Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

1994

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

PREFACE

The **Statistics Canada Catalogue 1994** contains information about the wide range of print and electronic information sources and services published by Statistics Canada. This edition contains some new elements, including: forthcoming titles; a list of discontinued titles; titles released since the cut-off date of the Catalogue; catalogue numbers for electronic products and services (see the *Finding and Using Statistics* section for details); and indexing for yet more feature articles in the *Publications and Map Products Subject Index*.

Publications described are those in print as of December 31, 1993, with the addition of those described as forthcoming and those described in the *Hot off the press!* section. Publications discontinued since the last edition of this Catalogue are so indicated. Unique out-of-print items, listed for your information, cannot be ordered but can be consulted in Regional Reference Centres and libraries across Canada.

Your comments and questions are welcome and can be directed to:

COMPENDIA

11-001E

Catalogue 11-001E (Français 11-001F) ISSN 0827-0465

Thursday, May 26, 1994
For release at 8:30 a.m.

MAJOR RELEASES

- **Farm input price index, first quarter 1994** 2
The index increased 1.5% in the first quarter of 1994 as most prices for farm inputs rose; the exception was interest costs.
- **Tuberculosis incidence, 1992** 4
Estimates from the World Health Organization (WHO) show that the rate of tuberculosis in Canada ranks among the lowest in the world. In 1992, 2,091 cases (representing a crude rate of 7.4 cases per 100,000 population) of new active and reactivated tuberculosis were reported in Canada. This was a slight increase from 2,018 cases (7.2 cases per 100,000 population) reported in 1991.

DATA AVAILABILITY ANNOUNCEMENT

Winnipeg Family Violence Court 6

PUBLICATIONS RELEASED 7

The daily. Daily. First issue, Feb. 1932. E. and F.
ISSN 0827-0465.
DDC 317.1.

This vehicle for first (official) release of statistical data and publications produced by Statistics Canada, provides highlights of newly released data with source information for more detailed facts. It contains weekly and monthly schedules of upcoming major news releases and

announces new non-print products and new services.

	Per Issue	Per Year
Canada:	\$1.00	\$175.00
United States:	US\$2.00	US\$210.00
Other Countries:	US\$2.00	US\$245.00

11-002E

Infomat, a weekly review. Weekly. First issue, Oct. 1932. E. and F.

ISSN 0380-0547.

DDC 317.1.

The weekly review highlights major Statistics Canada reports, reference papers and other releases. It contains charts, a summary of the latest monthly statistics and a complete list of publications released during the week, arranged alphabetically by originating division.

	Per Issue	Per Year
Canada:	\$3.00	\$130.00
United States:	US\$4.00	US\$156.00
Other Countries:	US\$4.00	US\$182.00

11-008E

Canadian social trends. Quarterly. First issue, summer 1986. E. and F.
ISSN 0831-5698.
DDC 306/.0971.

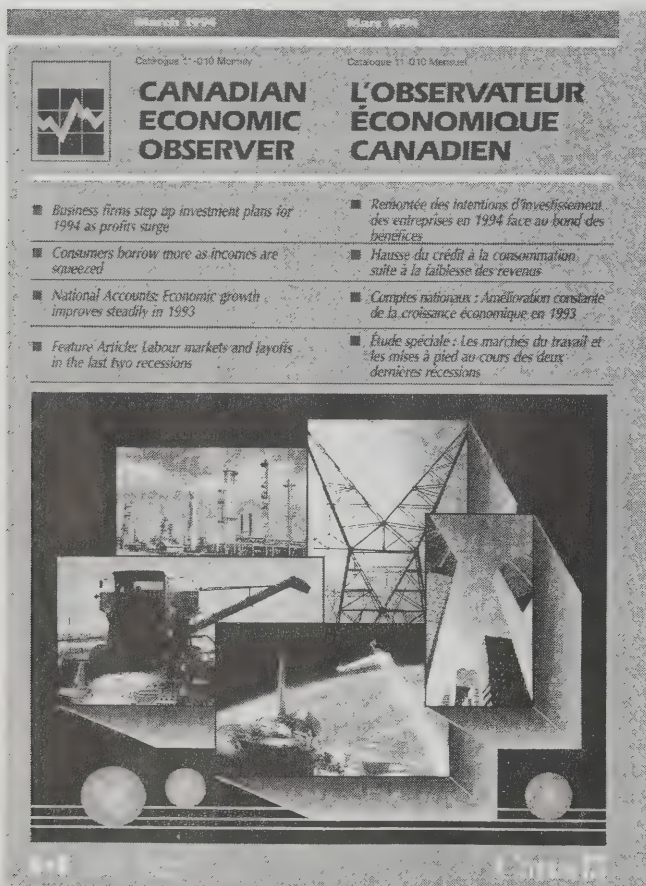

GENERAL AND REFERENCE

This publication discusses the social, economic, and demographic changes affecting the lives of Canadians. It contains the latest figures for major social indicators.

Note: Individual issues released since January 1990 have been indexed, but specific contents have not been listed here because of space constraints.

	Per Issue	Per Year
Canada:	\$9.00	\$34.00
United States:	US\$11.00	US\$41.00
Other Countries:	US\$12.00	US\$48.00

11-010

Canadian economic observer. Monthly. First issue, Jan. 1988. Bilingual.

ISSN 0835- 9148.

DDC 330.971/0648.

This is Statistics Canada's monthly flagship publication for economic statistics. Each issue contains a monthly summary of the economy, major economic and statistical events, a feature article and technical note. A statistical summary contains a wide range of tables and graphs on the principal economic indicators for Canada, the provinces and the major industrial nations. A historical listing of this same data is contained in the *Canadian economic observer: historical supplement* (11-210).

Note: Individual issues released since January 1990 have been indexed, but specific contents have not been listed here because of space constraints.

	Per Issue	Per Year
Canada:	\$22.00	\$220.00
United States:	US\$27.00	US\$264.00
Other Countries:	US\$31.00	US\$308.00

11-201

The annual report of Statistics Canada. Annual. First issue 1919. Bilingual.

ISSN 0703-2544.

DDC 354.710081/9.

The annual report reviews the accomplishments of the Agency in the fiscal year under review. Featuring an overview and introduction to Statistics Canada, it profiles activities in social and economic statistics, presents new developments in methodology and highlights key products and services. It also covers regional operations, international activities and presents departmental revenues and expenditures. Complete with summary highlights, flow charts, photos and more, the annual report is both a barometer of Agency activity and a complete description of its operations and services.

Price: No Charge

11-204E

Statistics Canada catalogue. Annual. First issue 1930. E. and F.

ISSN 0838-4223.

DDC 016.3171.

This catalogue lists publications available for sale from Publications Sales; maps and mapping services available from Geography Division; and electronic products and services. A special guide to finding and using statistics is included, as are separate author/title and subject indexes and details for ordering.

	Per Issue
Canada:	\$15.00
United States:	US\$18.00
Other Countries:	US\$21.00

11-207

Listing of supplementary documents. Annual. First issue 1980. Bilingual.

ISSN 0228- 5134.

DDC 016.3171.

This publication provides a listing of Statistics Canada research papers, technical reports and conference proceedings which are not covered in the *Statistics Canada Catalogue*. The current edition is a revised cumulation which includes more than 400 new items and replaces and updates previous editions.

	Per Issue
Canada:	\$34.00
United States:	US\$41.00
Other Countries:	US\$48.00

GENERAL AND REFERENCE

11-207S

Listing of supplementary documents, supplement. Annual. First issue 1983. Bilingual.

ISSN 0835-085X.

DDC 016.3171.

This is a systematic inventory of supplementary Statistics Canada documents available to the public, including technical papers, memoranda, and discussion and working papers.

Per Issue

Canada: \$5.00

United States: US\$6.00

Other Countries: US\$6.00

11-208E

Guide to managing Statistics Canada publications in libraries / Fred Baker. Annual. First issue 1991. E. and F.

ISBN 0-660-13813-1.

DDC 025.17/34/0971.

This guide provides librarians with advice on building a reference collection of Statistics Canada publications in order to have at least 10 years of the most recently revised data. The guide features a comprehensive listing of all catalogued publications released since 1917, by Statistics Canada publication number. In addition to suggested retention policy, the entries provide links between current and discontinued publications and other useful reference notes.

Per Issue

Other Countries: US\$112.00

11-209E

Statistics Canada publications list. Annual. First issue 1990. E. and F.

ISSN 1180- 548X.

This list includes over 600 titles with their content description and prices. An order guide, discounts and discount packages are also included.

Price: No charge

11-210

Canadian economic observer. Historical statistical supplement. Annual. First issue 1986. Bilingual.

ISSN 0838-0236.

DDC 330.971/0648.

This is a companion volume to the monthly report (no. 11-010) and contains historical annual series that correspond to those published in the monthly tables. Data covered include the national accounts, prices, international and domestic trade, labour and financial markets. Provincial detail for employment earnings, retail

trade, housing and consumer price indexes are also presented.

Per Issue

Canada: \$27.00

United States: US\$33.00

Other Countries: US\$38.00

11-402E

Canada year book. Biennial. First issue 1905. E. and F. ISSN 0068-8142.

DDC 317.1.

The 1994 edition comprises 22 chapters of captivating text and more than 100 feature articles, tables and improved charts to form a comprehensive overview of Canadian life and issues today: current events, culture, geography, economy, demography, government, industry, and more. Highlights drawn from the 1991 Census and hundreds of surveys make this a publication of record, a must-have for everyone who relies on current knowledge of Canada: teachers, students, librarians, business people, researchers and policy makers - anyone interested in the state of the nation. The 1994 *Canada Year Book* is hardcover, with a full-colour dust jacket and over 700 pages of text and analysis. More than 145 large-format photographic images - black-and-white and colour - represent The National Archives, The National Gallery, the Canadian

GENERAL AND REFERENCE

Museum of Contemporary Photography, and a host of gifted Canadian photographers.

Canada: \$59.95 per issue plus \$5.05 postage and handling

United States: US\$72.00 per issue (includes all handling)

Other Countries: US\$84.00 per issue (includes all handling)

11-403E

Canada: a portrait. Biennial. First issue 1980/81. E. and F.

ISSN 0840-6014.

DDC 971.

The 1993 edition presents an overview picture or portrait of the social, economic and cultural life of Canada today. Packaged in a new 30 x 23 cm hard cover format, it features six chapters: *This Land, The People, The Society, Arts and Leisure, The Economy and Canada in the World*. It includes text, charts and more than 60 high-quality colour photographs. Eminent Canadians -- Jean Béliveau, Roberta Bondar, Douglas Cardinal, Tomson Highway, Antonine Maillet and W.O. Mitchell -- have contributed prefaces to each chapter, and additional quotes by and about Canadians and short feature articles complement the main text. A 10-colour-plate art section augments the *Arts and Leisure* chapter, featuring work of Canadian visual artists, and a comprehensive index lists more than 400 entries.

Canada: \$34.95 per issue plus \$3.05 postage and handling

United States: US\$41.95 per issue (includes all handling)

Other Countries: US\$48.95 per issue (includes all handling)

11-509E

FORTHCOMING

Human activity and the environment 1994 / Statistics Canada. E and F. (System of National Accounts)

This is the fourth edition of Statistics Canada's popular environmental statistics compendium. This unique compilation brings together data from Statistics Canada and other organizations in a comprehensive look at the Canadian environmental trends and issues. New for 1994 are international and provincial environmental profiles, which allow easy comparison of varying environmental performance. Also new are sections on the economy, energy, soil erosion, air quality, contaminants and many others. **Note:** For further information, contact the Client Services Representative (613) 951-3640.

Per Issue

Canada: \$35.00

United States: US\$42.00

Other Countries: US\$49.00

11-512E

Historical catalogue of Statistics Canada publications, 1918-1980 / Statistics Canada, User Services Division. 337 p. 29 cm. 1982. E. and F.

ISBN 0-660-10964-6.

DDC 016/.01571.

The catalogue provides a complete record of all catalogued publications of Statistics Canada and of the Dominion Bureau of Statistics. It documents the publishing program of the Bureau from its formation in 1918 to December 31, 1980. The publication also includes references to materials dating from the 1851 Census of Canada and a number of publications of other federal departments issued prior to 1918.

Price: This publication is out of print and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

11-516E

Historical statistics of Canada / 2nd ed. F.H. Leacy, editor. 800 p. 30 cm. 1983. E. and F.

ISBN 0-660-11259-0.

DDC 317.1.

A unique compendium that depicts in text and extensive historical tables the nation's growth and development from Confederation to the modern era. The book, covering 22 topics, draws together social, economic and political time series from a wide variety of sources and provides explanatory notes on the statistics.

Price: This publication is out of print and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

11-517E

Canada's young family home-owners: a family studies teaching kit. 1 portfolio (11 pieces). 1986. E. and F.

DDC 306.8/5/0971.

These are families headed by parents, born during the "baby boom", the period that saw a jump in the national birth rate following World War II. The "boomers" form a population group substantially larger than those before and after them and created special needs as they moved from infancy to adulthood. In the 1980s, many of them head young families and this kit looks at how and where they live and assesses their current impact on society. This kit includes: a set of 9 two-colour transparencies, a topically related census publication, and illustrated student worksheets.

Price: This publication is out of print and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

GENERAL AND REFERENCE

11-518E

Living alone: a family studies teaching kit. 1 portfolio (12 pieces). 1986. E. and F.
DDC 305/.90652/0971.

A single male university graduate and an elderly widow who didn't finish high school are two types of Canadians very likely to live alone. But they are not the only ones. Single-person households have been growing steadily in number since 1956, with a sharp increase from 1971 to 1981. This kit details where our singles live, their educational background, the type of accommodation they occupy and their incomes. This kit includes: a set of 10 two-colour transparencies, a topically related census publication, and illustrated student worksheets.

Price: This publication is out of print and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

11-519E

The elderly in Canada: a family studies teaching kit. 1 portfolio (14 pieces). 1986. E. and F.
DDC 305.2/6/0971.

From 1971 to 1981, the population aged 65 and over grew by 35% while the country's total population increased just 13%. The trend toward a higher proportion of seniors promises to continue well into the next century, making new demands on our society. This kit includes: a set of two-colour transparencies, a topically related census publication, and illustrated student worksheets.

Price: This publication is out of print and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

11-520E

Canada's lone-parent families: a family studies teaching kit. 1 portfolio (9 pieces). 1986. E. and F.
DDC 306.8/56/0971.

The number of single-parent families has been increasing steadily since 1966. Proportionally, more children than ever before are being raised in such households. These families are most likely to have lower incomes and to spend more than the recommended portion of income on shelter. Where these families live, how their incomes compare with those of other Canadians and the types of housing they occupy are examined. This kit includes: a set of 7 two-colour transparencies, a topically related census publication, and illustrated student worksheets.

11-523E

Guide to Statistics Canada data on women / Statistics Canada, Housing, Family and Social Statistics, Target Groups Project. 113 p. 28 cm. 1987. E. and F.
ISBN 0-660-12722-9.
DDC 016.3054/0971.

Divided into three parts, the guide briefly describes all Statistics Canada publications containing data on women. It catalogues information that has not been published, but is available on microfiche or tape or can be accessed by computer. It cross-references entries on women across a broad range of topics from income and employment to health and education. It also lists a selection of articles that examine women's issues.

Price: This publication is out of print and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

11-526

Households and the environment, 1991 / Statistics Canada, Household Surveys Division. 39 p. 28 cm. 1992. Bilingual.
ISBN 0-660-54884-4.
DDC 363.7/0525/0971.

In May 1991, Statistics Canada conducted the Household Environment Survey to measure household actions that have (or are perceived to have) positive or negative impacts on the environment. The survey provides baseline information to use in measuring progress towards sound environmental practices at the household level. The subjects examined include recycling and waste reduction practices, energy and water conservation practices, the use of recycled products, and the use and disposal of potentially hazardous household substances.

Databases for environmental analysis: Government of Canada/ Statistics Canada, National Accounts and Environment Division, System of National Accounts, and Environment Canada, Environmental Information Systems Division, State of the Environment Reporting. 260 p. 28 cm. 1992. E. & F.

ISBN 0-660-14650-9.

DDC 025.06/3337/0971.

This new publication is a joint product of Statistics Canada and Environment Canada. It presents an inventory of Government of Canada databases useful for environmental reporting. With over 370 databases listed, each one has a detailed description which lists: purpose, contact information and much more. As a special feature, a diskette for micro computer users is also included. It contains all the information in the report and allows users to search the database on a variety of fields, including "key words". **Note:** For further information, please contact the Client Services Representative at (613) 951-3640.

Environmental perspectives, 1993: studies and statistics / Statistics Canada, National Accounts and Environment Division, System of National Accounts. 96 p. 28 cm. 1993. E. & F.

ISBN 0-660-14755-6.

DDC 333.7/0971.

This publication presents the results of recent studies and surveys on current and emerging environmental issues. The 13 chapters include new data on local government waste management, further details from the Household Environment Survey, a study of land-use change around Riding Mountain National Park, an analysis of the impact of estimated compliance costs of the 1992 federal regulations governing Canadian pulp and paper mills and a linking of greenhouse gas emissions to industrial production using an input-output model. Other survey results include land management practices for soil erosion control, packaging use and disposition, pollution abatement and control expenditures and a profile of the Canadian waste management industry. Preliminary estimates of the value of crude oil and gas reserves in Alberta are also presented.

11-612E no. 1

Health and social support, 1985 / Statistics Canada, Housing, Family and Social Statistics Division. 232 p. 28 cm. 1987. E. and F.
ISBN 0-660-12654-0.
DDC 362.1/0971.

The first General Social Survey was carried out in September and October 1985, collecting information on health and related factors from 11,200 persons age 15 and older. The sample covered the non-institutionalized population of Canada. The data were gathered with telephone and face-to-face interviewing. This report presents initial analyses and findings including comparisons with findings from the 1978-1979 Canada Health Survey. Topics examined include: barriers and bridges to improving health status - smoking, alcohol use, physical activity, etc.; current health status - health problems, etc.; and a focused chapter on support networks and social participation of the elderly.

Accidents in Canada / Wayne Millar, Owen Adams. 116 p. 28 cm. 1991. E. and F.
ISBN 0-660-13588-4.
DDC 363.1/00971.

Accident statistics are available from a variety of sources: hospital morbidity data, workers' compensation data, workers' accident and injury data and vital statistics are all potential sources of data relating to accidents in Canada. However, many accidents that occur are not reported by these programs and information can only be obtained directly from accident victims as reported in a general population survey. The data in this report are unique because they complement the existing statistics and they provide insight into the social and demographic characteristics of Canadians who have experienced an accident in the home, at work, during recreation, or on the road during the year preceding the survey. This is the first national survey to focus on such a broad range of accidents and their implications. Many of these incidents are not recorded elsewhere. Consequently, the information is potentially important for policy makers, legislators, academics and persons involved with prevention programs. This report examines the findings of the accident portion of the survey based on an analysis of the released data.

11-612E no. 4

Where does time go? / Andrew S. Harvey, Katherine Marshall, Judith A. Frederick. 161 p. 28 cm. 1991. E. and F.
ISBN 0-660-13738-0.
DDC 640.43/00971.

The publication presents an account of how Canadians spend their time and is based on data from a survey of nearly 10,000 Canadian adults conducted during the last quarter of 1986. An analysis of the data collected identifies how the total population and various sub populations (for example, students, employed mothers and the elderly) allocate their time. These data are relevant to such issues as the increased labour force participation of women and the sharing of household tasks and other responsibilities; the amount of time given to volunteer, housework and other unpaid work in relation to paid work; and how much time Canadians spend in activities with family members versus time spent with others or alone.

11-612E no. 5

Ups and downs on the ladder of success: social mobility in Canada / Gillian Creese, Neil Guppy, Martin Meissner. 118 p. 28 cm. 1991. E. and F.

ISBN 0-660-13737-2.

DDC 305.5/13/0971.

The publication presents analysis of the General Social Survey (cycle 2) which focused, in part, on the social mobility of Canadians. The analysis was conducted by researchers from the University of British Columbia. The study of social mobility is concerned with the relationship between parents' education and occupations and those of their children, as well as the relationship between a persons' first and subsequent jobs. Social mobility has been a topic of academic research in Canada and many other countries, although in Canada a national social mobility survey had not been conducted since 1973. In response to demands for more current data, Statistics Canada added several questions on this subject to its 1986 General Social Survey.

REFERENCE AND WORKING MANUALS

12-001

Survey methodology. Semi-annual. First issue, June 1975. Bilingual.

ISSN 0714-0045.

DDC 001.4/22.

The journal publishes articles dealing with various aspects of statistical development relevant to a statistical agency, such as design issues in the context of practical constraints, use of different data sources and collection techniques, total survey error, survey evaluation, research in survey methodology, time series analysis, seasonal adjustment, demographic studies, data integration, estimation and data analysis methods, and general survey systems development. The emphasis is placed on the development and evaluation of specific methodologies as applied to data collection or the data themselves.

Standard industrial classification, 1980. 4th ed. 551 p. 29 cm. 1980. E. and F.

ISBN 0-660-12956-6.

DDC 338/.02/012.

This classification describes the industrial structure of the Canadian economy in terms of the principal activities of establishments. It follows the traditional sectoring of the economy into extraction, e.g. agriculture and mining; transformation, e.g. manufacturing; and services, e.g. transportation, communication and other services. It has a four-tiered structure in which 861 industries are delineated at the four-digit level. It is designed for statistical application to facilitate the collection and compilation of comparable data series related to production.

12-578E

Canadian export classification (based on the Harmonized System) / Statistics Canada, International Trade Division. 618 p. 28 cm. 1987. E. and F.
 ISBN 0-660-12492-0.
 DDC 382/.0971/0012.

Commencing January 1, 1988, Canadian exporters or their agents are required to assign an export Harmonized System (H.S.) number to all export transactions. This publication which lists all possible export H.S. codes and their accompanying descriptions is therefore an essential tool in the preparation of customs export documentation. To assist in coding, the publication's introduction includes, among other things, an outline of the classification structure, an overview of the classification of goods, and the general rules for the interpretation of the Harmonized System.

Price: This publication is out of print and no longer available for sale. A working manual (unnumbered publication) can however be obtained directly from the International Trade Division.

12-579E

Canadian export-import alphabetical index (based on the Harmonized System) / Statistics Canada, International Trade Division. 298 p. 28 cm. 1987. E. and F.
 ISBN 0-660-12493-9.
 DDC 382/.0971/0012.

This publication has been designed to be used in conjunction with both the *Canadian tariff and imports statistics nomenclature* aligned to the structure of the *Harmonized commodity description and coding system*, published by Revenue Canada (no. RV-57-1-1-1987 E) and the *Canadian export classification (based on the Harmonized System)* (12-578E). Its purpose is to facilitate the selection of the correct ten-digit import Harmonized System (H.S.) classification number and/or eight-digit export H.S. number based on the user's understanding of a commodity description. Approximately 17,000 product rulings are listed employing the

key word principle in determining the alphabetic placement of an individual product descriptor.

Survey sampling: a non-mathematical guide / by A. Satin and W. Shastry. 2nd ed. 96 p. 28 cm. 1993. E. and F.
 ISBN 0-660-15049-2.
 DDC 001.4/22.

The manual is a basic guide on survey sampling for those with little or no formal training in mathematical statistics and it is largely patterned after workshops on survey sampling. It is intended to explain the fundamental concepts and methods of survey sampling by way of examples and illustrations rather than by theory and algebraic expressions. This second edition has been expanded to include a chapter on sampling methods for telephone surveys in light of the growing prominence of these types of surveys in Canada. As well, this edition includes the complete set of problems and possible solutions used in the survey sampling workshops. These problems offer the reader an opportunity to apply the principles and techniques covered in the guide.

INCOME, NATIONAL ACCOUNTS

13-001

National income and expenditure accounts. Quarterly. First issue 1953. Bilingual. (System of national accounts).

ISSN 0318-708X.

DDC 339.371.

Each quarter, this publication gives a comprehensive statistical picture of Canadian economic developments. The focus is on Canada's gross domestic product, including such components as consumer spending, business investment, exports, labour income, corporation profits, farm income, government spending and prices. The publication begins with an overview article, reviewing and analyzing economic developments in the most recent quarter. Most issues also contain a second, more technical article explaining national accounts methodology or analyzing a particular aspect of the economy. The main body of the publication consists of 37 statistical tables containing seasonally adjusted quarterly data for the most recent eight-year period. **Note:** For further information, contact the Client Services Representative (613) 951-3640.

Note: An initial release normally published in *The Daily* is also available in fax format. See list of fax services in the *Electronic Products and Services* section.

13-201

National income and expenditure accounts, annual estimates. Annual. First issue 1938/1944. Bilingual. (System of national accounts).

ISSN 0703-0037.

DDC 339.371.

This publication provides a comprehensive annual perspective on the Canadian economy. The subject matter is similar to, but much more detailed than that in publication 13-001. The focus is on Canada's gross domestic product and four major sectors of the economy: households, businesses, governments and non-residents. Industrial and provincial distributions are provided for several aggregates and there is a thorough financial statement for the various levels of government in Canada. The publication includes an article reviewing and analyzing the latest data revisions. The main body of the publication consists of 73 statistical tables, extensively footnoted and cross-referenced, containing annual data for the most recent twelve-year period. **Note:** For further information, contact Client Services Representative (613) 951-3640.

13-207

Income distributions by size in Canada. Annual. First issue 1971. Bilingual.

ISSN 0575-8750.

DDC 339.2/2/0971.

This publication provides estimates of family and individual incomes by size of income, major source of income, region/province, sex and other characteristics. It includes income shares by quintile and incidence, estimated numbers and characteristics of low income families and unattached individuals. Income deficiency, or the extent to which low income family incomes fall short of the low income cut-offs, is included. Incidence and estimated numbers of low income for persons, children and the elderly are also presented. Statistics are derived from the Survey of Consumer Finances, conducted annually since 1972. The report also includes data analysis, definitions, data quality measures, survey questionnaires and a bibliography. **Note:** Prior to 1971, occasional issues for data back to 1951 were produced. See *Selected Publications* in no. 13-207 for a listing of publications available.

Family incomes, census families. Annual. First issue 1971. Bilingual.

ISSN 0703-7368.

DDC 339.2/2/0971.

This publication shows the distribution of census families and persons not in families by size of income, major source of income, region/province, age, sex and other characteristics. The census family concept used is identical to that of the Canadian census. Statistics are derived from the Survey of Consumer Finances, conducted annually since 1972. Definitions and a bibliography are included.

Income after tax, distributions by size in Canada. Annual. First issue 1971. Bilingual.

ISSN 0319-0374.

DDC 339.2/0971.

Income distributions for families, unattached individuals and all persons with income are shown on an after-tax basis by selected characteristics such as region, age and sex. Income after tax is defined as total money income less income tax paid. Low income data on an after-tax basis and information on the extent to which low income family incomes fall short of the low income cut-offs are available. Statistics are derived from the Survey of Consumer Finances, conducted annually since 1972. Data analysis, definitions, data quality and a bibliography are included.

Provincial economic accounts, annual estimates. Annual. First issue 1961/1976. Bilingual. (System of national accounts).

ISSN 0847-0359.

DDC 336.71.

This publication provides a regional perspective on Canadian economic developments. It includes separate sets of statistical tables, organized in a manner similar to those in publication 13-001, for each of the twelve provinces and territories. The focus is on each region's gross domestic product, final domestic demand, personal disposable income and government sector accounts. The publication begins with an article outlining concepts and methods and reviewing regional economic developments in the most recent year. The main body of the publication consists of 19 statistical tables, for each of Canada as a whole and the twelve provinces and territories, containing annual data for the most recent five-year period. **Note:** For further information, please contact the Client Services Representative (613) 951-3640.

