britain, for the first time, in 1886. The proportions to the total production, respectively, are : Great Britain - pig iron, 34 per cent.; steel, 33 per cent. The United States—pig iron, 29 per cent.; steel, 35 per cent.

Copper.

483. "Copper constitutes one of the most important of the " mineral treasures of the Dominion, and is destined to " occupy a very important rank amongst its resources. Its " ores are distributed over vast tracts of country in Ontario, " in the Eastern Townships of Quebec, in Nova Scotia, " and British Columbia, and in New Brunswick." There are no copper smelting works in operation in Canada, and consequently all the ores are exported for treatment abroad. It is said that smelting works are to be established at Sudbury, in Ontario, in which neighbourhood are what are perhaps the largest deposits of copper ore in the world. These deposits have been only very recently discovered.

Production of copper in 1887.

484. The production in 1887 was limited to mines at Capelton, Que., Sudbury, Ont., and the Goodfellow mine, Albert County, N.B., and the quantity produced was 40,800 tons of ore, containing 3,260,424 lbs. of fine copper, valued at \$342,345. This was a decrease of 344,576 lbs., as compared with 1886, owing to the largest producers being engaged in constructing new plant and sulphuric acid works.

Exports of copper.

485. During the years 1860 and 1869, inclusive, copper ore to the value of \$1,593,978 was exported from Quebec,

and of \$2,498,008 from Ontario, but since that year, until 1886, there was no export from Ontario. The total value exported from the two Provinces since 1860 has been \$7,769,111. The exports from the other Provinces have been too small to be worth notice. It is said that the Customs returns of quantity and value have been low, and the amount actually exported has been considerably larger than the above figures. The following table gives the exports of copper for the ten years, 1878-1887:—

EXPORTS OF COPPER FROM CANADA, 1878 TO 1887.

YEAR.	Quantity.	Value.	YEAR.	Quantity.	Value.
	Lbs.	\$		Lbs.	\$
1878.....	355,160	36,499	1883.....	1,400,300	148,709
1879.....	408,860	47,817	1884.....	2,714,400	273,422
1880.....	1,434,700	192,171	1885.....	2,626,000	262,600
1881.....	1,244,780	125,753	1886.....	2,403,040	249,259
1882.....	1,864,170	182,502	1887.....	2,605,660	138,436

In 1887, 34,160 lbs. of the value of \$3,416 were exported from Ontario; with that exception, the whole quantity during the period went from the Province of Quebec.

486. Though petroleum has been found in Quebec, Nova Scotia and New Brunswick, and in the North-West Territories, it is in Ontario where the most of the oil has been and is obtained. Bothwell, Eunniskillen and Petrolia are the largest oil-producing districts, the oil being obtained at a depth of from 400 to 500 feet. Petro-  
leum.

487. The following table, according to Mr. Coste, contains the only reliable statistics of Canadian production of oil that are available, and these figures do not give the total production, since the quantity of crude oil used as such is not included:— Canadian  
production  
of  
oil.

PRODUCTION OF CANADIAN PETROLEUM AND NAPHTHA AND CORRESPONDING QUANTITIES OF CRUDE OIL, 1881-1887.

YEAR.	Refined Oils.	Crude Equivalent calculated.
	Imp. galls.	Imp. galls.
1881 .....	5,380,081	10,760,162
1882 .....	5,111,893	11,359,762
1883 .....	6,204,544	13,787,875
1884 .....	6,730,068	16,825,170
1885 .....	5,853,290	14,633,225
1886 .....	6,469,667	17,025,439
1887 .....	7,905,666	20,804,384

Exports of Canadian oil.

488. And the following table shows the exports during the same period :—

EXPORTS OF CANADIAN PETROLEUM, 1881-1887.

YEAR.	Gallons.	Value.
		\$
1881 .....	501	99
1882 .....	1,119	286
1883 .....	1,328	710
1884 .....	1,098,090	30,168
1885 .....	337,967	10,562
1886 .....	241,716	9,855
1887 .....	473,559	13,831

Consumption of oil in Canada.

489. The amount, therefore, of Canadian oil consumed in the country during those six years was 39,808,258 Imperial gallons. The amount imported during the same period was 8,987,827 Imperial gallons. The total consumption in Canada, therefore, amounted during that time to 50,488,756 gallons, being an average annual consumption of 7,212,679 gallons.

Petroleum in N. W. T.

490. The most extensive petroleum field in America, if not in the world, is believed to exist in the Athabasca and Mackenzie valleys in the North-West, and the committee of the Senate appointed in 1888 to enquire into the resources of the Mackenzie Basin, say in their report that it is

probable that this great petroleum field will assume an enormous value in the near future, and will rank among the chief assets comprised in the Crown domain of the Dominion. The committee also suggests that a tract of about 40,000 square miles be reserved from sale, and that practical tests and explorations be made to ascertain its value.

491. Petroleum is found in several other countries in the world, but principally in the United States, Russia, Egypt and Burmah. It was first discovered in the United States, in Pennsylvania, in 1859, and the total production of crude oil since then has amounted to 345,573,177 barrels, valued at an equal number of dollars, the States of Pennsylvania and New York having produced 330,312,443 barrels out of the above quantity. The very unexpected discovery of crude petroleum in enormous quantities in the Trenton limestone of north-eastern Ohio in 1886 has had an important effect on the output of that State, the production having increased from 650,000 barrels, in 1885, to 5,018,015 barrels in 1887. Petroleum in United States.

492. The earliest records of production of petroleum in Russia commence in 1821, though the existence of oil was known hundreds of years before. The Baku oil fields at the eastern extremity of the Caucasus Mountains are the most important. The total shipment of petroleum products from Baku, from 1883 to 1887, have been :— Petroleum in Russia.

	Galls.
1883.....	145,180,705
1884.....	262,621,710
1885.....	300,149,775
1886.....	377,006,120
1887.....	389,816,630

The Russian Government, it is said, are contemplating the building of a canal to connect the rivers Don and Dnieper, which would permit tank steamers to pass all the way by water from the Caspian into the Black Sea, and thence of course to all parts of Europe, whereas now the oil for export has to be taken by rail from Baku to Batoum, and

then transhipped. The supply of Russian petroleum is very large, and the cost of working considerably less than in America, so that the construction of such a canal would enable Russia to push its competition with the United States very severely.

Salt. 493. The salt produced in the Dominion is almost all manufactured in Ontario, the largest number of wells being situated in the County of Huron, while a few are being operated in the Counties of Lambton on the south, Bruce on the north, and Perth on the west.

Production of salt in Canada 1887. 494. The total production of salt in 1887 amounted to 429,807 barrels of 280 lbs., the value of which was, of the salt alone, \$166,394, and of the packages used, \$75,211, making a total value of \$241,605. This was a reduction in quantity, as compared with 1886, of 91,083 barrels, but an increase in the price of salt alone of \$6,012. There were seventeen producers in Ontario and one in New Brunswick, employing altogether 273 men.

Exports of Canadian salt. 495. The exports of Canadian salt since 1875 have been as follow:—

## EXPORTS OF CANADIAN SALT, 1875-1887.

YEAR.	Ontario.	Quebec.	Other Provinces.	Total.	Value.

1887.....	153,475	.....	570	154,045	11,526

All the salt exported was manufactured in the Province of Ontario, with the exception of a small quantity from New Brunswick.

496. The total output of salt in the United States in 1887 was 7,831,962 barrels, valued at \$4,093,846.

Salt out put in United States. Production of silver in Canada 1887.

497. The total production of silver in Canada in 1887 was about 349,330 ozs., valued at \$349,330, being an increase as compared with 1886 of \$140,240, due principally to the rich bodies of silver ore struck in the Port Arthur district, particularly at the Beaver Mine, the total shipments from this district having amounted to \$190,495. The finding of a large body of very rich ore at the Beaver Mine in March, 1887, proved that the Silver Islet was not the only rich mine in that district, which is said to be a region containing a great number of very well, defined veins of very rich silver ores, and needs only work and capital for very profitable development. The first shipment of silver from the Lanark Mine of Illecillewait, B. C., was made in 1887: and it was estimated that about 146,898 ozs. of silver were extracted from the copper ore exported in the same year from the Capelton Mines, Quebec.

498. The following table gives the exports of silver ore during the years 1873 to 1887, exclusive of the production of the Capelton Mines:—

Exports of silver 1873 1887.

EXPORTS OF CANADIAN SILVER ORE, 1873 TO 1887.

1877.....	42,848	1886.....	25,957
1878.....	685,715	1887.....	206,284
1879.....	154,273		
1880.....	68,205	Total.....	3,800,589
1881.....	15,115		

Production of silver in United States. 499. The total value of the production of silver in the United States since 1848 has been \$825,724,517. In 1887 the estimated value was \$53,433,300.

Production of phosphate 1887. 500. The total quantity of phosphate or apatite shipped from Canadian mines in 1887 was 23,690 tons, valued at \$319,815, being an increase of 3,195 tons as compared with 1886. The only two places where this mineral is worked at present are in Ottawa County, Quebec, and north of Kingston, Ontario, and the quantity shipped came from the two districts in the following proportions:—Ottawa County mines, 19,589 tons; and Ontario mines, 4,101 tons.

Countries to which phosphate exported. 501. The quantity exported was 23,152 tons, valued at \$433,217, and of this 705 tons went to the United States, and the rest to Great Britain and Germany. The exports to Great Britain of Canadian phosphates are largely increasing. In 1882 they formed only 6 per cent. of the total imports, and in 1886 were 12 per cent., having doubled in four years.

Output of phosphate 1888. 502. The total output in 1888 is said to have been 23,290 tons, of which 17,246 tons were exported, and the decrease in quantity is stated to be due to the difficulty of transportation from the mines.

Raw material at present all shipped. 503. Experiments are being made at the Central Experimental Farm to determine the value of crude phosphate as manure, when ground to an almost impalpable powder, and the result, if favourable, will be of the greatest value to agriculturists. It is to be regretted that no steps have yet been taken for the establishment of works in this country for the conversion of phosphate into superphosphate, in which case a large home market might be created for this valuable fertilizer, much to the benefit of the country, while the increase in profit to the manufacturer would be consider-

able. When it is considered that 167,536 tons of pyrites have been exported to the United States during the years 1881 to 1886 inclusive, a quantity of which doubtless returns to Canada as sulphuric acid, as the imports of the acid from the United States in 1888 amounted to 2,460,239 pounds, and that only 498 tons of fertilizers were manufactured in Canada in 1887, in which only 221 tons of Canadian phosphate were used, there can be no doubt that enterprise and capital alone are wanting to develop an extensive and profitable industry in the manufacture of fertilizers in Canada, instead of sending all the raw material out of the country. In view of the approaching exhaustion of the guano beds of Peru and Chili, the phosphate beds in Canada are prominently engaging the attention both of British agriculturists and also of superphosphate manufacturers in that country, as a favourable source from which to derive their supplies for fertilizers.

504. The following table gives the exports of phosphate from 1877 to 1887:—

Exports of  
phosphate  
from  
Canada.

EXPORTS OF PHOSPHATE FROM CANADA, 1877 TO 1887.

YEAR.	Quantity.	Value.	YEAR.	Quantity.	Value.
	Tons.	\$		Tons.	\$
1877.....	2,823	47,084	1884.....	21,709	424,240
1878.....	10,743	208,109	1885.....	28,969	496,293
1879.....	8,446	122,035	1886.....	20,440	343,007
1880.....	13,060	190,086	1887.....	23,152	433,217
1881.....	11,968	218,456			
1882.....	17,153	338,357	Total.....	178,179	3,248,552
1883.....	19,716	427,668			

Of the above sum, \$3,129,387 worth was exported from Quebec and \$119,165 from Ontario; 96 per cent., therefore, went from Quebec.

505. The production of phosphate in the United States in 1887, principally in the Carolinas, was 430,549 tons of 2,240 lbs., of which 199,735 tons were shipped abroad.

506. It is estimated that about 12,000 tons of ground gypsum were used in this country as a fertilizer during the year.

507. Asbestos is a mineral which is only worked in the Eastern Townships, and the shipments of which are steadily increasing in value, as shown by the following figures:—

SHIPMENTS OF ASBESTOS FROM CANADIAN MINES, 1879 TO 1887.

YEAR.	Quantity.	Value.	YEAR.	Quantity.	Value.
	Tons.	\$		Tons.	\$
1879.....	300	19,500	1885.....	2,440	142,441
1880.....	380	24,700	1886.....	3,458	206,251
1881.....	540	35,100	1887.....	4,619	226,978
1882.....	810	52,650			
1883.....	955	68,750	Total.....	14,643	851,465
1884.....	1,141	75,097			

508. There is not space in a work of this kind to take up all of the minor mineral productions in detail. The table at the commencement of the chapter of the productions in 1886 and 1887 will be some guide to their annual value.

## CHAPTER XI.

## SOCIAL AND ART STATISTICS.

## RELIGION.

509. There is no State church in the Dominion, and no State assistance is given to any denomination ; the Roman Catholic church, however, being guaranteed the privileges enjoyed in the Province of Quebec, before the British possession. Roman Catholicism prevails very extensively in the Province of Quebec, and also has numerous followers in the Maritime Provinces, Ontario and Manitoba, while almost every variety of Protestantism is represented in some part of the country in greater or less numbers, the principal denominations being Church of England, Presbyterian, Methodist and Baptist.

Distribution of religions in Canada.

510. An attempt was made last year to collect statistics from the leading religious bodies, which met with but little success, the only returns received being from the Presbyterians, Congregationalists, Universalists, United Brethren and the Evangelical Association ; the Methodist and Baptist returns were nearly complete, but not quite, and from only a few of the dioceses of the Church of England could answers be obtained, while, with two exceptions, no answers were received from the Roman Catholic church.

Collection of religious statistics.

511. The following figures, giving the numbers of the clergy of certain denominations, are believed to be fairly correct, but are not official :—The Church of England has 17 Bishops and over 900 clergy ; the Roman Catholic Church has 1 cardinal, 5 archbishops, 16 bishops and about 1,200 clergy ; the Methodists have about 1,500 clergy, the Baptists about 500 clergy, Evangelical Lutheran Synod 53, Reformed Episcopal Church 24, African Methodist Episcopal 17, and

Statistics of certain denominations.

CHAPTER XI.

New Jerusalem Church 8. The following figures are official:—Presbyterian, 1,831 churches and stations, seating capacity 426,717, number of clergy 895, number of communicants 145,640, total expenditure \$1,730,252, 1,415 Sunday schools, 11,513 teachers, 104,684 pupils. The Evangelical Association 81 churches, ministers 70, Sunday schools 79, teachers 1,028, pupils 6,001; Congregationalists, number of ministers 80, Sunday schools 120, teachers 1,100, pupils 8,634; United Brethren, 44 places of worship, 22 preachers, 34 Sunday schools, 301 teachers, 2,514 pupils; Universalists, 6 churches, 3 ministers, 3 Sunday schools, 12 teachers, 175 pupils.

Average attendance.

512 Particulars of the average attendance were received in some instances, but not in enough to make them worth quoting.

Census returns of principal denominations.

513. The following were the numbers of the leading denominations in the several Provinces according to the latest censuses:—

NUMBERS OF THE LEADING RELIGIOUS DENOMINATIONS IN CANADA ACCORDING TO THE LATEST CENSUSES.

PROVINCES.	Roman Catholic.	Church of England.	Presbyterian.	Methodist.	Baptist.
* Ontario.....	320,839	366,530	417,749	591,503	106,680
* Quebec .....	1,170,718	68,797	50,287	39,221	8,833
* Nova Scotia.....	117,487	60,255	112,488	50,811	83,761

‡ The Territories.....	9,301	9,976	7,712	6,910	778

\* Census 1881. † Census 1886. ‡ Census 1885.

The total number of Protestants in the Dominion in 1881, was 2,439,188, and of Roman Catholics 1,791,982.

## EDUCATION AND ART.

514. Under the British North America Act, 1867, the right to legislate on matters respecting education was placed in the hands of the Governments of the several Provinces, the rights and privileges of denominational and Separate schools, then existing, being specially protected.

Education.

515. As a consequence of the above there is a considerable difference in many details in the Public School systems in force in the various Provinces, though they are all based on the principle of free education, the funds being supplied by local taxation and Government grants. Ontario lays claim to having the most perfect system; but be that as it may, the arrangements in each Province are admirable, and it is doubtful if any country other than Canada can boast of the same extended educational facilities.

Difference in the several provincial systems.

516. In Ontario the school system is under the control of the Minister of Education, who is a member of the Provincial Government for the time being. In the other Provinces there are Superintendents and Boards of Education, who report to the respective Provincial Secretaries. In Nova Scotia, New Brunswick, British Columbia and Prince Edward Island, the schools are purely undenominational. In British Columbia, "the highest morality is to be inculcated, but no religious creed or dogma taught." In the other three Provinces religious exercises are permitted, but no children can be compelled to be present against the wishes of their parents. In Quebec and Manitoba the schools are Protestant and Roman Catholic. Education is based on religious teaching, and the Roman Catholic catechism and, in Protestant schools, the Bible, are text books. In Ontario the schools are undenominational, but Protestants and Roman Catholics are allowed Separate schools within certain limitations. Every Public and High school, however, is opened and

Denominational and undenominational systems.

closed with prayer, and the reading of the Scriptures, but without comment or explanation, while the trustees and clergy of all denominations are empowered to make special arrangements for religious instruction. By this means the fullest facilities for religious instruction are given, without the assumption by the Government of any responsibility in regard to the instruction imparted.

Public schools Ontario 1886.

517. As previously stated, the control of education in Ontario is vested in the Minister of Education, and subject to the approval of the Provincial Government, all regulations for the Public and High schools are made by him. These schools are under the control of local boards of trustees, elected by the ratepayers, and are allowed to have none but certificated teachers. Education of children between the ages of 7 and 13 is compulsory for not less than 100 days in the year, but the law is by no means as strictly enforced as is desirable in the educational interests of the Province. The following table gives particulars respecting the Public schools of Ontario in 1886, Roman Catholic Separate schools being included :

PUBLIC SCHOOLS, ONTARIO, 1886

Number of Schools open.	School Population between 5 and 21 years of age.	Total Number of Pupils.	Boys.	Girls.	Average Attendance.
5,437	601,204	487,496	257,030	230,466	239,044
TEACHERS.			AVERAGE COST PER PUPIL.		
Male.	Female.	Receipts.	Expenditure.	On Total Attendance.	On Average Attendance.
		\$	\$	\$ cts.	\$ cts.
2,727	4,637	3,993,483	3,457,699	7 09	14 48

518. The proportion of pupils registered to the total school population was almost exactly the same as in 1885, the slight difference being in favour of 1886, as shown by the following figures: 1885, 81.02 per cent.; 1886, 81.08 per cent.; but there was a decided improvement in the attendance, the proportion to registered pupils being 49.03 per cent., as compared with 47.81 per cent. in 1885. No less than 93,375 children between the ages of 7 and 13 did not attend for the full time of 100 days, and of this number 90.10 per cent. lived in the rural districts. The average attendance in rural districts was 45 per cent. of the registered attendance; in towns it was 59 per cent. and in cities 63 per cent. Bad weather, bad roads and long distances from the school no doubt contribute principally to reduce the attendance in rural districts, particularly during the winter months.

Average attendance.

519. There was an increase over 1885 of 42 in the number of schools open and of 146 in the number of teachers.

Number of schools.

520. The following table gives particulars concerning the Roman Catholic Separate schools in Ontario in 1886:—

Separate schools Ontario 1886.

ROMAN CATHOLIC SEPARATE SCHOOLS, ONTARIO, 1886.

Number of Schools.	Number of Pupils.	Boys.	Girls.	Average Attendance.	Receipts.	Expenditure.	AVERAGE COST PER PUPIL.	
							On Total Attendance.	On Average Attendance.
224	29,199	14,860	14,339	15,959	\$ 193,908	\$ 179,730	\$ cts. 6 15	\$ cts. 11 27

The average attendance at the Separate schools was better than at the public schools, being 55 per cent. of the total number of pupils, and it will be seen that the average cost per pupil was less both on total and average attendance than in the Public schools.

There were also 7 Protestant Separate schools, 6 of which made returns, showing 6 teachers and 250 pupils.

High schools  
Ontario  
1886.

521. The following are particulars concerning the High schools in Ontario in 1886:—

HIGH SCHOOLS, ONTARIO, 1886.

Number of Schools.	Number of Pupils.	Boys.	Girls.	Average Attendance.	Receipts.	Expenditure.	AVERAGE COST PER PUPIL.	
							On Total Attendance.	On Average Attendance.
					\$	\$	\$ cts.	\$ cts.
109	15,344	7,907	7,437	8,797	502,315	477,797	31 14	54 31

The average attendance was 57 per cent. of the number of pupils.

School houses  
Ontario.

522. There were 5,454 school houses in the Province, of which 2,490 were of brick or stone, 2,357 frame and 607 log. The log school houses are fast disappearing.

Number of teachers.

523. According to the returns there was 1 teacher to every 66 pupils in the Public schools, 1 to every 63 pupils in the Separate schools, and 1 to every 40 pupils in the High school.

Total receipts.

524. The total receipts for Public school purposes in 1886 amounted to \$3,993,483, derived from the following sources: Legislative grant, \$265,912; municipal school grants and assessments, \$2,826,376; clergy reserve fund and other sources, \$901,195.

Model schools,  
mechanics  
institutes,  
&c.

525. In addition to the above mentioned schools, there were 55 Model schools, with 1,491 teachers in training, 4 training institutes, 66 teachers' institutes, with 5,974 mem-

bers, and 6 Normal and Model schools, with 1,264 students. There were also in operation 8 Art schools, with 1,108 pupils. In connection, also, with and under the supervision of the Educational Department, were 139 mechanics' institutes and free libraries, with 226,443 volumes. The number of members was 16,094.

526. The second Friday in May in each year has been set apart under the name of Arbor Day, for the purpose of planting trees and improving the school grounds. In 1885 on that day 38,940 trees and in 1886 34,087 trees were planted.

527. The total number of pupils attending Public, Separate and High, Normal and Model schools in Ontario, not including colleges and private schools, was 503,939, an increase of 16,168 as compared with 1885.

528. Educational matters in the Province of Quebec are under the control of the Superintendent of Public Instruction, assisted by a council consisting of 35 members, and divided into committees for the management of Roman Catholic and Protestant schools, respectively. The schools are maintained partly by local taxation and partly by Government grants, and are individually controlled by local boards or by the local clergy. As previously stated, religion is assumed to be the basis of education, and the various Roman Catholic religious bodies and institutions are largely interested in such matters. Out of a total number of 569 uncertificated male teachers, 502 were Roman Catholic clergy, or members of some religious institution: and out of 6,121 uncertificated female teachers, 5,541 were nuns and sisters belonging to Roman Catholic Conventual institutions. The following table gives the number of educational establishments of all grades in the Province, and of the pupils who attend them:

Arbor Day,

Total number of pupils.

Educa-  
tional  
statistics  
Quebec  
1886.

## EDUCATIONAL STATISTICS, QUEBEC, 1886.

Total.....	5,154	221,169	34,493	257,339	120,332	129,412

\*Protestants only.

**Excess of females.** 529. It will be remembered that according to the census of 1881 there was an excess of females in this Province of 2,809. It would seem, judging from the above table, that the excess of females has a tendency rather to increase than otherwise.

**Average attendance.** 530. The average attendance at the elementary schools was 130,048, which is a considerably larger proportion of pupils than in Ontario, being as high as 72·30 per cent.

**Protestant pupils.\*** 531. The proportion of Protestant pupils was higher than in 1885, being 15·6 per cent. as compared with 12·8 per cent. in that year.

**Expenditure.** 532. The total amount contributed by the Provincial Government for educational purposes in 1886 was \$845,235, and the total expenditure by the Board of Education, \$348,767. There are no means of ascertaining the expenditure on education by the various religious bodies.

533. The Government grant for elementary schools of \$160,000 is not considered sufficient by the Superintendent, and he again complains of the number of uncertificated teachers employed, especially in the back districts, by municipalities too poor to pay more qualified ones, there being no less than 700 schools taught by female teachers too young and inexperienced, and possessing none of the qualifications for teaching.

Insufficiency of proper teachers.

534. The Council of Public Instruction in Nova Scotia consists of the members of the Executive Council. There is also a Superintendent of Education. The total management of the Public schools is in the hands of trustees chosen by the ratepayers of the section.

Education in Nova Scotia.

535. There was a slight falling off in the number of pupils and in the average attendance, the latter having been 58·56 per cent. of the number enrolled, as compared with 59·66 per cent. in 1886. Attendance at the Public schools of children between the ages of 7 and 12 is by law compulsory, but the regulation is not strictly enforced. There was, however, a decrease of 22 in the number of sections without schools, and increases of 56 and 41 respectively in the number of teachers and schools in operation.

Average attendance.

The proportion of the population at school remained about the same as in 1886, viz: 1 in 4·1.

Population at school.

536. The total Government expenditure for education during 1887 was \$216,085, an increase of \$6,252. The county fund amounted to \$119,047, and the sectional assessments to \$290,544, the three amounts making a total of \$625,676.

Expenditure.

537. The following table of educational statistics explains itself:—

Educational statistics Nova Scotia.

## CHAPTER XI.

Education  
in New  
Brunswick.

538. The Provincial Board of Education of New Brunswick consists of the Lieutenant-Governor, the members of the Executive Council, the President of the University of New Brunswick, and the Chief Superintendent of Education.

539. The total number of pupils was slightly less than in the preceding year, but the average attendance improved from 57.50 per cent. to 58.65. The average daily attendance during the term ended 31st December, 1886, was 60.68, and during that ended 30th June, 1887, 56.80, an increase in both cases over the figures for the two preceding terms. The proportion of the estimated population attending the Public schools was 1 in 6.04.

Average attendance.

540. The Government expenditure for the year was \$137,187; the county fund amounted to \$94,558, and the district assessments to \$182,222, making a total of \$413,967. The average cost per pupil, including the pupils of Superior and Grammar schools, was \$6.04.

Expenditure.

541. An Arbor Day, on the same principle as that in Ontario, was held for the first time on 20th May, 1887, when 8,179 trees were planted and 162 flower beds laid out.

Arbor Day.

542. The following table gives the educational statistics for the year :—

Educational statistics New Brunswick.

NEW BRUNSWICK EDUCATIONAL STATISTICS.

Public Schools, 1886-87.

Total.....	154	600	754

Ninety-eight pupils attended the institutions for the deaf and dumb at Fredericton and Halifax, and 27 the school for the blind at Halifax.

Education  
in Mani-  
toba.

543. The central control of educational matters in Manitoba is in the hands of a Board of Education, composed of 21 members, and divided into two sections, one section consisting of 12 Protestants and the other section of 9 Roman Catholics, each section having exclusive control over the schools of its own denomination. The local management is in the hands of trustees elected by the people.

School  
lands.

544. Two sections of land of 640 acres each, in every township, are reserved and held in trust by the Dominion Government as school lands, for the purpose of aiding and

promoting education, and it is estimated that upwards of 1,500,000 acres are available for settlement. These lands have, until quite recently, been purposely kept out of the market, in order to allow their value to increase; but in January, 1888, a number of sections were offered for sale at several points in the Province, when 19,986 acres were disposed of for the sum of \$140,189, the average price realized having been \$7 per acre, the maximum price \$16.10 per acre, and the minimum \$5 per acre. Some idea can be gathered from the foregoing of the very great value of this educational endowment.

545. The following statistics relate only to the Protestant schools of Manitoba, particulars of the Roman Catholic schools not being available. The increase in the number of schools has been very rapid. In 1871 there were only 16 in the Province; in 1881 there were 128, and in 1886 there were 496. The school age is 5 to 15 years inclusive, and in 1886 the school population in organized districts was 16,834, the number attending school 15,926, and the average attendance 8,129. There is a Normal school for the training of teachers, and a High school or Collegiate department at Winnipeg, at which the attendance in 1886 was 114. The total number attending school was 16,926, there being 1,000 over the school age, and of the whole number 9,041 were boys and 7,885 girls. The number of teachers employed was 524. The expenditure of local school boards is provided for annually as follows:—1. From the Government grant, not exceeding \$100 to each school. 2. From the municipal levy, not exceeding \$240 to each school. 3. From the special district tax for the balance required. The Government grant in 1886 amounted to \$54,749 and the total receipts to \$380,623, being an increase of 41,627 over 1885. The total expenditure amounted to \$352,850, an increase of \$31,950 over 1885.

Educa-  
tional  
statistics  
Manitoba.

**Education in British Columbia.** 546. The educational system of British Columbia is free, and is supported entirely by the Government. There is a Superintendent of education, acting under the Provincial Secretary, and each school is locally controlled by trustees, elected by the ratepayers of each school district.

**Average attendance.** 547. There was an increase in the number of schools and pupils, but a decrease in the average daily attendance from 55.50 per cent. to 53.75 per cent. There was an increase of 974 in the total number of pupils.

**Expenditure.** 548. The expenditure for education proper amounted to \$88,521, and for construction of school houses, furniture, repairs, &c., \$17,705, making a total of \$106,226.

**Educational statistics British Columbia.** The following table shows the number of schools, teachers, and pupils in each class:—

EDUCATIONAL STATISTICS OF BRITISH COLUMBIA, 1887.

TOTAL NUMBER OF SCHOOLS, ETC.					
92	116	5,345	2,843	2,502	2,921

**Education in Prince Edward Island.** 549. Educational matters in Prince Edward Island are under the control of a Board of Education appointed by the Government, and of a Chief Superintendent, and are supported partly by Government grants and partly by district assessments. The Government expenditure in 1887 was \$110,484, and that of the school boards \$36,294, making a

total expenditure of \$146,778, being a decrease of \$2,000, as compared with 1886.

550. The school age is between the ages of 5 and 16, and it was estimated that there were 23,000 children between those ages in 1887, of whom 22,800 attended school during some portion of the year. There was, however, a falling off in the average percentage of attendance from 56.27 per cent. to 54.76 per cent. The number of districts without schools has decreased from 74, in 1876, to 5 in 1887. An Arbor Day was established in 1885, but the results have not yet been very extensive.