Provincial economic accounts, preliminary estimates. Annual. First issue 1988. Last issue 1992. Bilingual. **Discontinued.** (System of national accounts). ISSN 0706-3083. DDC 336.71.

This publication contains preliminary estimates for the main statistical series in publication 13-213 and is available five months after the reference year. The focus is on each region's final domestic demand, gross domestic product and personal disposable income. The components of final domestic demand are measured both at current prices and at constant 1986 prices and there is a set of implicit price indexes. Factor incomes such as wages and salaries, corporation profits and farm income are also presented. There are six tables for each of Canada and the 12 provinces and territories. The publication also includes an article outlining data sources and methods and highlighting regional economic developments during the year. **Note:** For further information, contact the Client Services Representative (613) 951-3640.

13-216

Income estimates for subprovincial areas. Annual. First issue 1983. Bilingual.

ISSN 0825-124X.

DDC 339.2/0971.

Two kinds of income estimates, money income and personal income are shown for subprovincial areas, counties or census divisions, and census metropolitan areas on an aggregate and per capita basis. Money income is disaggregated by source of income; income taxes assessed and money income after taxes are also given. Personal income is a broader income measure based on national accounts concepts. As well, personal disposable income (personal income minus taxes) is given.

A user guide to the Canadian system of national accounts / by John D. Randall. 106 p. 28 cm. 1989. E. and F.

ISBN 0-660-13257-5.

DDC 339.3/0971.

This publication is a further step in Statistics Canada's initiative to promote the understanding and use of key economic series published by the organization. For the first time, all components of the Canadian System of National Accounts are defined and discussed under one cover. The report covers some principal national accounting tenets and embraces input-output, income and expenditure, financial flows, national balance sheets, balance of payments and the international investment position as well as the key concepts of each component. This publication also devotes a chapter on certain classic issues, and possible extensions and modifications to the System and some more recent concerns about the System of National Accounts. This book is intended for

GENERAL AND REFERENCE

use by those working in the field as a general reference guide, and for outside users as an introduction to the availability and contents of the Canadian System of National Accounts.

STUDIES IN NATIONAL ACCOUNTING

13-603E no. 1

Guide to the income and expenditure accounts / Statistics Canada (System of national accounts). 164 p. 28 cm. 1990. E. and F.

ISBN 0-660-13607-4.
DDC 339.371.

This publication is the first in a series to be published over the next few years. This series will fully document Canada's system of national and provincial accounts. Other volumes will deal with particular parts of the system in greater depth. This publication presents an overview of Canada's Income and Expenditure Accounts, including: an outline of the concepts and definitions; an explanation of the sources of information and statistical methods used; a glossary of terms and a broad compilation of other facts about the accounts. In addition, a full chapter is devoted to assessing the quality of the estimates. **Note:** For further information, contact the Client Services Representative (613) 951-3640.

SNA, INDUSTRY AND COMMODITY STATISTICS

Publications with a catalogue number prefix 15 contain industry and/or commodity information which has been integrated within the System of National Accounts (SNA). SNA publications which are not industry and/or commodity oriented are published under catalogue number prefix 13. SNA industry and commodity groupings may differ from other Statistics Canada official classifications such as the Standard Industrial Classification (SIC). These differences ensure that SNA variables are defined consistently over time and across

SNA industry and commodity classifications. In addition, integration of source data within the SNA framework ensures consistency in statistical terms. Nevertheless, SNA industry and commodity definitions are uniquely defined in terms of the other official classification structures.

15-001

Gross domestic product by industry. Monthly. First issue, Jan. 1987. Bilingual. (System of national accounts).

ISSN 0711-852X.
DDC 339.371.

The publication contains monthly, quarterly, and annual estimates of gross domestic product for 183 industries, including aggregates and special industry groupings. Estimates are available nationally and seasonally adjusted, in millions of dollars at 1981 prices, for the current year and the previous year. The June issue contains historical data covering the most recent several years. A brief text provides analytical highlights, and charts of four major industry groupings are also present. **Note:** Historical estimates of Gross Domestic Product at 1986 prices are available in CANSIM matrices 4670-4674. Data from 1961 to 1985 are published in *Gross domestic product by industry, 1961-1985*, (no. 15-512) January 1991, and from January 1986 to June 1992 in *Gross domestic product by industry* (no. 15-001) June 1992.

Aggregate productivity measures. Annual. First issue 1985/86. E. & F. (System of national accounts).

ISSN 0317-7882.

DDC 331.11/8/0971.

The publication contains labour productivity and experimental multifactor productivity annual estimates for several business-sector industries and aggregates at the Canada level. Measures of labour productivity by industry are complemented by corresponding measures of compensation per person, compensation per person-hour and unit labour cost. Multifactor productivity measures are available for alternative specifications of production activity. At the level of industries, productivity is available for gross output and net-gross output. At the business sector level, it is available in terms of value added. In addition, the publication presents interindustry productivity indexes for several industries and the business sector. Due to the interest in analyzing the competitiveness of Canadian industries, the publication compares the labour productivity and multifactor productivity performance of Canada and the United States based on a similar methodology. Previously 14-201.

The input-output structure of the Canadian economy, 1961-1981 (revised data) / Statistics Canada, Input-Output Division. (System of national accounts). 526 p. 36 cm. 1987. Bilingual.

ISBN 0-660-53419-3.

DDC 339.2/3.

This publication contains input-output tables for the period 1961 to 1981 which are the results of the latest historical revision of the various accounts which form the

Canadian System of National Accounts (CSNA). It also provides the final estimates of Gross Domestic Product at factor cost by industry which establishes the contribution of each industry to the total value of production in the economy. These input-output tables constitute a data bank on the production and distribution activity of all industries in Canada which is integrated to the CSNA through the input-output accounting framework. They show who is producing what (distinguishing roughly 200 industries and 600 commodities), who is buying what (intermediate purchases by producers for the production of other commodities or final purchases by producers for the production of other commodities or final purchases by sector) and how much it costs to produce them in material, labour and capital. The introductory chapters cover the following subjects: the input-output accounting framework, the classification system, some special definitions used in the input-output tables, the sources and methods, the aggregation parameters, gross domestic product, some uses and interpretations of the tables and the input-output models used for impact analysis.

DDC 339.2/3/0971.

This publication contains input-output tables in constant prices for the period 1961 to 1981 which are the results of the latest historical revision of the various accounts which form the Canadian System of National Accounts (CSNA). It also provides the final estimates of Real Gross Domestic Product at factor cost by industry which establishes the contribution of each industry to the total volume of production in the economy. These tables constitute a data bank on the production and distribution activity of all industries in Canada which is integrated to the CSNA through the input-output accounting framework. They show who is producing what (distinguishing roughly 200 industries and 600 commodities), who is buying what (intermediate purchases by producers for the production of other commodities or final purchases by sector) and how much it costs to produce them in material, labour and capital. The introductory chapters cover the following subjects: the input-output accounting framework, the nature, sources and methods of deflation, Gross Domestic Product and the aggregation parameters.

ISBN 0-660-14414-X.

DDC 339.2/3/0971.

The publication outlines the conceptual and statistical framework of the services sector in the accounts. For the first time, the methodology and data sources used to calculate estimates of services in the current-price input-output accounts are described completely. Specific sources and methods are outlined for determining inputs, outputs and gross domestic product of service industries in the business sector.

SEASONAL VARIATIONS

16-502

Seasonal variations in the Canadian economy: retail trade / Statistics Canada, Time Series Research and Analysis Division. 160 p. 28 cm. 1985. Bilingual.

ISBN 0-660-52856-8.

DDC 381/.1/0971.

The study analyzes seasonal fluctuations in economic activity focusing on the retail trade sector. It presents data from 1972 to 1982 for 28 kinds of businesses as well as regional breakdowns of retail sales. The publication adopts a practical approach to the complicated task of seasonal analysis of current sales, and of creating an index of seasonal variation.

SMALL AREA DATA

17-202 to 17-206

Demographic and income statistics for postal areas. Annual. First issue 1987. Bilingual.

ISSN 0840-8491.

DDC 339.2/2/0971.

This annual publication brings together various demographic and socio-economic characteristics of tax filers for more than 7,000 postal areas across Canada. Its primary objective is to provide key socio-economic indicators for a number of uses such as marketing, direct mailing, social service planning, regional analysis, provincial and municipal planning, etc. Among the 30 different characteristics provided are the age and sex of tax filers, a distribution of tax filers by level of income, the median income and how it compares to the income reported five years earlier. In addition, each of the 7,000 postal area's median income is compared to the provincial and Canadian figures. This reference manual also includes a special appendix which provides a cross-reference of postal codes, thus facilitating the identification of place names. Also featured is a special highlights section which takes a close look at some of the major trends that have taken place at the national,

SPECIAL STUDIES

18-501E

Developing a longitudinal database on businesses in the Canadian economy: an approach to the study of employment / Statistics Canada, Business Microdata Integration and Analysis. 127 p. 28 cm. 1988. E. and F. ISBN 0-660-12669-9. DDC 331.11/07/2071.

This publication outlines how a database on employment by size of firm was created, discusses its current status and potential, analyses the pitfalls in using it to make assertions about our current knowledge of the role of small business in the dynamics of job creation. The database, created by linking data from survey and administrative sources, is presented in a set of tabulations for 1978 and 1984 and for changes between these two years. The tabulations focus on the labour used by businesses and the data are disaggregated by size of business, life status of the business (continuous, newly identified or no longer identified) and country of control. They are tabulated by industry and by province.

21-205

Agricultural financial statistics. Annual. First issue 1990. Bilingual.
ISSN 1188-7516.
DDC 338.1/3/0971.

Using data compiled for Revenue Canada, taxation returns of unincorporated and incorporated farms, this publication provides a detailed picture of the financial performance of Canadian farms. It offers readers detailed summaries of operating revenues and expenses by province, farm type, and revenue class. The publication also features sources and levels of off-farm income for unincorporated operators and farm families and to complete the picture, distributional tables on farm and off-farm income. All of this data is accompanied by text, including: data highlights, concepts and methods, and a glossary of specialized terms.

STATISTICAL COMPENDIUM

21-603E

Agriculture economic statistics. Irregular. First issue 1926/1978. E. and F.
ISSN 0833- 6210.
DDC 338.1/3/0971.

This publication presents annual estimates of net farm income, farm cash receipts, farm operating expenses and depreciation charges, the index of farm production, current values of farm capital, farm debt outstanding, the farm product price index, direct program payments, the production account, the balance sheet of the agricultural sector, the cash flow account and wage rates for hired agricultural labour. Notes on the concepts and methods plus listing of CANSIM databank numbers are included. Twice each year updates are released which include new and revised estimates of these indicators (except for the index of farm production which was last estimated for 1985) and data highlights for the most current year (package 10-603E).

FARM CROPS

22-002

Field crop reporting series. Irregular. First issue, Oct. 1920. Bilingual.
ISSN 0575- 8548.
DDC 338.1/73/00971.

The eight publications in this series are released at strategic points in the crop year detailing farm stocks of grain, crop area, yield and production. Stock reports detail the farm-held stocks at the provincial level and farm-held plus commercial stocks at the Canada level for major Canadian grains. The first area report contains the planting intentions of producers while the June estimates are made after most of the seeding has been completed. Yields and levels of production by province are esti-

PRIMARY INDUSTRIES

mated twice, based on expectations to the end of harvest, while the November estimate is released after the harvest.

Note: An initial release normally published in *The Daily* is also available in fax format. See list of fax services in the *Electronic Products and Services* section.

22-003

Fruit and vegetable production. 3 times a year. First issue 1932. Bilingual.

ISSN 0383-008X.

DDC 338.1/7/40971.

This seasonal publication provides an overview of the Canadian fruit and vegetable production sector. Estimates of the annual commercial production of apples by variety are included. The annual commercial production and value of the major tree fruits and berries and grapes are also available. Annual estimates of the area, yield, production and value of the major commercially grown vegetables are published. For processing vegetables, annual contracted and harvested area, production and value, and acquisitions by processors are available. For the mushroom growing industry, estimates of area, production, sales, investments and labour costs and employment are available once yearly. Statistics on the tobacco growing sector are published twice yearly. Three times a year, estimates of the area, yield, and production of potatoes are published. The value of potato production is published once yearly. **Note:** The publication will now be issued 3 times a year instead of the current four times. The first issue of the crop year will appear in July and will present the cultivated areas from the Fruit and Vegetable Area Survey conducted in May. The second will appear in October and include harvested estimates. The third will appear in February and will contain estimates for processing vegetables, as well as any revisions available.

Greenhouse industry. Annual. First issue 1955. Bilingual.

ISSN 0527-5369.

DDC 338.1/750483/0971.

This annual publication provides an overview of the Canadian greenhouse industry. Included are annual estimates of the total area under glass and plastic, months of operation and the total sales. Estimates of employment, labour costs, investments, purchases of plant materials and heating fuel costs are also available. Information on the value of sales of greenhouse vegetables, flowers and ornamental plants are also published, as well as the production of flowers by variety. The publication includes analyses of the internal structure of the greenhouse industry based on total sales and type of flowers or plants produced. There is also information on the proportion of sales through various channels.

The results of the Annual Survey of Manufactures are included in the twenty publications whose catalogue numbers end with -250, -251 or -252.

The publications provide principal statistics including the number of establishments, number of employees, salaries and wages, cost of materials and fuel, value of shipments and value added. They also present commodity detail relating to inputs and outputs. A data analysis, definitions, notes and an establishment name list are also included.

Note: Except for nos. 34-252 *Clothing*, 42-251 *Transportation* and 46-250 *Chemicals*, the annual publications covering the Survey of Manufactures were suspended for the reference year 1991. For that year, information on principal statistics is available in no. 31-203.

GENERAL SURVEYS

31-001

Monthly survey of manufacturing. Monthly. First issue, Feb. 1947. Bilingual.

ISSN 0840-8238.

DDC 338.4/767/0971.

This publication provides estimated values of manufacturers' shipments, inventories and orders by month, based on a sample of about 12,500 establishments. Data are presented for 22 major groups and selected individual industries at the 3 and 4 digit level of detail, as defined by the 1980 Standard Industrial Classification as well as aggregates for durable, non-durable and total manufacturing. Major group industry data are shown with and without adjustment for seasonal variation. Unadjusted shipment totals by province and by major groups within provinces are also shown. These data are used to monitor the business cycle in the key manufacturing sector of the economy; to

evaluate and develop financial and industrial policy; and to provide market data at the detailed industry level. Related information on Manufacturer's opinions about employment and production prospects over the next 3 months and on the current state of inventories and orders are available from the Business Conditions Survey (BCS). The survey is carried out at the beginning of January, April, July and October. Results based on 5,000 or more responses are available about 5 days after the reference month in the *Statistics Canada Daily*. The BCS balance of opinion data often gives a good guide to the direction of change, at least a month in advance of the corresponding quantitative data.

Note: An initial release normally published in *The Daily* is also available in fax format. See list of fax services in the *Electronic Products and Services* section.

31-003

Industrial capacity utilization rates in Canada.

Quarterly. First issue, 3rd quarter 1976. Bilingual.

ISSN 1192-1641.

DDC 338.4/567/0971.

This publication contains a series of quarterly statistical estimates of capacity utilization rates for the manufacturing sector in Canada. Capacity utilization measures, being a comparison of actual with capacity production, can facilitate the analysis of production, investment and prices. Capacity utilization rates are calculated for the Canadian manufacturing sector by major group, according to the 1980 Standard Industrial Classification, as well as for durable, non-durable and total manufacturing aggregates. The publication contains estimates of capacity utilization for the five most recent years; quarterly for the two most recent years and annual estimates for the other three years.

Manufacturing industries of Canada, national and provincial areas. Annual. First issue 1953. Bilingual.

ISSN 0382-4144.

DDC 338.4/767/0971.

This publication presents a set of principal statistics (including value of shipments, value of materials used, employment and compensation, etc.) by industry and industry group for Canada and the provinces. Also included are tables giving historical data, size ranking order lists and establishment counts by employment size. Tables showing statistics by type of organization and size of establishment have been included since

MANUFACTURING

1977, except for the years 1983 and 1987. For the year 1987, data were shown under an abbreviated format.

31-211

Products shipped by Canadian manufacturers. Annual. First issue 1961. Bilingual.

ISSN 0575-9455.

DDC 380.1/4567/0971.

This publication presents value and quantity of products shipped by manufacturers, classified by commodity, for Canada and the provinces. Commodities used have been based on the Industrial Commodity Classification (ICC) up to 1986 and on the Standard Classification of Goods (SGC), (which is the Canadian adaptation of the international Harmonized System (H.S.)), for 1988 and subsequent years. **Note:** This publication will not be produced for 1991.

Destination of shipments of manufacturers. Irregular. First issue 1979. Last issue 1984. Bilingual. **Discontinued.**

ISSN 0838-0988.

DDC 380.1/0971.

The publication presents values of shipments of Canadian manufacturing establishments by province of origin and of destination, and gives an "outside Canada" destination. Industry detail includes: all manufacturing, major groups (2 digit S.I.C.) and industry (4 digit S.I.C.) classified according to the 1980 Standard Industrial Classification. The data source is the Census of Manufactures. **Note:** Tables will be available from the

Industry Division. For further information, please contact Janet Robertson, (613) 951-3509.

TRANSPORTATION - GENERAL

50-002

Surface and marine transport. Irregular. First issue, June 1985. Bilingual.

ISSN 0828-2897.

DDC 380.5/0971.

This service bulletin presents timely data, time series analysis, and special tabulations covering trucking, rail, bus, urban transit, and marine transportation. Topics include summary information from the quarterly and annual For-hire Trucking surveys (commodity origin/destination), the Quarterly and Annual Motor Carrier Freight and Household Goods Movers Survey, marine commodity movements, port activities, vehicle registrations and fuel sales.

AIR TRANSPORT

51-002

Air carrier operations in Canada. Quarterly. First issue, Jan./Mar. 1970. Bilingual.

ISSN 0008-2570.

DDC 387.7/0971.

Each quarter, this publication presents operational and financial statistics for the activities of approximately 250 Canadian air carriers. It provides information to be used in the monitoring of the Canadian air transport industry. Specific tabulations presented include data on passenger-kilometres, aircraft hours flown, goods and mail carried, operational expenses and revenues by province and travel by fare type.

51-005

Air carrier traffic at Canadian airports. Quarterly. First issue 1976. Bilingual.

ISSN 0701-7928.

DDC 387.7/36/0971.

This publication presents statistics on airline traffic such as the volume of flights, passengers and cargo, at Canadian airports. Data on Canadian and foreign airlines' regional and local scheduled services have been added to complement the data previously published on the major scheduled services and major charter services. The publication presents several summary tables which have been grouped into sections dealing with overall or specialized views of the airline industry. An analysis of the significant changes which have occurred in the survey period will be provided, by type of service. Annual summary data are included in the fourth quarter issue.

52-216

Rail in Canada. Annual. First issue 1987. Bilingual.
ISSN 0843-4530.
DDC 385/.0971.

This publication provides information relating to the size and structure of the Canadian rail transport industry. A general overview of the rail industry for a six year period is followed by a more in-depth analysis on the economic performance, financial structure and equipment use for the reference period. The publication also provides commodity origin and destination data series supplied by the National Transportation Agency. Each year, one or more special studies related to the railway industry are also presented. **Note:** No. 52-216 in its present format only goes back to 1987. Prior to that date, *Railway transport in Canada: general statistics* were published in 52-215, *Commodity statistics* in 52-211 and *Commodity origin and destination statistics* in 52-214.

57-601

Energy statistics handbook. Monthly. First issue, Apr. 1992. Bilingual.

ISSN 1188-665X.

DDC 333.79/0971.

The handbook, a joint publication of Statistics Canada and Energy, Mines and Resources Canada, provides current monthly and historical annual energy data covering the last 12 years. This is the most comprehensive source of detailed information on the energy field available and a useful tool for those who analyze and follow the availability, production and use of energy in Canada. Data are organized and presented in a logical, easy-to-use manner by energy type. The publication also has supportive sections on prices and conversion factors (such as how to change a volume of natural gas to its heat content or how to change cubic metres of crude oil to metric tons of coal equivalent). Economic indicators (money market, housing starts, gross domestic product, etc.) are included to enhance understanding of the links between macroeconomic indicators and energy statistics. **Note:** On ordering, subscribers receive a binder with dividers, definitions and sources, and 200 pages of tables. Eleven monthly updates of tables will follow, so users will always have the most recent data available.

Private and public investment in Canada, intentions. Annual. First issue 1946. Bilingual.

ISSN 0823-065X.

DDC 338.4/367/0971.

This publication presents capital and repair expenditures on construction and on machinery and equipment for all sectors of the Canadian economy and by province for selected industry groups. The report also provides capital and repair expenditures for 15 of the largest metropolitan areas in the manufacturing sector and the split between private and public investment, business and social capital and current and constant dollars. The tabulations focus on capital spending intentions for the coming year, preliminary estimates of actual investment for the current year and the actual investment for the previous year. The investment data are gathered from about 28,000 establishments and establishment groups in Canadian businesses, institutions and governments.

Note: An initial release normally published in *The Daily* is also available in fax format. See list of fax services in the *Electronic Products and Services* section.

Inter-corporate ownership. Biennial. First issue 1975. Bilingual.

ISSN 0575-8823.

DDC 338.8/0971.

The directory presents information in an easy-to-read format, showing at a glance the hierarchy of subsidiaries within each enterprise structure. Entries for each corporation provide country of control, country of residence and percentage of voting rights held. In addition, the inclusion of a Standard Industrial Classification (SIC) and the province of head office for most Canadian resident corporations permits study by industrial sector. Additional indexes are available to buyers of the publication. In addition to the alphabetical index in each manual, indexes by country of control, province of head office, and SIC-C can be purchased for \$29.95 each. (These indexes have been available since 1992.)

Average prices of selected farm inputs
January 1994

Le prix moyen de certaines entrées agricoles
Janvier 1994

INTRODUCTION

This publication presents average prices for selected fertilizers as of January 5th, 1994.

This project has been possible due to Agriculture Canada, who have joined major manufacturers of the farm input price information. The new information has resulted in production of not only this publication, but a substantial improvement in the Farm Input Price Index as published in the Catalogue number 62-004.

The average prices can be used for calculating cost of production estimates in conjunction with corresponding input quantities. They can be also used for price comparisons among the regions, within one province or among regions of different provinces.

In January, some dealers are offering advance prices for fertilizers, although there are few actual sales depending on the product, the Atlantic Provinces, central Canada and British Columbia often recorded higher prices than the prairie regions. In general, prices of fertilizers containing phosphorus tend to be higher in January.

Comparing the average prices for the same product for the same region over time may be misleading as the averages can change due to a changed sample of dealers responding in each pricing period. For the time comparison of the farm input prices, please refer to the corresponding price indexes.

The regions match or are groupings of the Census of Agriculture regions. See page 11 for details.

Data requirements for average price calculation are more stringent than for a price index. Firstly, the prices have to be for very specific commodities. Thus for pesticides for example, a price must not only be for a product of the same concentration of active ingredients, but also for the same packaging, as the price for a 10 litre container may not be the same as for two 5 litre containers. Secondly, because price levels differ from year to year, the average prices are less reliable for the same sample size. The survey requires a larger number of respondents than it would for a price index, but sometimes, the average may still be based on a insufficient number of observations. In those instances the average price is either marked as suppressed.

INTRODUCTION

Cette publication présente les prix moyens de certains engrais en date du 5 janvier, 1994.

Ce travail n'aurait pas été rendu possible sans l'aide financière d'Agriculture Canada, qui a financé d'importantes améliorations aux renseignements sur les prix des entrées dans l'agriculture. Grâce à ces nouvelles améliorations, il a été possible non seulement de préparer la présente publication, mais aussi d'améliorer sensiblement l'indice des prix des entrées dans l'agriculture figurant dans le publication no 62-004 au catalogue.

Les prix moyens peuvent servir à calculer les estimations du coût de la production (avec les quantités correspondantes des entrées). Ils peuvent en outre servir à comparer les prix entre les régions à l'intérieur d'une province ou entre les régions de diverses provinces.

En Janvier, certains points de vente offrent des prix anticipés pour les engrais, même s'il y a peu de ventes actuelles. Selon le produit, les provinces de l'Atlantique, le centre du Canada et la Colombie-Britannique ont souvent enregistré des prix plus élevés que les régions des Prairies. En général, les prix pour les engrais contenant du phosphore tendent à être plus élevés en janvier.

La comparaison dans le temps des prix moyens pour le même produit et la même région peut être trompeuse; car les moyennes peuvent varier en raison du renouvellement de l'échantillon des marchands déclarants lors de chaque période de relevé des prix. Aux fins de comparaison des prix dans le temps, veuillez consulter les indices des prix correspondants.

Les régions correspondent aux régions normalisées du recensement de l'agriculture ou au consistant des regroupements. Voir page 11 pour le détail.

Les données servant au calcul des prix moyens sont soumises à des critères plus stricts que celles servant à un indice des prix. D'abord, les prix relevés doivent être ceux de produits bien précis. Pour les pesticides, par exemple, le prix relevé doit non seulement être celui d'un produit ayant la même concentration d'ingrédients actifs, mais aussi celui d'un emballage identique car le prix d'un contenant de 10 litres peut être différent de celui de deux contenants de cinq litres. Ensuite, parce que les niveaux des prix varient d'une année à l'autre, les prix moyens sont moins fiables pour un échantillon de même taille. L'enquête porte sur un échantillon plus nombreux de répondants que dans le cas d'un indice de prix, mais, peu importe que le prix moyen soit encore basé sur un nombre insuffisant d'observations. Dans ces cas, le prix moyen est soit marqué ou supprimé.

\$1,996 per homeowner household in 1987, cover the separate purchase of materials, as well as contract and labour expenditures. Data covering the 10 provinces are presented by size of area of residence, type of dwelling, value of dwelling, age of household head, income, age of the dwelling and length of occupancy.

Family food expenditure in Canada. Biennial. First issue 1982. Bilingual.

ISSN 0838- 3898.
DDC 339.4/863/0971.

The publication provides results based on a sample of 4,816 households that responded to the Food Expenditure Survey throughout 1990. This publication presents a series of tables showing the food expenditure patterns of households living in 17 selected metropolitan areas across Canada. It also includes a brief analysis of these patterns. Many tables are included which show average weekly expenditures classified by type of food purchased in stores and meals purchased in restaurants. The tables present expenditure information by a number of different socio-economic characteristics of the households, including income. Some information is included on quantities purchased and on purchases in different types of stores and restaurants.

62-555

Family expenditure in Canada. Irregular. First issue 1982. Bilingual.

ISSN 0838-3715.

DDC 339.4/7/0971.

The 1992 edition summarizes the results from the Survey of Family Expenditures in 1992, which was conducted across the 10 provinces as well as in Whitehorse and Yellowknife. This was the first national survey of family expenditures since 1986. The publication presents a synopsis of differences in expenditure patterns between 1986 and 1992, and between household groups and areas. It provides a comparison of results from all previous national surveys and offers an interesting menu of comprehensive data tabulations presenting categories of household expenditures for 1992 classified by various household characteristics, such as household income, size and type, and by various geographical areas.

Industry price indexes, 1986 = 100: users' guide / Statistics Canada, Prices Division, Industrial Prices. 144 p. 28 cm. 1990. Bilingual.

ISBN 0-660-54862-3.

DDC 338.5/28/0971

This publication describes two sets of price indexes, the Industrial Product Price Indexes (IPPI) and the Raw Materials Price Indexes (RMPI), and it covers four topics. The first section describes the different sets of data and how they are organized. The second section provides some help in choosing the most appropriate index for different uses and describes the main characteristics of the statistics. The third section explains how to link together series from different time periods. The final section gives some general information to users. The intention of this text and accompanying tables is to assist users of the statistics in their selection and use of the figures.