Average attendance.

551. The following table is a summary of the educational statistics of the Province in 1887: --

\* Protestant schools only. † Public schools only. ‡ Winter term only. § Government expenditure only. ¶ Capitation and inspector's grants only.

If the figures for the attendance in the Territories during the summer term were available, the number would be very largely increased.

**Total attendance.** 558. It will be seen that the total number of pupils at the Public, High, and Model schools amounted to 978,949. If all those attending the various universities, theological colleges and private schools could be reckoned, the whole number of those undergoing tuition of some kind would probably be over one million.

**Difference in dates of Provincial reports.** 559. Owing to the fact that the various Provinces issue their reports at different periods, as appears in the above table, it is not possible to give the figures for the whole Dominion at a given date; but as it is intended in future issues to keep to the same periods as those given above, the figures will in a very short time be as valuable for comparison as if they all represented the same year.

**The higher educational institutions.** 560. An attempt has been made to collect some particulars about the principal higher educational institutions of the country, and though they are not as complete as it is hoped to make them in course of time, it is believed they will be found to afford both valuable and useful information.

King's  
College,  
Windsor,  
N.S.

King's College, Windsor, N.S. was founded in 1789, by an Act of the Provincial Legislature, and by Royal Charter in 1802 received all the privileges of a University, thus becoming the first university of British origin established in Canada. The college is in connection with the Church of England, the patron being the Archbishop of Canterbury, but is open to students of all denominations, no religious tests being imposed except, in the Divinity course. It confers degrees in Arts, Divinity, Civil Law and Engineering. It has an endowment fund of \$155,000, without including real estate, and an income of about \$9,000 per annum, and has also a number of scholarships attached, to the value of \$3,000. The number of students in October, 1888, was 24.

**McGill University Montreal.** The University of McGill, Montreal, consists of McGill College and affiliated colleges. McGill College was founded after the death of the Hon. James McGill, in 1813, who endowed it by will with 46 acres of land in Montreal and £10,000. It was made a university by Royal charter in 1821, and re-organized by an

amended charter in 1852. The total value of its endowment is now \$600,000, and its revenue and expenditure average \$60,000. It is a Protestant Institution, but entirely undenominational. Degrees are conferred in Arts, Law, Medicine and Applied Science. There is also a special course in Arts for females, in separate classes. The total annual value of scholarships and exhibitions is \$1,900. The number of students of the college proper in 1887 was 595, and there were in addition 41 in colleges affiliated in Arts, and 108 in the Normal School, making a total of 744. There were also 150 in affiliated Theological colleges, and 368 in the Model schools of the Normal School. The affiliated colleges are Morrin College, Quebec; St Francis' College, Richmond; Congregational College, Montreal; Presbyterian College, Montreal; The Diocesan College, Montreal; The Wesleyan College, Montreal; McGill Normal School, and a number of schools and High schools. The university possesses a valuable museum, and an excellent library, containing 37,000 volumes.

University College, Toronto, was founded by Royal Charter in 1827, and was for a long time known as King's College. It possesses an endowment of \$1,042,000, invested in various securities, and also owns valuable lands in the city of Toronto. Its income for the year ended 30th June, 1887, was \$85,200, of which \$ 3,300 were derived from fees. The expenditure was about \$70,000. Scholarships to the value of \$800 are attached. The university is altogether unsectarian, and it was in consequence of the Faculty of Divinity being suppressed in 1850, when the University of Toronto was constituted, that Trinity College was established. Degrees are conferred in Arts, Law, Medicine (including Dentistry) Civil Engineering, and Agriculture, in the university, and in University College, in Arts, Science, and special non-professional branches in Law and Medicine. The University and University College constitute one Faculty for teaching purposes, governed by the University Council and all examinations are conducted under regulations of the Senate of the University, which, as a governing body, determines the requirements and appoints examiners. In October, 1888 there were upwards of 500 students in Arts and 300 in Medicine. Females are admitted. There were 91 degrees conferred during 1887.

In connection with the University is Upper Canada College for boys, which was attended by 369 pupils during 1887. This institution provides a first-class education in classics, modern languages, history, geography, mathematics, &c.

Victoria University, Cobourg, founded as Upper Canada Academy in October, 1829, is under the control of the Methodist Church, but free from all sectarian tests. In 1861 the charter was enlarged, full university powers were secured, and the name changed to its present one. All State aid was discontinued in 1868, and the institution is supported by voluntary contributions. Endowment, exclusive of lands, buildings, &c., is \$150,000. Annual expenditure, \$20,000. In anticipation of federation with the Provincial University, a further sum of \$450,000 is now being raised for buildings and endowment. There are at present about 634 students. Females are admitted. Affiliated with Victoria University are Albert College, Belleville; Toronto Medical School and Trinity Medical College, Toronto; the School of Medicine and Surgery, Montreal; the Wesleyan Ladies' College, Hamilton, and the Ontario Ladies' College, Whitby.

**Bishop's  
College,  
Lennox-  
ville, Q.**

Bishop's College, Lennoxville, Quebec, was incorporated by Act of the Legislature of Quebec in 1843, and was designed to provide the Church of England in the Province of Quebec with a suitable place for educating her ministry, and also to offer to the Province at large the blessing of a sound and liberal education, based upon religious principles. The university was instituted by Royal Charter in 1852. The value of the endowed scholarships is about \$37,400, and their annual value about \$2,000. Degrees are conferred in Divinity, Arts, Medicine, Law and Music. The fees for board and tuition are \$190 per annum. The number of resident students in Divinity and Arts in October, 1888, was 28. Females are not admitted.

Affiliated to the university and under the control of the corporation of Bishop's College, is Bishop's College school, Lennoxville, for boys. Fees \$280 per annum. Sons of clergymen working in the dioceses of Quebec and Montreal are admitted as boarders at a greatly reduced rate.

**Ottawa  
College,  
Ottawa.**

Ottawa College, Ottawa, was founded in 1848, under the title of "College of By-town," and in 1868 received the title of College of Ottawa, and the power of conferring degrees. It has an average revenue of \$46,000. It is a Roman Catholic institution, but Protestants are not excluded. Scholarships are attached, of the value of \$17,500; yearly value, \$875. It confers degrees in Arts, Law, Medicine, Civil, Mining and Mechanical Engineering and Music, and all degrees conferred are officially recognized in the Province of Ontario. The number of students in 1888 was 398. Females are not admitted.

**Trinity  
College,  
Toronto.**

The University of Trinity College, Toronto, was constituted by Royal Charter, dated 15th July, 1852, and possesses all such powers of conferring degrees as are enjoyed by the universities of Great Britain. The amount of endowment is about \$750,000, all contributed by private subscription. Annual revenue, \$30,000. It possesses scholarships of the value of about \$2,000 per annum, besides exhibitions in the theological school of the value of \$1,700. The university is under the supervision of the Church of England, but students in Arts are admitted without reference to their religion, provided they conform to the regulations. The total number of degrees conferred in 1887 was 158. The following colleges are affiliated:—St. Hilda's College for women, Toronto (on the pattern of Lady Margaret Hall, Oxford); Trinity Medical College, Toronto; The Women's Medical College, Toronto; and the Royal College of Physicians and Surgeons, Kingston. The total number of undergraduates last year was 400, viz.: Arts, 57; Law, 23; Medicine, 234; Music, 95. In connection with the university are the following schools: Trinity College school, Port Hope, opened on 1st May, 1865, for boys only, possessing fine buildings valued at \$90,000, and having an average number of 138 pupils, fees for board and tuition, \$267 per annum; the Bishop Strachan school, Toronto, for girls, and the Hellmuth Ladies' College, London, Ont. The university fees are \$200 per annum for resident students and \$65 for non-residents.

**Laval  
University  
Quebec.**

Laval University, Quebec, was founded by the Quebec Seminary, under Royal Charter dated 8th December, 1852. It is under the control of the Roman Catholic Church, but students of other denominations are admitted without distinction. Females are not admitted. It has a branch institution at Montreal, with Faculties

of Theology, Medicine and Art, to the latter of which is attached the Ecole Polytechnique of Montreal. The number of students at Quebec and Montreal in 1887 was 500. All the usual degrees are conferred. Sixteen colleges and seminaries throughout the Province of Quebec are affiliated with the university.

Knox College, Toronto, is a theological school of the Presbyterian Church in Canada, and was founded in 1845. The amount of endowment is \$200,000. The average revenue is about \$16,500, and expenditure \$16,000. Value of scholarships, \$1,800 per annum. The students of this college mostly prosecute their studies in Arts in University College, Toronto. The number having in this manner connection with Knox College in 1888 was about 100, there being 76 resident students.

Knox  
College,  
Toronto.

The Presbyterian College, Montreal, was founded in 1868, and has an endowment of \$160,000, with scholarships worth annually \$1,300. The average revenue and expenditure is about \$12,600. The course of study is limited to the theological curriculum of the Presbyterian Church, including the preparation of French and Gaelic preachers, and degrees are conferred in Divinity only. The number of students during the winter of 1888-89 was 74.

Presbyter-  
ian Col-  
lege,  
Montreal.

The Presbyterian College, Halifax, is a theological seminary affiliated with Dalhousie College, Halifax, from which it receives the majority of its students, and was organized in 1860 by the union of the theological department of the Free Church, Halifax, and the seminary, Truro. It is supported and controlled by the Presbyterian Synod of the Maritime Provinces. It has an endowment of about \$120,000. The number of students in 1888 was 30. The degree of B. D. only is conferred.

Presbyter-  
ian Col-  
lege,  
Halifax.

The University of Mount Allison College was founded by Act of the Legislature of New Brunswick in 1862, and consists of the University of Mount Allison, the Mount Allison Academy for boys and young men, founded in 1843, and the Mount Allison Ladies' College, founded in 1854. The university is under the control of a Board appointed by the Methodist Church, and has an endowment of \$120,000, and scholarships of the annual value of \$500. It has power under its charter to confer degrees in Arts, Science, Divinity, Law and Medicine. Seventeen degrees were conferred in 1888. The revenue in 1888 was \$41,000, the expenditure \$40,000 and the number of students 268.

University  
of Mount  
Allison.  
N.B.

The Wesleyan Theological College, Montreal, is affiliated with McGill University, and confers degrees in Divinity only. It was founded in 1873, and has an endowment of \$52,000. The average annual revenue and expenditure are \$6,000, and the number of students in 1888 was 35.

Wesleyan  
College,  
Montreal.

The University of Acadia College, Wolfville, Nova Scotia, was founded in 1838, and has an endowment of \$100,000. The governors are appointed by the Baptist Convention of the Maritime Provinces, and "while no religious tests or subscriptions are required. Acadia is designed to be a positively christian college. In view of the fact that forms of philosophy, alien to the christian faith, are finding their platform in many educational institutions, it is of increased importance that the higher education should be available under positively christian influences." There are seven scholarships of the value of \$250 annually. The usual university degrees are conferred. There were 114 students in 1888. Females are admitted.

Acadia  
University  
Wolfville,  
N.S.

**Woodstock College, Ont.** Woodstock College, Ontario, in connection with McMaster University (of which particulars are not available), is a school of learning for young men of the Baptist denomination, and has an endowment of \$160,000, and an average revenue of \$25,000. The attendance in 1888 was about 100. In connection with the ordinary course of four years, a manual training department has been established, giving instruction in drawing, carpentry, wood-turning, carving and iron-work.

**School of Practical Science, Toronto.** The School of Practical Science at Toronto was established in 1877, when the Provincial Government effected an arrangement with the council of university College, whereby the students of the school enjoy full advantage of the instruction given by its professors and lecturers in all departments of science embraced in the work of the school. As now organized, the school includes in its teaching staff, professors in Engineering and Applied Chemistry, and professors and lecturers in Mathematics, Physics, Chemistry, Mineralogy, Geology, Biology and Ethnology. Diplomas are granted in Engineering, Assaying and Mining Geology and Analytical and Applied Chemistry. Preliminary scientific training for the professions of Surveying and Medicine is also furnished. A laboratory and workshop are also attached to the school. The school is maintained by an annual grant from the Provincial Government of about \$8,800. The number of students in 1887 was 69. Candidates for the degree of C.E. at the University of Toronto must hold the diploma in Civil Engineering of this school. The Provincial Minister of Education proposes to establish full courses of instruction in Applied Chemistry, Applied Mechanics and Architecture.

**Total annual expenditure.** 561. It will be seen that there is an annual expenditure from the institutions named above of upwards of \$400,000, providing instruction for over 5,000 students. Another attempt will be made during the ensuing year to make these statistics fuller and more complete.

**Decrease in business of the Patent office.** 562. A small decrease will be noticed in the business of the Patent Office during 1888, which was caused by the falling off in business during the months of September, October and November, occasioned by the fact that a presidential election was in progress in the United States, and a similar falling off has been noticed during the last 24 years, in the weeks immediately preceding a presidential election, the large majority of applications for patents coming from the United States.

**Business of Patent office 1868-1888.** 563. The following table shows the different transactions of the Patent Office in each year since 1st July, 1867:—

BUSINESS OF THE PATENT OFFICE OF CANADA, 1868-1888.

\* There were no caveats until 1869.

564. The limit of duration of a patent is fifteen years which period can be reduced by the applicant to five or ten years on payment of a proportionate fee. In 1883 there were 2,178 patents granted, of which 184 were for 15 years, 29 for 10 years, and the remainder, 1,965, for 5 years, and of this last number 1,732 were allowed to lapse at the expiration of the term, showing that the large majority of Canadian patents are not kept in force for more than 5 years. Duration of patents.

565. The Model Museum, which is designed to be a school of instruction in every department of science and mechanical invention, attracts large numbers of visitors. but the limited Model Museum.

space at present allotted to it necessitates such a crowding of models as to deprive it of much of its usefulness. This will be remedied, however, when the new Departmental Building is finished.

Copy-  
rights and  
trade  
marks.

566. The business in the Copyrights and Trade Marks Branch showed a very considerable increase, the receipts being \$1,071 in excess of those of 1887, and the following table shows the large increase in the business of this branch since Confederation :—

COPYRIGHTS, TRADE MARKS, INDUSTRIAL DESIGNS AND TIMBER MARKS REGISTERED IN CANADA, 1868 TO 1888.

Exhibition  
at Glas-  
gow, 1888.

567. Canada was well represented at the Exhibition held at Glasgow during the summer of 1888, as the exhibits consisted for the most part of a collection previously shown at the Colonial and Indian Exhibition. A special visit was

paid to the Canadian Court by Her Majesty, who showed the greatest interest in the exhibits of grain, minerals, timber and natural history.

568. The importance of the Archives Branch of the Department of Agriculture is steadily growing, and frequent references are now made to it from various parts of the world for information respecting questions which have to be settled by documentary evidence, and there is scarcely a work recently published on the history of Canada or the United States which has not been much indebted to this branch for information. Archives.

#### LAW AND CRIME.

569. By the British North America Act it is provided that the Governor General shall appoint the Judges of the Superior, District and County Courts, except those of the Courts of Probate in Nova Scotia and New Brunswick, and that their salaries, allowances and pensions shall be fixed and provided by the Dominion Parliament. It is also provided that the Judges of the Courts of Quebec shall be selected from the Bar of that Province, and there is a similar provision for the selection of the Judges in Ontario, Nova Scotia and New Brunswick, until the laws relative to property and civil rights and the procedure of the courts in those Provinces are made uniform. Appoint-  
ment of  
judges in  
Canada

570. The highest court in the country is known as the Supreme Court, and was constituted in 1875. It is presided over by a Chief Justice and five Puisné Judges, all of whom must reside within, or within five miles of, the city of Ottawa, where the Court holds its sittings three times a year, viz., in February, May and October. This court has an appellate, civil and criminal jurisdiction in and throughout Canada. The Sup-  
reme  
Court.

The Exchequer Court.

571. The Exchequer Court, presided over by a separate Judge, who must reside in, or within five miles of, Ottawa, possesses exclusive original jurisdiction in all cases in which demand is made, or relief sought, in respect of any suit or action of the Court of Exchequer on its revenue side against the Crown or any of its officers. This court also possesses concurrent original jurisdiction in all cases in which it is sought to enforce any law relating to the revenue. The court may sit at any time and at any place in Canada.

The Superior Courts

572. The Superior Courts of the several Provinces are constituted as follow: Ontario—The Supreme Court of Judicature, composed of the Chief Justice of Ontario and three Justices of Appeal, and the High Court of Justice, divided into three divisions, having concurrent jurisdiction, viz., the Queen's Bench and Common Pleas Divisions, each presided over by a Chief Justice and two Judges, and the Chancery Division, presided over by a Chancellor and three Judges. Quebec—The Chief Justice of the Queen's Bench and five puisné judges, and the Chief Justice of the Superior Court, and twenty-six puisné judges, whose residences are fixed in various parts of the Province. Nova Scotia and New Brunswick—The Chief Justice of the Supreme Court, the Judge in Equity, and five and four puisné judges respectively. Manitoba—The Chief Justice, and three puisné judges. British Columbia—The Chief Justice and four puisné judges. Prince Edward Island—The Chief Justice and two assistant judges. There are also Vice-Admiralty Courts in Quebec, Nova Scotia, New Brunswick and Prince Edward Island, and a Maritime Court of Ontario. In the North-West Territories there are five puisné judges of the Supreme Court. There are also County Courts, with limited jurisdiction, in most of the Provinces. Police Magistrates and Justices of the Peace are appointed by the Provincial Governments

573 The collection of criminal statistics, provided for by 39 Vic., chap 13, constitutes the only attempt hitherto made by the Dominion Government to collect any one class of statistics for the whole Dominion. The Act came into operation in 1876, and the returns now made to the Department are considerably fuller than at the commencement of the system. They have not yet, however, attained that degree of completeness which is desirable, and it is to be regretted that more interest in making full and complete returns is not shown by the officials concerned, and more particularly by Justices of the Peace, who, in many cases, make no returns at all. Statistics of crime, when strictly accurate, are valuable indications of the social condition of a country, and are also of much importance in connection with the making of laws, both civil and criminal; but their value, to a large extent, disappears, when their accuracy or completeness can be called in question, and if those whose duty it is to make returns would only recognize the actual importance of their work, it is probable they would be at more pains to send in complete figures, and also to send them in with greater promptitude, much time being at present lost through delay on this account. Comparisons between the various Provinces might be of much practical value, but owing to the want of completeness, such comparisons are much impaired in value.

Collection of criminal statistics.

574. The various indictable offences are divided into six classes, as follow :—

Classification of indictable offences.

- Class I. Offences against the person.
- Class II. Offences against property, with violence.
- Class III. Offences against property, without violence.
- Class IV. Malicious offences against property.
- Class V. Forgery, and offences against the currency.
- Class VI. Other offences not included in the foregoing classes.

And the following list gives the principal crimes and offences that are included in each class :

CLASS I.—OFFENCES AGAINST THE PERSON.

Murder and attempt to murder.  
 Manslaughter.  
 Shooting, stabbing, wounding, &c.  
 Rape and other offences against females.  
 Unnatural offences.  
 Bigamy.  
 Abduction.  
 Assault, aggravated and common.  
 Other offences against the person.

CLASS II.—OFFENCES AGAINST PROPERTY, WITH VIOLENCE.

Robbery, with violence.  
 Burglary, house and shop-breaking.  
 Other offences against property, with violence.

CLASS III.—OFFENCES AGAINST PROPERTY, WITHOUT VIOLENCE.

Horse, cattle and sheep stealing.  
 Larceny.  
 Embezzlement.  
 Felonious receiving.  
 Fraud.

CLASS IV.—MALICIOUS OFFENCES AGAINST PROPERTY.

Malicious injury to horses, cattle and other property.  
 Arson, burning, &c.

CLASS V.—FORGERY AND OFFENCES AGAINST THE CURRENCY.

Forgery.  
 Offences against the currency.

CLASS VI.—OTHER OFFENCES, NOT INCLUDED IN THE FOREGOING CLASSES.

Carrying unlawful weapons.  
 Offences against gambling, municipal, liquor and other Acts.  
 Keeping disorderly houses and houses of ill-fame.  
 Perjury.  
 Smuggling, and offences against the revenue.  
 Other offences, not included in the above classes.

Convictions in  
 Canada,  
 1882-1886.

575. The following table gives the total number of convictions of all kinds in Canada, according to the above returns, during the years ended 30th September, 1882 to 1886:—

TOTAL NUMBER OF CONVICTIONS IN CANADA, 1882 TO 1886.

OFFENCES.	Convictions for the Years ended 30th September				
	1882.	1883.	1884.	1885.	1886.
I.—Offences against the person.....	4,667	4,845	4,281	4,886	5,202
II.—“ “ property, with violence.....	173	132	228	222	255
III.—“ “ without violence.....	2,190	2,003	3,286	3,599	3,178
IV.—Malicious offences against property.....	655	584	274	201	269
V.—Forgery and offences against the currency	22	25	20	48	43
VI.—Other offences, not included in the above classes .....	23,598	25,799	21,459	24,913	24,927
Total.....	31,305	33,388	29,551	33,869	33,874

576. There was an increase of only 5 in the total number of convictions in 1886 as compared with 1885, which may be considered satisfactory, for seeing that the returns from the Province of Quebec were fuller than in any previous year, and assuming that the figures from the other Provinces were, at least, not less complete than formerly, it is evident that there must have been a decided decrease in crime during the year under review. The largest increases were in offences against the person and malicious offences against property, while it is very satisfactory to note a marked decrease in the number of offences against property without violence, the increase in crimes of this description having been alarmingly rapid in previous years. Decrease  
in crime.

577. It must be borne in mind that the number of convictions does not represent a similar number of individual criminals, because any person convicted more than once during the year, whether for the same or a different offence, is counted as a separate person for each conviction, and it is well known that for drunkenness, vagrancy and similar offences, a number of persons are convicted several times every year. The police returns for the city of Toronto for Persons  
convicted  
more than  
once.

1887 furnish an apt illustration of this. Out of a total number of 10,597 persons charged, 987 were brought up twice, 520 three times, 131 four times, 87 five times, 29 six times, 17 seven times, 10 eight times, 2 nine times, 1 ten times and 1 eleven times, thus reducing the number of individual criminals from 10,597 to 7,477, a reduction of 3,120.

Total con-  
victions  
1886.

578. Out of the total number of 33,874 convictions during the year 3,509 were for indictable offences, and 30,365 were summary convictions by police and other magistrates, being in the proportion to the estimated population of 1 in 1,366 and 1 in 157 persons, respectively. The proportions in the two preceding years, 1884 and 1885, were, for indictable offences, 1 in 1,042 and 868 persons, and for summary convictions 1 in 173 and 156 persons respectively. The proportions therefore in 1886 contrast favourably with previous years. The total number of persons charged with indictable offences was 5,497, out of which 3,509, or 63·8 per cent. were convicted. The proportions of convictions in 1884 and 1885, were, respectively, 56·9 per cent., and 68·8 per cent.

Sex and  
residence  
of crimi-  
nals, 1886.

579. The following table gives the sex and residence of persons convicted for indictable offences in 1886. In this and subsequent tables it must be remembered that it is the number of convictions that is being dealt with, and not the number of individual criminals, the statistics not allowing that number to be exactly arrived at. By taking the number of those convicted twice, and assuming that those convicted more than twice were only convicted three times, the number of persons is found to be 2,820, but with full particulars this number would probably be still further reduced :—

SEX AND RESIDENCE OF PERSONS CONVICTED FOR INDICTABLE OFFENCES. 1886.

OFFENCES.	SEX.		RESIDENCE.		
	Male.	Female.	Cities and Towns.	Rural Districts.	Not Given.
Class I.....	713	24	520	213	4
.. II.....	252	3	202	51	2
.. III.....	1,920	150	1,638	351	81
.. IV.....	43	4	22	24	1
.. V.....	42	1	31	8	4
.. VI.....	236	121	281	75	1
Total.....	3,206	303	2,894	722	93

580. The proportion of convictions of females to the total number of convictions was 8.6 per cent., and per 100 convictions of males 10.5 per cent. In 1884 the proportions were 11.2 per cent., and 12.7 per cent., and in 1885, 9.5 per cent. and 10.6 per cent. Judging from these figures there would certainly seem to be a tendency towards a decrease of crime among females. No female has ever been convicted of a penitentiary offence in either Manitoba or British Columbia.

Convictions of females.

581 The proportions of convictions of those living in cities and towns and those living in country districts do not vary very much, the figures for the three years 1884, 1885 and 1886, in the order named, having been, in cities and towns 76.69 per cent., 76.06 per cent., and 76.77 per cent., and in country districts 22.50 per cent., 22.91 per cent. and 20.57 per cent. The number of those whose residence was not given was 93, which was larger than it ought to have been.

Proportion of criminals in town and country.

582. The next table gives the number of convictions for indictable offences in each Province in 1886, with the ages and educational status of the convicted.

Ages and educational status of criminals 1886.

## AGE AND EDUCATIONAL STATUS OF PERSONS CONVICTED FOR INDICTABLE OFFENCES, 1886, BY PROVINCES.

PROVINCES.	EDUCATIONAL STATUS.					AGES.

Number  
unable to  
read or  
write.

583. There has been a steady decrease in the number of those convicted during the last three years who were unable to read or write, the proportions to the total number having been in 1884, 28·50 per cent., in 1885, 13·82 per cent., and in 1886, 9·40 per cent. This may fairly be taken as an indication that the number of totally uneducated persons is gradually decreasing. As an instance of the absence of care shown by many persons in making returns, no less than 423 cases, or 12 per cent. of the total number, were reported without any particulars of the educational status of the convicted. As regards ages, 400 per cent. were under 16, 16·64 per cent. between 16 and 21, 50·66 per cent. between 21 and 40, and 17·92 per cent. over 40 years of age.

Religions  
of criminals  
1886.

584. The next table gives the religions of those convicted of indictable offences in 1886.

RELIGIONS OF PERSONS CONVICTED FOR INDICTABLE OFFENCES, 1886.

OFFENCES.	Baptists	Roman Catholics.	Church of England.	Methodists.	Presbyterians.	Protestants.	Other Denominations.	Not Given.
Class I.....	16	350	88	60	54	64	65	40
“ II.....	6	117	25	28	17	24	26	12
“ III.....	54	920	352	213	170	135	104	122
“ IV.....	3	16	6	11	3	2	4	2
“ V.....	1	11	14	5	7	1	1	3
“ VI.....	8	136	70	30	30	24	23	36
Total.....	88	1,550	555	347	281	250	223	215

585. The following were the proportions of those convicted, belonging to the four leading denominations in 1884, 1885 and 1886:—

Number of principal religions, 1884, 1885, 1886.

	1884.	1885.	1886.
Roman Catholics.. .....	49·51 per cent.	49·90 per cent.	44·17 per cent.
Church of England.....	16·99 “	14·90 “	15·81 “
Methodists.....	10·89 “	9·11 “	9·88 “
Presbyterians.....	7·62 “	7·71 “	8·00 “

The number of Baptists convicted has scarcely varied during the 3 years; in 1884 it was 86, and in each of the years 1885 and 1886 it was 88.

586. The birthplaces of the convicted are given in the next table:—

Birth-places of criminals 1886.

**BIRTH PLACES OF PERSONS CONVICTED FOR INDICTABLE  
OFFENCES, 1886.**

OFFENCES.	BIRTHPLACES.							Not Given.
	BRITISH ISLES.			Canada.	United States.	Other Foreign Countries.	Other British Possessions.	
	Eng-land and Wales	Ire-land.	Scot-land.					
Class I.....	49	60	25	513	29	42	2	17
" II.....	14	18	6	168	25	20	.....	4
" III.....	220	183	53	1,337	131	62	3	81
" IV.....	6	2	1	34	1	3	.....	.....
" V.....	7	5	1	21	4	2	.....	3
" VI.....	39	31	9	221	42	6	1	8
Total.....	335	209	95	2,294	232	135	6	113

It will be seen that almost all the offenders were born in Canada, the United Kingdom or the United States, and the following are the proportions in 1885 and 1886:—

	1885.	1886.
Canada.....	68·44 per cent.	65·37 per cent.
United Kingdom.....	20·64 "	20·77 "
United States.....	5·97 "	6·61 "

The proportions being very much the same in both years.

Occupations of criminals, 1886.

587. The occupations of those convicted are given below:—

**OCCUPATIONS OF PERSONS CONVICTED FOR INDICTABLE  
OFFENCES, 1886.**

OFFENCES.	OCCUPATIONS.							Not Given.
	Agricul-tural.	Com-mercial.	Domes-tic.	Indus-trial.	Profes-sional.	Labour-ers.		
Class I.....	62	88	41	135	7	333	71	
" II.....	6	18	5	63	2	123	38	
" III.....	66	121	118	276	19	989	461	
" IV.....	12	2	3	6	.....	15	9	
" V.....	.....	13	1	12	3	11	3	
" VI.....	12	41	27	50	10	79	136	
Total.....	158	283	195	542	41	1,530	749	

The labourers and the industrial and commercial classes furnish the largest number of criminals, and the following have been the proportions of these classes to the total number during the three years 1884, 1885 and 1886 :—

	1884.	1885.	1886.
Labourers.....	42 per cent.	46 per cent.	44 per cent.
Industrial.....	16 “	15 “	15 “
Commercial.....	10 “	8 “	8 “

588. In the three years above named not less than 19 per cent., 18 per cent. and 21 per cent. of the number convicted were returned with the occupations not given, showing still more clearly the unnecessary carelessness of those making the returns. Incomplete returns.

589. The various sentences passed on the persons convicted in 1886 were as follow :— Sentences of convicted, 1886.

	Number.
Death.....	14
Penitentiary, two years and under five.....	316
“ five years and over.....	136
“ life.....	13
Gaol, with option of a fine.....	622
“ under one year.....	1,731
“ one year and over.....	203
Sent to reformatories.....	153
Sentences deferred.....	286
Various sentences.....	35
<b>Total convictions.....</b>	<b>3,509</b>

590. Out of the 14 persons sentenced to death, all of them for the crime of murder, 7 were Indians in the North-West Territories, who were implicated in the rebellion of 1885. Sentences to death.