Restaurant, caterer and tavern statistics. Monthly. First issue, June 1967. Bilingual.

ISSN 0226-2320.

DDC 338.4/76479571.

This publication presents the monthly estimates of total receipts of restaurants, caterers and taverns both at the Canada and provincial levels. The estimates for restaurants are broken down into three categories - licensed, unlicensed and take-outs. Highlights of the month's estimates are commented upon along with an analysis of the market share of chain groups versus the independent operators. These highlights are accompanied by tables and graphs showing the year-over-year change for the reference month both in dollar and percentage terms. Revised estimates for the previous month along with the accumulated year-to-date estimates are also outlined.

Leisure and personal services. Annual. First issue 1984/1986. Bilingual.

ISSN 0838-2174.

DDC 338.7/61/0971.

A companion to *Business Services* (63-232), this publication covers Amusement and Recreation (major group 96) and Personal and Household Services (major group 97) of the 1980 Standard Industrial Classification. Included are three years of financial information and the latest two years of revenue and expense detail, market and employment information on 26 industries, such as golf courses, skiing facilities, film/video industry, barber and beauty shops, dry cleaning and funeral services. Revenue information is presented for Canada and the provinces. Information on these major groups for the years 1982-1984 and 1983-1985 are published in *Selected service industries in Canada* (no. 63-231). The publication includes definitions, methodology and data quality notes.

63-234

Architectural, engineering and scientific services in Canada. Annual. First issue 1988. Bilingual.

ISSN 1183-4447.

DDC 338.4/762/000971.

The publication presents the results of the 1988 surveys of architectural, consulting engineering and scientific and

technical services. There are three sections in the publication, one for each of the industries surveyed. Each section includes a description of the industry, a discussion of methodology, an analysis of the data, coverage and data quality, as well as explanatory notes related to the statistical tables. For each industry, tables showing detailed statistics by province or region are followed by tables detailed according to revenue size group. The tables have been numbered in such a way as to facilitate comparisons between industries, and also between provinces and revenue size groups within each industry. **Note:** The survey was not conducted in 1990 and there will not be a 1990 edition. The publication will resume with the 1991 edition.

63-532

Funeral directors. Quadrennial. First issue 1976. Bilingual.

ISSN 0575-8629.

DDC 338.4/736375/0971.

The publication presents data on funeral services: receipts by source and type of service, average funeral cost, inventory, purchases and expenditures. It also includes methodology, data quality, definitions and an analysis. Information for previous survey years is contained in occasional publications with varying catalogue numbers from 63-532 in 1972, 63-520 in 1968, 63-511 in 1964 and 63-502 in 1956. **Note:** This publication is suspended since the 1984 issue.

63-541

Retail commodity survey, 1989. 171 p. 28 cm. 1991. Bilingual.

ISBN 0-660-54865-8.

381./1/0971.

The Retail Commodity Survey for 1989, containing broadly based data on the patterns of consumer demand in Canada, is the most comprehensive study completed since 1974. It provides benchmark data on the type of goods Canadians buy, and allows analysis of change in buying habits and retailing patterns. The survey was designed in consultation with members of the retail business community. It reflects more detailed information than is normally available from the accounting records of Canadian retailers. It covers approximately 200 commodity groupings sold by 16 types of retail outlets, in all the provinces and the territories. Although the proportion of expenditures on major retail commodities did not change appreciably between 1974 and 1989, the survey reflects a number of shifts in consumer preferences. For example, food sales represented about the same proportion of retail sales as in 1974, but poultry

COMMERCE, CONSTRUCTION, FINANCE AND PRICES

was a much more significant component of the food basket at the expense of other meat products. Other changes confirmed by the survey are the shifts in buying habits away from general merchandise stores, including department, variety and general stores, towards specialty retailers.

Interprovincial wholesale commodity survey, 1990.
 155 p. 28 cm. 1993. Bilingual.

ISBN 0-660-54886-0.

381.2/0971.

The Interprovincial Wholesale Commodity Survey for 1990 is the first report describing the type of commodities handled by wholesalers and their geographical patterns. This publication presents, for approximately 100 commodity groupings, estimates on the origin and the destination by province/country of wholesale merchants' shipments for 9 major trade groups based on the 1980 Standard Industrial

Classification. The publication also includes data analysis, methodology and data quality.

Operating results, men's retail clothing stores.
 Irregular. First issue 1974. Bilingual.

ISSN 0829-7401.

DDC 381/.45687/088041.

This publication presents for men's retail clothing stores operating results, providing ratios of gross profit, detailed expense items and net profit as a percentage of net sales for incorporated and for unincorporated firms. These ratios are stratified by sales size and by province or region wherever possible. In order to enhance the usefulness of the data, both the "mean" and the "median" are shown for each financial ratio. Includes bibliography.

CONSTRUCTION AND HOUSING

64-001

Building permits. Monthly. First issue, Dec. 1922. Bilingual.
ISSN 0318-8809.
DDC 338.4/769/00971.

This monthly publication provides information about the building construction sectors. In addition to data on the number and value of building permits issued by Canadian municipalities, this publication provides information on the average value of dwellings, the number and value of mobile homes, and permits issued for building renovation. Data are presented at national and provincial levels as well as for census metropolitan areas, large urban centres and economic regions. With the use of graphs, summary tables and a short analysis, the publication describes current activity and trends in the residential and non-residential building construction sectors.

Note: An initial release normally published in *The Daily* is also available in fax format. See list of fax services in the *Electronic Products and Services* section.

Construction in Canada. Annual. First issue 1951/1953. Bilingual.
ISSN 0527-4974.
DDC 338.4/769/00971.

This publication contains data on the total value of construction put in place. The analysis includes data for construction in both current and constant dollars for new and repair construction and the type of structure by sector and by province. Seventy different types of structures are covered. The publication also devotes a section on labour content and cost of materials. The tabulations focus on capital spending intentions for the coming year, preliminary estimates of actual investment for the current year and the actual investment for the previous year.

67-001

Canada's balance of international payments. Quarterly. First issue 1953. Bilingual. (System of national accounts).

ISSN 0847-074X.

DDC 382.1/7/0971

The publication presents Canada's transactions with non-residents on a quarterly basis. These transactions are grouped under two main accounts: the current account for merchandise, services, investment income and transfers; the capital account for borrowings and investments abroad. The transactions are distributed among six geographical areas (quarterly and annually) for the current and two previous years with comments on developments in the current quarter. The fourth quarter issue includes: more detailed breakdowns of some accounts, annual historical data for six geographical areas back to 1973 and, for total non-residents, from 1927.

Note: An initial release normally published in *The Daily* is also available in fax format. See list of fax services in the *Electronic Products and Services* section.

67-002

Canada's international transactions in securities. Monthly. First issue 1935. Bilingual.

ISSN 1183-4315.

DDC 332.6/73/0971.

The publication presents trading in Canadian and foreign bonds and stocks with non-residents. Trading in outstanding securities is presented on a monthly basis, while new issues and retirements are quarterly. Monthly gross and net transactions are presented with the United States, United Kingdom, Continental Europe, Japan and other countries by type of issue; data for the previous two years are included. Highlights are given for the current period. The December issue contains historical data and an annual review.

Note: An initial release normally published in *The Daily* is also available in fax format. See list of fax services in the *Electronic Products and Services* section.

Canada's international transactions in services. Annual. First issue 1986/1987. Bilingual. (System of national accounts).

ISSN 0840-5859.

DDC 382.1/7/0971

This comprehensive source on international service transactions contains aggregate data from 1969 and detailed data for the most recent years. Major categories are travel, freight and shipping, business services, government transactions and miscellaneous services. A description of sources and methods is also provided. Business services are categorized by geographical area, industry, country of control and whether or not with foreign affiliated companies. New with the 1988/89 issue are experimental breakdowns for over 20 additional countries and country groups and a technical note explaining the estimation of financial services, particularly banking and securities transactions.

GOVERNMENT FINANCE

68-508

FORTHCOMING

Public sector assets and liabilities, historical overview / Statistics Canada, Public Institutions Division, System of National Accounts Branch. Bilingual.

Based on the Financial Management System, Public Institutions Division offers, for the first time, a historical overview of asset and liability statistics for the federal, provincial/territorial and local governments and Government Business Enterprises in Canada. Also included are consolidated balance sheets, guaranteed debt and Canada and Québec pension plan balance sheets. For the first time, a historical overview presenting financial information for governments that is comparable between governments and over a period of time. **Note:** For further information, contact Patti Phillips (613) 951-0767; FAX (613) 951-0661.

Price: To be announced

68-512

Public finance historical data, 1965/66-1991/92 / Statistics Canada, Public Institutions Division, System of National Accounts Branch. 208 p. 28 cm. 1992. Bilingual. ISBN 0-660-54872-0. DDC 336.71.

The Public Institutions Division offers twenty-six years of government revenue and expenditure statistics for the federal, provincial and local governments in Canada based on a common universe, classification, concepts and methods. Also included are consolidated revenue and expenditures, which provide an indication of the total size of government by eliminating intergovernmental revenues and expenditures. This is the only publication offering comprehensive statistics for all three levels of government in one volume. For the first time, using one Statistics Canada publication you will be able to trace the size, structure and composition of governments in Canada as reflected by their financial statistics. **Note:** Data in this publication are available on diskette. For further information, please contact Patti Phillips (613) 951-0767; FAX (613) 951-0661.

LABOUR FORCE

71-001

The labour force. Monthly. First issue, Nov. 1945. Bilingual.

ISSN 0380-6804.

DDC 331.11/0971.

This monthly presents seasonally adjusted and unadjusted estimates of labour force, employment and unemployment, with unemployment and participation rates analyzed by selected geographic, demographic and occupational variables. It includes updates to historical series contained in 71-201, occasional special analyses and a sample questionnaire, definitions, a list of economic regions and a bibliography.

Note: An initial release normally published in *The Daily* is also available in fax format. See list of fax services in the *Electronic Products and Services* section.

Annual report of the Minister of Regional Industrial Expansion under the Corporations and Labour Unions Returns Act. Part II, Labour unions. Annual. First issue 1963. Bilingual.

ISSN 0228-345X.

DDC 331.88/0971.

The report contains statistical summaries and analyses of the activities of all labour unions operating in Canada who are required to report under the Act. Data presentation utilizes both tabular and graphical displays to provide information covering membership, degree of unionization (both male and female), and financial data. The extent of the application of organized labour in Canada with international unions is outlined.

Labour force annual averages. Annual. First issue 1990. Bilingual.

ISSN 1181-6627.

DDC 331.12/5/0971.

The purpose of this annual publication is to provide users of Labour Force Survey data with a convenient source for annual averages. The publication presents an overview of the labour force during the period between 1980 and 1990. It contains a brief description of major developments as well as three tables giving 11 years of annual averages for selected labour force characteristics. It also presents annual average estimates of some provincial breakdowns as well as more detailed sub-provincial estimates. Methodological notes and definitions of concepts are also provided.

NEW NEW NEW NEW NEW

Women in the workplace / Nancy Zukewich Ghalam. 56 p. 28 cm. 1993. E and F.

ISBN 0-660-147322-X.

DDC 331.4/0971.

This publication analyzes the rapid increase in the number of working women and documents the many other characteristics of women's work experience that have been slower to change. For example, women still tend to be concentrated in traditionally female occupations. Women continue to earn considerably less than men, irrespective of their educational qualifications. Moreover, even when employed, most women still maintain primary responsibility for household work and family matters. This second edition is a unique source of data and analysis on the role of women in today's labour market and on the issues that confront working women. This report includes over 50 pages of Statistics Canada data, supported by 40 tables and 25 charts - some of it never published before.

71-535 no. 1

Labour market activity of disabled persons in Canada / by D. Gower. (Labour analytic report no. 1). 96 p. 28 cm. 1988. Bilingual.

ISBN 0-660-53420-7.

DDC 331.5/9/0971.

How likely is it that a disabled person is active in the labour market? To what extent is this person's participation influenced by education and by degree of disability? Using data from the Canadian Health and Disability Survey (conducted in October 1983 and June 1984), this study answers such questions.

Flux: two years in the life of the Canadian labour market: findings of the Statistics Canada Labour Market Activity Survey, 1986-87 / prepared by David P. Ross and Richard Shillington. 101 p. 28 cm. 1991. E. and F.

ISBN 0-660-14192-2.

DDC 331.11/0971.

The main object of this report has been to expose to a wider public the extent of the data recorded by the Labour Market Activity Survey. As such, it represents primarily a "fact" book, concerned with what happened, rather than a detailed analysis of the findings, or an attempt to explain them. The Labour Market Activity Survey tracked the same people over time (in this case a two-year period), and demonstrated just how elastic both the working-age population and the labour market are. It is clear now that when reference is made to the labour force at different times, even within the span of a year, that force represents a different size and mix of working-age Canadians each time. This is not to deny the existence of a substantial fixed "core" at the centre, but there is tremendous elasticity at the periphery.

73-001

Unemployment insurance statistics. Monthly. First issue, Feb./June 1942. Bilingual.

ISSN 0829-1098.

DDC 368.4/4/00971.

This publication reports on the operation of the Canadian Unemployment Insurance Program. Tabulated are data on claims received by Employment and Immigration Canada, the number of beneficiaries, and benefit payments. The tables show statistics detailed by province, age and sex of the beneficiary, average and total payments made to beneficiaries, and other related information such as beneficiaries' insurable earnings prior to making a claim, the number of disqualifications, and the total number of beneficiaries who received benefits during a calendar year. In addition, requests may be made for tabulations which provide information for census divisions or for census metropolitan areas. **Note:** Unpublished data, including statistics for small areas defined by data users, are also available on request. For special tabulations or for further information, contact André Picard (613) 951-4045 or Carole Lacroix (613) 951-4039, Labour Division.

Note: An initial release normally published in *The Daily* is also available in fax format. See list of fax services in the *Electronic Products and Services* section.

Unemployment insurance statistics, annual supplement. Annual. First issue 1985. Bilingual.

ISSN 0828-3176.

DDC 368.4/4/00971.

The annual supplement provides information on the evolution of the Canadian Unemployment Insurance Program, the technical notes for the monthly report, and historical statistics (a few series dating back to the early 1940's). The unemployment insurance statistics published in the annual supplement include data on the number of claims received and allowed, the number of benefit weeks paid, total benefit disbursements, average weekly benefits, the number of disqualifications, and the number of beneficiaries. Where applicable, the data are detailed by sex, type of benefit, month, and province. In

EMPLOYMENT, UNEMPLOYMENT AND LABOUR INCOME

In addition, this publication features complementary statistics, including wages and salaries paid in Canada, maximum and average weekly unemployment insurance benefits expressed in current and 1986 dollars and average weekly earnings.

EMPLOYEE PENSION PLANS

74-001

Quarterly estimates of trustee pension funds. Quarterly. First issue, Jan. 1973. Bilingual. ISSN 0700-205X. DDC 331.25/2/0971.

This publication provides estimates for Canada of the income, expenditures and asset portfolios of trustee pension funds. The series began with the first quarter of 1970. It provides advance estimates of the principal statistics of the annual Survey of Trustee Pension Funds (74-201). It also includes a data analysis. **Note:** Special tabulations are available to meet specific needs. For further information about publication 74-001 or the special tabulations, please contact Thomas Dufour (613) 951-2088 or Johanne Pineau (613) 951-4034 or fax (613) 951-4087.

74-201

Trustee pension funds, financial statistics. Annual. First issue 1958. Bilingual. ISSN 0835-4634. DDC 331.25/2/0971.

This publication presents information on the income, expenditure and assets of all trustee pension funds in Canada in both the public and private sectors. Data are presented at the Canada level. The publication contains an analysis of the funds based on the size of the fund, the number of members and the type of benefit and trust arrangement. It is a continuation of a series of reports produced since 1957. As a single pool of investment capital in Canada, these funds are surpassed in size only by the aggregate reserves held by the chartered banks. **Note:** Special tabulations are available to meet specific needs. For further information about publication 74-201 or the special tabulations, please contact Thomas Dufour (613) 951-2088 or Johanne Pineau (613) 951-4034 or fax (613) 951-4087. **Note:** As a result of budget cuts for federal government departments, no reports were produced for the 1991 reference period. The 1994 issue, containing 1992 data, is the first publication produced since that for 1990.

74-401

Pension plans in Canada. Biennial. First issue 1970. Bilingual. ISSN 0701-5488. DDC 331.25/2/0971.

This publication provides information on all occupational pension plans sponsored by employers in both the public and private sectors. Information is presented on male and female membership, provincial distribution of members, labour force coverage, eligibility conditions, contribution and benefit rates, retirement ages, contributions paid into the plans and vesting and indexing provisions. Also included are two special sections on recipients of pension benefits and contributors to RRSPs. **Note:** Special tabulations are available to meet specific needs. LABOUR ANALYSIS AND EMPLOYMENT ISSUES

75-001E

Perspectives on labour and income. Quarterly. First issue, Summer 1989. E. and F. ISSN 0840-8750. DDC 331.1/0971.

This quarterly publication brings together and analyzes a wide range of labour and income data. Each issue presents approximately six articles covering topics such as youth in the labour market, pensions and retirement, work arrangements, education and training, and trends in the family income, to name a few. The publication also devotes a section to new products, surveys, research projects and conferences. Another section consists of more than 50 up-to-date labour and income statistical indicators, by province. Every autumn and every spring, the publication offers a supplement that reviews recent labour market trends. And the winter issue contains an annually updated index of published articles. **Note:** Individual issues released since January 1990 have been indexed, but specific contents have not been listed here because of space constraints.

FORTHCOMING

Education quarterly review. Quarterly. Bilingual.

This publication provides statistical data and analysis from surveys through a combination of articles and summary statistics. Descriptions of data release and new survey developments are included, as are data and statistical analyses from elementary-secondary, postsecondary and adult education and training levels. Characteristics examined include enrolment, staff and finance for schools, universities and colleges. Variables include age, gender, citizenship, degrees and diplomas, salary and source of education funding.

Price: To be announced

81-204

Universities, enrolment and degrees. Annual. First issue 1949/50. Last issue 1990. Bilingual. **Discontinued.** ISSN 0706-3652. DDC 378.71.

This publication provides university enrolment and degree data by level, registration status, field of study, province and institution. The data highlight a number of student characteristics such as sex, age, mother tongue, immigration status and country of citizenship. **Note:** Replaced by *Education quarterly review* no. 81-003 and *Education in Canada* no. 81-229.

Financial statistics of education. Annual. First issue 1954/56. Last issue 1989/90. Bilingual. **Discontinued.** ISSN 0703-9328. DDC 379.1/1/0971.

This publication provides five years of consolidated financial statistics on all levels of education. It highlights revenues by direct source of funds and expenditures by object of various public and private educational institutions such as elementary and secondary schools, universities, colleges and vocational schools. Also included are financial statistics on government expenditures on education in Canada and abroad. Charts and tables display data by level of education and by province/territory. To put educational information into perspective, some of the major expenditure items are related to socio-economic indicators such as gross domestic product, population, personal income, etc. There are also sections in this publication devoted to definitions and to details on the survey methodology used to gather the data. **Note:** Replaced by *Education quarterly review* no. 81-003 and *Education in Canada* no. 81-229.

Human resource training and development survey results, 1987 / Edith Rechnitzer. 51 p. 28 cm. 1990. E. and F.

ISBN 0-660-13754-2.

DDC 658.3/124/0971.

This report summarizes the results of the survey. The findings are presented in three parts. The first provides information on companies and their activities relating to human resource planning. The second presents data on companies providing training, their objectives in training, their success in achieving these goals, participation in training, occupational groupings of participants, and type of program they were taking. The third part deals with the amount that companies spent to train employees. The report includes a description of methodology and a glossary.

HEALTH REPORTS

82-003

Health reports / Statistics Canada, Health Statistics Division. Quarterly. First issue 1989. Bilingual.

ISSN 0840-6529.

DDC 614.4/271.

The report combines several previously existing health publications into a single comprehensive and easy-to-read journal-style report. Issued four times a year, this publication incorporates the best and most widely used features found in previous health publications. With concise text, distinctive charts and easy-to-read tables, it contains incisive analysis and key statistics. Each issue features: an up-to-date list of recently released databases and publications; highlights of newly released data; analytical feature articles that support your understanding of statistical information; directions on how to obtain specialized tabulations and custom data services directly from the Health Statistics Division at Statistics Canada. Every edition will present notable statistics and informative feature articles.

DDC 362.1/6/0971.

Residential care facilities are listed alphabetically according to municipality. In this document, only residential special care facilities are included which maintain four or more beds for residents other than members of staff and which provide care to at least one resident. These facilities are, in general, maintained for people chronically ill or disabled who reside there more or less permanently, in contrast to, for example, a hospital where patients are accommodated on the basis of medical need and are provided with continuing medical care and supporting diagnostic and therapeutic services. Some psychiatric institutions are included here. **Note:** Replaced by publication 83-240.

Cancer in Canada. Annual. First issue 1984. Last issue 1988. Bilingual. **Discontinued.**

ISSN 1180-3053.

DDC 614.5/999/0971.

This report demonstrates the continuing progress being made by several provinces to improve cancer registration procedures, and thereby provide a more accurate picture of cancer patterns across Canada. Cancer incidence data, the principal type of data included in this report, are based on reports from provincial and territorial cancer registries. Data on cancer deaths taken from national mortality data, and data on hospital separations due to cancer, are also presented in formats which facilitate comparisons with the cancer incidence data. Taken together, these data describe the extent of cancer in Canada, indicate the different types of cancer that occur, and show how cancer patterns vary by province, age and sex. **Note:** Replaced by publication 82-218.

Life tables, Canada and provinces. Annual. First issue 1985/1987. Last issue 1985/1987. Bilingual. **Discontinued.**

ISSN 1180-307X.

DDC 304.6/4571.

This report contains tables generated on the basis of age-sex-specific mortality rates for Canada and the provinces prevailing in the period studied. For all the provinces, except Prince Edward Island, detailed tables by single years of age, for males and female as well as tables for the subdivisions of the first year of life, have been produced. With respect to Prince Edward Island, however, because of the smallness of the required frequencies involved, only abridged tables with five-year groupings have been produced. **Note:** Replaced by publication 84-537.

Per Year

Canada: \$15.00

Cancer in Canada. Annual. First issue 1989. Bilingual.

ISSN 1195-406X.

DDC 614.5/999/0971.

This report demonstrates the continuing progress being made by several provinces to improve cancer registration procedures, and thereby provide a more accurate picture of cancer patterns across Canada. Cancer incidence data, the principal type of data included in this report, are based on reports from provincial and territorial cancer registries. Data on cancer deaths taken from national mortality data, and data on hospital separations due to cancer, are also presented in formats which facilitate comparisons with the cancer incidence data. Taken together, these data describe the extent of cancer in Canada, indicate the different types of cancer that occur, and show how cancer patterns vary by province, age and sex. **Note:** Previously 82-003S suppl. no. 8.

PUBLIC HEALTH

82-544

Cardio-vascular disease in Canada / by E. Nicholls, C. Nair, L. MacWilliam, J. Moen and Y. Mao. 181 p. 28 cm. 1986. Bilingual.

ISBN 0-660-52905-X.

DDC 616.1/2/00971.

This publication is the first comprehensive report in 15 years, about health risk number one. With 25 illustrative charts, it reviews major causes of death in Canada to put heart disease in context. Then, the causes of heart disease are examined in detail (heart attack, stroke, diseases of the arteries, ischemic heart disease, etc.). A look at hospital discharge rates is also included. The study also gives a global perspective, comparing Canada with other industrialized countries like the U.S., Switzerland and Japan.

Canadian classification of diagnostic, therapeutic and surgical procedures / Statistics Canada, Health Division, Nosology Reference Centre. 2nd print. [with corrections and additions]. 604 p. 24 cm. 1986. E.

ISBN 0-660-11938-2.

DDC 616/.0012.

This Classification (CCP) was originally produced by Statistics Canada in 1978 to meet Canadian needs for a procedural classification to be used in conjunction with the World Health Organization's International Classification of Diseases, Ninth Revision (or ICD-9). The CCP, which was published in both English and French, includes a tabular list, divided into 18 chapters of categories and subcategories, and an alphabetical index. Since the initial implementation of the CCP in 1979, all of the errata produced up to that time have been incorporated. With advances in surgical technology, such as the increased use of the endoscopic surgical approach, it has been necessary to produce two additional errata/updates since the reprint, the most recent being in early 1992. Recently a second printing of the French version became necessary. As with the English, all previously issued errata have been incorporated into the second printing and some previously undetected typographical errors have been corrected. In addition, the new and modified rubrics of the 1992 update have been included in the second printing and may be identified by a special diamond symbol.

Atlas of cancer mortality in British Columbia, 1956-1983 / Pierre R. Band, John J. Spinelli, Richard P. Gallagher, William J. Threlfall, Vincent T.Y. Ng., Mary L. McBride, T. Gregory Hislop, Andrew J. Coldman. 103 p. 28 cm. 1989. Bilingual.

ISBN 0-660-53411-8.

DDC 912/.161699409711.

During the period 1956 to 1983, a total of 52,891 men and 40,708 women died in British Columbia as a result of cancer. The atlas presents these deaths by 24 major organ systems and geographically by 75 school districts. Mortality for each type of cancer for each school district is compared to the provincial mortality rate for each type of cancer. The results of these comparisons are depicted on maps. The atlas also contains a discussion of major risk factors for each type of cancer presented. It will be a useful addition to reference material for public health workers and educators.

Blindness and visual impairment in Canada / prepared by Kathleen Naeyaert. 76 p. 28 cm. 1990. Bilingual.

ISBN 0-660-54858-5.

DDC 362.4/1/0971.

The data are from the Health and Activity Limitation Survey (HALS), a post-censal survey of persons with disabilities. This report compares demographic and socio-economic characteristics of the 450,000 adults with vision impairment who live in Canadian households and those of the non-disabled adult population. It also discusses the barriers faced in everyday activities by people with vision impairment.

Note: For print-handicapped Canadians, an audio cassette can be ordered by contacting: Janet Pantalone, Post-censal Surveys Program, (613) 951-2050.

83-237

Residential care facilities, aged. Annual. First issue 1990/91. Bilingual.

ISSN 1195- 4167.

DDC 362.1/6/0971.

The term "residential care facilities" refers to facilities with four beds or more, funded, licensed or approved by provincial/territorial departments of health and/or social services. This report, however, focuses only on facilities for the aged which include homes for the aged, nursing homes, lodges for senior citizens and rest homes. Certain facilities such as apartments or other homes for seniors not providing any level of care were not included.

List of residential care facilities. Annual. First issue 1992. Bilingual.

ISSN 1195-4051.

DDC 362.1/6/0971.

Residential care facilities are listed alphabetically according to municipality. In this document, only residential special care facilities are included which maintain four or more beds for residents other than members of staff and which provide care to at least one resident. These facilities are, in general, maintained for people chronically ill or disabled who reside there more or less permanently, in contrast to, for example, a hospital where patients are accommodated on the basis of medical need and are provided with continuing medical care and supporting diagnostic and therapeutic services. Some psychiatric institutions are included here.

84-536E

Marriage, divorce and mortality: a life table analysis for Canada and regions, 1980-1982 / by O.B. Adams and D.N. Nagnur. 94 p. 28 cm. 1988. E. and F.

ISBN 0-660-13081-5.

DDC 306.8/0971.