591. There were 30,365 summary convictions, of which 27,782 were commitments to gaol with the option of a fine, and 1,695 without that option. The proportion of summary convictions per 1,000 of the population was 6.33. This is very low, and contrasts favourably with similar figures for the Australasian Colonies in 1885, which ranged from 100.85 per 1,000 in Western Australia to 25.84 per 1,000 in South Australia. While, however, these small figures are undoubt- Summary convictions.

edly an indication of the law-abiding disposition of the people of this country, they are probably too small. Assuming, in the absence of information to the contrary, that all those charged with indictable offences were committed for trial, the proportion per 1,000 of the population would be 1.14, while of those convicted after commitment the proportion was 0.73. It is highly probable that these figures are far more nearly correct than those relating to summary convictions. Commitments for trial in 1885 in the Australasian Colonies varied from 2.52 per 1,000 in Western Australia to .53 in Tasmania, and convictions after commitment from 1.49 to .23 in the same colonies, while in the same year in England the respective proportions were .49 and .38, in Scotland .64 and .50, and in Ireland .57 and .31.

Convictions of all kinds. 1886.

592. The following table gives the number of convictions for indictable offences and the number of summary convictions in each Province in 1886, according to the returns:—

CONVICTIONS BY PROVINCES, 1886—INDICTABLE OFFENCES.

OFFENCES.	Ontario.	Quebec.	Nova Scotia.	New Brunswick.	Manitoba.	British Columbia.	P. E. Island.	The Territories.	Canada.

SUMMARY CONVICTIONS, 32-33 VIC., CHAPTERS 31, 32, 33, 34.

Assault on females. ...	10	.....	2	1	.....	.....	.....	.....	13
Various offences aga'st the person.....	2,781	925	232	331	82	70	31	.....	4,452
Various offences aga'st property.....	488	175	85	47	11	9	6	.....	821
Breach of municipal by-laws and other minor offences.....	8,426	3,398	455	442	610	362	223	7	13,923
Drunkennness.....	5,453	2,367	667	1,290	631	389	359	.....	11,156
<b>Total.....</b>	<b>17,158</b>	<b>6,865</b>	<b>1,441</b>	<b>2,111</b>	<b>1,334</b>	<b>830</b>	<b>619</b>	<b>7</b>	<b>30,365</b>
<b>Grand Total .....</b>	<b>19,174</b>	<b>7,854</b>	<b>1,542</b>	<b>2,176</b>	<b>1,411</b>	<b>999</b>	<b>658</b>	<b>60</b>	<b>33,874</b>

593. The proportion of convictions for indictable offences per 1,000 persons in each Province in 1885 and 1886 was:—

	1885.	1886.	Proportion per 1,000 of convictions for indictable offences.
Ontario.....	1.01	.96	
Quebec.....	.85	.68	
Nova Scotia.....	.26	.21	
New Brunswick.....	.24	.19	
Manitoba.....	.95	.71	
British Columbia.....	.60	1.70	
Prince Edward Island .....	.13	.33	
The Territorse.....	1.78	.77	

There was apparently a decrease of the more serious crimes in every Province, with the exception of British Columbia and Prince Edward Island; in the former Province the increase was nearly 200 per cent. The returns of summary convictions are not complete enough to make comparisons between the provinces of any value.

594. The total number of convictions for drunkenness returned was 11,156, being only 90 less than the preceding year, and as the Canada Temperance Act was in force in a large portion of the Dominion during the period, this result would seem to show that that measure was not as successful in restraining intemperance as its advocates expected.

It is found that 2·33 persons in every 1,000 were convicted of drunkenness in 1886 and 2·41 persons in 1885.

Prevalence of drunkenness in each Province.

595. The following is the order, according to the returns furnished to the Government, in which the Provinces, in proportion to population, stood with reference to the prevalence of drunkenness :—

Manitoba.	Ontario.
British Columbia.	Quebec.
New Brunswick.	Nova Scotia.
Prince Edward Island.	

This vice is apparently still most prevalent in Manitoba, though the proportion of convictions to population is somewhat smaller, being 1 in 172, as compared with 1 in 150 in 1885. The position of the other Provinces has not varied to any extent, with the exception of British Columbia, which has gone from the lowest or most temperate position in the list to that of second, ranking next to Manitoba. This is probably accounted for by the construction of the Canadian Pacific Railway, and the large influx of labourers in consequence. It is probable that the position of the Provinces as given above is fairly correct, though the figures themselves may not be so absolutely; still, as stated previously, these comparisons between Provinces must be accepted with a certain amount of caution.

Convictions of all kinds, 1882-1886.

596. The following table gives the total number of convictions of all kinds in the several Provinces in the years 1882 to 1886, together with the sentences imposed :—

PROVINCES.	Year ended 30th Sept.	Total Convictions	SENTENCE.				Various Sentences
			Committed to			Death	
			Penitentiary.	Gaol or Fined.	Reformatories.

	1886	60	10	40	.....	7	3

Convict population of Canada, 1887.

596. The total convict population of the Dominion (that is, the total number confined in the penitentiaries, of which there are 5), on 30th June, 1887, was 1,159, being a decrease of 41 as compared with the same date in 1886, when it was 1,200, but an increase of 47 over 1885, when the number was 1,112. In proportion to population, however, the increase was very small, the figures being 1 convict in every 4,223 persons in 1885 and 1 in 4,206 in 1887. Of the above number of convicts, 1,131 were males and 28 females, the latter of whom were all confined in Kingston Penitentiary.

The convicts were divided among the several penitentiaries as follows:—

	No.	Daily Average.
Kingston .....	554	572
St. Vincent de Paul.....	280	283
Dorchester.....	153	144
Manitoba.....	83	85
British Columbia.....	89	94

Value of penitentiaries, &c.

597. The value of the buildings and stock, etc., on hand on 30th June, 1887, of the several penitentiaries, together with the expenditure on each during the year then closed, are given below.

	Value of Buildings, Stock, etc.	Expenditure, including Salaries.
Kingston.....	\$1,281,305	\$107,788
St. Vincent de Paul.....	618,553	79,500
Dorchester .....	401,999	42,982
Manitoba.....	258,640	47,546
British Columbia.....	280,516	34,723
	<hr/>	<hr/>
	\$2,841,013	\$312,539
	<hr/>	<hr/>

598. There is a certain amount of revenue derived from prison labour and miscellaneous sources, which amounted in 1887 to \$19,863, thus reducing the actual expenditure to \$292,666. Assuming that the number 1,177 represents the average number of prisoners during the year, the total cost *per capita* will have been \$248.65. If, however, the value of the work performed by the convicts in and about the buildings is deducted, the cost *per capita* is still further reduced to \$191. Cost of prisoners.

599. The following punishments were awarded in the several prisons during the year:— Punishments inflicted 1887.

PUNISHMENTS FOR OFFENCES COMMITTED WITHIN PENITENTIARIES, 1887.

PENITENTIARY..	Deprived of Tobacco.	Dark Cells.	Solitary Cells.	Flogged.	Lost Re-mission.	Other Punishments.
Kingston .....	7	170	17	1	115	62
Dorchester.....	39	47	.....	.....	9	168
Manitoba.....	6	.....	2	1	31	163
British Columbia.....	7	.....	.....	.....	23	124
Total.....	59	217	19	2	178	517

“Other punishments” include bread and water, loss of supper, light, school, letters and books, and reprimands and admonitions. The Warden of St. Vincent de Paul Penitentiary made no returns of the punishments inflicted.

600. No information is available respecting the complete number of convicts, but the following table gives full particulars respecting those who were admitted in the years 1886 and 1887. Particulars of convicts, 1886 and 1887.

**PARTICULARS OF PERSONS ADMITTED INTO THE PENITENTIARIES

Proportion of females.

601. The proportion of women to the number of males admitted in 1886 was '03 per cent., and in 1887 '01

per cent. The proportion of criminals under 20 years of age to the total number was about the same in both years, viz., 18·63 per cent. in 1886 and 18·35 per cent. in 1887, and the percentage of Canadians in each year was 64·68 per cent. and 63·60 per cent., respectively. The labouring class furnished the largest number of prisoners in both years. The occupations of women are not given.

Ages of prisoners.

602. The number of deaths in 1886 was 18, and in 1887 17, being about 1½ per cent., which is said to be a very low average.

Deaths of prisoners.

603. The following table shows the number of persons confined in common gaols and prisons of the several Provinces in 1887. As the Provinces differ as to the dates to which their returns are made up, it has not been possible to give these particulars at a date common to all, but they have been brought as close together as possible. The figures for Nova Scotia and New Brunswick are by no means complete, answers to applications for information having been received from about half only of the whole number of counties; for as there is no official in either Province whose duty it is to collect these statistics, it was necessary to apply to the sheriff of each county. It is hoped that better success will be met with next year:—

Persons confined in county gaols.

PROVINCE.	No. of Gaols.	Date.	NO. CONFINED		Total.
			Male.	Female.	
Ontario.....	* 54	Sept. 30, 1887...	791	297	1,088
Quebec.....	22	Dec. 31, 1886...	297	131	428
Nova Scotia.....	13	June 30, 1887...	66	18	84
New Brunswick.....	6	Jan. 1, 1888...	30	12	42
Manitoba.....	3	June 30, 1887...	43	5	48
British Columbia.....	3	Oct. 31, 1887.....			158
Prince Edward Island.....	3	June 30, 1887...	15	2	17
<b>Total</b> .....	104		1,242	465	1,865

\* Including Central Prison and Mercer Reformatory, Toronto.

Assuming 30th June, 1887, for a common date, it will be seen that 1 in every 1,612 of the population was in prison at that time ; but these figures are below the mark.

---

CHAPTER XII.

BANKS AND SAVINGS BANKS.

Canadian  
currency.

604. The denominations of money in the currency of Canada were declared by the Act 34 Vic., chap. 4, to be dollars, cents and mills, there being 100 cents in a dollar and 10 mills in a cent. By the same Act the British sovereign, as then coined, was declared to be legal tender for \$4.86 $\frac{2}{3}$ .

Silver and  
gold coins

605. Silver coins struck, by order of Her Majesty for circulation in Canada, were declared to be legal tender to the amount of ten dollars, and copper coins, similarly struck, to the amount of twenty-five cents. The gold eagle of the United States was also declared to be legal tender for ten dollars, and multiples and halves of the same for proportionate sums.

Coins in  
circulation.

606. The coins in circulation in Canada are silver fifty, twenty-five, twenty, ten and five cent pieces, and bronze one cent pieces, all of which are struck in England. No twenty cent pieces have been coined for a considerable time, and they are gradually disappearing from circulation, Canada has no gold coinage of its own ; but, as stated above, British and American gold pieces pass current.

Paper  
currency.

607. The notes issued exclusively by the Government are of the denominations \$4, \$2, \$1, and twenty-five cents fractional paper currency, no bank in the Dominion being allowed to issue notes for a less sum than five dollars, or for any sum not being a multiple of five dollars.

608. The chartered and incorporated banks of the Dominion are regulated by the Bank Act, 34 Vic., chap. 5, and subsequent amending Acts, by which it is provided, amongst other things :

The Bank Acts and principal provisions.

That at least one hundred thousand dollars of capital shall be *bonâ fide* paid up, to the satisfaction of the Treasury Board, before any incorporated bank shall commence business.

Capital paid up.

The amount of notes issued for circulation by any bank shall never exceed the amount of its unimpaired capital, under a penalty varying with the amount of such excess.

Amount of notes for circulation.

Any bank when making payment is compelled, if requested, to pay the same or part thereof, not exceeding sixty dollars, in Dominion notes, for \$1, \$2 or \$4 each.

Part payment to be in Dominion notes.

The payments of notes issued by any bank for circulation shall be the first charge on its assets in case of insolvency.

Notes to be a first charge.

No dividends or bonus exceeding 8 per cent. per annum shall be paid by any bank, unless, after deducting all bad and doubtful debts, it has a reserve fund equal to at least twenty per cent. of its paid-up capital.

Limit to dividend.

Monthly returns, certified by the President and General Manager, shall be made by every bank to the Government, according to the form and under the penalty provided by the Acts.

Monthly returns.

Every bank shall, subject to a penalty, always hold at least half, if possible, of its cash revenues in Dominion notes, and never a less proportion than forty per cent.

Proportion of cash in Dominion notes.

No person, firm or company, other than a bank incorporated under the above Acts, may use the title of bank, banking company, banking house, banking association or banking institution, without adding the words "not incorporated."

Private Banks.

Number of incorporated banks.

609. There were forty-one incorporated banks that made returns to the Government on 30th June, 1888, distributed as follows: 13 in Ontario, 14 in Quebec, 9 in Nova Scotia, 3 in New Brunswick, and one each in Manitoba and British Columbia. The banks are assigned to the Provinces according to the situation of their head offices, but many of them have branches all over the Dominion.

Bank statement 1887 and 1888

610. The following is a comparative statement of the assets and liabilities of the various banks in Canada on the 30th June, 1887 and 1888:—

BANK STATEMENT, 30TH JUNE, 1887 AND 1888.

LIABILITIES.	1887.	1888.
	\$	\$
Capital paid up .....	60,815,356	60,168,010

Other Government securities.....	3,518,406	3,978,231
Loans to Dominion and Provincial Governments....	3,548,960	1,563,060
Loans or discounts for which collateral securities are held.....	11,688,123	11,436,96
Loans to municipal and other corporations.....	16,615,734	21,773,368
Loans to or deposits made in other banks.....	415,166	1,311,964
Discounts.....	138,263,340	137,409,009
Debts overdue, not secured.....	1,166,334	1,186,902
"    "    secured.....	1,623,795	1,368,342
Mortgages on real estate, and real estate held by the bank:.....	2,020,109	1,757,395
Bank premises.....	3,570,955	3,636,919
Other assets.....	2,848,566	4,177,568
<b>Total assets.....</b>	<b>229,241,464</b>	<b>244,975,333</b>

The proportion of liabilities to assets was larger in 1888, being 67·90 per cent., as compared with 65·17 per cent. in 1887, and 64·59 per cent. in 1886. The amount on deposit showed an increase of \$14,242,339, discounts a decrease of \$854,331, and overdue debts a decrease of \$376,670. Notes in circulation showed a small increase, viz., \$6,491.

611. The following statement shows the proportions of the principal items of assets and liabilities to the total amounts in the years 1868, 1877 and 1888:—

Proportions of assets and liabilities.

ASSETS AND LIABILITIES—PERCENTAGE OF PRINCIPAL ITEMS.

ITEMS.	1868.	1877.	1888.
	p. c.	p. c.	p. c.
<b>Liabilities—</b>			
Notes in circulation .....	18·99	19·22	18·30
Deposits .....	75·03	75·03	77·38
<b>Assets—</b>			
Specie and Dominion notes.....	11·40	8·29	7·16

1883...	61,404,554	32,211,945	107,148,664	145,296,836	226,803,491	64.06
1884...	61,443,397	29,654,511	106,594,253	140,973,233	223,855,601	63.97
1885...	61,821,158	29,692,803	104,656,566	138,510,300	217,264,655	63.75
1886...	61,841,395	29,200,627	112,991,764	147,547,682	228,422,353	64.99
1887...	60,815,356	30,438,152	114,483,190	149,413,632	229,241,464	65.18
1888...	60,168,010	30,444,643	128,725,529	166,344,852	244,975,223	67.90

Increase during the period.

614. The number of banks that made returns to the Government on 30th June, 1868, was 27, being 14 less than in 1888, and the following are the proportions of increase under the several heads, between those years:—Increase in amount of paid up capital, 98 per cent.; in notes in circulation, 266 per cent.; in amount on deposit, 292 per cent.; in liabilities, 280 per cent.; and in assets, 214 per cent. The proportion of liabilities to assets was higher in 1888 than in any other year, and was lowest in 1877.

Reserve fund.

615. The total amount of reserve held by the banks on the 30th June, 1888, was \$18,736,215. No returns of this fund were made previous to 1883, when an amendment to the Bank Act, requiring them, was passed.

616. Besides the suspension of the Central Bank and Bank of London during the year 1887-88, the Federal Bank, Toronto, went into voluntary liquidation. Suspensions 1887-1888.

617. The total amount of money on deposit on 30th June, 1887, in the Chartered Banks, Post Office and Government Savings Banks, Montreal and Quebec Savings Banks, and in the hands of Loan Companies, was \$183,756,329, equal to the sum of \$37.69 per head of population. Total amount on deposit.

618. The following table gives the share value, paid up capital, last six months' dividend, and highest and lowest quotations at Toronto in 1888, of the principal banks and loan companies in Canada. The prices quoted are taken from the statement published by the committee of the Toronto Stock Exchange :— Dividends and prices of principal stocks, 1888.

Business failures. 1888.

619. There were 1,668 failures in Canada during 1888, representing liabilities to the extent of \$13,974,787, divided among the Provinces as follow :—

	No.	Liabilities.
Ontario.....	915	\$6,704,343
Quebec.....	482	4,466,824
Nova Scotia.....	126	1,305,503
New Brunswick.....	66	741,691
Manitoba.....	52	478,945
British Columbia.....	19	128,803
Prince Edward Island.....	8	148,678
<b>Total.....</b>	<b>1,668</b>	<b>\$13,974,787</b>

Business failures. 1884-1888.

620. The following figures give the number of failures and extent of liabilities during the past five years :—

	No.	Liabilities.
1884.....	1,327	\$19,191,306
1885.....	1,256	8,861,609
1886.....	1,252	10,386,884
1887.....	1,366	16,070,595
1888.....	1,668	13,974,787
Average.....	1,374	\$13,697,036

It will be seen that though the number of failures was 202 in excess of the previous year, the amount involved was less by \$2,095,808, and that though the number was considerably above the average of five years, the amount of liabilities was only \$277,751 above the average.

621. The Post Office Act, which provided for the establishment of Post Office Savings Banks in Canada, was passed on the 20th December, 1867, and was limited in operation, as regards the Savings Banks, to the Provinces of Ontario and Quebec. Under its provisions a deposit must not be less than \$1, and must not exceed \$300 in any one year; neither must the total amount on deposit exceed \$1,000. On the 1st September, 1885, the system was extended to the Provinces of Nova Scotia and New Brunswick, and the offices are distributed in the several Provinces as follow: Ontario, 317; Quebec, 75; Nova Scotia, 22; New Brunswick, 14; Manitoba, 2; and British Columbia, 3.

622. Government Saving Banks, under the management of the Finance Department, have been established in the Maritime Provinces and in Manitoba and British Columbia, in which banks deposits are allowed to the extent of \$1,000. The number of offices under this system is 50, viz., 29 in Nova Scotia, 14 in New Brunswick, 2 in Prince Edward Island, 1 in Ontario, 1 in Manitoba, and 3 in British Columbia. Arrangements are now being made for the transfer of the Government Savings Banks in the last mentioned Province to the Post Office Department.

623. The rate of interest paid in both classes of savings banks is at present 4 per cent., but during the session of

Parliament in 1888 a Bill was passed enabling the Government to reduce this rate, if it appeared that the condition of the country required it.

Progress  
of the Post  
Office  
system.

624. The Post Office system went into operation on the 1st April, 1868, when 81 offices were opened; at the close of the three months ended 30th June, 1868, there were 2,102 depositors, 3,247 deposits had been made, and the amount on deposit was \$204,589. On the 30th June, 1888, there were 433 offices open, 101,693 depositors, 155,978 deposits had been made during the year, and the total amount on deposit was \$20,689,033. Almost the whole of this enormous increase has taken place during the last eight years, the amount on deposit on 30th June, 1879, having been only \$3,105,190, the average annual increase since that date having been \$1,953,760. The average amount of each deposit received has considerably decreased, having been \$49.51, or \$8.30 less than in 1887. The average amount to the credit of each account was \$203.44.

Depositors  
and de-  
posits by  
Provinces

625. The following table shows the number of depositors in each Province, the amount on deposit, and the proportion of that amount per head of population on 30th June, 1888:—

PROVINCE.	Number of Depositors.	Amount on Deposit.	Average Amount to each Depositor.	Average Amount per head of Population.
		\$	\$ cts.	\$ cts.
Ontario.....	83,063	16,288,124	196 09	7 52
Quebec.....	15,315	3,787,858	247 33	2 55
Nova Scotia.....	1,402	179,137	127 77	0 37
New Brunswick.....	1,062	202,829	191 00	0 58
Manitoba and North-West Ter- ritories.....	16	1,469	91 81	.....
British Columbia.....	835	229,615	275 00	1 08
Total.....	101,693	20,689,032	203 44	4 30

626. In the United Kingdom, in 1887, the amount on deposit in Post Office Savings Banks averaged \$7.05 per head of population. Deposits  
in United  
Kingdom.

627. It is generally admitted that the amount on deposit in the savings banks of the country is more or less an indication of the saving power of the people, and the increase in these deposits in Canada of late years has been very large. Signifi-  
cance of  
increase  
in Savings  
Banks  
deposits.  
Mr. Giffen, in his address before the British Association in September, 1887, the purport of which address was to show that in spite of the depression, England had made and was making material progress, said: "Another fact is the steady increase of savings banks deposits and depositors. These deposits are not, of course, the deposits of working classes only, so called. They include the smaller class of tradesmen, and the lower middle classes generally. But *quantum valeant*, the facts as to a growth of deposits and depositors should reflect the condition of the country generally, in much the same way as the returns of pauperism." If, then, the figures for this country are taken, relating to Post Office saving banks alone, it is found that between 1870 and 1877 the number of depositors increased from 12,178 to 24,074, an increase of 97 per cent., and the deposits from \$1,588,848 to \$2,639,937, an increase of 66 per cent.; while between 1878 and 1888 the number of depositors increased from 25,535 to 101,693, an increase of 298 per cent., and the deposits from \$2,754,484 to \$20,689,032, an increase of 651 per cent. "Whatever special explanations there may be, facts like these are at least not inconsistent with a fuller employment of the population in the last ten years than in the previous ten."

628. The balance of deposits is not now required, as formerly, to be invested in Canadian Government securities, but forms part of the unfunded debt of the Dominion. Disposal  
of balance

Transactions of the Post Office and Government Savings Banks 1887 and 1888 and of Loan Companies, 1887.

Loan companies.

630. Thirty-three companies made returns in 1874 and 74 in 1887. 63 of which were in Ontario, 9 in Quebec, 1 in

Nova Scotia and 1 in Manitoba. The increase in the number of companies and in the business done has been very large, the companies having increased 124 per cent., the capital paid up 299 per cent., and the total loans 485 per cent. The total authorized capital, as far as the returns showed, was \$102,700,583, of which \$75,768,750, or 73 per cent., was subscribed, and 32,125,009, or 31 per cent., paid up. The returns were partially defective, the companies in New Brunswick making no returns at all, and the company in Nova Scotia only imperfect ones.

---

### CHAPTER XIII.

#### DOMINION LANDS.

631. The area of land taken up for homesteads during 1888 was largely in excess of that of the previous year, and the number of acres sold was also considerably more than in 1887, while there was a decided decrease in the number of acres pre-empted, showing pretty conclusively that settlers are becoming more firmly convinced that 160 acres is as large an area as the average farmer can profitably work. The following are the comparative figures for the two years:—

	1887.	1888.
Homesteads .....	319,500 acres.	420,333 acres.
Pre-emptions .....	87,747 “	70,521 “
Sales.....	114,544 “	197,140 “

Area of land taken up, 1888.

632. The proportion of land taken up for homesteads to the total number of persons reported to have settled in Manitoba and the North-West was about the same as in 1887, from which it is satisfactory to see that incoming settlers continue to realize the advisability of acquiring some experience of the modes of agriculture suitable to the

Proportion of area to number of settlers.

country, before taking up land. "There is much in the soil and climate of Manitoba and the North-West that requires to be studied by the newly arrived agriculturist, even assuming his former experience to have fitted him in every respect for the pursuit of his calling, and it would be to his personal interest that he should acquire a little practical knowledge of the country and its methods of farming before finally taking up land on his own account."\*

Transactions in Dominion lands 1872-1888.

633. The following table gives particulars of the transactions in Dominion lands in each year from 1872 to 31st October, 1888, that being the end of the year in this Department, except in financial matters :—

YEAR.	AREA.			
	Homesteads.	Pre-emptions.	Sales.	Total.
	Acres.	Acres.	Acres.	Acres.
1872 .....	40,000	1,600	15,200	56,800
1873 .....	136,640	2,400	16,620	155,660
1874 .....	215,520	101,461	17,713	334,694
1875 .....	84,480	67,314	4,908	156,702
1876 .....	52,960	40,406	39,562	132,928
1877 .....	145,280	107,715	170,989	423,984
1878 .....	308,640	275,240	125,380	709,260
1879 (Oct. 31st) .....	555,296	270,178	271,343	1,096,817
1880 ..	280,640	140,790	260,797	682,227
1881 ..	438,707	263,647	355,166	1,057,520
1882 ..	1,181,652	904,211	613,282	2,699,145
1883 ..	970,719	659,120	202,143	1,831,982
1884 ..	533,280	364,060	213,172	1,110,512
1885 ..	239,552	106,213	126,049	481,814
1886 ..	294,960	146,480	133,701	575,141
1887 ..	319,500	87,747	114,544	521,791
1888 ..	420,333	70,521	197,140	678,994

It will be seen that the figures for homesteads and sales were larger than in any year since 1884, showing that

\* Report of the Minister of the Interior, 1887.

the effects of the disturbances in 1885 have now passed away. Since the beginning of 1872, therefore, the total number of acres disposed of has been 12,705,971, of which 6,228,159-acres were homesteads, 3,609,103 pre-emptions and 2,877,709 sales.

634. The next table gives the total amount of pre-emption and homestead fees, and proceeds of sales received in each year from 1st July, 1872, to 30th June, 1888 :—

Receipts from fees and sales 1873-1888.

PRE-EMPTION AND HOMESTEAD FEES AND PROCEEDS FROM SALES, 1873-1888.

YEAR ENDED 30TH JUNE,	Homestead and Pre-emption Fees.	Ordinary Sales.		Sales to Colonizati'n Companies.	Total.
		Cash.	Scrip.	Cash.	
	\$	\$	\$	\$	\$
1873.....	6,970	21,616			28,586
1874.....	8,290	17,697			25,987
1875.....	11,570	13,591			25,161
1876.....	4,700	3,704	320		8,724
1877.....	5,620	1,069	136,955		143,645
1878.....	15,370	2,682	120,159		138,211
1879.....	36,026	8,188	210,904		256,119
1880.....	32,358	41,768	81,683		155,812
1881.....	30,682	62,940	70,828		164,451
1882.....	94,228	1,228,424	50,590	354,036	1,727,280
1883.....	127,740	516,092	33,638	248,492	923,962
1884.....	70,390	423,113	40,919	253,713	788,136
1885.....	42,745	198,759	45,875	1,214	288,594
1886.....	40,481	76,140	204,658		321,279
1887.....	26,502	48,176	337,640		412,318
1888.....	28,521	62,238	313,523	10,000	404,282

The total revenue from 1st July, 1887, to 30th June, 1888, including timber, minerals, &c., amounted to \$540,606.

635 There was a total decrease in 1888 of \$8,036, owing to a reduction in the amount of scrip redeemed, but there was an increase in fees and cash for sales, the receipts from pre-emptions being doubtless small, on account of the extension of time granted within which to make payment.

Decrease in 1888.

Entries cancelled. 636. The number of entries cancelled has been steadily decreasing; in 1874 63 per cent. of the homestead and 93 per cent. of the pre-emption entries were cancelled; in 1888 there were no cancellations. The number of patents issued was 3,275, as compared with 4,599 in the preceding year, and the number cancelled was 34. The decrease in the number of patents issued is owing to the fact that under the Territories Real Property Act notifications to the proper officials, by the Minister of the Interior, that certain lands have been granted to any railway company or to the Hudson's Bay Company shall be equivalent to letters patent.

Patents issued.

Rocky Mountains Park. Banff. N.W.T. 637. A large tract of land enclosing the hot mineral springs at Banff, N.W.T., was reserved and set apart for a National Park, under an Order in Council passed 25th November, 1885. It is known as Rocky Mountains Park. Eighteen miles of road were made in the Park during 1887 and 1888, and other work done covering about 7 miles more. The improvements made in the Cave and Basin have given great satisfaction, and the receipts from fees for bathing therein amounted to \$976. There are also now several other bath houses, the rental from which amounted to \$640. The total number of visitors, a great proportion of whom were Canadians, was about 5,822.

Other park reservations.

638. Four other park reservations have been made in the Rocky Mountains, under an Order in Council passed 10th October, 1886.

Canadian Agricultural Coal and Colonization Company.

639. An important experiment is being tried by the Canadian Agricultural Coal and Colonization Company, who have purchased ten separate tracts of 10,000 acres each, at ten different points along the line of the Canadian Pacific Railway, and have also purchased the lease and stock of the Powder River Ranche Company, which covers an area of

80,000 acres, and includes 8,000 head of cattle. The object of the company is, besides the cultivation of the land, the raising of horses, cattle, sheep and pigs. The outlay by the company so far has been \$780,000.

640. The total area set out for settlement since 1873 is as follows :—

	Acres.	No. of Farms of 160 acres each.	Area set out for settle- ment.
Previous to June, 1873.....	4,792,292	29,952	
In 1874.....	4,237,864	26,487	
1875.....	665,000	4,156	
1876.....	420,507	2,628	
1877.....	231,691	1,448	
1878.....	306,936	1,918	
1879.....	1,130,482	7,066	
1880.....	4,472,000	27,950	
1881.....	9,147,000	50,919	
1882.....	9,460,000	55,125	
1883.....	27,000,000	168,750	
1884.....	6,400,000	40,000	
1885.....	391,680	2,448	
1886.....	1,379,010	8,620	
1887.....	643,710	4,023	
1888.....	1,131,840	7,074	
<b>Total.....</b>	<b>71,810,012</b>	<b>438,564</b>	

At the rate of five souls to a homestead, these lands would sustain an agricultural population of 2,192,820.