This report presents indicators of the lifetime incidence and duration of the events of marriage, divorce, widowhood and remarriage in the Canadian population. These indicators are derived from the application of single and multi-state life table techniques to the age-sex-marital status-specific rates of these events. The report contains detailed tables for Canada, and summary indicators for Canada and regions for the 1980-1982 and 1984-1986 periods. Selected international comparisons are presented and Canadian trends since the 1970-1972 period are examined as well.

FORTHCOMING

Life tables, Canada and provinces. Occasional. Bilingual. ISSN 1195-4116.

This report contains tables generated on the basis of age-sex-specific mortality rates for Canada and the provinces prevailing in the period studied. For all the provinces, except Prince Edward Island, detailed tables by single years of age, for males and female as well as tables for the sub-divisions of the first year of life, have been produced. With respect to Prince Edward Island, however, because of the smallness of the required frequencies involved, only abridged tables with five-year groupings have been produced. **Note:** Previously 82-003S suppl. no. 13.

Price: To be announced

84-544

Occupational mortality in British Columbia, 1950-1978 / by R.P. Gallagher, W.J. Threlfall, P.R. Band, J.J. Spinelli and A.J. Coldman. 72 p. + 33 microfiches. 28 cm. 1986. Bilingual.

ISBN 0-660-52872-X.

DDC 363.1/1/09711.

This publication is the first province-wide analysis of occupational mortality risks in Canada. The authors used information on usual lifetime occupation recorded on death registrations for residents of British Columbia who died between 1950 and 1978. Proportionate mortality ratios (PMR) were used to detect unusual patterns of mortality. Although the data represent only one province, the wide range of occupations in British Columbia makes the publication useful to the country as a whole.

Sound recording. Annual. First issue 1984. Bilingual.

ISSN 0847-1223.

DDC 338.4/7789912/0971.

This publication provides details on all aspects of the Sound Recording Survey including highlights and methodology. The survey is a census of all record and label companies in Canada engaged in: the production, leasing, licensing and sale of masters; the release and/or sale of recordings in various formats (i.e. CD, tape). The purpose of the publication is to disseminate data which will provide users with the information required for corporate decision-making, monitoring programs and reviewing policies. The tabulations focus on releases and sales of record and label companies during each financial year. Data are broken down by province (Quebec, Ontario, other), size of business, origin of financial control, and Canadian content. There is also a summary of the financial situation of record and label companies. A market estimate at the Canadian level, based on data from various surveys within Statistics Canada, is also provided. The reference section includes a list of other data sources.

87-210

Book publishing. Annual. First issue 1985/86. Bilingual.

ISSN 1181-6635.

DDC 338.4/70705/0971.

This publication contains data on book publishing and on exclusive distribution of books provided by firms having attained a certain level of revenues. Survey methodology and described. Figures on published titles and sales in Canada, based on the reporting firms' financial year, are usually broken down by size, language, financial control and province of the firm. Other tables present figures on the financial aid awarded to publishers, their employment data and their average financial position. Data on exclusive agency sales by publishers and distributors

EDUCATION, HEALTH, CULTURE AND SOCIAL ISSUES

give information on another facet of the book industry in Canada. Since 1987-88, tables on publishing and sales of Canadian-authored titles as well as figures on sales outside Canada have been added. This publication, which summarizes the book publishing data bank for a particular year, provides users with the information required for corporate decision-making, monitoring programs and reviewing policies.

Culture statistics, the economic impact of the arts and culture sector / Statistics Canada, Education, Culture and Tourism Division. 34 p. 28 cm. 1986. Bilingual.

ISBN 0-660-52880-0.

DDC 338.4/7306/0971.

This study addresses the matter of the economic value of the activities of this sector. Through an input-output model, the contribution of arts and culture to such key economic indicators as domestic output, Gross Domestic Product, and employment is explored. Estimates of direct, indirect, and induced economic impact upon these variables are provided for each of the major arts and culture sectors of written media, film, broadcasting, sound recording, performing arts, heritage institutions and libraries, government programs, and the wholesaling and retailing of arts and culture products. The study focuses on economic impact at the national level for 1981, with annual projections to 1984.

88-202

Industrial research and development, ... intentions. Annual. First issue 1982. Bilingual.

ISSN 1192-3385.

DDC 607/.2/71.

This report summarizes research and development (R&D) activities performed and funded by Canadian business enterprises and industrial research institutes and associations. The data are used, for instance, to plan and evaluate R&D tax incentive programs, to provide indicators of the state of industrial innovation and to complement national aggregates for scientific R&D expenditures and personnel. Among the topics covered are current and capital expenditures on research and development, energy R&D expenditures by area of technology, R&D expenditures as a percentage of company sales, sources of funds for intramural R&D, personnel engaged in R&D, and foreign payments made and received for technological services. Most historical tables are presented for the latest five years and disaggregated by 46 industrial groupings, size of R&D program, employment size, sales size, country of control, and by province. Specific enquiries should be directed to the author division.

Family and friendship ties among Canada's seniors: an introductory report of findings from the General Social Survey /by Leroy O. Stone, with the assistance of Hubert Frenken and Edward Dak Ming Ng. 76 p. 28 cm. 1988. Bilingual.

ISBN 0-660-53415-0.

DDC 362.6/0971.

This national study looks at the kinds of family and friendship links upon which seniors rely for support. With an analysis of data collected in the 1985 General Social Survey, the publication shows how the network of family and friendship ties which one can expect to have varies systematically over the course of one's life. The study demonstrates the substantial levels of help given to others by seniors, as well as the help they receive.

The changing labour market for postsecondary graduates, 1975-1984 / W. Garnett Picot and Ted Wannell, Doug Lynd. 86 p. 23 cm. 1987. Bilingual.

ISBN 0-660-52896-7.

DDC 331.11/423/0971.

This publication examines the growth in employment for graduates from various disciplines, trends in the supply of graduates and labour market conditions (salary and unemployment rates) for graduates in selected disciplines in 1978 and 1984. It also reviews employment trends in the economy as a whole between 1975 and 1984 and places changes in labour market conditions for graduates within this context. The study is intended to inform the public and contribute to a better understanding of issues by providing systematic quantitative analysis of changing labour market conditions. Major variables in this report include number of graduates by field, employment and salary, and unemployment statistics on graduates by field of study, and employment trends by occupation and industry for Canada and in some cases Canada excluding Quebec. This publication includes 14 tables and 32 charts.

Canadians in the pre-retirement years: a profile of people aged 55-64 / Colin Lindsay, Mary Sue Devereaux. 43 p. 28 cm. 1991. E. & F.
ISBN 0-660-13995-2.
DDC 305.24/4/0971.

While much has been written about the elderly in Canada, less is known about those Canadians who are nearing the age of 65. The report attempts to fill the gap by profiling the population aged 55-64. What emerges is a portrait of a group in transition. On one hand, people in this age range exhibit many characteristics of the working-age population. At the same time, though, several traits associated with advancing age are beginning to emerge. The information in this report has been integrated from a variety of Statistics Canada and

other government sources to provide an overview of the demographic characteristics, family status, health, employment, income, housing, and activity patterns of 55-64-year-olds.

NEW NEW NEW NEW NEW

Lone-parent families in Canada / Colin Lindsay. 47 p. 28 cm. 1992. E. and F.
ISBN 0-660-14195-7.
DDC 306.85/6/0971.

The structure of family living in Canada is changing. The past several decades have seen significant increases in common-law unions, the incidence of divorce and remarriage and the number of blended families. As well, the number of people who are living alone has grown substantially. One of the most dramatic changes has been the rise in the number of lone-parent families. Currently, there are nearly one million lone-parent families in Canada, representing one of every five families with children. This report drew upon a variety of

EDUCATION, HEALTH, CULTURE AND SOCIAL ISSUES

Statistics Canada sources to provide an overview of the demographic and family status, employment, income, housing, and activity patterns of lone parents and their families.

A portrait of families in Canada / Pina La Novara. 56 p. 28 cm. 1993. E. and F.
 ISBN 0-660-15167-7.
 DDC 306.8/5/0971.

In the past decade, there have been significant changes in the structure of family living in Canada. The most dramatic include the rise in the number of common-law unions, lone-parent families and married-couple families without children living at home. For example, in 1991, 77% of all families were headed by married couples and 10% were headed by common-law couples. Nearly one million lone-parent families now live in Canada and over

80% are headed by women. This report was drawn from a variety of sources to give an overview of the demographic and family characteristics, employment, income, housing, family violence, and activity patterns of families.

Canadian National Child Care Study: parental work patterns and child care needs / Donna S. Lero ... [et al.]. 145 p. 28 cm. 1992. E and F.

ISBN 0-660-14293-7.

DDC 362.7/12/0971.

This document focuses on the relationship between parents' work lives and child care. It has two major objectives. The first is to describe parental work patterns including parents' employment status, the prevalence of full- and part-time work, occupational characteristics, and work schedules. The second major objective is to use the data on parental work patterns and work schedules to accurately estimate child care needs.

Language, tradition, health, lifestyle and social issues / Statistics Canada, Post Censal Surveys Program. 247 p. 28 cm. 1993. Bilingual.

ISBN 0-660-54891-7.

DDC 306/.08997071.

The information in this publication was obtained from the 1991 Aboriginal Peoples Survey. Data tables include information for Canada, the provinces and territories, 11 selected census metropolitan areas, and on and off Indian reserves and settlements; data are tabulated for adults and children by both total Aboriginal population and by specific Aboriginal group. This survey, conducted in the months following the 1991 Census, included persons who identified with at least one Aboriginal group (North American Indian, Métis, Inuit or a specific group such as Cree or Inuvialuit) and/or who reported being registered under the Indian Act of Canada. Series 1 (Tables 1.1 - 1.2) are summary tables showing the total population reporting Aboriginal identity for each Aboriginal group, including those persons living on and off Indian reserves and settlements. Series 2 (Tables 2.1 - 2.7) provides a detailed breakdown of the language and traditional activities for each Aboriginal group. Series 3 (Tables 3.1. - 3.7) contains similar data but for children aged 5-14 years. Series 4 (Tables 4.1 - 4.7) contains health, lifestyle and social issues for the adult population for each Aboriginal group. Series 5 (Tables 5.1 - 5.7) shows the health characteristics of children (under 15) for each Aboriginal group.

This publication highlights information on schooling, work and related activities, income, household expenses and mobility that was collected in the 1991 Aboriginal Peoples Survey. Respondents in this survey were those who identified with an Aboriginal group, that is, they considered themselves to be North American Indian, Métis or Inuit. Data tables in this publication include information for Canada, the provinces and territories, and 11 selected census metropolitan areas. Data are tabulated for adults and children by both total Aboriginal population and by specific Aboriginal group.

POPULATION ESTIMATES, PROJECTIONS AND ANALYSIS

91-002

Quarterly demographic statistics. Quarterly. First issue, Jan./Mar. 1987. Bilingual.

ISSN 0835-4057.

DDC 304.6/0971.

This publication presents quarterly estimates of population for Canada, the provinces and territories as well as statistics on the following components of population change: births, deaths, marriages, immigration, emigration and interprovincial migration, the latter by origin and destination. Quarterly estimates of population are provided for the last eight years prior to the reference date of the publication, and statistics on the components are given with the reference quarter. This publication also contains highlights of current demographic trends and a brief description of the methods used to generate the statistics.

Report on the demographic situation in Canada. Annual. First issue 1983. E. and F.

ISSN 0715-9293.

DDC 304.6/0971.

This report describes major demographic developments in Canada in recent years. Highlights include the birth rate, the death rate, nuptiality and divorce, common-law unions, life expectancy, infant mortality, leading causes of death, married and single mothers, international migration, internal migration, changes in the concentrations of ethnic groups. The second part of this report is devoted to some currently relevant demographic topic or issue. Part two of this latest report, gives an overview of the population of Mexico. Some examples of previous topics are: age structure in transition: two centuries of demographic change; an overview of the principal world migratory flows since World War II; and the recent evolution of the Canadian and American populations.

FORTHCOMING

Annual demographic statistics. Annual. Bilingual. ISSN 1195-9762.

These estimates are based on the 1991 Census results, and the Agency's estimates of the number of people not counted by the Census. In addition, they now include non-permanent residents. This publication contains the following data: estimates of the number of census families for Canada, the provinces, and territories, by type of family (husband-wife, lone-parent), size, age and sex of parents, and age of children as of July 1;

postcensal estimates of the population for Canada, the provinces and territories, by age, sex and marital status, as of July 1, as well as statistics by age and sex for deaths, immigration, emigration, interprovincial, and the non-permanent resident population; and postcensal estimates of the population for census divisions and census metropolitan areas in Canada, by the regression-nested and component methods. In addition, this new publication contains population projections for the coming five years, highlights of the current demographic trends, and statistics for major demographic indicators such as fertility, mortality, nuptiality, and divorce. A brief description of the methods used to produce the estimates is also included. **Note:** For greater convenience to users, this collection of population estimates provides information previously covered by publications 91-204, 91-210, 91-211 and 91-212.

Income of immigrants in Canada: a census data analysis / R. Beaujot, K.G. Basavarajappa, R.B.P. Verma. 98 p. 23 cm. 1988. E. and F.

ISBN 0-660-12742-3.

DDC 339.2/2/0971.

Using data from the 1981 Census and other sources, this study provides an overview of how recent immigrants have adjusted and integrated into Canadian society. A quick review of immigration policy over the years is also presented, as well as charts which show how the percentages of immigrants from less traditional sources have increased, while those from traditional sources have declined. The emphasis is on income as a factor of education, country of origin, ability to speak one of the official languages, and number of years spent in Canada.

Migration between the United States and Canada. 87 p. 28 cm. 1990. E and F.

ISBN 0-660-13729-1.

DDC 304.8/71/073.

This publication presents a cross-sectional description of the characteristics of Americans living in Canada in 1981 and of Canadians living in the United States in 1980. Using 1980 United States and 1981 Canadian census data, this unique study describes and assesses characteristics in five different areas: demographic, social, labour force status, employment (occupation and industry) and income. The joint report exemplifies the long and sustained cooperation between the United States Bureau of the Census and Statistics Canada in the pursuit of research issues of mutual concern.

Caribbean immigrants: a demo-economic analysis / Anthony H. Richmond. 85 p. 23 cm. 1989. E. and F.

ISBN 0-660-12957-4.

DDC 305.8/969729/071.

Including immigrants from Guyana and Bermuda, the Caribbean population enumerated in the 1981 Census numbered 211,205, of whom the largest groups were the Jamaicans (78,000) and the Haitians (27,000). They were a diverse population in terms of ethnicity, reflecting British, French, Afro-Caribbean and Asian ancestry. The publication compares the characteristics of this population with respect to age, sex, education and ethnic origin; with that of the Canadian population, and other immigrants, and measures their economic success.

 DDC 016.3171.

The second edition of the *1991 Census Catalogue* is the first stop when searching for census products and services. The catalogue provides full product descriptions including information on the release date, price, medium, table titles and catalogue numbers. How to order the products is fully explained, and an order form is provided to make it simpler. Also included in the catalogue are descriptions of the various services available to census data users with a complete list of Statistics Canada contacts to serve you better.

1991 CENSUS

92-303

1991 Census of agriculture products and services.

48 p. 28 cm. 1992. Bilingual.

ISBN 0-660-57100-5.

DDC 016.3171.

This product helps users to identify which product or service best fulfils their data requirements and serves as a guide to better understand the concepts and variables of the census of agriculture. This publication provides complete details on the full line of census of agriculture products and services, including pricing and ordering information. Descriptions of the geography used in the census as well as useful background information on the census are also included.

Price: No charge

92-305E

1991 census handbook. 224 p. 26 cm. 1992. E. & F.

ISBN 0-660-14254-6.

DDC 304.6/0971.

The handbook provides a non-technical overview of the census. In straightforward text, it presents a brief history of Canadian censuses and describes the data collection and processing activities. It discusses each census question, including a comparison with those questions asked in 1986. The handbook introduces data users to the census variables and geography, and provides an overview of products and services. Data quality, confidentiality and different applications of census data are also discussed. For the first time, the handbook provides an overview of the census of agriculture. **Note:** For similar data for 1986, refer to 1986 Census publication no. 99-104E.

GEOGRAPHIC REFERENCE

The geographic reference products allow users to locate the geographic areas appropriate to their census and other data needs. Reference maps are available for geographic areas that range for enumeration areas, census tracts (neighbourhoods), census subdivisions (municipalities) and census divisions (counties) to census agglomerations and census metropolitan areas (large urban centres) and federal electoral districts (Members of Parliament's ridings).

92-310E

Geography guide book. 37 p. 28 cm. 1993. E. & F.

ISBN 0-660-14256-2.

DDC 917.1.

In easy to understand language, the *Geography Guide Book* situates and explains the applications of most of Statistics Canada's geographic areas and their

geographic hierarchies. Five brief case studies show the reader what steps to follow in actual research situations. At the end of the Guide Book, all geographic terms are defined. A section describing related geographic products and services, as well as how to order them, rounds out the Guide Book.

1991 census geography: a historical comparison.

51 p. 28 cm. 1993. E. & F.

ISBN 0-660-14257-0.

DDC 304.6/0971.

This publication will assist the user in understanding the various changes that have occurred to census geographic areas. It defines the geographic areas covered in the 1991 Census and compares them with the areas from 1986. This information is provided for standard census areas such as census subdivisions, census tracts and federal electoral districts, and for non-standard geographies such as block-faces and postal codes.

ENUMERATION AREA REFERENCE LISTS

The information available in this series assists the user in relating enumeration areas to other geographic levels. The enumeration areas is the smallest standard geographical unit and serves as the key to building geographic hierarchies. A user is thereby able to situate a particular enumeration area by census tract, census subdivision and federal electoral district. This information is presented by region and by type of regional unit.

MAPS

92-319

Census divisions and census subdivisions. 19 p. 21 folded col. maps. 30 cm. 1992. Bilingual.
ISBN 0-660-57112-9.
DDC 307.2/0971.

The provincial maps show the boundaries for census divisions (areas such as counties and regional districts) and census subdivisions (such as cities, municipalities, towns, villages, settlements, other local municipal entities and townships). Also shown are the boundaries for census metropolitan areas and census agglomerations. Each province is covered by one to four maps, with scales ranging from 1:375,000 to 1:6,000,000. The base map, produced by Energy, Mines and Resources Canada, includes water bodies, major roads and railroads.

Note: The maps in this series are also available separately for \$5.00 each in Canada, \$6.00 US in the United States and \$7.00 US in the other countries (Product no. 92F0061).

Census metropolitan areas, census agglomerations and census tracts. 1 v. 29 cm. 1992. Bilingual.
ISBN 0-660-57113-7.
DDC 307.2/16/0971.

These maps show the boundaries of census subdivisions, census metropolitan area/census

1991 CENSUS

agglomeration parts (urbanized core, urban fringe, rural fringe) and, where applicable, census tracts, primary census metropolitan areas and primary census agglomerations. Also shown are rivers, lakes, railroad tracks, provincial boundaries and other significant features. The map scales range from 1:25,000 to 1:2,000,000. The publications in the *Census Tract Profile* series contain corresponding maps for each tracted census metropolitan area and census agglomeration.

Note: The maps in this series are also available separately for \$5.00 each in Canada, \$6.00 US in the United States and \$7.00 US in the other countries (Product no. 92F0062).

TECHNICAL REPORTS

The 1991 Census was a large and complex undertaking. While considerable effort was taken to ensure high quality standards throughout all collection and processing operations, the results are subject to a certain degree of error. The technical reports examine the quality of the 1991 Census data. Technical reports look at definitions, concepts and components of variables, collection and coverage, regional and head office processing, edit and imputation, data evaluation and quality, and historical comparability with data from previous censuses. This series is aimed at moderate and sophisticated users but will be written in a manner which could make them useful to all census data users. Two additional methodological reports on coverage and on sampling and weighting also provide valuable assistance to the users in assessing the usefulness of the data for their own applications.

POPULATION AND DWELLING COUNTS SERIES

The publications in this series present the final, unrounded counts for all of Canada. The percentage change in the population from 1986 to 1991 is also included, as well as the total land area (in square kilometres). The first six publications provide the counts for population and dwellings by type of geographic area. The three remaining publications serve as reference tools for locating particular places and identifying their relationship to other geographical units; these are presented by geographic regions of Canada. **Data are also available on demand from the Electronic Shelf for enumeration areas, census tracts and other geographic areas.**

1991 CENSUS

93-301

A national overview. 61 p. 28 cm. 1992. Bilingual.

ISBN 0-660-57277-X.

DDC 304.6/0971.

This publication presents the 1991 counts for Canada, provinces and territories, as well as for most of the smaller levels of geography. The tables provide an overall picture of national counts with many census-to-census comparisons.

Table Titles:

Table 1. *Population and Dwelling Counts, for Canada, Provinces and Territories, 1986 and 1991 - 100% Data*

Table 2. *Population Distribution, for Canada, Provinces and Territories, 1951 and 1991 - 100% Data*

Table 3. *Population and Dwelling Counts, for Federal Electoral Districts, 1986 and 1991 - 100% Data*

Table 4. *Population and Dwelling Counts, for Census Divisions, 1986 and 1991 - 100% Data*

Table 5. *Population and Dwelling Counts, for Census Metropolitan Areas in Decreasing Order of 1991 Population, 1986 and 1991 - 100% Data*

Table 6. *Population and Dwelling Counts, for Census Agglomerations, 1986 and 1991 - 100% Data*

Table 7. *Population Distribution Inside and Outside the Census Metropolitan Areas and Census Agglomerations, for Canada, Provinces and Territories, 1991 - 100% Data*

Mother tongue. 299 p. 28 cm. 1992. Bilingual.

ISBN 0-660-57124-2.

DDC 305.7/0971.

This publication presents data on the population by mother tongue. It includes information by type of response (single or multiple) as well as data by age and sex for selected languages. Two tables present statistics on mother tongue transmission to children; another presents data on families by mother tongue of husband and wife. In general, the tables are presented for Canada, provinces and territories. However, one table gives data for census metropolitan areas. **Note:** For similar data for 1986, refer to 1986 Census publication no. 93-102.

1991 CENSUS

Table Titles:

Table 1. *Population by Mother Tongue and Sex, for Canada, Provinces and Territories, 1991*

Selected income statistics. 305 p. 28 cm. 1993. Bilingual.

ISBN 0-660-57142-0.

DDC 339.2/2/0971.

This publication provides selected income statistics for individuals, families and households for 1985 and 1990 in constant (1990) dollars. Included are tables presenting 1985 and 1990 total income and employment income size distributions for the population 15 years and over by

sex, age, work activity and marital status. Census family and household income size distributions for 1985 and 1990 are provided by family structure, combination of employment income recipients, household type and size. The publication also includes statistics on the incidence of low income among families, unattached individuals and for the population in 1985 and 1990. All tables are shown for Canada, provinces, territories and census metropolitan areas. **Note:** For similar data for 1986, refer to 1986 Census publications nos. 93-114, 93-115, 93-117, 93-118, 93-119.

Table Titles:

Table 1. *Population 15 Years and Over by Sex and Total Income Groups in Constant (1990) Dollars, for Canada, Provinces, Territories and Census Metropolitan Areas, 1985 and 1990*

Table 2. *Population 15 Years and Over by Sex, Age Groups and Total Income Groups in Constant (1990) Dollars, for Canada, Provinces, Territories and Census Metropolitan Areas, 1985 and 1990*

Table 3. *Population 15 Years and Over by Sex and Employment Income Groups in Constant (1990) Dollars, for Canada, Provinces, Territories and Census Metropolitan Areas, 1985 and 1990*

Table 4. *Population 15 Years and Over With Employment Income by Sex, Work Activity, Age Groups and Marital Status, Showing Number and Average Employment Income in Constant (1990) Dollars, for Canada, Provinces, Territories and Census Metropolitan Areas, 1985 and 1990*

Table 5. *Paid Workers 15 Years and Over by Sex and Wage and Salary Groups in Constant (1990) Dollars, for Canada, Provinces, Territories and Census Metropolitan Areas, 1985 and 1990*

Table 6. *Census Families in Private Households by Family Structure and Family Income Groups in Constant (1990) Dollars, for Canada, Provinces, Territories and Census Metropolitan Areas, 1985 and 1990*

Table 7. *Census Families in Private Households by Family Structure, Combination of Employment Income Recipients and Family Income Groups in Constant (1990) Dollars, for Canada, Provinces, Territories and Census Metropolitan Areas, 1985 and 1990*

Table 8. *Private Households by Type, Number of Persons and Household Income Groups in Constant (1990) Dollars, for Canada, Provinces, Territories and Census Metropolitan Areas, 1985 and 1990*

Mother tongue: 20% sample data. 303 p. 28 cm. 1992. Bilingual.
ISBN 0-660-57364-4.
DDC 305.7/0971.

This publication contains data on the population by mother tongue, taken from the 20% sample. It includes information by type of response (single or multiple) as well as data by age and sex for selected languages. Two tables present statistics on mother tongue transmission to children; another presents data on families by mother tongue of husband and wife. In general, the tables are presented for Canada, provinces and territories. However, one table gives data for census metropolitan areas. **Note:** For similar data for 1986, refer to 1986 Census publication no. 93-102.

Table Titles:

Urban and Rural Areas

93-339 Area Profile Series

Profile of urban and rural areas. Part A. Canada, provinces and territories. 203 p. 28 cm. 1993. Bilingual.

ISBN 0-660-57148-X.

DDC 304.6/0971.

The 100% and 20% sample profiles show data within each province for census metropolitan areas (CMAs) as a group, census agglomerations (CAs) as a group, and the areas outside CMAs and CAs as a group. The areas outside CMAs and CAs are shown by population size. Separate profiles are shown for rural farm and rural non-farm areas within CMAs, within CAs, and outside CMAs and CAs. For rural farm areas, the Part A profile (100% data) includes some data from the census of agriculture, such as number and aggregate area of census farms, number with gross sales under \$25,000,

number of greenhouse and nursery farms, number of male and female operators, and aggregate value of land and buildings.

FOCUS ON CANADA SERIES

Ordering Information

The publications are available exclusively through Prentice Hall Canada Inc., 1870 Birchmount Road, Scarborough, Ontario, M1P 2J7. Copies may be ordered toll-free by telephone at 1-800-567-3800 or by fax at 1-416-299-2529.

Focus on Canada is a series of descriptive analytical publications that examines current, social, economic and demographic characteristics of the Canadian population. Users will like the easy-to-read style as well as the colourful presentation of statistical information through tables and charts.

The titles for this series are outlined below:

96-305E

FORTHCOMING

Our changing demographics. E. & F.

ISBN 0-660-14312-7.

Based on 1991 census data, this report highlights some of the most fundamental demographic changes that have influenced the well-being of Canadians over recent years: marriage and divorce trends; imbalance among numbers of women and men; the aging population; changing population growth patterns across Canada.

Price: \$9.00

1991 CENSUS

96-307E

FORTHCOMING

Families in Canada. E. & F.
ISBN 0-660-14314-3.

What is a family? This report illustrates the dramatic changes in family structure that have occurred in recent decades by contrasting current data with data from previous censuses. It analyzes family size and structure, composition, living arrangements, and economic well being and concludes with a discussion of the family in the future.

Price: \$9.00

96-309E

FORTHCOMING

Canadians on the move. E. & F.
ISBN 0-660-14316-X.

Canadians are on the move. In this report, mobility and migration in Canada are reviewed in terms of demographics, ethnicity, education level and language of the people who are moving. In- and out-migration are studied from a geographical perspective, both at the provincial and city levels. The last chapter discusses the impact of and reason for the mobility of Canadians.

Price: \$9.00

96-311E

FORTHCOMING

Canada's changing immigrant population. E. & F.
ISBN 0-660-14318-6.