641. The total revenue of the Department of the Interior for the year ended 31st October, 1888, was :—

Gross revenue in cash.....	\$241,867
Scip redeemed and warrants located.....	387,583
<b>Total.....</b>	<b>\$629,450</b>
<b>Total in 1887.....</b>	<b>429,819</b>
<b>Increase in 1888.....</b>	<b>\$199,631</b>

Total receipts. 642. The total receipts on account of the Dominion lands under the various heads to 31st October, 1888, are as follow :

Homestead fees.....	\$ 410,335
Pre-emption.....	190,014
Sales, cash.....	3,297,854
Timber, grazing and mineral.....	876,393
Colonization.....	883,456
Miscellaneous.....	239,862
	<hr/>
	\$5,897,914
	<hr/>

Survey of Yukon District. 643. An important survey of the Yukon District was completed in 1888 by Mr. Wm. Ogilvie, who had been absent nearly two years, his principal object being to ascertain the true position of the international boundary. His report will shortly be published.

Immigration of crofters into Manitoba. 644. A number of crofters emigrated from the West Highlands and islands of Scotland in the spring of 1888, and settled near Pelican Lake, in Manitoba. When visited in September last they were found to be generally satisfied with the locality and with the prospects.

Sale of school lands in N.W.T. 645. No general sale of school lands has yet been held in the Territories, but upon the recommendation of the Board of Education for the Territories a section situate in the anthracite coal region was put up for sale in March, 1888, at an upset price of \$20 per acre, and realized \$30,496, the price ranging from \$70.50 per acre to \$20.05 per acre.

Cheese factory in N.W.T. 646. One cheese factory and two creameries were erected, during 1888, in the section lying along the eastern foot hills of the Rocky Mountains, being the first of their kind in that part of the country.

Dominion Lands Regulations. 647. Under the Dominion Lands Regulations all surveyed even-numbered sections, excepting 8 and 26, in Manitoba and the North-West Territories, which have not been home-

steaded, reserved to provide wood lots for settlers or otherwise disposed of or reserved, are to be held exclusively for homesteads and pre-emptions.

648. Homestead entry for one quarter-section (160 acres) of surveyed agricultural land, open to such entry, may be obtained by any person who is the sole head of a family, or by any male who has attained the age of 18 years, on application to the Local Agent of Dominion Lands, and on payment of an office fee of \$10. Condi-  
tions of  
home-  
stead  
entry.

At the time of making entry the homesteader must declare under which of the three following provisions he elects to hold his land, and on making application for patent must prove that he has fulfilled the conditions named therein.

1. The homesteader shall begin actual residence on his homestead and cultivation of a reasonable portion thereof within six months from date of entry, unless entry shall have been made on or after the first day of September, in which case residence need not commence until the first day of June following, and continue to live upon and cultivate the land for at least six months out of every twelve months for three years from date of homestead entry.

2. The homesteader shall begin actual residence, as above, within a radius of two miles of his homestead, and continue to make his home within such radius for at least six months out of every twelve months for the three years next succeeding the date of homestead entry; and shall, within the first year from date of entry, break and prepare for crop ten acres of his homestead quarter section; and shall within the second year crop the said ten acres, and break and prepare for crop fifteen acres additional—making twenty-five acres; and within the third year after the date of his homestead

entry, he shall crop the said twenty-five acres, and break and prepare for crop fifteen acres additional, so that within three years of the date of his homestead entry he shall have not less than twenty-five acres cropped, and fifteen acres in addition broken and prepared for crop, and shall have erected on the land a habitable house in which he shall have lived during the three months next preceding his application for homestead patent.

3. The homesteader shall perfect his homestead entry by commencing the cultivation of the homestead within six months after the date of entry, or if the entry was obtained on or after the first day of September in any year, before the first day of June following, shall, within the first year after the date of his homestead entry, break and prepare for crop not less than five acres of his homestead; shall, within the second year, crop the said five acres, and break and prepare for crop not less than ten acres in addition, making not less than fifteen acres in all; shall erect a habitable house upon his homestead before the expiration of the second year after his homestead entry, and before the commencement of the third year, shall *bonâ fide* reside therein, and cultivate the land for three years next prior to the date of his application for his patent.

In the event of a homesteader desiring to secure his patent within a shorter period than the three years provided by law, he will be permitted to purchase his homestead at the Government price at the time, on furnishing proof that he has resided on the land for at least twelve months from the date of his perfecting his homestead entry, and that he has brought at least 30 acres thereof under cultivation.

Any homesteader may at the same time as he makes his homestead entry, but not at a later date, should there be available land adjoining the homestead, enter an additional

quarter-section of land as a pre-emption, on payment of an office fee of \$10.

649 The pre-emption right entitles the homesteader, who obtains entry for a pre-emption, to purchase the land so pre-empted on becoming entitled to his homestead patent ; but should the homesteader fail to fulfil the homestead conditions, or to pay for such pre-emption within six months after he becomes entitled to claim a patent for his homestead, he forfeits all claim to his pre-emption. Pre-emp-  
tions.

650. Every assignment or transfer of homestead or pre-emption right, made before the issue of the patent, is null and void, except in cases where any person or company is desirous of assisting intending settlers, when, the sanction of the Minister to the advance having been obtained, the settler has power to create a charge upon his homestead for a sum not exceeding six hundred dollars, and interest not exceeding eight per cent. per annum, provided that particulars of how such an advance has been expended for his benefit, be first furnished to the settler, or if the charge be made previous to the advance, then such charge shall only operate to the extent certified to by the local agent as having been actually advanced to the settler. One half of the advance shall be laid out in the erection of buildings on the homestead. Power to  
create a  
charge on  
home-  
stead for  
advances.

651. The price of pre-emption, not included in town site reserves, is \$2.50 an acre. Where land is north of the northerly limit of the land grant, along the main line of the Canadian Pacific Railway, and is not within twenty-four miles of any branch of that railway, or twelve miles of any other railway, pre-emptions may be obtained for \$2 per acre. Price of  
pre-emp-  
tions.

652. Payments for land may be in cash, scrip, or police or military bounty warrants. Pay-  
ments.

**Licenses to cut timber for domestic use.** 653. Homestead settlers, whose land is destitute of timber, may, upon payment of an office fee of 50 cents, procure from the Crown timber agent a permit to cut the following quantities of timber free of dues: 30 cords of dry wood, 1,800 lineal feet of building timber, 2,000 poplar fence rails and 400 roof poles.

**Or purchase a wood lot.** In cases where there is timbered land in the vicinity available for the purpose, the homestead settler, whose land is without timber, may purchase a wood lot, not exceeding in area twenty acres, at the price of \$5 per acre cash.

**Timber licenses** 654. Licenses to cut timber on surveyed or unsurveyed lands are granted after competition to the highest tenderer.

**Coal districts.** 655. Coal districts have been set apart as follows:—

1. On the Souris River, south of Moose Mountain.
2. On the South Saskatchewan River, near Medicine Hat.
3. On the North Saskatchewan River, near Edmonton.
4. On the Bow River.
5. On the Belly River.
6. On the Cascade River.
7. Wood Mountain.

The price per acre is, for land containing lignite or bituminous coal, \$10, and for anthracite coal, \$20.

When two or more parties apply to purchase the same land, tenders will be invited.

**Leases of grazing lands.** 656. Leases of grazing lands in Manitoba and the North-West Territories can be granted only after public competition, except in the case of actual settlers, to whom may be leased, without public competition, tracts of land not to exceed four sections and to be contiguous to the settler's homestead. Leases shall be for a period of not exceeding twenty-one years, and no single lease shall cover a greater area than 100,000 acres.

The lessee is obliged, within each of the three years from the date of granting the lease, to place upon his lease-hold

not less than one-third of the whole amount of the stock which he is required to place upon the tract leased, namely, one head of cattle for every twenty acres of land embraced by the lease, and shall, during the rest of the term, maintain cattle thereon in that proportion.

After placing the prescribed number of cattle upon his leasehold, the lessee may purchase land, within the tract leased, for a home, farm and corral.

Any portion of the lands forming a grazing tract authorized to be leased subsequent to the 12th January, 1886, unless otherwise provided in any lease thereof, are open for homestead and pre-emption and to purchase from Government at \$2.50 per acre cash; and in the event of such settlement or sale, the lease (if any) to be void in respect of such lands so entered or purchased.

657. Any person may explore vacant Dominion lands not appropriated or reserved by Government for other purposes, and may search therein, either by surface or subterranean prospecting, for mineral deposits, with a view to obtaining a mining location for the same, but no mining location shall be granted, until the discovery of the vein, lode or deposit of mineral or metal within the limits of the location or claim. Mining locations.

On discovering a mineral deposit, any person may obtain a mining location, upon marking out his location on the ground, in accordance with the regulations in that behalf, and filing with the agent of Dominion lands for the district, within sixty days from discovery, an affidavit in form prescribed by mining regulations, and paying at the same time an office fee of \$5, which will entitle the person so recording his claim to enter on the land and work it for one year.

and the first Militia Act was passed in 1868, 31 Vic, chap. 40. This Act was subsequently amended in various ways, but is practically embodied in the present Consolidated Militia Act, 46 Vic., chap. 2, passed 25th May, 1883. By it the militia of Canada is declared to consist of all the male inhabitants of Canada of the age of 18 years or upwards and under sixty, not exempted or disqualified by law, this population being divided into four classes, as follow :—

The  
Militia  
Act.

Who con-  
stitute the  
Militia.

The first class comprises those aged 18 or upwards and under 30, being unmarried or widowers without children.

The second class comprises those between the ages of 30 and 45, being unmarried or widowers without children.

The third class comprises those between 18 and 45, being married or widowers with children.

The fourth class comprises those between 45 and 60.

661. The following persons are exempt from enrolment and actual service at any time: Judges, clergymen and ministers of all religious denominations, professors in colleges and teachers in religious orders, the wardens and officials of all penitentiaries and lunatic asylums, persons physically disabled, and any person being the only son of a widow and her only support. Certain other persons are exempt from service except in case of war.

Persons  
exempt  
from ser-  
vice.

662. The number of men to be trained and drilled annually is limited to forty five thousand, except as specially authorized, and the period of drill is to be sixteen days and not less than eight days each year.

Number of  
men and  
period of  
drill.

663. The militia is divided into active and reserve land and marine force. The active land and marine force is

Active  
and re-  
serve  
Militia.

composed of men raised either by voluntary enlistment or ballot, and the reserve force consists of the whole of the men not serving in the active militia of the time being.

Period of service.

664. The period of service is three years.

Military Districts.

665. The Dominion is divided into twelve military districts, in each of which a permanent military staff is maintained, under the command of a Deputy Adjutant General.

Permanent corps.

666. The permanent corps and schools of instruction consist of "A" troop of Cavalry at Quebec, "A," "B" and "C" Batteries, Schools of Artillery at Kingston, Quebec and Victoria, B.C.; "A," "B," "C" and "D" Infantry School Corps, at Fredricton, N.B., St. Johns, Q., Toronto and London, Ont., and a School of Mounted Infantry at Winnipeg. The total strength of these permanent corps is limited to 1,000 men. The present strength is 1,015 men, including officers.

Royal Military College.

667. The Royal Military College at Kingston, which is under the control of the Militia Department, was founded in 1875, and has proved a most successful institution. The present number of cadets is 80, which number is likely to be shortly increased to 96. The total number of cadets who have joined has been 254, of whom 129 have graduated and 69 have been gazetted to commissions in the Imperial army. Besides the four commissions annually offered by the Imperial Government, six others were offered during the year, proving that the Imperial Government is fully satisfied with those graduates who have already obtained commissions in the service. Five cadets received commissions in the Royal Engineers, three in the Royal Artillery, one in the Cavalry, and one in the Infantry.

Strength of the Active Militia, 1888.

668. The following is a statement of the numbers of the Active Militia, showing the strength of the different arms of the service :

MILITIA AND DEFENCE.

Totals, 31st Dec., 1888..		1,987	1,440	2,362	179	31,506		37,474

There was a decrease in the total number of men of 678, as compared with 1887. The number of troops, batteries and companies was : troops, 43 ; batteries, 61½ ; companies, 637½ ; and engineers, 3, making a total of 745.

669. The total ordinary expenditure amounted to \$1,273,178, and the special expenditure, in consequence of the rebellion in 1885, to \$40,223. The following is a summary of the expenditure by the Department of Militia in 1888 :—

MILITIA EXPENDITURE, 1888.

Salaries, district staff.....	\$ 24,100
Brigade majors.....	12,216
Royal Military College.....	55,411
Ammunition, clothing and military stores.....	189,419
Public armouries.....	62,970
Drill pay and camp purposes.....	281,734
Drill instruction.....	37,025
Dominion Rifle Association.....	10,000
Drill sheds and rifle ranges.....	13,824

Militia expenditure 1888.

Construction and repairs.....	84,612
Barracks in British Columbia.....	8,946
Care of military properties.....	12,437
Grant to Dominion Artillery Association.....	2,000
A, B and C Batteries.....	} 431,983
Cavalry and Infantry Schools.....	
Contingencies .....	46,501
<hr/>	
Total ordinary militia service.....	\$1,273,178
North-West service (Rebellion 1885) .....	40,233
<hr/>	
Total expenditure.....	\$1,313,401

Militia revenue. 670. The Militia revenue for 1888 amounted to \$20,719, made up as follows:—

Ammunition, sale of.....	\$ 933
Military stores " .....	2,778
Clothing " .....	1,074
Miscellaneous stores, sale of.....	253
Military properties, rent of.....	4,681
<hr/>	
Total.....	\$20,719

Militia pensions. 671. The sums paid for militia pensions amounted to \$35,869, as follow:—

Pensioners.	Number.	Amount.
Pensioners, 1812-1815.....	204	\$ 8,490
" Fenian raids.....	23	4,964
" Rebellion, 1885.....	128	22,415
	<hr/>	<hr/>
	355	35,869

Gratuities. 672. In addition to the gratuities reported as having been paid in 1887, an additional amount of \$4,231 has been paid to eight applicants, making a total of \$68,332 paid in this way to 238 persons.

## CHAPTER XV.

## INSURANCE.

## PART I—FIRE INSURANCE.

673 During the year 1887 the business of fire insurance in Canada was carried on by 32 active companies; of these 6 were Canadian, 21 British and 5 American. Inland Marine and Ocean Marine Insurance were also transacted by 5 of them (3 Canadian and 2 American). This list of companies differs from that of the previous year by the addition of 2 British companies, the Atlas Assurance Company and the Employer's Liability Assurance Corporation (Limited), the latter for the transaction of fire re-assurance and the former for the transaction of fire insurance generally.

Fire Insurance companies in 1887.

674. The cash received for premiums during the year, in Canada, amounted to \$5,244,502, being greater than that received in 1886 by \$312,167; and the amount paid for losses was \$3,403,514, exceeding that paid in 1886 by \$102,126. The ratio of losses paid to premiums received is shown in the following table:—

Premiums received and losses paid 1887.