While the proportion of immigrants to the total population of Canada has remained relatively stable, the composition of the immigrant population has changed. This report focuses on age, fertility, ethnic origin, education, and labour force participation of recent immigrants and non-permanent residents.

Price: \$9.00

96-312E

FORTHCOMING

Profile of Canada's seniors. E. & F.
ISBN 0-660-14319-4.

Who are Canada's senior citizens? This report provides comprehensive information on this growing segment of our population. The composition and changes in the group are presented by age, sex, marital status, education, employment, and income. Special attention is given to living arrangements, including those of people who are institutionalized or living alone. The final chapter looks to the future, identifying the health promotion movement and the kind of services our seniors will require.

Price: \$9.00

96-313E

FORTHCOMING

Languages in Canada. E. & F.
ISBN 0-660-14320-8.

Who is speaking what in Canada? This report looks at two aspects of the ever-fascinating topic of language in this country. First, it examines the demographics of language groups and the factors that have an impact on their size and growth. Next it focuses on the language knowledge of Canadians and the use of various languages.

Price: \$9.00

96-315E

FORTHCOMING

Women in the labour force. E. & F.
ISBN 0-660-14322-4.

How has employment changed for women over the twenty year span from early to middle and late baby boom groups? The evolution of women in the work force is examined in this report, comparing demographic characteristics, level of education, marital status and number of children for women from these three groups. The report reviews their professions and work arrangements. The final chapter looks at revenues and the overall contribution of women to the family income.

Price: \$9.00

96-316E

FORTHCOMING

The self-employed. E. & F.
ISBN 0-660-14323-2.

Is being self employed really economically attractive? Or is it chosen due to circumstances? This report focuses on two types of self-employed workers in Canada: those with and without paid help. These groups are analyzed in terms of their demographic make-up, labour characteristics, industries, and occupations. It casts new light on the common perception of the self employed as an advantaged group.

Price: \$9.00

96-317E

FORTHCOMING

The earnings of Canadians. E. & F.
ISBN 0-660-14324-0.

During the mid 1980s Canadians suffered through one recession and, at the taking of the most recent census, were in the midst of another. This study provides insights into the picture of employment in Canada, tallying earnings by sex, age group, marital status, education, major field of study, and selected occupations. The differences between male and female earnings are reported, including changes since 1985. The relationship between work activity and earning is examined. The report concludes with a look across provinces at changes in overall earnings from 1970 to 1990.

Price: \$9.00

1991 CENSUS

96-318E

FORTHCOMING**Family income in Canada. E. & F.**

ISBN 0-660-14325-9.

Changes in family incomes and purchasing power between 1970 and 1990 are traced, highlighting the impact of the recession of the early 1980s. The study analyzes the consequences of changing work and education profiles of the spouses on the incomes of husband-wife families. The incomes of lone parent families are examined in terms of their work and age patterns. Changes in the characteristics of families at different levels of income and in income inequality between 1970 and 1990 are discussed. Finally, changes in the regional disparities are examined.

Price: \$9.00

96-320E

FORTHCOMING**Children and youth: an overview E. & F.**

ISBN 0-660-14327-5.

How do Canada's children live? This in-depth study examines the living arrangements, educational, cultural, and economic conditions of young people in this country. It begins by looking at children of two-parent and single-parent families, children living alone, and teenagers who are parents. It goes on to report level of schooling and field of study and examines employment, unemployment and income of Canada's youth.

MAP PRODUCTS

Geography Division offers the wide range of map products described below. Digital files and special services are described in the *Electronic Products and Services* section under Mapping Services. **For further information or to order any of these products, please contact your nearest Statistics Canada Regional Reference Centre** (listed inside the front cover).

Geography Division's maps can be divided into two categories: reference maps and custom statistical maps. The boundaries of census geographic areas are presented on reference maps found either in data publications, map bulletins or on individual map sheets. These maps enable users to locate and identify census geographic areas and to relate statistical data to the corresponding geographic areas. Custom statistical map services allow users to graphically represent statistical information. The following describes the reference maps. See the *Electronic Products and Services* section for further information on the custom statistical maps.

Reference Maps

Several map series have been produced to support 1991 Census publications and the delineation of geographical boundaries. Descriptions of the map series from previous censuses are described in the *Statistics Canada Catalogue 1992*.

The price for a pre-printed colour map is \$5. Enumeration Area Maps (produced on-demand) cost \$10 each. Prices are subject to change without notice.

92-319

Census Division and Census Subdivision Maps.
ISBN 0-660-57112-9.

These provincial maps show the boundaries for census divisions (areas such as counties and regional districts) and census subdivisions (such as cities, municipalities, towns, villages, settlements, other local municipal entities and townships). Also shown are the boundaries for census metropolitan areas and census agglomerations. Each province is covered by one to four maps, with scales ranging from 1:375,000 to 1:6,000,000. The base map, produced by Natural Resources Canada, includes water bodies, major roads and railroads.

<i>Price: Full set</i>	<i>Individual map</i>
<i>Canada: \$75.00</i>	<i>Canada: \$5.00</i>
<i>US: US \$90.00</i>	
<i>Other Countries: US \$105.00</i>	

92-320

Census Metropolitan Area, Census Agglomeration and Census Tract Maps.
ISBN 0-660-57113-7.

These maps show the boundaries of census subdivisions, census metropolitan area/census agglomeration parts (urbanized core, urban fringe, rural fringe) and, where applicable, census tracts, primary census metropolitan areas and primary census agglomerations. Also shown are rivers, lakes, railroad tracks, provincial boundaries and other significant features. The map scales range from 1:25,000 to 1:2,000,000. The publications in the Census Tract Profile series contain corresponding maps for each tracted census metropolitan area and census agglomeration.

<i>Price: Full set</i>	<i>Individual map</i>
<i>Canada: \$75.00</i>	<i>Canada: \$5.00</i>
<i>US: US \$90.00</i>	
<i>Other Countries: US \$105.00</i>	

Federal Electoral District Map.

This colour map (78.8 cm by 27.8 cm) shows the federal electoral districts of Canada according to the 1987 Representation Order. It also depicts major rivers, lakes and time zones. This map is included in the publication *Population and Dwelling Counts - Federal Electoral Districts* (93-302) and *Area Profile Series - Federal Electoral Districts - Part A* (93-335) and *Part B* (93-336). It was produced by Natural Resources Canada for the Office of the Chief Electoral Officer, Elections Canada.

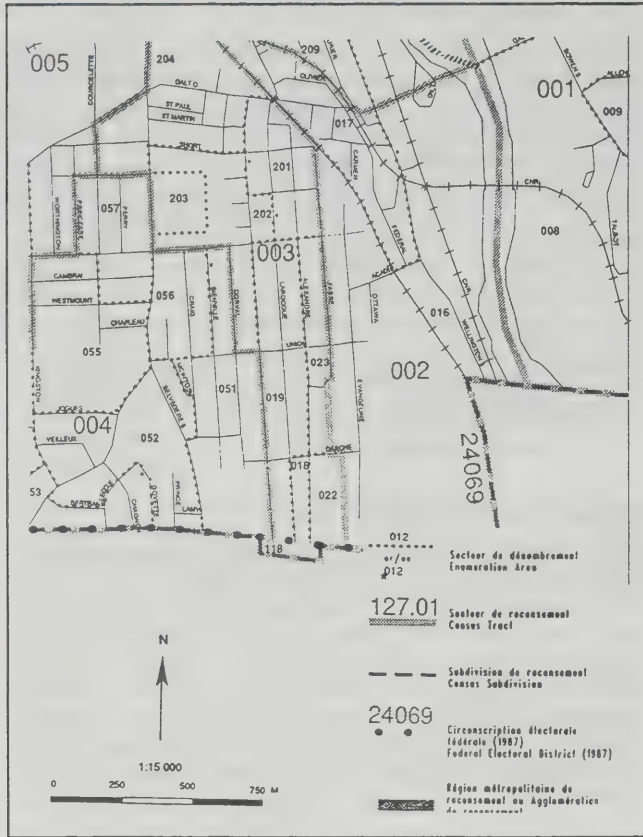

Price: Canada: \$5.00/map

Enumeration Area Maps.

Three series of enumeration area reference maps have been developed to situate enumeration areas within various levels of geography. All depict the enumeration area as their smallest reference unit. The maps also include roads, railroads, hydrography and other notable physical features.

MAP PRODUCTS

Series 1: Large Urban Centres (formerly G13 and G13A series)

The Series 1 maps depict enumeration areas (EA) within urban centres with a population of 50,000 and over that are part of the census tract program. Also shown on the maps are census tract, census subdivision, federal electoral district, census metropolitan area and census agglomeration boundaries. Most Series 1 maps were computer generated at a scale of 1:15,000 or 1:60,000, depending on the density of information. The remaining Series 1 maps were photographically reduced for dissemination at various scales.

Service no.: 92F0001

Price: (complete CMA/CA)

less than 10 maps in CMA/CA \$ 10.00 per map
 from 10 to 33 maps in CMA/CA \$ 7.50 per map
 from 34 to 50 maps in CMA/CA \$250.00 for entire centre
 over 50 maps in CMA/CA \$ 5.00 per map

The maps in this series are also available separately as:
 Service no.: 92C0001

Price: \$10.00/map

More than 10 Series 1 EA maps purchased together:
 \$7.50/map.

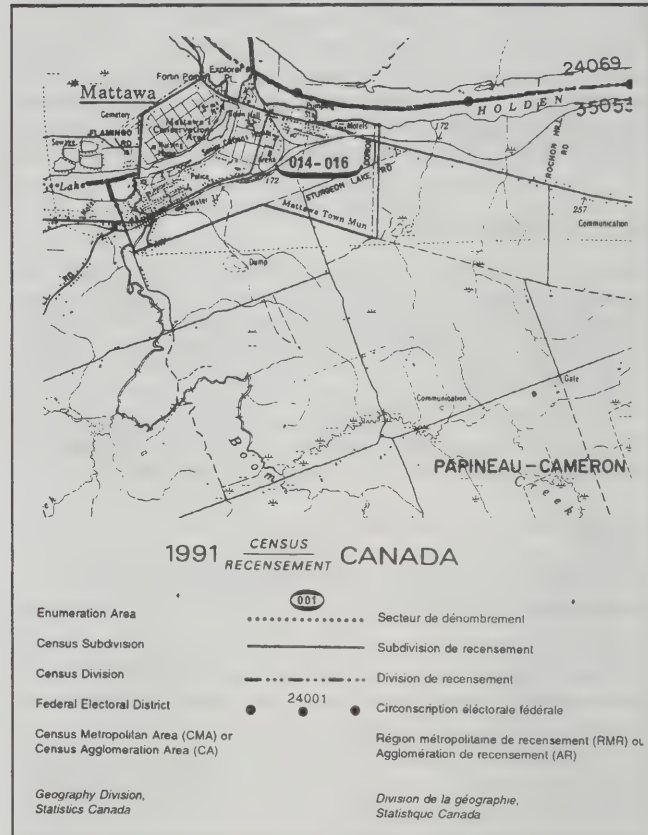

Series 2: Small Urban Centres (formerly G-14 and G-16 series)

This series depicts enumeration areas within census subdivisions and unincorporated places. Federal electoral districts are also shown on the maps. The size and scale of the maps vary, depending on the area covered.

Service no.: 92F0059

Price: \$10.00/map

Series 3: Rural Areas (formerly G-12 series)

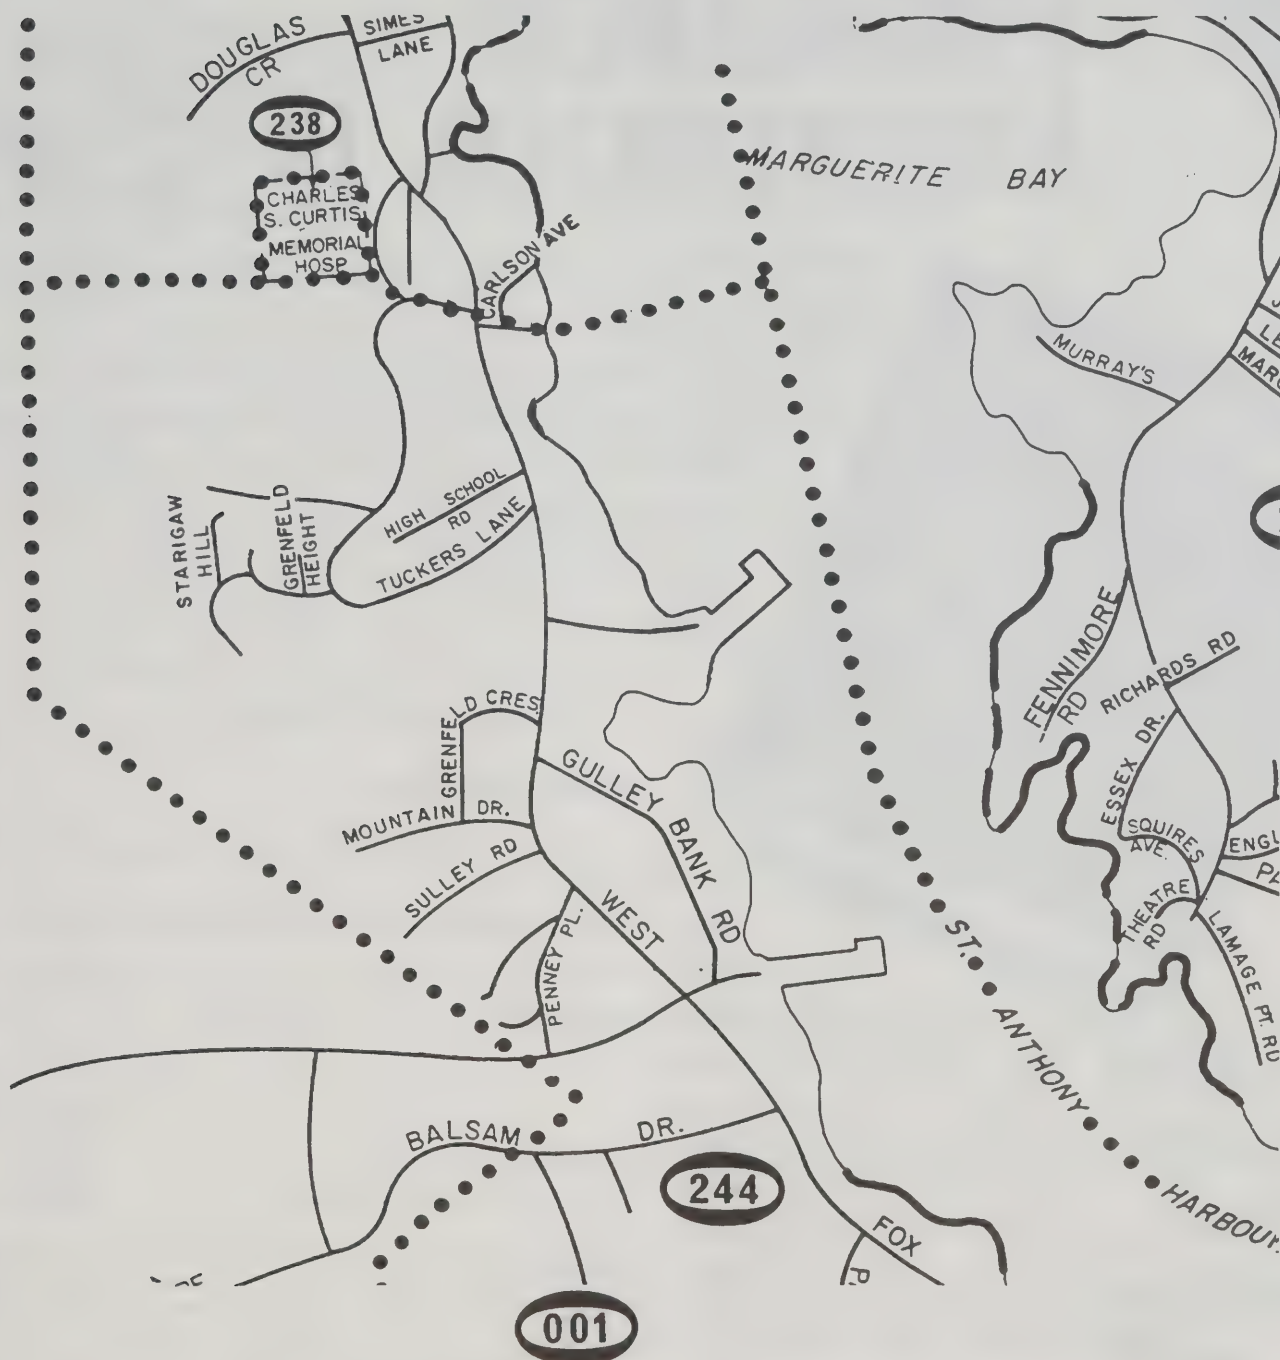

This series depicts enumeration areas in rural areas. Also shown are census subdivision, census division, federal electoral district, census metropolitan area and census agglomeration boundaries. The Series 3 maps are at a scale of 1:50,000 or 1:250,000 for the 10 provinces and at a scale of 1:1,000,000 for Yukon and 1:4,000,000 for N.W.T.

Service no.: 92F0060

Price: \$10.00/map

THE MARKET RESEARCH HANDBOOK 1993/1994

Brainstorming with your colleagues produces some great marketing ideas. But which ones will you use? The **Market Research Handbook** can help you narrow your options before you commit any more time and resources to developing your strategy.

This handbook is the most comprehensive statistical compendium on Canadian consumers and the businesses that serve them. It helps you to identify, define and locate your target markets.

Looking for . . .

. . . socio-economic and demographic profiles of 45 urban areas?

. . . revenue and expenditure data for retailers and small businesses?

The **Market Research Handbook** has it all . . . and more. It provides information on:

- 1991 Census information
- personal expenditures on goods and services
- size and composition of households and families
- wages, salaries and employment
- investment in Canadian industries
- labour force in various industries
- industry and consumer prices

It has been one of our bestsellers since 1977 for the simple reason that it offers such a range and depth of market data. Save time and money when you're looking for data or data sources, keep the **Market Research Handbook** close at hand for easy reference.

The **Market Research Handbook** (Cat. no. 63-224) is \$94 (plus 7 % GST) in Canada, US\$132 in the United States and US\$132 in other countries.

To order, write to Statistics Canada, Marketing Division, Publication Sales, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication.

PUBLICATIONS AND MAP PRODUCTS SUBJECT INDEX

ABBREVIATIONS

CA = Census agglomeration
 CD = Census division
 CMA = Census metropolitan area
 CSD = Census subdivision
 CT = Census tract
 E = English
 EA = Enumeration area
 FED = Federal electoral district
 M = Microfiche
 P = Preliminary
 S = Supplement

USING THE INDEXES

The publication index has been divided into three parts: *Publications and Map Products Subject Index* and *Author/title Index* and *Electronic Products and Services Subject/title Index*. In the print publication index, each entry is followed by a number which corresponds to the numerically arranged contents of the catalogue. References to map products indicate the page number on which the map is described.

CROSS REFERENCES

In the subject indexes, cross references are frequently used. A See reference refers from a non-preferred to a preferred term in the index.

Example:

CPI
 See
 Consumer price index

A See also reference refers to related material in the index.

Example:

Enterprises
 See also
 Business
 Corporations

Specific subjects or commodities not found in the index may require the user to consider broader search terms. In the case of a specific commodity, for which there is no entry in the index, users may look under the industry of which that specific commodity is a part. For example, there is no entry under "Colognes", but users will find references to relevant publications by looking under "Toilet preparations".

Users may wish to consult the various Standard Classification manuals to identify broad groupings under which their specific interest may fall (see *Finding and Using Statistics*). Where the contents of a publication focus largely upon a particular subject, the document number is highlighted in bold, permitting ease in visibility and access.

Feature articles appearing in a number of data publications have been indexed in both the subject and

author/title print and map products indexes. This is in addition to the indexing done for the flagship publications, included for the first time in the 1992 edition of the catalogue. Issues from January 1990 of the following publications is included:

- 11-008E *Canadian social trends*
- 11-010 *Canadian economic observer*
- 75-001E *Perspectives on labour and income*
- 82-003 *Health Reports*
- 85-002 *Juristat*

Articles featured in issues from January 1992 of the following publications have also been added to the index

- 13-001 *National income and expenditure accounts*
- 15-204E *Aggregate productivity measures*
- 51-002 *Air carrier operations in Canada*
- 54-205 *Shipping in Canada*
- 61-008 *Quarterly financial statistics for enterprises*
- 62-001 *The consumer price index*
- 65-001 *Summary of Canadian international trade*
- 67-001 *Canada's balance of international payments*
- 72-002 *Employment, earnings and hours*
- 87-004 *Focus on culture*

ALPHABETIZATION

Initial articles [eg. "the"] are disregarded in the alphabetical arrangement of the author/title index. In the subject index, years are organized chronologically and precede alphabetized material.

A

AIDS

- a community-based response, network of organizations, comparison of psychological needs of persons with AIDS and aging population, need to pay more attention to social aspects, resource issues in caring for people with AIDS, 89-514E
- Alberta, self-reported risk, knowledge of people with AIDS, testing, tolerance, access to health care, 11-008E (Winter 1991; p. 25)
- cases from 1983-1990 and distribution by sex and risk factors, Canada and the U.S., 11-008E (Winter 1991; p. 22-24)
- mortality, by age group and sex, 91-209E
- number of children, by age group and sex, Canada, 89-520
- proceedings of a symposium on social supports, 89-514E
- propagation through drug use, 75-001E (Autumn 1990; p. 30-41)
- transmission, risk factors, regional differences, 11-008E (Winter 1991; p. 22-24)
- trends, males, 1970 to 1990, 82-003 vol. 4 no. 2 (p. 103-123)
- tuberculosis, risk and control, 82-003 vol. 4 no. 3 (p. 277-292)

PUBLICATIONS AND MAP PRODUCTS SUBJECT INDEX

recent data, 11-010

retirement

early, men aged 55 to 64, impact of marriage and spousal income, 75-001E (Winter 1991; p. 31-34)

mandatory, proportion in favour, by occupation, by sex, by suggested retirement age, by selected characteristics, 75-001E (Autumn 1991; p. 8-17)

planned retirement age, by sex, by age group, by selected characteristics, 75-001E (Autumn 1991; p. 8-17)

school leavers and graduates, status, by gender, 11-008E (Autumn 1993; p. 2-7)

self-employment

by industry, 71-535 no. 3

description and trends, 71-536

seniors

adjusted dependency ratio, Canada and selected industrial nations, 11-008E (Spring 1991; p. 3-5)

distribution, by age group and sex, by major occupational group, by major economic activity group, 91-533E

pre-retirement population, aged 55-64, provincial differences, retirement plans, part-time work, self-employment, unpaid family work, occupation, unemployment, 89-521E

service industries

employment, by employer, industry and occupation, by main activity, size of firm/work organization, union membership, 11-612E no. 6

income, benefits, career opportunities and job security, 11-612E no. 6

job autonomy, skill requirements and repetitious work, education and underemployment, job satisfaction and pay evaluation, 11-612E no. 6

self-employment, temporary and part-time employment, multiple job holding, part-year employment, 11-612E no. 6

survey

educational attainment, review of the data, 71-001 (August 1993; p. C3-C10)

guide to data, 71-528

selected demographic, socio-cultural, employment characteristics, by province and economic region, 1986 census, 71-535 no. 5

time spent on selected major activities, total productive activity by gender, free time activities, activities with friends and alone, 11-612E no. 4

time use, by gender, 11-008E (Autumn 1993; p. 13-16)

training and development in companies, 81-574E

trends, percentage change by province, part-time employment, 11-008E (Autumn 1990; p. 16-19)

unemployment

definition of the official rate and alternatives for measurement, 75-001E (Winter 1992; p. 35-43)

distribution of number of unemployed spells, by province, by age and sex, by education level, by regional unemployment rates, 71-538E

duration, average completed, by age groups, 1977-1992, 11-010 (September 1993; p. 4.1-4.20)

exit rates, 11-010 (September 1993; p. 4.1-4.20)

permanent lay-offs, average completed duration, by region, 11-010 (September 1993; p. 4.1-4.20)

rates, annual average, by quartile of occupation, 75-001E (Winter 1991; p. 14-23)

unemployed, health, sleep problems, by sex, 11-008E (Winter 1992; p. 8-10)

university and college full-time teachers, salaries and salary scales, by institution, 81-258, 81-258P, 81-258S

unpaid family work, trends, 71-535 no. 2

utilized and unutilized supply, 75-001E (Spring 1990; p. 73-77)

visible minorities

socio-demographic characteristics, 1986, 75-001E (Summer 1991; p. 17-26)

Toronto, 11-008E (Winter 1991; p. 26-28)

vocational training, industries and government, participation and expenditures, 75-001E (Winter 1990; p. 21-31)

wages and salaries and supplementary labour income, 75-001E (Autumn 1990; p. 42-49)

women

absence from work, due to personal or family responsibilities, 11-008E (Spring 1993; p. 2-6)

1980-1991, 71-534E

activity, by marital status, by age group and presence of children, 1991 census, 93-325

demographic profile and labour force experience, 71-538E

historical data, 1700 to 1951, 11-008E (Winter 1993; p. 2-5)

participation, 11-008E (Spring 1993; p. 2-6), 71-534E

lone-parent families, 75-001E (Spring 1993; p. 9-15)

work arrangements

flexitime, by industry, by occupation, by sex and age, by marital and family status, 75-001E (Autumn 1993; p. 17-22)

overview, 75-001E (Autumn 1993; p. 8-10)

work injuries, 72-208

working-age population, distribution, incidence and mean number of transitions, by province, by age and sex, by marital status, by education and earnings level, by regional unemployment rate, 71-538E

Labour market

activity

diffusion index, weight, 72-002 (July 1992; p. xi-xxi)

literacy and numeracy skills, adult, 89-525E

reading skills levels, 75-001E (Spring 1992; p. 22-30)

survey

men, 71-206

older workers, by province, 71-208

women, 71-205

Compact Solutions from Statistics Canada

StatCan: CANSIM Disc

550,000 statistical time series on Canadian economic and business subjects.

StatCan: CANSIM Directory Disc

The directory of the CANSIM Time Series Data Base on CD-ROM.

TIERS-Canadian Merchandise Trade Statistics

Combines detailed monthly data and software for the retrieval of Canadian merchandise trade with 200 countries for over 16,000 import and 6,000 export commodities.

World Trade Database 1980 - 1991

A matrix of international trade flows created from data reported by the 160 member countries of the United Nations Statistical Office.

1991 Census Profiles CD-ROM

A wide range of profile data on Demographic, Housing, Family and Economic subjects for the smallest to the largest of geographic study areas.

1986 Census Profiles CD-ROM

A similar range of data and geographic coverage as the 1991 Census Profiles CD-ROM providing continuity between census years. **DISCOUNT OF 70% OFF COMMERCIAL PRICE.**

ESAS - Agricultural Statistics on CD-ROM

Agricultural financial and physical statistics gathered from the Taxation Data Program, the National Farm Survey and the Farm Financial Survey.

E-STAT - Electronic Learning for Canadian Schools

Marketed exclusively to educational institutions, this CD-ROM contains Canada-wide census community information plus the current and historical record of 300,000 business and socio-economic subjects. Teachers and students can transform these statistics into colourful maps and graphs which illuminate these subjects as never before.

Labour Market Activity Survey CD-ROM

The Labour Market Activity Survey tracks the same people over a two-year period and demonstrates the elasticity of both the working-age population and the labour market. Data are presented in two file universes; the characteristics of individuals and the characteristics of jobs.

Inter-Corporate Ownership on CD-ROM

This research tool offers timely, accurate information on the Canadian corporate structure, the concentration of corporate assets and the degree and extent of foreign ownership.

** The CD-ROMs listed above all have on-disc software.*

*** Except for E-STAT and the Stat Can: CANSIM Directory Disc, a 50% discount is available to educational institutions for these products*

**FOR MORE INFORMATION, contact Marketing Division, or the nearest

MAPPING SERVICES

Geography Division offers a wide variety of map products described in the *Map Products* section. Some custom mapping is also available. Digital files, geographic listings and special services are described below. For further information or to order any of these products or services, please contact your nearest Statistics Canada Regional Reference Centre (listed inside the front cover).

DIGITAL FILES

The digital files consist of data linkage (attribute) files and geographic data files for mapping purposes. These products can be integrated into appropriate computer systems, thereby allowing users to build geographic data bases for their own applications. The files are available on diskette or magnetic tape. Prices vary depending on the product from \$120 to several thousand dollars. Prices are available on request and can change without notice.

A. Geographic Files

When used with a mapping software package, these files provide visual representation of geographic areas and various geographical units.

Digital Boundary Files (DBF)

The Digital Boundary Files comprise a library of geographic boundaries in digital form for most levels of geography (from the enumeration area up to the province

and territory). With the appropriate software, Digital Boundary Files provide the framework for computer analysis and mapping. These files can also be used to create new geographic areas by aggregating standard geographic areas, and for other data manipulations available with the user's software.

The 1991 Census is the first census for which an enumeration area (EA) boundary file has been available as a standard geography product.

Since these digital boundaries reflect the actual boundaries required to enumerate all the households in Canada, boundaries running through water bodies (such as lakes and oceans) may appear as straight lines, rather than follow the shoreline. Thus, the digital boundary files may not be suitable for mapping applications where realistic shoreline is important, or for analysis requiring the computation of real land area.

All other Digital Boundary Files are created by aggregating the component enumeration area boundaries.

Format: ARC/INFO® Export, also available on demand in MapInfo for Windows;
Projections: Lambert, Lat/Long. Media: tape (1600 or 6250 BPI), cartridge (38000 BPI) IBM®-compatible high density diskette 3.5"

Price: The Digital Boundary Files are packaged by type of geographic boundary (e.g. enumeration areas, census subdivisions, census consolidated subdivisions, census divisions, urban areas, federal electoral districts, provinces and territories) and coverage (e.g. Canada, province or territory, census metropolitan area or census agglomeration).

The **Provinces and Territories, Federal Electoral Districts, Urban Areas and Census Divisions Digital Boundary Files** are each available as a standard package for Canada.

The **Census Tracts Digital Boundary Files** are available as standard packages for Canada, the provinces and census metropolitan areas/census agglomerations (CMAs/CAs). These files are priced at \$1.00 per geographic unit plus \$100.00 service fee. If more than one province or CMA/CA file is ordered, then the service fee is applied only once.

Enumeration Area Boundary Files, Census Sub-division Boundary Files and Census Consolidated Subdivision Boundary Files are available as standard packages for Canada and the provinces and territories. These files are priced at \$1.00 per geographic unit plus \$100.00 service fee per boundary file type. If more than one province or territory is ordered within a given type, then the service fee is applied only once. In the case of the Enumeration Area Boundary Files, the standard package also contains all other higher-order boundaries that are available (e.g. census divisions) at no extra charge.

Enumeration Areas:

Product No.: 92F0067

Custom Retrieval Service No.: 92C0004

ELECTRONIC PRODUCTS AND SERVICES

Census Subdivisions:

Product No.: 92F0073

Custom Retrieval Service No.: 92C0006

Census Consolidated Subdivisions:

Product No.: 92F0074

Custom Retrieval Service No.: 92C0020

Census Divisions:

Product No.: 92F0072

Custom Retrieval Service No.: 92C0006

Census Metropolitan Areas/Census Agglomerations:

Product No.: 92F0068

Custom Retrieval Service No.: 92C0005

Digital Cartographic Files

The **Digital Cartographic Files** are geographic boundary files for thematic mapping applications used by Geographic Information Systems and mapping software packages. Each Digital Cartographic File includes geostatistical area boundaries that have been modified to follow shorelines and coastlines. In addition a few major lakes are included in the files.

Format: *MapInfo for Windows, also available on-demand in ARC/INFO Export; Media: tape (1600 or 6250 BPI), cartridge (38000 BPI) IBM®-compatible high density diskette (3.5"); Projection: Lambert*

Price: *The Digital Cartographic Files are packaged by type of geographic boundary (e.g. census tracts) and coverage (e.g. Canada, province/territory, census metropolitan area or census agglomeration).*

The **Provinces/Territories and Census Divisions Digital Cartographic Files** are available as standard packages for Canada. These files are priced at \$0.50 per geographic unit plus \$100.00 service fee.

The **Census Tracts Digital Cartographic Files** are available as standard packages for the tracted census metropolitan areas/census agglomerations (CMAs/CAs). These files are priced at \$0.50 per geographic unit plus \$100.00 service fee. If more than one province or CMA/CA file is ordered, then the service fee is applied only once.

Purchasers of a Census Tract Digital Cartographic File will receive an additional file of major streets and some railway features used to define the census tract boundaries. This file, called the **Skeletal Street Network File (SSNF)**, has been produced to provide some cartographic reference features for underlying the Census Tract digital cartographic files in thematic mapping applications.

The **Census Subdivision Digital Cartographic Files** are available as standard packages for Canada and the provinces/territories. These files are priced at \$0.50 per geographic unit plus \$100.00 service fee. If more than one province is ordered, then the service fee is applied only once.

Standard Package for Canada and the provinces and territories:

Product No.: 92F0082

Standard Package for Census Tracts:

Product No.: 92F0078

Custom Retrieval Service No.: 92C0011

Street Network File (SNF)

Product No.: 92F0081

Custom Retrieval Service No.: 92C0022

This file provides the street network for most large urban centres in Canada. It includes streets, railroad tracks and other pertinent features such as street names and address ranges. In combination with the user's appropriate software, the Street Network File is useful for route planning, delivery services and mapping. When considering a particular application, the user should be aware of the various vintages of the Street Network File at the census subdivision level.

Format: a) *ARC/INFO Export, also available on-demand in MapInfo for Windows; Projection: Lat/Long;*
b) *AMF formats: ASCII (110 bytes), EBCDIC (95 bytes), Projection: UTM Media: tape 1600 or 6250 BPI, IBM-compatible high density diskette (3.5"). (It is to be noted that this format will not be available in future releases).*

Price: *The prices for Street Network Files are established at \$0.45 per block (polygon). A \$100.00 processing fee is added to each order.*

Skeletal Street Network File

Product No.: 92F0080

Custom Retrieval Service No.: 92C0012

The **Skeletal Street Network Files (SSNF)** is a "thinned-out" street network file containing major roads and railways only (with street names but no address ranges). The SSNF has been produced solely to provide some cartographic reference features when producing thematic maps with the CT Digital Cartographic File (DCF).

Format: *MapInfo for Windows, also available on-demand in ARC/INFO Export; Media: tape (1600 or 6250 BPI), cartridge (38000 BPI) IBM-compatible high density diskette (3.5"); Projection: Lambert*

Price: *The prices for the SSNF have been established based on the following:*
a) *for CMA/CAs with less than 200 CTs the price is: Canada: \$100.00*
b) *for CMA with 200 CTs or more the price is: Canada: \$200.00 (Montreal, Ottawa-Hull, Vancouver and Toronto).*
c) *for all CMAs/CAs the price is: Canada: \$2,900.00*

ELECTRONIC PRODUCTS AND SERVICES

B. Data Linkage (Attribute) Files

Block-face Data File (BDFD)

Product No.: 92F0066

Custom Retrieval Service No.: 92C0003

The information in this file uses the smallest geographical unit available from Statistics Canada, namely the block-face in urban centres covered by Street Network Files. A block-face is one side of a city street between two consecutive intersections. This file contains 1991 Census population and dwelling counts for block-faces. It also links the block-face to all higher levels of geography (enumeration areas and above) through geographical codes. The block-face representative point (centroid) coordinates and street names with address ranges are also provided.

Format: ASCII; *Media:* tape (1600 or 6250 BPI), cartridge (38000 BPI), IBM®-compatible high density diskette (3.5")

Price: Prices vary with geographic area and are available upon request.

GEOREF (Geographic Information Reference System)

This is a user-friendly software and data product designed to provide the user with a wide selection of geographic information. The system is based on the enumeration area, from which all the higher levels of geography can be determined. For each type of geographic unit, the name and code of standard geographic areas, population counts, dwelling counts and selected land area are available. GEOREF will run on IBM®-compatible personal computers using DOS.

GEOREF diskettes for any three regions:

Price: Canada: \$450.00
US: US \$475.00
Other Countries: US \$500.00

Geographic Attribute File (GAF)

Product No.: 92F0075

Custom Retrieval Service No.: 92C0007

The Geographic Attribute File assigns to each 1991 Census enumeration area (the basic geographical unit of census data collection) all higher geographic levels by codes and names. It also locates each enumeration area representative point according to Universal Transverse Mercator (UTM) coordinates and Lambert coordinates, as well as by longitude and latitude. The 1991 population and private occupied dwelling counts for all enumeration areas are also presented. Most of the same information is available with software in GEOREF.

Format: ASCII; *Media:* tape (1600 or 6250 BPI), cartridge (38000 BPI), IBM®-compatible high density diskette (3.5")

Price: Prices vary with geographic area and are available upon request.

1986-1991 EA Correspondence File

Product No.: 92F0076

The 1986-1991 EA Correspondence File is a digital file containing the relationship of the 1986 enumeration area structure to the 1991 enumeration area structure.

Format: ASCII, EBCDIC; *Media:* tape (1600 or 6250 BPI), cartridge (38000 BPI), IBM®-compatible high density diskette (3.5")

Price: Canada: \$125.00

ELECTRONIC PRODUCTS AND SERVICES

Place Name Master File (PNMF)

Product No.: 92F0006

Custom Retrieval Service No.: 92C0008

The Place Name Master File is a file containing the "master" list of place names with 1991 Standard Geographical Classification (SGC) codes and, where known, enumeration area (EA) codes. This list accumulates the place names published in the Standard Geographical Classification volume with additional names or alternative names/spellings of places encountered by the census representatives during 1991 Census collection. The population counts of all census subdivisions, as well as unincorporated places linked to enumeration areas are also included. ("Unincorporated Places" refers to a cluster of five or more permanently occupied dwellings in a rural area.)

Format: *ASCII; Media: tape (1600 or 6250 BPI), cartridge (38000 BPI) IBM®-compatible 3.5" high density diskette*

Price: *Prices vary with geographic area and are available upon request.*

Postal Code Conversion File (PCCF)

Product No.: 92F0002

Custom Retrieval Service No.: 92C0002

The Postal Code Conversion File links the six-character postal code with the standard 1991 Census geographic areas (such as enumeration areas, municipalities, census tracts, etc...). It also provides the x, y coordinates for a point representing the approximate location of the postal code to support mapping applications.

Format: *ASCII; Media: tape (1600 or 6250 BPI), cartridge (3800 BPI), IBM®-compatible diskette (3.5")(ASCII)*

Price: *The Postal Code Conversion File is available as a standard package for Canada and the Provinces/Territories.*

C. Geographic Reference Product

Complete On-line Guide to Geography

Product No.: 92F0077

This electronic product is an interactive hypertext document with the TOOLBOOK® authoring environment and runs as a WINDOWS® application. It provides a quick and easy access to a number of spatial concepts to census geography. It consists of three parts:

Electronic Guide to Geography - Statistics Canada's census geography basics, products and services, case studies and learning activities;

Illustrated Glossary - explanatory definitions and illustrations, national and metropolitan hierarchies;

Reference Dictionary - definitions, rules, user issues, applicable censuses and footnotes.

This guide is particularly useful for users and educators and quickly illustrates specialized geography concepts and products.

Format: *3.5" IBM® compatible diskettes*

Price: *Canada: \$45.00*

GEOGRAPHIC LISTINGS

Print-outs of geographic listings are available through your nearest Statistics Canada Regional Reference Centre. Below is a description of the 1991 Street Index listings.

Street Index

Product No.: 92F0065

This is an alphabetical listing of street and address ranges from the Street Network Files, linked to specific standard geographic areas.

Three products, each showing a different linkage, are available:

- (1) street and address linkage to enumeration areas;
- (2) street and address linkage to census divisions and census subdivisions; and
- (3) street and address linkage to census tracts.

These listings show street name, type, direction, odd and even address ranges, abbreviated municipality name, and the code for the geographic area requested.

The Street Index listings are available as print-on-demand products for census metropolitan areas (CMAs) and census agglomerations (CAs) that have a corresponding Street Network File.

Format: *Paper only*

Price: *Prices vary with geographic area and are available upon request.*

SPECIAL SERVICES

The **Special services** offered by Geography Division through the Statistics Canada Regional Reference Centres allow users to specify their own geographic base for data retrieval and custom map production. Consultative services are also offered to meet special user needs. Prices are based on specific client requirements.

Geocoding

Product No.: 92C0013

The geocoding process allows users to define their own geographic area of study regardless of standard boundaries. This custom geography is produced from an aggregation at the block-face level for large urban centres and at the enumeration area level for small urban areas and rural areas. Census data for these custom areas can also be purchased.

Price: *Geocoding is priced at a minimum base of \$350.00 plus \$40.00 per polygon.*

ELECTRONIC PRODUCTS AND SERVICES

Custom Services

Product No.: 92C0014

If the standard geography products do not satisfy a user's need, the Custom Services may be able to produce the product as a special request. Examples include special data retrievals or merges using any of the geography files (postal codes, attribute files, boundary files and street network files), special population compilations using basic census collection records and digitizing user-defined boundaries. Some custom mapping is available.

Price: The minimum cost for this service is \$350.00. Estimates will be provided based on the complexity of the request.

MICRODATA FILES

Microdata files consist of unaggregated records of individual responses to Agency surveys, which have been carefully screened to ensure complete confidentiality (i.e. all records are non-identifiable). Selected data sets in this form have been assembled to be used, along with necessary documentation, on users' own computer systems.

The file descriptions were supplied by project managers in various divisions throughout the Agency. The descriptions may vary somewhat in consistency of content and presentation. However, users should find the descriptive material adequate as a first step in the identification of data related to their needs.

The file descriptions are in the form of information profiles. Each heading provides information on an important aspect of the file. Although not detailed, the profile information is designed to permit a prospective client to decide if information from a particular file is likely to meet his or her needs. However, before ordering, it is advised that the address or telephone number provided under the heading "Contact" be used to obtain information on availability as well as quality, confidentiality, delivery dates, or other conditions or restrictions which may apply.

11M0001

Survey of the Importance of Wildlife to Canadians. 1982 -

(Formerly MDF-3808)

Summary

This occasional survey collects information about watching, feeding, attracting, photographing and hunting wildlife and what these activities contributed to the Canadian economy.

Frequency

February 1982, 1988, 1992. Quinquennial as of 1992

Reference period

Calendar year

Universe

Civilian, non-institutionalized population of Canada 15 years of age and older

Geographic coverage

10 provinces

ELECTRONIC PRODUCTS AND SERVICES**12M0003****General Social Survey, cycle 3: Personal Risk. 1988**

(Formerly MDF-3891)

Summary

The third annual cycle of the General Social Survey concentrated on the personal risk of crime victimization and accidents. The following types of information were collected: attitudes to various components of the justice system; awareness of victim services; perception of risk with regard to accidents and crime incidents; and information on the kind and number of times the respondent had been involved in an accident or crime incident. Only accidents which occurred during 1987 and interrupted the respondent's normal activities for at least half a day, or caused expenses of \$200.00 or more, were reported. Similarly, only crime incidents which occurred between January 1st and December 31st 1987 were in scope. Each time an accident or criminal victimization was reported, a report was completed collecting details about the incident - month of year of occurrence, time of day, location, and the resulting financial and health impacts.

12M0006

General Social Survey, cycle 6: Health. 1991

(Formerly MDF-3894)

Summary

Cycle 6 provides a range of measures of health status, health care utilization, and lifestyle risk factors. Most of the core content in Cycle 6 repeats Cycle 1. Since much of the core content was also covered in the 1978-79 Canada Health Survey, the three surveys can be used to measure changes in health status over time. Focus content for Cycle 6 covered flu vaccinations, job benefits, old age and disability income, and measures of emotional health.

Census Families: Income. 1971 to present.

(Formerly MDF-3502a)

Summary

This file contains data collected in the Survey of Consumer Finances. Census family variables include detailed income by source and family characteristics. With this file users may identify specific family types such as two-parent and lone-parent families. Information is also provided on earnings, transfers, and total income for the head and the spouse of the census family unit, as well as personal and labour-related characteristics.

Frequency

Biennial (1971 to 1981); 1982; annual (1984 - to present).

Reference period

Calendar year. The year of the file title is the income year.

Universe

Census families and persons not in families living in private dwellings in Canada; excludes the Yukon, Northwest Territories, and Indian reserves.

Geographic coverage

Codes are given for provinces; areas with population 500,000+, 100,000 to 499,999, 30,000 to 99,999, urban areas less than 30,000 and rural areas. Beginning with 1990 data, the urban areas less than 30,000 category is split into 2,500 to 29,999 and less than 2,500 and selected CMAs are identified.

13M0005**Key File. 1987 to present.**

(Formerly MDF-3502e)

Summary

The purpose of this file is to enable users to combine the Survey of Consumer Finances and Household Income Facilities and Equipment (HIFE) files into custom-tailored household and sub-household units. This file consists of one record for each child and adult in the surveys' samples. Each key file record has the identification numbers for the corresponding household, economic family, census family individual microdata tapes records.

Reference period

Income for previous calendar year and household facilities and equipment at the time of survey. The title years of the Key File is the income year - eg, the 1991 Key File allows linkage of the HIFE file containing May 1993 HIFE data and income files containing 1992 income.

Universe

Economic families and unattached individuals living in private dwellings in Canada; excludes the Yukon, Northwest Territories, and Indian reserves.

Geographic coverage

Codes are given for provinces; areas with population 500,000+, 100,000 to 499,999, 30,000 to 99,999, urban areas less than 30,000 and rural areas. Beginning with 1990 data, the urban areas less than 30,000 category is split into 2,500 to 29,999 and less than 2,500 and selected CMAs are identified.

Household Income, Facilities and Equipment (HIFE). 1972 to present.

(Formerly MDF-3506)

Summary

This file combines data from the Survey of Consumer Finances (SCF) and the Household Facilities and Equipment Survey (HFE). It relates household facilities

and equipment data to the level of household income received in the preceding year. Data items include: dwelling characteristics, household facilities and equipment, recreational equipment, household and family income and personal, and labour-related characteristics.

Note: the files for 1988 and 1991 also include data from the Shelter Cost Survey. See 64M0002 for further information. In 1991, the Household Income, Facilities and Equipment and Shelter Cost microdata files were linked with data from the Household Environment Survey (HES). The HES conducted in May 1991 asked households a range of questions on environmental concerns covering energy and water conservation measures, the use of products with a "high" environmental profile, the use and disposal of potentially hazardous materials, water consumption reduction measures, and waste and recycling practices.

Frequency

Biennial: (1972 to 1982); 1983; annual (1985 to present)

Reference period

Income data is for the previous calendar year; household facilities and equipment are those present at time of survey. The title year of the file is the survey year - eg. 1993 HIFE file contains HIFE data from May 1993 and 1992 income data from the SCF.

Universe

Private households in Canada; excludes the Yukon, Northwest Territories, and Indian reserves.

Geographic coverage

Codes are given for provinces; areas with population 500,000+, 100,000 to 499,999, 30,000 to 99,999, urban areas less than 30,000 and rural areas. Beginning with 1990 data, the urban areas less than 30,000 category is split into 2,500 to 29,999 and less than 2,500 and selected CMAs are identified.

71M0001

Labour force survey (LFS). 1976 -

(Formerly MDF-3701)

Summary

The Labour Force Survey (LFS) is a household sample survey which collects data on the labour market activities of the working age population of Canada. It generates a wide range of estimates relating to the employed, the unemployed, and persons not in the labour force.

Frequency

Monthly

Reference period

Usually the week containing the 15th day of the month

Universe

Canadian citizens and landed immigrants aged 15 years and over residing in Canada, excluding inmates of institutions, full-time members of the Armed Forces, and residents of Indian reserves, the Yukon and Northwest Territories

Geographic coverage

Provinces

Sample size

58,000 reporting units (households)

Collection method

80% telephone interview, 20% face to face interview

Collection period

Usually the week containing the 22nd day of the month (the week following the reference week)

Related publications

**71M0006
Survey of Job Opportunities. 1978 -**

(Formerly MDF-3821)

Summary

Conducted as a supplement to the Labour Force Survey, the Survey of Job Opportunities collects information on persons not in the labour force who say they want and are available for work but who are not currently seeking employment. The purpose is to identify: 1) persons inactive due to labour market conditions or their own preference, and the participation patterns and type of work desired by such individuals; 2) persons who have become discouraged looking for work and believe no suitable jobs are available; and 3) persons who know that work will not be available in their community until some future time, due to seasonal or economic conditions. Standard demographic variables are shown for each respondent.

Frequency

71M0010 Labour Market Activity Survey. 1986 - (Formerly MDF-3853)

Summary

This survey replaces the Survey of Work History (75M0006) and the Survey of Union Membership (71M0004). Objectives of the survey are: 1) to measure the frequency and number of job changes in the Canadian labour market over one, two and three year periods; 2) to provide information on the characteristics of jobs held during this period; 3) to develop socio-economic/demographic profiles of groups of people who would benefit from Employment and Immigration Canada (EIC) programs; and 4) to identify participants of EIC and other training programs. Topics include: periods of employment and unemployment; job search activities; unionization; pension plan coverage; wage rates; work schedules; inter- and intra-employer occupational mobility; and financial compensation during absences from work. Data is presented in 2 files; persons and jobs.

Frequency

Annual; continues selected elements of the Survey of Annual Work Patterns

Reference period

Information is collected for a 12 month period. Cross-sectional data are available for the years 1986-1990; longitudinal data, drawn from separate panels, are available for 1986-87, and 1988-89-90.

Universe

Civilian, non-institutionalized population aged 16 to 69, excluding residents of the Yukon, Northwest Territories, and Indian reserves

Geographic coverage

Provinces; sample supports selected estimates for economic regions and census metropolitan areas

Sample size

66,934 individuals (1986 cross-sectional); 77,802 (1987 cross-sectional); 63,432 (1986-87 longitudinal); 63,804 (1988 cross-sectional); 63,660 (1989 cross-sectional); 63,016 (1990 cross-sectional); 55,434 (1988-89-90 longitudinal)

75M0005**Survey of Technological Change. 1992**

(Formerly MDF-3899)

Summary

This survey was conducted as a supplement to the Labour Force Survey. The purpose was to collect information about the attitudes of workers in selected industries and occupations toward the introduction of new technology, and whether the introduction of change is a positive or negative experience. The respondents are asked about changes in technology that have taken place in their workplace and their job over the last three years and the extent to which they participated in these changes.

Universe

This study selected 1,000 respondents from each of the following groups. The first group included the industries of steel, pulp and paper and telecommunications. The second group included persons in blue collar occupations in all other manufacturing industries. The third group was selected from those employed at the time of the interview.

Survey of 1981 Work History. 1981

(Formerly MDF-3804)

Summary

This survey was conducted as a supplement to the monthly Labour Force Survey, and provides detailed information on all jobs (up to a maximum of four) held by respondents over the course of 1981. For each job, data are shown for the industry, occupation, class of worker (paid, unpaid or self-employed) and months worked. For paid workers, data are presented on work schedule, wage rate, reasons for working variable hours, union membership, and desire for additional hours (part-time employees only). Standard demographic variables and annual income from all sources are shown for all respondents. Work history data for later years is collected in Survey of Annual Work Patterns and Labour Market Activity Survey.

82M0003**Health and Activity Limitation Survey (HALS):
Adults in Households. 1986**

(Formerly MDF-3221a)

Summary

This post-censal survey identifies numbers and distribution of adults with disabilities in households, and the barriers experienced by them in such areas as employment, education, transportation, community support, housing, and leisure activities. Includes selected demographic data from the 1986 Census as well as information on the nature and severity of disability, the type of aids used or needed, and income and expenses resulting from a health problem or condition. Records are also included for non-disabled persons, giving census data only.

Universe

Persons 15 years of age and over living in Canadian households at the time of the 1986 Census

Geographic coverage

Canada; provinces; territories; and the following census metropolitan areas (CMAs): St. John's, Halifax, Montreal, Toronto, Winnipeg, Edmonton, Calgary, Vancouver

Sample size

Total respondents (disabled and non-disabled): 132,337;
Disabled: 71,900

**Health and Activity Limitation Survey (HALS):
Disabled Adults in Health-Related Institutions.
1987**

(Formerly MDF-3222)

Summary

This post-censal survey identifies numbers and distribution of adults with disabilities in institutions, and the barriers experienced by them. Types of institutions include special care homes and institutions for the elderly and chronically ill, general hospitals, psychiatric institutions, and treatment centres and institutions for the physically handicapped. Data include nature and severity of disability, type of aids used or needed, and out-of-pocket expenses resulting from a health problem or condition.

Universe

Disabled adults aged 15 and over, who as of March 1, 1987 had been residing in a health-related institution for a continuous period of at least 6 months

Geographic coverage

Canada (excluding the Yukon and Northwest Territories); provinces

Sample size

Approximately 17,434 persons from 1,100 institutions

Collection method

Personal interview

Collection period

March to April 1987

89M0005

Survey on Drinking and Driving. 1988

(Formerly MDF-3869)

Summary

The objectives of the survey were: 1) to collect etiological, attitudinal, cognitive and behavioral information regarding drinking and driving; 2) to collect information useful at both provincial and national levels; 3) to collect baseline data which can be used to assess trends and changes in variables over time. The goal of the overall program, of which the national survey is a part, is to change the prevailing social acceptability of drinking and driving at the community level. Questions cover personal behaviour, drinking habits, drinking and driving situations, and demographic characteristics.

89M0008 Survey of Literacy Skills Used in Daily Activities. 1989

(Formerly MDF-3874)

Summary

The principal objective of the survey was the development of a detailed literacy profile of Canada's adult population. Translated into specific data requirements, it was determined that the final database should provide: 1) a direct multi-dimensional assessment of the literacy skills of the Canadian population aged 16-69 for each official language; 2) a self-assessment of the literacy skills and associated literacy needs for persons whose mother tongue is other than English or French; 3) a self-assessment of the literacy skills and associated needs for those at work, for those looking for work and for those outside of the labour force; 4) data allowing the analysis of the link between assessed literacy levels and other socio-economic indicators such as educational attainment and labour force participation. The central element of the survey was the direct assessment of the skills of Canadians using commonplace tasks of varying difficulty drawn from a range of topics and knowledge areas. This central element was supported by the collection of background information on respondents. In addition to collecting standard demographic characteristics, the background questionnaire included questions on the self-assessed literacy skills of respondents (in one of the official languages and in their mother tongue), on the perceived barriers to realizing enhanced literacy skill levels and on training which would facilitate such skill enhancement.

91M0002

Survey on Ageing and Independence. 1991

(Formerly MDF-3885)

Summary

The main objective of the survey was to measure contributors to the quality of life and independent living of today's (65 years old or over) and tomorrow's (45 to 64 years old) seniors in Canada. A broad range of characteristics was measured to study the assumption that independent living in later life is influenced by three major factors: physical and mental well-being; social life; and income. These factors are in turn shaped by life course experiences such as education and work history. Other characteristics such as age, gender and marital status and area of residence also contribute to determining life circumstances. Topics include: retirement and main activity; labour characteristics and retirement preparations; physical and social activities; well-being; health; life events; social support networks, family and friends; mobility and travel; accidents and safety; living arrangements and housing characteristics; income; financial situation; satisfaction with life. The survey was conducted as a supplement to the Labour Force Survey, and the microdata file contains much of the Labour Force Survey data.