FIRE INSURANCE IN CANADA, 1887.

COMPANIES.	Paid for Losses.	Received for Premiums.	Percentage of Losses to Premiums.	
			1887.	1886.
	\$	\$		
Canadian Companies.....	764,321	1,121,445	68.16	66.75
British ".....	2,335,034	3,693,992	63.21	68.19
American ".....	304,159	429,075	70.89	56.59
<b>Total .....</b>	<b>3,403,514</b>	<b>5,244,502</b>	<b>64.90</b>	<b>66.93</b>

675. The following table shows the amount received for premiums, and paid for losses, as well as the percentage of losses to premiums, in every year from 1869:—

Premiums received and losses paid 1869-1887.

## PREMIUMS RECEIVED AND LOSSES PAID IN CANADA, 1869-1887.

YEAR ENDED 31ST DECEMBER.	Premiums received.	Losses paid.	Percentage of Losses to Premiums.
	\$	\$	
1869.....	1,785,539	1,027,720	57.56
1870.....	1,916,779	1,624,837	84.77
1871.....	2,321,716	1,549,199	66.73
1872.....	2,628,710	1,909,975	72.66

Business done by British companies.

678. The business done by the British fire companies resulted in a balance in their favour of \$359,243, being an increase of \$122,027, as compared with 1886, as shown by the following statement :—

	1886.	1887.
Paid for losses.....	\$2,347,433	\$2,335,032
"    general expenses.....	872,595	999,715
Total.....	<u>\$3,220,028</u>	<u>\$3,334,747</u>
Received from premiums.....	3,457,244	3,693,990
Balance in favour .....	<u>\$ 237,216</u>	<u>\$ 359,243</u>

The adverse balance, which has been in existence every year since 1877, when occurred the disastrous fire at St. John, N. B., when the losses paid by British companies amounted to four and one-half millions, has been at last reversed, there being a favourable balance for the period, at the close of 1887, of \$341,938.

By American companies.

679 The following is a comparative statement of the business done by American companies in 1886 and 1887:—

	1886.	1887.
Paid for losses.....	\$239,310	\$325,160
"    general expenses.....	97,438	116,531
Total.....	<u>\$336,748</u>	<u>\$441,691</u>
Received for premiums.....	427,844	411,642
Balance.....	<u>\$91,086</u>	<u>—\$ 59</u>

By Canadian companies.

680. A similar comparative statement of the business done by Canadian companies is found below :—

	1886.	1887.
Paid for losses.....	\$2,128,943	\$2,397,362
"    general expenses...	926,299	1,031,697
"    dividends.....	114,809	123,423
Total.....	<u>\$3,170,051</u>	<u>\$3,552,502</u>
Received for premiums.....	3,090,851	3,346,969
"    from other sources	139,223	152,921
Total.....	<u>3,230,074</u>	<u>3,479,890</u>
Balance.....	<u>+ \$60,023</u>	<u>—\$72,612</u>

681. For every \$100 received for premiums the payments by British and American companies therefore were as follow :—

Proportion of payments to receipts by British and American companies.

COMPANIES.	For Losses.		For Expenses.		Balance for Companies.	
	1886.	1887.	1886.	1887.	1886.	1887.
	\$	\$	\$	\$	\$	\$
British .....	67 90	63 21	25 24	27 06	6 86	9 73
American.....	55 93	63 73	22 77	26 39	21 30	9 88

The business, it will be seen, was more favourable in 1887 for British Companies, but not so much so for American ones.

682. For every \$100 received for income by Canadian companies the payments were :—

By Canadian companies.

CANADIAN COMPANIES.	For Losses.		For Expenses.		For Dividends.	
	1886.	1887.	1886.	1887.	1886.	1887.
	\$	\$	\$	\$	\$	\$
For every \$100 of income.....	65 91	68 89	28 68	29 64	3 55	3 55
“ “ premium..	68 88	71 63	29 97	30 82	3 71	3 69

Their total cash income in 1886 was \$3,230,074, and in 1887 \$3,479,890, and their cash expenditure was in the same years \$3,170,051 and \$3,552,502 respectively.

683. The Inland Marine insurance business was much less favourable than that of the preceding year, the losses incurred having been 73·84 per cent. of the premiums received, as against 68·54 per cent. in 1886.

Inland marine insurance.

684. The Ocean business was equally unfavourable, the proportion of losses to premiums having been 100·41 and 82·43 per cent. in 1887 and 1886 respectively.

Ocean marine insurance.

685. The following figures show the total business of both inland and ocean marine insurance in 1887:—

Premiums received.....	\$705,963
Losses incurred.....	609,472
" paid.....	\$514,227
" " for previous years.....	78,635
	Total losses paid during year.....
	592,862
	Losses outstanding.....
	100,358
	=====

Amounts  
at risk  
1869:1887.

686. The total amounts at risk against fire in each year, from 1869, are given in the next table. When it is considered that the very large increase in the amount, upwards of \$400,000,000, represents a proportionate increase in the value of property and in the wealth of the people, it must be admitted that the progress made during the period has been considerable:—

FIRE INSURANCE IN CANADA—AMOUNTS AT RISK, 1869 TO 1887.

YEAR ENDED 31ST DECEMBER.	Fire Insurance.	YEAR ENDED 31ST DECEMBER.	Fire Insurance.
	\$		\$
1869.....	188,359,809	1879.....	407,357,985

1878.....	409,899,701		

PART II.—THE INSURANCE.

Number  
of life in-  
surance  
com-  
panies.

687. There were 29 companies transacting a life insurance business in Canada in 1886, viz., 11 Canadian, 10 British and 8 American. One new license was issued during the year, to the Manufacturers' Life Insurance Company.

688. The value of the insurances effected during the year was \$38,008,310, being an increase of \$2,836,962. The business was divided among the several companies in 1886 and 1887, as follows:—

	1886.	1887.
Canadian companies .....	\$19,289,694	\$23,505,549
British " .....	4,054,279	3,067,040
American " .....	11,827,375	11,435,721
	<u>\$35,171,348</u>	<u>\$38,008,310</u>

Life insurance during 1887.

689. The Canadian companies do a larger share of the business than all the other companies combined, their share in 1886 having been 54.84 per cent., and in 1887 61.84 per cent.

Proportion of Canadian Companies business to total.

690. The following table shows the amount of life insurances effected in each year from 1869 to 1887, inclusive:

Life insurance 1869-1887.

1885 .....	14,881,695	3,950,647	8,332,646	27,164,988
1886 .....	19,289,694	4,054,279	11,827,375	35,171,348
1887 .....	23,505,549	3,067,040	11,435,721	38,008,310

• Imperfect.

Increase during the last three years.

691. The increase in the total amount of insurance in force in 1886 over 1885, and in 1887 over 1886, was very large, amounting to the sums of \$21,858,550 and \$20,378,574, respectively, as shown by the following figures:—

LIFE INSURANCE IN FORCE IN CANADA—1885, 1886 AND 1887.

COMPANIES.	Insurance in Force.		
	1885.	1886.	1887.
	\$	\$	\$
Canadian.....	74,591,139	88,181,859	101,796,754
British.....	25,930,272	27,225,607	28,163,329
American.....	49,440,735	55,908,230	61,734,187
Total.....	149,962,146	171,315,696	191,694,270

Canadian companies share of increase.

692. The Canadian companies' share of the increase in 1885 over 1884 was 55.63 per cent.; of that of 1886 over 1885, 63.64 per cent., and of that in 1887 over 1886, 66.81 per cent.

Insurance a means of estimating progress in wealth

693. The amounts at risk for both fire and life insurance are often used for the purpose of estimating the wealth and progress of a nation, and the amount at risk for life insurance may be more particularly used to indicate the progress made, not only in wealth, but in what may be called surplus wealth. Fire insurance is to a large extent looked upon as a business expense, which must be incurred as necessarily as rent, salaries, &c., and which is therefore paid out of the gross receipts. But with life insurance, people far more generally insure in proportion to their ability to pay the premiums; not until after everything else is paid, and there is a surplus, is the question of life insurance considered. Life insurance, therefore, being generally paid out of surplus earnings of the people, the following figures indicate the very large increase in their premium-paying power during

the last few years, and consequent improvement in their condition:—

## LIFE INSURANCE IN CANADA.—AMOUNT AT RISK, 1869-1887.

Year ended 31st December.	Life Insurance.
1869.....	\$35,680,082
1870.....	42,694,712
1871.....	45,825,935

1881 .....	46,041,591	20,983,092	36,266,249	103,290,932
1882 .....	53,855,051	22,329,368	38,857,629	115,042,048
1883 .....	59,213,609	23,511,712	41,471,554	124,196,875
1884 .....	66,519,958	24,317,172	44,616,596	135,453,726
1885 .....	74,591,139	25,930,372	49,440,735	149,962,146
1886 .....	88,181,859	27,225,607	55,908,230	171,315,696
1887 .....	101,796,754	28,163,329	61,734,187	191,694,270

Average amount of policies in force, 1887

695. The average amount of policies in force in 1887 was \$1,763. As shown by the next table, this amount was larger than in either of the two preceding years, which was \$1,663 and \$1,741, respectively:—

## AVERAGE AMOUNT OF POLICIES IN FORCE IN CANADA, 1887.

COMPANIES.	POLICIES.		
	Number.	Amount.	Average Amount.
		\$	\$
Canadian .....	59,829	101,566,100	1,696
British .....	13,838	28,163,329	2,035
American.....	34,440	60,878,367	1,768
Total .....	108,107	190,607,796	1,763

The average amount of the new policies was, for Canadian companies, \$1,843; for British companies, \$1,943,

and for American, \$2,085, the corresponding amounts for 1886 having been \$1,807, \$2,192, and \$2,167.

696. There was an increase of \$279,856 in the amount of insurance terminated naturally, *i. e.*, by death, maturity or expiration, in 1887, as compared with 1886, the amount last year having been \$2,445,521; and an increase of \$2,102,176 in the amount terminated by surrender and lapse, the total amount so terminated having been \$14,044,968. Increase in insurance terminated.

697. The death rate was very much lower than in 1886, and was below the average of the last eight years, as shown below:— Death rate 1880-1887.

INSURANCE DEATH RATE IN CANADA, 1880 TO 1887.

YEAR ENDED 31ST DECEMBER,	Number of Lives at Risk	Number of Deaths.	Death Rate per 1,000.
1880.....	33,557	278	8·284
1881.....	38,115	309	8·107

1887 .....	2,825,119	890,282	2,285,954	6,001,405
<b>Total.....</b>	<b>20,937,445</b>	<b>12,229,613</b>	<b>25,736,342</b>	<b>58,903,400</b>

Payments to policy holders 1886 and 1887.

699. The total amount paid to policyholders during 1886 and 1887 was:—

	1886.	1887.
Death claims (including bonus additions) ..	\$1,744,268	\$1,903,179
Matured endowment " " ..	226,024	267,795
Annuity holders .....	6,800	6,743
Paid for surrendered policies .....	174,631	287,089
Dividends to policyholders .....	700,258	770,399
	<u>\$2,851,981</u>	<u>\$3,235,305</u>

The amount received for premiums was \$6,001,405, therefore for every \$100 of premium \$52.99 was paid to policyholders, and \$47.01 carried to expense, profits and

reserve; in the preceding year the proportions were \$54.15 and \$45.85, respectively.

700. The average rate of premiums received for every \$100 of current risk was in 1886 \$3.22, and in 1887 \$3.28, and of claims paid \$1.22 and \$1.19. Average rate of premiums.

701. The following tables give the condition of the Canadian companies in 1887, showing their assets and liabilities, income and expenditure:— Financial position of Canadian companies 1887.

## CANADIAN LIFE COMPANIES, 1887.

Receipts.  
1886 and  
1887.

702. The receipts from income in 1886 and 1887 were respectively made as follows :—

INSURANCE.

429

	1886.	1887.	Expenditure 1886 and 1887.
Premiums and annuity sales.....	\$2,482,113	\$2,922,526	
Interest and dividends.....	628,558	652,407	
Sundry.....	43,989	116,073	
<b>Total.....</b>	<b>\$3,154,660</b>	<b>\$3,691,006</b>	

And the expenditure during the same year was :—

	1886.	1887.
Paid to policyholders and annuitants.....	\$1,316,174	\$1,405,686
General expenses.....	639,938	736,846
Dividends to stockholders.....	109,450	70,202
<b>Total.....</b>	<b>\$2,085,563</b>	<b>\$2,212,734</b>

703. From the above figures, therefore, it appears that out of every \$100 of income received the companies expended :— Proportion of payments to income.

	1886.	1887.
	\$ cts.	\$ cts.
Paid to policyholders.....	41 72	38 08
General expenses.....	20 93	19 96
Dividends to stockholders.....	3 47	1 90
Reserve.....	33 89	40 06

704. Four companies did business on the assessment plan in 1887, three Canadian and one American, having at the end of the year \$25,255.613 in force. The amount of policies taken during the year was \$7,860,000. The amount of insurance terminated by surrender and lapse was large, viz., \$4,440,707, being \$170.28 for every \$1,000 of current risk. The amount terminated by death was \$174,965, or \$6.75 for every \$1,000 of risk. Assessment companies.

PART III.—ACCIDENT AND GUARANTEE INSURANCE.

Accident insurance. 705. Accident insurance business was transacted by 8 companies, viz., 4 Canadian, 3 British and 1 American, and guarantee business by 3 companies, 1 Canadian, 1 British and 1 American. One Canadian company was added to the list, by the Manufacturers Accident Insurance Company. The business done in 1886 and 1887 was:—

ACCIDENT.	1886.	1887.
	\$	\$
Premiums received.....	165,384	193,715
Amount insured.....	26,443,366	30,067,982
Paid for claims .....	80,531	83,318
GUARANTEE.		
Premiums received.....	80,820	64,478
Amount guaranteed.....	9,495,850	9,672,850
Paid for claims.....	19,684	20,692

Plateglass insurance. 706. Plate glass insurance was transacted by 2 companies, 1 British and 1 American, respectively. The premiums received during the year were \$21,098, the amount in force was \$196,089, and the losses incurred \$4,907. Two firms in Montreal transact this class of business, but work on the system of replacement, instead of paying the value of the glass broken, and their returns do not show the amount in force.

Number of insurance companies of all kinds. 707. At the close of 1887 there were 83 companies under the supervision of the Superintendent of Insurance, the same number as in the preceding year. They were engaged in business as follow :—

Doing life insurance.....	43
“ “ assessment plan.. .....	4
“ fire insurance.....	32
“ inland marine insurance.....	7
“ ocean marine .. .....	4
“ accident .. .....	8
“ guarantee .. .....	3
“ steam boiler .. .....	1
“ plate glass .. .....	4

708. The total amount of deposits held by the Receiver-General, for the protection of policyholders, amounted on 10th July, 1888, to the sum of \$13,673,477. Deposits with Government.

709. The total amounts received for all forms of insurance in 1886 and 1887 were:— Total receipts of all kinds 1886 and 1887.

YEAR.	COMPANIES.			Total.