95M0002

1986 Census Public Use Microdata File on Individuals.

(Formerly MDF-3901e)

Summary

The file contains data based on a sample of 500,000 individuals, representing approximately 2% of the population enumerated during 1986 Census. Extensive demographic, social and economic information, such as income, age, schooling, and ethno-cultural characteristics are provided. The file allows users to return to the base unit of the census, enabling them to group data to suit their own requirements.

Universe

All individuals except residents of institutions and incompletely enumerated Indian reserves

Geographic coverage

Canada's provinces and territories (Yukon and Northwest Territories combined); 12 census metropolitan areas

Sample size

2% (500,000 individuals)

Collection period

June 1986

95M0003 1986 Census Public Use Microdata File on Households and Housing.

(Formerly MDF-3901d)

Summary

The file contains data based on a sample of 115,000 households, representing approximately 1% of all households in Canada, enumerated during the 1986 Census. Information is given on households per se, such as total income of household members, and information is given on dwellings, such as date of construction. Extensive demographic, social and economic information about the household maintainer, his/her spouse and economic family, are also provided. The file allows users to return to the base unit of the census, enabling them to group data to suit their own needs.

Universe

All private households in occupied private dwellings outside Indian reserves

Geographic coverage

Canada; provinces and territories (Yukon and Northwest Territories combined); 21 census metropolitan areas

Sample size

1% (115,000 households)

Collection period

June 1986

95M0004

1981 Census of Canada Public Use Sample Tapes.

(Formerly MDF-3901c)

Summary

The data have been organized into two files: Individual, and Household/Family. To create each of these basic files an independent stratified sample was taken from 1981 Census records. The Individual file contains detailed demographic and economic data, along with selected family and household characteristics, for each individual in the sample. In the Household/Family file, each record consists of two parts: the household part contains detailed information on the occupants of the household, as well as some information on housing; the family part gives detailed information on each census family and non-family person within the household.

Universe

All private households in occupied dwellings outside Indian reserves

Geographic coverage

To meet confidentiality criteria, geographic areas identified are restricted to provinces and census metropolitan areas with population 250,000 +; PEI, Yukon and Northwest Territories are combined

Sample size

Individual file: 1 in 50; Household/family file: 1 in 100

Collection period

June 1981

95M0005

1976 Census of Canada Public Use Sample Tapes.

(Formerly MDF-3901b)

Summary

The public use sample is a representative sample of individual records from the 1976 Census. Data have been organized into three files: the Individual File contains detailed demographic and economic data, along with a few family and household characteristics, for each individual in the sample; the Household File contains detailed demographic information on the occupants of the household, as well as some information on housing; the Family File gives detailed information on the husband/male lone parent and wife/female lone parent in the census family, as well as grouped data on the other members of the family.

Universe

All private households in Canada outside Indian reserves

Geographic coverage

To meet confidentiality criteria, geographic areas identified are restricted to areas with population 250,000+ (9 provinces and 3 census metropolitan areas: Montreal, Toronto and Vancouver)

95M0007

1991 Census Public Use Microdata File on Individuals

(Formerly MDF-3901g)

Summary

The file contains data based on a 3% representative sample of the population enumerated during the 1991 Census. Anonymous responses to census questions are available for more than 100 variables, including education, labour force participation, income, and ethnic origin. The file allows users to return to the base unit of the census, enabling them to group and manipulate the data to suit their own data and research requirements. The Individual file is available in a CD-ROM version for the first time in 1991, permitting the use of microcomputer applications.

ELECTRONIC PRODUCTS AND SERVICES

Universe

The target population for the file includes all Canadian citizens and landed immigrants with a usual place of residence in Canada or those on military or diplomatic assignment outside the country. For the first time in 1991, the census also includes non-permanent residents in Canada. Non-permanent residents are persons holding student or employment visas, Minister's permits or persons claiming refugee status. Prior to 1991 non-permanent residents were considered foreign residents and were not enumerated (except in 1941).

Excluded from the population universe are foreign residents (foreign diplomats, members of foreign Armed Services stationed in Canada, or residents of another country visiting in Canada temporarily) and residents of institutions or incompletely enumerated Indian reserves and settlements.

Geographic coverage

Canada's provinces and territories (Yukon and Northwest Territories combined): selected census metropolitan areas.

95M0008

1991 Census Public Use Microdata File on Households and Housing

(Formerly MDF-3901h)

Summary

The file contains data based on a sample of Canadian households, representing approximately 3% of all households in Canada, enumerated in the 1991 Census. Data is presented on the household in the context of the individuals and families that reside there. There are more than 100 variables in this file including structural and cost related information on the dwelling: size, income and employment variables for the household; ages and income sources for economic family members; and economic, demographic and socio-cultural information for the income maintainer and his/her partner. The file allows users to return to the base unit of the census, enabling them to group and manipulate the data to suit their own data and research requirements. The Household and Housing file is available in a CD-ROM version for the first time in 1991, permitting the use of microcomputer applications.

Universe

The target population for the file includes all households in occupied private dwellings in Canada, where the occupants are Canadian citizens, landed immigrants, or non-permanent residents. Non-permanent residents are persons holding student or employment visas, Minister's permits or persons claiming refugee status. The inclusion of non-permanent residents represents a change in the population universe from previous censuses. Prior to 1991 non-permanent residents were considered foreign residents and were not enumerated (except in 1941).

Excluded from the household universe are collective households, households outside of Canada, households located on Indian reserves or settlements and households consisting solely of temporary and/or foreign residents. Foreign residents are diplomats from foreign countries residing in Canada, members of foreign Armed Services stationed in Canada, or residents of another country visiting in Canada temporarily.

Geographic coverage

Canada's provinces and territories (Yukon and Northwest Territories combined); selected census metropolitan areas.

Sample size

3% (297,313 households)

95M0009

1991 Census Public Use Microdata File on the Family

(Formerly MDF-3901i)

Summary

The file contains data based on a sample of families and non-family persons, representing approximately 3% of all those enumerated in the 1991 Census. Data is presented on family composition and structure. Demographic, social, cultural and economic information is provided for families, their members and for non-family persons. The file allows users to return to the base unit of the census, enabling them to group and manipulate the data to suit their own data and research requirements. The Family file is available in a CD-ROM version for the first time in 1991, permitting the use of microcomputer applications.

Universe

The target population includes families of Canadian citizens, landed immigrants and non-permanent residents living in private households in Canada on Census day. Non-permanent residents are persons holding student or employment visas, Minister's permits or persons claiming refugee status. The inclusion of non-permanent residents represents a change in the population universe from previous censuses. Prior to 1991 non-permanent residents were considered foreign residents and were not enumerated (except in 1941).

Excluded from the family file are families who live in collective households, reside overseas, are located on incompletely enumerated Indian reserves or settlements, or families consisting of foreign residents. Foreign residents are diplomats from foreign countries residing in Canada, members of foreign Armed Services stationed in Canada, or residents of another country visiting in Canada temporarily.

Geographic coverage

Canada's provinces and territories (Yukon and Northwest Territories combined): selected census metropolitan areas.

CANADIAN BUSINESS PATTERNS

Product No.: 61F0040

Custom Retrieval Service No.: 61C0025

This PC-based, high density diskette product contains both data and the supporting user-friendly software. The product includes:

- Up-to-date counts of establishments on a provincial and a national basis;
- Tables at the 1, 2 and 4-digit SIC 80 levels;
- 6 employment size ranges;
- Graphic capabilities;
- Varied data manipulation and worksheet features;
- Compatibility with many software packages;
- Step-by-step user documentation and background methodology - hardcopy and diskette;
- Data produced on a semi-annual basis beginning with June 1990.

ELECTRONIC PRODUCTS AND SERVICES

The price structure for Product No. 61F0040 is:

- \$500.00 for one semi-annual release;
- \$800.00 for two semi-annual releases in a calendar year;
- \$100.00 per back issue of semi-annual basis for calendar year clients beginning with June 1990.

In addition to the above, the Product Analysis and Dissemination Section of the Business Register Division is able to produce various customizations of analysis and establishment counts, catering to a wide range of requests. Establishment counts can be tabulated by virtually any industry and geographic area within Canada to suit your analytical needs.

For more information on customized tabulations, Canadian Business Patterns, or if you wish to receive a free demo diskette, please contact:

Fax: (613) 951-0104

CANSIM

CANSIM is Statistics Canada's computerized data base network and information retrieval service. CANSIM, which stands for Canadian Socio-economic Information Management System, provides public access to current and historical time series statistics in various forms, such as on-line access, tape services, CD-ROM and over-the-counter client defined retrievals on paper, tape or microcomputer diskettes. The CANSIM Time Series Data Base contains about 550,000 time series collected from subject matter sources throughout Statistics Canada, as well as outside sources such as the Bank of Canada. Many of these series constitute a data record of several decades and some series contain more detail than data found in the published print form.

CANSIM Data Retrieval Services

Custom Retrieval Service Numbers:

Retrievals from Cross-classified database: 10C0017

Standing Request Retrieval from the CANSIM Time Series: 10C0018

AD HOC Retrieval from the CANSIM Time Series: 10C0019

For users who have limited or a one-time need of the data available on the CANSIM Time Series or Cross-classified Data Bases, Statistics Canada provides a retrieval service customized to the users data requirements. Data are provided in a variety of storage media (paper, diskette, or magnetic tape).

CANSIM University Base Service

The CANSIM University Base is a data base offered exclusively to universities and colleges, for the purposes of teaching and academic research. The University Base contains the same series as those found in the commercial CANSIM Time Series Data Base.

University Base Internet Service

The entire CANSIM Time Series Data Base (approximately 550,000 series) is now available through the University Base Internet service. The Internet service is accessible through the EPAS Computing Facility of the University of Toronto; Statistics Canada's official university distribution site.

This service provides weekly updates to the base, full directory search capacity and use of EPAS retrieval manipulation and display software. The choice service level and number of access accounts can be negotiated directly with the EPAS Computing Facility.

To acquire a subscription to this service an agreement restricting use of the base to academic use must be signed and a fee of \$995 must be paid to Statistics Canada. A service agreement with EPAS is negotiated separately. For more information contact: Bill Graham, Statistics Canada via e-mail at grahwil@statcan.ca or telephone (613) 951-1144 or Chris Leowski, EPAS-University of Toronto via e-mail at chris@epas.toronto.ca or telephone (416) 978-4304.

CD-ROM Products

The Marketing Division has three compact disc products for sale.

a) **The StatCan: CANSIM Disc** provides a compact, cost-effective means of accessing the approximately 550,000 CANSIM time series, of the CANSIM Time Series Data Base. In addition to the data, the disc offers full directory functions, including a key word search facility enabling you to readily identify needed data, plus a thesaurus that reconciles everyday language with Statistics Canada terms. It has two flexible software packages on the one disc. One to search this extensive data base and the other to retrieve, manipulate, format and display the data in either tabular or graphic form. Data are easily downloaded and exported to commercial spreadsheet software packages. This disc also contains information about the surveys and statistical programs carried out by Statistics Canada as well as a list of publications which are found in the Statistics Canada Catalogue.

The **StatCan: CANSIM Disc** Product No.: 10F0007XC can be purchased for \$1,995 for an annual (one copy) subscription or \$2,995 for a semi-annual subscription. A discount of 50% is given to educational institutions. Annual Update Product No.: 10F0007UC.

b) **StatCan: CANSIM Directory Disc - Compact Disc (CD-ROM) - Product No.: 10F0005XC.** This disc contains only the textual portion of the StatCan: CANSIM Disc. The textual bases include the CANSIM Time Series Directory, a Thesaurus, the Statistics Canada Catalogue

ELECTRONIC PRODUCTS AND SERVICES

and Survey Information (SDDS). SDDS stands for Statistical Documentation Data System. This product is updated semi-annually and retails for: Canada: \$75; (plus GST where applicable) United States: U.S. \$90; other countries: U.S. \$100.

c) **The Canada 1986 and 1991 Census Profiles CD-ROMS** contain two types of files: the popular profile series - 2A (data collected from 100% of the population) and 2B (data collected from a 20% sample). Both incorporate more than 500 cultural, demographic, housing, family and economic characteristics for thousands of standard sub-provincial areas on a single compact disc. The 1986 Census Profiles also contain a series of special-interest tables created specifically for this disc. The 1991 profiles disc contains an electronic dictionary. Data files for the 1986 or the 1991 profiles are available at a number of geographic levels, including census subdivisions, urban forward sortation areas, census tracts and enumeration areas. Easy-to-use retrieval software, featuring detailed help screens, allows users to display and manipulate data, or to transfer them to user-owned commercial software packages.

The Geography Information File enables users to identify the relationships between a number of standard political and statistical areas used in the Census. Descriptive files provide information on the content of pre-defined Census tabulations and the public-use microdata files.

The 1986 Census Profiles CD-ROM is now available for sale at 70% off its commercial price. Prices for the 1991 Census Profiles CD-ROM range from \$500.00 for one province to \$7,500.00 for all of Canada. Educational discounts of 50 % are also available.

Electronic Publications Directory - Diskette

The Dissemination Division has produced, in IBM®/PC diskette format, an Electronic Publications Directory. This product includes search and retrieval software to access both current and historical catalogued publications. It incorporates synonyms and a thesaurus. It can display both titles and abstracts, and has an "availability for purchase" indicator. This product provides a compact (1.5 megabytes) and easy-to-use alternative to the on-line services.

On-line Access to CANSIM

The CANSIM Time Series Base, now comprising about 550,000 series contains primarily economic and business statistics. Direct public access is available to the CANSIM Time Series Data Base exclusively through privately owned computer service bureaus. These service bureaus can be accessed through world-wide data transmission networks by authorized users equipped with modems and terminals or personal computers. They also offer their own software to retrieve and manipulate data and in turn allow subscribers to download this data directly to their microcomputers. To obtain a list of the computer service bureaus contact the Marketing Division (613) 951-8200.

Reference Materials

Also available, as a non-catalogued publication, is the CANSIM Time Series Directory which describes the contents of the CANSIM Time Series Data Base. This directory has also been packaged on a CD-ROM. Both products are available from the Marketing Division and Regional Offices.

The Dissemination Division maintains an internal bibliographic information search service for the CANSIM Time Series Directory. The Dissemination Division can produce customized directories or special searches on a cost-recovery basis for users.

In addition to the above, the Dissemination Division also maintains a number of internal on-line bibliographic data bases including the Statistics Canada Inventory of Catalogued Publications. This data base has been adapted to enable flexible retrieval and production of other printed and electronic reference products including both diskette and CD-ROM based products.

CROP CONDITION ASSESSMENT PROGRAM

Custom Retrieval Service No.: 22C0004

Statistics Canada provides information on a weekly basis throughout the growing season for monitoring crop growing conditions in Manitoba, Saskatchewan and Alberta. This information is available through the Crop Condition Assessment Program (CCAP).

The CCAP reports are produced using statistical information derived from digital satellite data. These data are incorporated into a vegetation index, which indicates the level of vegetation stress resulting from conditions that could include drought, disease or insect damage.

The products available for purchase include hardcopy colour visual images, maps, graphs and tabular data at the census agricultural region and rural municipality levels. The CCAP is available on a 15-week subscription basis with prices ranging from \$1,200 to \$3,750, depending on output options.

ELECTRONIC PRODUCTS AND SERVICES

E-STAT LEARNING PACKAGE

Product Number: 10F0002XC
Annual Update: 10F0002UC

E-STAT is a computer-aided learning tool developed by Statistics Canada for Canadian secondary schools. The E-STAT CD-ROM combines a selection of CANSIM time series with census profile information to provide an excellent statistical source to support secondary school curriculum. A user-friendly software allows users to key word search the data bases, to retrieve and manipulate the data and to present the results in table, graph and map form. The package is well documented and includes teacher support materials. This product is marketed exclusively to educational institutions.

For more information about E-STAT please contact the nearest Statistics Canada Regional Reference Centre.

ENVIRONMENTAL INFORMATION SYSTEM

Custom Retrieval Service No.: 12C0001

The **Environmental Information System** contains a wide variety of Statistics Canada's socio-economic data series commonly used in the analysis of environmental issues. This information can be restructured to suit specific needs of the environmental researcher or consultant.

The system also provides the facility to combine socio-economic microdata collected by Statistics Canada with external environmental information which together provide new insights into the nature of many environmental problems. To date the system has been used by researchers to estimate pollution emission levels; analyze pollutants from agriculture; gauge population pressures on ecosystems; assess land use change; estimate acid rain impacts; help estimate soil erosion.

Data can be readily tabulated and displayed by environmental classifications appropriate to the analysis. A number of special geographic units are available in the System for this purpose including river basins, ecological zones, soil zones, wetland regions. Other classifications are developed around environmentally relevant themes covering agricultural practices such as monocultures, crop rotations and industrial characteristics such as resource consumers, energy consumers and users of hazardous materials.

In addition, customers are able to specify their own geographic and other classifications of interest for data analysis. Clients, for example, have been provided with socio-economic data tabulated for acid rain deposition zones, endangered species habitats, air pollution monitoring areas, and forest regions, among others.

Over 1,000 demographic, agriculture and manufacturing variables collected by Statistics Canada are maintained on the Information System to serve in the analysis of environmental issues.

Examples of these data include population and population change; dwelling characteristics; household facilities; agricultural land uses; agricultural cropping practices, fertilizer and pesticide use; industrial characteristics and activities.

A selection of data on the physical characteristics of the environment are also available. In addition, clients can have their own data sets added and explore relationships with the data already in the system.

Information can be provided in the form of spread sheets; ASCII files; micro-computer databases; tables on paper; ARC/INFO export files; maps on paper, film, or PC screen formats.

The cost of each individual request is based upon its size and complexity. A data directory/dictionary is available upon request. For more information contact:

HEALTH INDICATORS 1992

Product Number: 83F0002XD
Annual Update: 83F0002UD
Secondary Site License: 83F0002L

The Health Statistics Division has updated and expanded the original publication to include 58 health-related indicators.

This publication features:

- statistical tables and graphs
- high density diskettes containing the entire database of over 1.4 million observations
- customized software to retrieve and manipulate the diskette database
- software manual
- detailed data dictionary

All indicators are disaggregated to the provincial level. Further indicator specific disaggregations may include variables such as age, sex, disease classification, and type of institution. Most indicators are presented for a number of years enabling time-series analysis.

ELECTRONIC PRODUCTS AND SERVICES

The following indicators are currently on the database.
New indicators are listed in dark print.

Health Determinants

- population distribution
- elderly population
- total fertility rate
- age-specific fertility
- live births
- teenage abortions and births
- number of smokers
- average number of cigarettes smoked per day
- number of drinkers
- average number of drinks per week
- persons with high blood pressure
- elderly population and income
- elderly population and low income cutoffs
- number of time-loss injuries
- exercise frequency
- regular pap smear
- regular seatbelt use
- measures to improve health
- body mass index
- persons desiring weight change
- regular breast examination
- breakfast food consumption
- **job satisfaction**
- **labour force statistics**
- **stress**
- **Bradburn affect balance scale**
- **drinking and driving**
- **lone parent families**
- **age at first intercourse**

Health Status

- life expectancy
- potential years of life lost
- age-standardized mortality rates
- infant mortality rates
- perinatal mortality rates
- number of suicides
- hospital separations
- hospital ambulatory care visits
- persons with disability
- disability due to motor vehicle accidents
- motor vehicle accident morbidity
- sexually transmitted diseases
- **stillbirths**
- **population reporting health problems**
- **notifiable diseases**
- **disability by living arrangement**

Health Resources

- per capita health expenditures by economic sector
- per capita health expenditures by category of services
- health expenditures as a percent of GDP by economic sector
- health expenditures as a percent of GDP by category of services
- number of health professionals

- university students in health care disciplines
- university graduates from health care disciplines
- college students and graduates from health care disciplines
- health care institution beds

Health Resource Utilization

- health care institution bed occupancy rate
- patient-days by type of care
- separations by type of health care institution
- patient-days by age and sex
- average length of stay in hospitals
- physician services and payments

The publication and database will be updated and expanded on an annual basis.

To load the database onto a personal computer you will require an IBM® compatible PC and graphics card as well as 512K of RAM. In addition, the diskettes require a high density disk drive and a hard disk is recommended. Diskettes are available in both the 3 1/2" and 5 1/4" formats.

The publication is available in either English or French while the diskette database and software are provided in a bilingual format.

The price of the publication (including the diskette database and software) is \$600.00. Additional copies are available for \$250.00 and yearly updates can also be purchased for \$250.00. For further information contact:

INTER-CORPORATE OWNERSHIP ON CD-ROM

Product No.: 61-517 C

The **Inter-Corporate Ownership Publication** (Catalogue 61-517) is now available in a CD-ROM format. Frequency: Quarterly; released on the 15th of the third month of each calendar quarter. First release: March 15th 1994. English or French option available on each disc. Free demonstration diskette available as well as a disc tutorial.

A guide to who owns whom in Canadian business, the ICO on CD-ROM, presents tiered ownership "maps" for over 75,000 corporations. Included software allows for one to four dimensional searches. These searches can be done by name, by country of control, by SIC, by province of head office and/or, by "type of ownership link" (a "single" or "multi" corporation enterprise).

Price: *Introductory price of \$3,000 for an annual subscription is offered to those ordering between March 15, 1994 and September 14th 1994.*

ELECTRONIC PRODUCTS AND SERVICES

Regular price will be \$5,000 for an annual subscription, \$1,750 for a single copy.

A 50% discount on the annual subscription is offered to educational institutions.

Prices for American and other foreign purchasers are the same, except in US dollars.

diskettes are available either on the day of release or at a reduced cost after 7 days. **Note:** For further information, contact the Client Services Representative at (613) 951-3640.

	<i>Per Year</i> <i>(On release day)</i>	<i>Per Year</i> <i>(After 7 days)</i>
<i>Canada:</i>	\$640.00	\$240.00
<i>United States:</i>	US\$768.00	US\$288.00
<i>Other Countries:</i>	US\$896.00	US\$336.00

National income and expenditure accounts. Annual. Publication and diskette package no. 10-297.

The diskettes are offered as a supplement for subscribers to 13-201 (see 13-201 under "Publications" for more details). They include all the data in 13-201, historical data beginning in 1926, a description of the series and a users' manual. **Note:** For further information, contact the Client Services Representative at (613) 951-3640.

	<i>Per Issue</i>
<i>Canada:</i>	\$120.00
<i>United States:</i>	US\$144.00
<i>Other Countries:</i>	US\$168.00

Provincial economic accounts. Annual. Publication and diskette package no. 10-299.

The diskettes are offered as a supplement for subscribers to 13-213 (see 13-213 under "Publications" for more details). They include all the data in 13-213, historical data beginning in 1961, a description of the series and a users' manual. **Note:** For further information, contact the Client Services Representative at (613) 951-3640.

	<i>Per Issue</i>
<i>Canada:</i>	\$130.00
<i>United States:</i>	US\$156.00
<i>Other Countries:</i>	US\$182.00

Financial flow accounts. Quarterly. Publication and diskette package no. 10-300.

The diskettes are offered as a supplement for subscribers to 13-014 (see 13-014 under "Publications" for more details). They include all the data in 13-014, historical data beginning in 1962, a description of the series and a users' manual. Please note that the diskettes are available either on the day of release or at a reduced cost after 7 days. **Note:** For further information, contact the Client Services Representative at (613) 951-3640.

	<i>Per Year</i> <i>(on release day)</i>	<i>Per Year</i> <i>(After 7 days)</i>
<i>Canada:</i>	\$1,340.00	\$380.00
<i>United States:</i>	US\$1,608.00	US\$456.00
<i>Other Countries:</i>	US\$1,876.00	US\$532.00

National balance sheet accounts. Annual. Publication and diskette package no. 10-301.

The diskettes are offered as a supplement for subscribers to 13-214 (see 13-214 under "Publications" for more details). They include all the data in 13-214,

MANUFACTURING DATABASES

The Annual Survey of Manufactures collects a wide range of data on manufacturing including data on fuel and electricity, materials and supplies used by input commodity, product shipments by commodity, value added, employment, wages and salaries, and other variables. Data can be custom tabulated at the provincial and national levels in electronic format on request, subject to data availability and confidentiality constraints. Two standard data files are available in electronic form.

The first standard data file contains principal statistics of manufacturers by industry at the Canada and province levels, from 1961 to date. Cost: \$3,000 for the complete file. Portions of the file can be made available at lesser cost (for example, Canada level data for the most recent year is \$550). Custom Retrieval Service No.: 31C0005

The second standard data file contains statistics on fuel consumption, value and quantity, for manufacturers by type of fuel by industry for Canada and the provinces from 1975 to 1986 and from 1990 to date. Quantity data for 1985, 1986 and 1990 are available for selected industries only. Cost: \$1,875 for the complete file. Portions of the file can be made available at lesser cost (for example, Canada level data for latest year is \$350). Custom Retrieval Service No.: 63C0001

PUBLIC FINANCE HISTORICAL DATA

Product No.: 68-512 D

Public Finance Historical Data, 1965/66 - 1991/92 - Occasional. Statistics Canada, Public Institutions Division, System of National Accounts Branch.

This diskette product is offered as a supplement to the publication of the same title. It includes all the historical data in publication 68-512 and a user's manual. For more details on the content, refer to 68-512 under Publications. **Note:** For further information, contact Patti Phillips (613) 951-0767; Facsimile (613) 951-0661.

Price: \$125.00

SMALL AREA AND ADMINISTRATIVE DATA DIVISION DATA PRODUCTS

The Small Area and Administrative Data Division (SAADD) tabulates data derived from administrative records.

Because confidentiality of Canadians is protected, numbers in certain databanks are rounded and data may be suppressed to avoid residual disclosure when geographic areas comprise fewer than 100 taxfilers, or characteristics are shared by fewer than 15 taxfilers.

The following is a brief description of the resulting demographic and socio-economic databanks that are available.

The Unemployment Insurance data are produced monthly; all other databanks are annual.

Canadian Taxfilers

Custom Retrieval Service No.: 17C0009

These are data on all Canadian taxfilers and include:

- number of taxfilers
- percent using a French tax return
- percent of taxfilers in each of six age ranges
- total income:
 - median
 - 75th percentile
 - percent with incomes over \$43k
 - percent with incomes over \$63k
- employment income
 - median
 - 75th percentile

Community profiles

Custom Retrieval Service No.: 89C0021

New this year, this product was developed to meet the data needs of small communities. Data on small rural communities that were not available in the past are now available for 1989 to 1991.

The five profiles include data on:

- population by age group and by type of family unit
- sources of income
- labour force participation
- economic dependency
- characteristics of husband-wife families.

Designer Data

Data can be designed for your specific needs.

You can purchase any of the databanks described above. For an additional fee, we will manipulate or adapt these data to your specific needs.

You may prefer to obtain data that are different than those contained in the standard databanks. Your understanding of your market(s) may require special tabulations. For a fee, we will produce data from the raw files to your specifications.

These special requests fall under the heading of **designer data - data produced to meet specific needs.**

Statistics Canada produces data for standard geographical areas as defined in the census geography or the postal code geography. Your geography may differ. Your special areas may be regions, branch service areas, neighbourhoods, and so forth. If you provide us with a list of postal codes for each area for which you want data, we will produce it for your areas. These requests are another example of **designer data**.

Subject to the normal release date of regular data products, and to the confidentiality and privacy constraints noted above, designer data can be produced at any time of the year.

Economic Dependency Profile

Custom Retrieval Service No.: 13C0017

This socio-economic profile shows the relationship of reported taxfiler transfer payments to employment income. Economic dependency is the ratio of reported taxfiler transfer payments to employment income.

The numerator is the total reported from the following sources: UI, CPP/QPP, OAS, pensions, Family Allowances, Child Tax Credit, Goods and Services Tax Credit and selected provincial tax credits. The denominator is the aggregate employment income reported for the same area.

The EDR (Economic Dependency Ratio) is calculated for all reported transfer payment sources plus the individual components such as UI.

This profile is available for Canada, the provinces and territories, census metropolitan areas, census divisions, postal geography (including postal walks) and user-defined areas.

ELECTRONIC PRODUCTS AND SERVICES

Family Databank

Custom Retrieval Service No.: 13C0016

The individual taxfiler data are combined into husband-wife families and lone parent families, non-family persons, and senior families.

Family tables provide annual small area data on:

- the population of taxfilers and family types and the number of children
- the distribution and the sources of income
- economic dependency
- labour force participation
- spousal contribution to income
- median incomes by variables such as age and the number of children.

All data are available for Canada, the provinces and territories, census metropolitan areas, census divisions, postal geography and user defined areas.

Labour Force Income Profile

Custom Retrieval Service No.: 71C0018

This profile shows the number of taxfilers reporting total income, labour force income, employment income and self-employment income. The profile includes the aggregate dollars for each of these definitions of income, median total income and median employment income.

This profile also includes data on the population of taxfilers reporting UI benefits.

The indices of income are reported for each area and are compared to the one for Canada and the province or the territory in which the smaller area is located. The profile is available for Canada, the provinces and territories, census metropolitan areas, census divisions, postal geography (including postal walks) and user-defined areas.

Migration Estimates

Custom Retrieval Service No.: 91C0025

Available are population migration estimates between all census divisions (CDs) in Canada, between the provinces and territories and between Canada and other countries.

The four tables are:

- Migration estimates for each CD by province of origin and destination (including intraprovincial migration)
- CD migration estimates by age group
- CD migration estimates by type of migration (intraprovincial, interprovincial and international) and gender
- Major migration flows by CD of origin and CD of destination.

Neighbourhood Income and Demographics (NID)

Custom Retrieval Service No.: 13C0015

NID provides nine tables of detailed taxfiler data on income and demographics for all neighbourhoods and letter carrier walks in Canada. It contains data on taxfilers according to:

- marital status by gender
- age distribution by gender and age group
- sources of income by gender and age group
- their number in the labour force.

These data are available for Canada, the provinces and territories, census metropolitan areas, census divisions, postal geography (including postal walks) and user-defined areas.

Specialized Databanks

Note: All of the specialized databanks are available for Canada, the provinces and territories, for postal geography (down to the postal walk level) and for user-defined areas.

Specialized databanks are available for six domains:

Canadian Investment Income

Custom Retrieval Service No.: 17C0008

This is a report on all taxfilers reporting investment income on lines 120 and 121 of the individual tax form (both Savers and Investors):

- the number of taxfilers
- the number of taxfilers reporting income on lines 120 and 121
- the total investment income from lines 120 and 121 of the T1, the individual tax form.

For taxfilers reporting investment income, there are data on:

- average age
- median total income
- the median investment income.

Canadian Savers

Custom Retrieval Service No.: 17C0009

There are data on:

- the number of taxfilers
- the number of savers
- the total investment income from line 121 of the T1, the individual tax form

For savers only, there are data on:

- average age
- median total income
- the median investment income.

Canadian Investors

Custom Retrieval Service No.: 17C0007

There are data on:

- the number of taxfilers
- the number of investors
- the total investment income from lines 120 and 121 of the T1, the individual tax form.

For investors only, there are data on:

- average age
- median total income
- the median investment income.

ELECTRONIC PRODUCTS AND SERVICES

Charitable Donors

Custom Retrieval Service No.: 13C0014

There are data on all taxfilers reporting charitable donations on line 340 of the individual tax form or T1:

- the number of taxfilers
- the number of taxfilers reporting donations
- their total donations to charitable organizations.

For taxfilers reporting charitable donations, there are data on:

- average age
- percent distribution of charitable donors for five age ranges
- median total income
- 75th percentile of total income
- the median charitable donation.

RRSP Contribution Limit or "ROOM"

Custom Retrieval Service No.: 17C0011

This new product provides data on the contribution limits carried over from 1991 and 1992 (Unused Room) and the contribution limits for 1993 (New Room). Specifically, the two tables available contain:

- the number of taxfilers with unused and new room and the corresponding dollar value;
- characteristics of taxfilers with new room.

RRSP Contributors

Custom Retrieval Service No.: 17C0006

There are data on:

- the number of taxfilers
- the number of taxfilers reporting RRSP contributions
- dollars contributed to RRSPs.

For those taxfilers in an area making RRSP contributions, there are data on:

- the average age
- median employment income
- 75th percentile of employment income
- median RRSP contribution.

Unemployment Insurance Data

Two monthly UI tables are available:

- counts of UI beneficiaries by type of benefit by gender and by age group; Product No.: 73F0002
- UI to population ratios representing the percentage of the population aged 15 to 64 who received UI benefits, and had no earnings; Custom Retrieval Service No.: 73C0004

Both are updated monthly and are available for Canada, the provinces and territories and for census divisions. The first table is also available for user-defined areas.

Prices

Standard products have fixed prices. A copy of the price list is available on request.

The price for all designer data products is on a cost recovery basis, and varies with the complexity of each request.

Output medium

All data products listed above are available in print and in machine readable format.

Information

Additional information, price lists and a more detailed catalogue of small area data products is available by contacting:

or from the Statistics Canada Regional Office nearest you.

SMALL BUSINESS DATA

The Small Business Statistics Program provides information "on" and "for" small and medium business. It makes extensive use of administrative taxation records, particularly the T1, T2 and T4 forms, and existing survey information. The program is a joint undertaking of Statistics Canada, Industry Canada and all provincial and territorial government departments responsible for small business. The information available from the Small Business Statistics Program is categorized as follows:

Employment and Payroll Dynamics, by Business Size, Life Status, Age and Sex

Custom Retrieval Service No.: 61C0006

Employment and Payroll Dynamics, by Business Size, Life Status, Age and Sex shows the number of businesses, payrolls, labour units, male/female and age distributions, newly identified firms and firms no longer reporting, by business size and by industry at the national and provincial (and territorial) levels.

Sales per Selling Area of Independent Retailers

Custom Retrieval Service No.: 63C0011

Sales per Selling Area of Independent Retailers outlines selling area information for various groups of independent retail businesses for all provinces and territories. The report also presents statistical information for four metropolitan areas and for the five Canadian regions. Information on single and independently

ELECTRONIC PRODUCTS AND SERVICES

operated franchises in Canada is also provided in the report.

The Small Business Profiles

Custom Retrieval No.: 61C0001

Product No. for Complete Set: 61F0015

The Small Business Profiles present selected operating expense to revenue ratios, financial ratios, balance sheet information and employment data by province (and territory) and by industry based on the 1980 Standard Industrial Classification (SIC). The prices vary from \$30.00 for 3 profiles up to \$2,100.00 for a complete set of all profiles.

The custom-tailored products and services available from the Small Business Statistics Program, other than the Small Business Profiles - **Custom Retrieval No.: 61C0003**, are categorized as follows:

Statement of Changes in Financial Position

Custom Retrieval Service No.: 61C0005

Statement of Changes in Financial Position provides information on the various constituents of funding from operating and financial activities as well as applications of funds used in investment activities, purchases of fixed assets, debt repayment, and cash applied to dividends by industry for Canada and for the provinces and territories.

Statistical Summaries

Custom Retrieval Service No.: 61C0007

Statistical Summaries (formerly *Small Business in Canada: A Statistical Profile* no. 61-231) provides a distribution of incorporated and unincorporated business by industry and by revenue size as well as selected operating results and balance sheet items for Canada and each province and territory.

THE SOCIAL POLICY SIMULATION DATABASE AND MODEL

Custom Retrieval Service No.: 89C0004

Product Description

The **Social Policy Simulation Database and Model (SPSD/M)** is a tool designed to assist those interested in analyzing the financial interactions of governments and individuals in Canada. It can help one to assess the cost implications or income redistributive effects of changes in the personal taxation and cash transfer system. As the name implies, SPSP/M consists of two integrated parts: a database (SPSD), and a model (SPSM). The SPSP is a non-confidential, statistically representative database of individuals in their family context, with enough information on each individual to compute taxes paid to and cash transfers received from government. The SPSM is a static accounting model which processes each individual and family on the SPSP, calculates taxes and transfers using legislated or proposed programs and algorithms, and reports on the results. A sophisticated

software environment gives the user a high degree of control over the inputs and outputs to the model and can allow the user to modify existing programs or test proposals for entirely new programs. The model comes with full documentation including an on-line help facility. The SPSP/M is designed for use on an IBM®/DOS compatible microcomputer.

The Database

For the most part, microdata collected by different statistical surveys and various administrative procedures were designed for specific purposes. No one dataset from a given survey or administrative source provides a sufficiently detailed and integrated picture of Canadian households to support the analysis of costs and distributional impacts of the entire tax/transfer system as it moderates the flows of money between governments and individuals. Until now such an integrated database has not existed in Canada. Furthermore, existing databases used for micro-simulation require large mainframe computers to process them.

The SPSP was constructed by combining individual administrative data from personal income tax returns and unemployment claimant histories with survey data on family incomes and expenditure patterns. The techniques used to create the database and avoid confidential data disclosure include various forms of categorical matching and stochastic imputation. While no one record on the database contains information for the same individual from the four bases, the database has been constructed in such a way as to provide a micro-statistically representative sample of Canadians.

Certain adjustments have been made to the data which force agreement between data and known control totals. For example survey weights have been adjusted to ensure that the population by age and sex corresponds to census data, and the number of high income Canadians corresponds to the number reported by Revenue Canada. Further adjustments have been made to compensate for item non-response in the surveys (e.g. to increase the number of families receiving social assistance). It should be noted that the SPSP coverage does not extend to the Yukon or Northwest Territories, persons residing on reservations, or armed forces personnel residing in barracks.

Also included in the SPSP package are data from Statistics Canada's Input/Output tables. This data supports the commodity tax model which facilitates the analysis of changes in sales taxes on Canadian households and individuals. The medium level aggregation tables at the federal level are included with the SPSP/M package along with some provincial detail derived from national accounts data.

The Model Software

The SPSP/M comes with a powerful software support environment designed to enhance the range, speed and ease of policy analysis in both black-box and glass-box modes of use. The comprehensive and flexible set of outputs allow for detailed verification of algorithms and results. The software has been designed to work in an

ELECTRONIC PRODUCTS AND SERVICES

integrated fashion at many different levels of analysis (e.g. household, census family, individual). A user-friendly model dialogue guides the analyst through all the required and optional adjustments of the parameter files. An on-line help facility provides information on the use of the model dialogue as well as a handy reference to variable and parameter descriptions and lists.

Users and Applications

The SPSM/M has been tested at more than thirty sites across Canada. The test sites have included federal departments, provincial governments, universities, interest groups, corporate divisions, and private consultants. These sites have had diverse research interests in the area as well as varied experience in micro-simulation. All sites have been impressed with the potential of the SPSD/M for use by their organizations.

Package and Ordering Details

Full SPSD/M

Cost:

\$5,000 for single package - Product No.: 89F0002L
 \$12,500 for a site license - Product No.: 89F0003L
 (A site is defined as a corporation, a university, provincial government, or federal department.)

Contents:

20 360Kb 5-1/4 inch diskettes
 Full documentation.
 Price does not include consultation or training.

System:

IBM/DOS compatible microcomputer.
 Minimum 10 megabytes free on your hard disk.
 Minimum 512 K RAM.
 For access to "Glass Box", Microsoft Compiler version 5.0 is needed.
 For higher speed a numeric co-processor is recommended (i.e., 8087).

Product Description and Ordering:

Brian Murphy
 Social and Economic Studies Division
 Analytical Studies Branch
 24-K, R.H. Coats Bldg.
 Statistics Canada
 Tunney's Pasture
 Ottawa, Ontario
 K1A 0T6
 Tel: (613) 951-3769
 Fax: (613) 951-5643

Tutorial Demonstration Diskette - Product No.: 89F0004L

Cost:

\$100 for single demonstration package.
 Restricted to use by one site as defined above.

Contents:

SPSD/M Introductory Manual.

5% sample of the SPSD.
 SPSM in black-box mode only.
 No Commodity Tax Model (COMTAX) although parameters are supplied.
 2 360 Kb 5-1/4 inch diskettes.

System:

IBM®/DOS compatible microcomputer.
 2 floppy drives or 600 kilobytes free on your hard disk.
 Minimum 512K RAM.

SPECIAL SURVEYS AND SPECIAL PROJECTS

Special Projects

A wide variety of business and trade statistics can be obtained through special projects carried out by the Division. Special projects such as the production of special tabulations through the integration of data from different sources.

Special Surveys

Custom Survey No.: 61S0001

The mandate of Small Business and Special Surveys Division also includes the execution, on demand, of custom-tailored surveys.

For further information, please contact:

Small Business and Special Surveys Division
 13-C8 Jean Talon Building
 Statistics Canada
 Ottawa, Ontario
 K1A 0T6

 Fax.: (613) 951-1572

STANDARD CLASSIFICATIONS

Standards Division has developed standard classifications for use in economic and social statistics, in order to promote comparability of data. These classifications are used to classify data by industry, commodity, occupation and geography. The classifications are available as catalogued publications in the form of manuals. However, as indicated below, certain of them are also available in electronic form and as coding manuals, which provide a much more comprehensive list of example titles. In addition, concordances, or convertibility tables, are available.

Standard Classification of Goods

Product No.: 12F0022

The Standard Classification of Goods (SCG) is a commodity classification based upon the Harmonized Commodity Description and Coding System. Commodity imports, exports and those reported in the Annual Survey of Manufactures are classified according to the SCG. This classification is of particular interest to market

ELECTRONIC PRODUCTS AND SERVICES

researchers who need to know the level of detail for which import, export and shipment data are collected. English and French copies of the SCG are available in machine readable form for \$200.00 each.

Standard Industrial Classification Coding Manual

This manual provides approximately 18,000 examples of pre-coded economic activities in alphabetical order. This enables users to code establishments, given a description of their activity and goods or services produced. Each example is coded to the 1980 and 1970 Canadian Standard Industrial Classification and the 1977 United States Standard Industrial Classification. This manual is available in English or French, on diskettes or on magnetic tape for \$200.00.

Concordances

Concordances, or convertibility tables, have been developed as essential aids for users wishing to compare industrial, occupational or commodity classifications and data or to analyze time series. All of the following concordances are available in English or French, on diskette or magnetic tape.

A. Industry Concordances

Canada/United States

Product No.: 12F0020 T

Product No.: 12F0020 D

The concordance tables between the 1980 Canadian Standard Industrial Classification (CSIC) and the 1987 United States Standard Industrial Classification (USSIC) (no. 12-574) are presented in both sequences. Additional information is provided in a set of explanatory notes to assist users in understanding the relationships between the four-digit classes of the two classifications. This package of four files is available for \$80.00.

1980 CSIC - 1987 USSIC
1987 USSIC - 1980 CSIC

Other concordances between the various editions of the Canadian and the U.S. Standard Industrial Classifications are available on diskette and on magnetic tape for \$125.00 and the print version is \$75.00.

Product No.: 12F0019 P

Product No.: 12F0019 D

Product No.: 12F0019 T

1980 CSIC - 1977 USSIC
1977 USSIC - 1980 CSIC
1970 CSIC - 1977 USSIC
1977 USSIC - 1970 CSIC

Canada/International

Concordances between the various editions of the Canadian Standard Industrial Classification (CSIC) and the International Standard Industrial Classification (ISIC) Rev. 2 are available on diskette and on magnetic tape for \$125.00 and the print version is \$75.00.

Product No.: 12F0018 P

Product No.: 12F0018 D

Product No.: 12F0018 T

1980 CSIC - 1968 ISIC Rev 2

1968 ISIC Rev 2 - 1980 CSIC

1970 CSIC - 1968 ISIC Rev 2

1968 ISIC Rev 2 - 1970 CSIC

Canada

Concordances between the various editions of the Canadian Standard Industrial Classification (CSIC) are available on diskette and magnetic tape for \$125.00 and the print version is \$75.00.

Product No.: 12F0015 P

Product No.: 12F0015 D

Product No.: 12F0015 T

1980 CSIC - 1970 CSIC

1970 CSIC - 1980 CSIC

Concordances between the Canadian Standard Industrial Classification (CSIC) and the Canadian Standard Industrial Classification for Companies and Enterprises (CSIC-C) are available on diskette and magnetic tape for \$125.00.

1980 CSIC - 1980 CSIC-C

1980 CSIC-C - 1980 CSIC

B. Commodity Concordances

The commodity concordances consist of code pairs only. There is no descriptive text. They are priced at \$125.00 each.

Concordances between the Standard Classification of Goods (for import classes only) (SCG-I) and the Canadian Customs Tariff (CT):

Product No.: 12F0027

SCG-I 1988 - CT (cumulative 1988-1993)

Concordances between the Standard Classification of Goods (all classes) (SCG) and the Standard International Trade Classification Rev. 3 (SITC Rev 3):

Product No.: 12F0023

SCG 1992 - SITC Rev 3

C. Commodity by Industry Classification Concordances

The commodity by industry concordances consist of code pairs only. There is no descriptive text. They are priced at \$125.00 each.

Concordances between the Standard Classification of Goods (all classes) (SCG) and the Canadian Standard Industrial Classification (CSIC) are available. These concordances also relate the international Harmonized Commodity Description and Coding System (HS) to the Canadian Standard Industrial Classification (CSIC) because HS codes constitute the first six digits of the SCG codes.

ELECTRONIC PRODUCTS AND SERVICES

Product No.: 12F0024

SCG 1992 - 1980 CSIC
 SCG 1991 - 1980 CSIC
 SCG 1990 - 1980 CSIC
 SCG 1989 - 1980 CSIC
 SCG 1988 - 1980 CSIC

Concordances between the Canadian Customs Tariff (CT) and the Canadian Standard Industrial Classification (CSIC) are available.

Product No.: 12F0025

CT (cumulative 1988-1993) - 1980 CSIC

Concordances between the Canadian Export Classification (CEC) and the Canadian Standard Industrial Classification (CSIC):

Product No.: 12F0026

CEC 1993 - 1980 CSIC
 CEC 1992 - 1980 CSIC
 CEC 1991 - 1980 CSIC
 CEC 1990 - 1980 CSIC
 CEC 1989 - 1980 CSIC
 CEC 1988 - 1980 CSIC

D. Occupation Concordances

Concordances between various editions of the Standard Occupational Classification (SOC) are available on diskette and magnetic tape for \$125.00.

Product No.: 12F0028

1991 SOC - 1980 SOC
 1980 SOC - 1991 SOC

Concordances between the statistical classes of the National Occupational Classification (NOC) and the Standard Occupational Classification (SOC) 1980 are available on diskette and magnetic tape for \$125.00.

Product No.: 12F0029

1993 NOC - 1980 SOC
 1980 SOC - 1993 NOC

E. Special Concordances

Custom Retrieval Service No.: 12C0004

Standards Division also offers concordances prepared to customer specifications, priced according to the work involved. Concordances with more recent vintages of the U.S. and U.N. classifications are in preparation.

A STATISTICS CANADA ONLINE DELIVERY SERVICE

Custom Retrieval Service No.: 10C0003

StatsCan Online is a service that provides direct-dialling access to a wealth of detailed information from Statistics Canada. With your own personal computer, you can select and retrieve the precise information you require. Several formats are provided, including text, tables, specialized data bases and, in the future, maps.

You can download the retrieved data for further manipulation off-line with your own software.

What is required to use this service?

Software

All software is provided on a diskette as part of the subscription fee. You don't need a commercial telecommunications package.

The software includes its own graphic user interface (GUI), making the service easy to learn and use. It has the look and feel of Windows.

Hardware

An I.B.M.-compatible microcomputer with

- DOS 3.3 or above
- 7MB of hard disk space
- 640KB of RAM with 460KB available

A modem (1200, 2400, or 9600 baud) and an ordinary (analogue) telephone line.

What telecommunication service is used?

The telecommunication service consists of a public data network accessible through regular telephone voice lines. Virtually the entire country is served by local access to a public data network so you will not incur long distance charges.

What is the cost?

The cost consists of :

- a monthly subscription fee
- data charges

The subscription fee is \$20.00 per month, payable regardless of usage.

The first hour of connect time per month is free. There is a charge of 30 cents per minute after the free hour per month.

The charges for accessing data are described in detail for each database. You will be informed of the cost of the data you have selected before viewing it and incurring the charge. There will be no surprises.

Volume discounts are available.

ELECTRONIC PRODUCTS AND SERVICES

There is a considerable amount of free information on the service such as:

- The Daily (Statistics Canada's official release vehicle)
- products and services catalogues
- data sources, definitions, and methodology
- data release schedules
- who to contact for assistance

Additional databases will be offered at regular intervals.

Electronic Dissemination Research Division
 10th Floor, R.H. Coats Building
 Ottawa, Ontario
 K1A 0T6
 Phone (613) 951-9196
 Fax (613) 951-3150

What data are available?

The following databases will be offered in 1994:

- International Merchandise Trade
- The Daily
- International Travel
- Marine Transport
- CANSIM
- The Industrial Monitor

STATSFAX SERVICE - PRODUCTS LIST

The **Statsfax service** provides clients with a subscribable service to the initial release of seventeen key economic and social indicators. Each release is delivered by facsimile the same time as it is released in

The Daily (no. 11-001E). *The Daily* and *Infomat* are also available in their entirety as separate faxed products. The individual titles, product numbers, number of issues and individual prices are as follows:

Number	Title	Pages	Issues Per year	Subscription price
11-0010XFE	The Daily	10	50	\$1,200
11-0020XFE	Infomat	8	50	\$630
11F0002XFE	Consumer Price Index	8	12	\$175
11F0003XFE	Labour Force Survey	20	12	\$300
11F0004XFE	Field Crop Reporting Series	2	8	\$55
11F0005XFE	National Income and Expenditures Accounts	9	4	\$85
11F0006XFE	Real Gross Domestic Product	3	12	\$85

TRADE DATABASES

Canada/U.S. Trade Patterns

Custom Retrieval Service No.: 65C0006

A comprehensive report, *Trade Patterns: Canada - United States, The Manufacturing Industries*, (no. 65-504E) was published, linking trade and manufacturing data to provide an extensive analysis of the changing patterns in North American production and trade. To produce this report, new commodity/industry concordances were developed (available from Standards Division) and an historical database, incorporating both Canadian and U.S. data files, which the International Trade Division is maintaining and making available on a cost-recovery basis.

Fax: (613) 951-0117

CD-ROM Products

Compact Disk Read Only Memory, CD-ROM products are rapidly becoming a popular format for data dissemination. They allow for the equivalent of 350,000 pages of information storage on one disk. The disk is inserted into a CD-ROM reader and the desired data are imported to a PC. This provides fingertip access to a large data bank without the requirement of dedicated hard storage space on your computer.

Canadian Merchandise Trade Statistics, CD-ROM, 1988-1990 and 1991-1992

Product No.: 65F0004 C

Revised, monthly merchandise trade data are available on CD-ROM. Over 16,000 imports are listed to the 10 digit level and 6,000 exports are shown at the 8 digit level for approximately 200 countries. The built in retrieval system, TIERS, allows you to aggregate, multiple select, sort, save and print the data. Variables to choose from include value, quantity, province, country and U.S. state. A separate function, HS6LOOK, facilitates the search for a required commodity code with the simple input of a product description. Harmonized System descriptions are available during a data request at the HS-6 level.

Canadian Merchandise Trade CD-ROM, 1988-1990:
\$1,750.00

Canadian Merchandise Trade CD-ROM, 1991-1992:
\$1,500.00

Purchase both 1988-1990 and 1991-1992: \$3,000.00

A discount is available to educational institutions. All prices are subject to Statistics Canada's Licence Agreement.

Importer and Exporter Databases, 1990 - 1992

Custom Retrieval Service No.: 65C0003

To increase the scope of trade analysis, the International Trade Division has developed **Importer and Exporter Databases** which link merchandise trade data to the industrial activity of more than 140,000 organisations engaged in international trade.

These databases allow the user to profile the composition and structure of Canada's importing and exporting communities. For the first time, analysts can study trade variables, such as commodity, value, size of importer/exporter, mode of transport and frequency of shipments in relation to the industry classification of the importers and exporters. The industrial classification of importers and exporters allows users to compare information on the industry conducting trade with the industry manufacturing the commodity.

Custom retrievals from the **Importer and Exporter Databases** may be ordered on a cost-recovery basis. No specific company information will be released.

Trade Information Enquiry and Retrieval System (TIERS)

Custom Retrieval Service No.: 65C0002

The **Trade Information Enquiry and Retrieval System (TIERS)** is a data and software package designed to expedite the recovery of Canadian trade information on a microcomputer. With data on over 16,000 import and 6,000 export commodities for approximately 200 countries, its user-friendly menu system includes: Harmonized System descriptions, quantity, value, province, year, country and U.S. State code variables; and flexibility for output media.

TIERS now offers up-to-date monthly merchandise trade data from 1988; the availability of subsets of data; screen editing and ranking functions; an aggregation function; and the capacity for multi-user or LAN access.

TIERS is updated monthly with data available within two working days of their release. The many advantages of TIERS are:

- the reduction of response time for trade data
- the availability of definitions and other metadata as an integral part of the package
- improved analytical ability
- more timely trade data
- the simplification of trade data acquisition

- the ability to produce user-specified outputs quickly

Now there is no need to waste time wading through cumbersome tables to get specific data. TIERS can guide you effortlessly through the maze of the trade data with an almost instant response.

World Trade Database

Custom Retrieval Service No.: 65C0001

The **World Trade Database** is a matrix of international trade flows created from data reported by member countries to the United Nations Statistical Office and broken down by partner country and commodity or industry. Countries are classified according to the Standard Classification of Customs areas and territories, commodities according to the Standard International Trade Classification (Revision 2) and industries according to the 1980 Canadian Standard Industrial Classification. The data are annual and the records currently extend over the period 1970 to 1991.

The database enables users to perform analyses such as to calculate market shares of anyone in any market defined in terms of geography or commodity; perform standard "constant" market share calculations as a means to measure countries penetration in selected markets; compare the pace of change in the country and commodity structure of trade over time between different trading nations.

In constructing the **World Trade Database**, Statistics Canada performs a number of adjustments to alleviate inconsistencies in the data as reported to the United Nations. Generally speaking, imports are considered to be the yardsticks for measuring trade. Exports to entrepôt countries are reallocated according to what customer countries report as imports. Geographic groupings are created for which trade is comparable in cases where reporting countries group individual partner countries differently.

Information from the **World Trade Database** is available on tape, diskette, computer printout or CD-ROM. The cost of each individual request is based on volume and complexity, with tabulations starting from as low as \$135.00.

World Trade Database, CD-ROM, 1980-1991

Product No.: 65F0005 C

The **World Trade Database CD-ROM** includes a complete matrix of international trade flows for 160 countries and 600 commodities from 1980. World Trade data are adjusted to alleviate the inconsistencies to data as reported by the member countries of the United Nations. Import figures are treated as the benchmarks and estimates are made for non-reporting or late reporting countries. Exports to entrepôt countries are re-allocated. All values are shown in US dollars.

World Trade Database, CD-ROM 1980-1991

Price: \$3,500.00

Annual updates including revisions \$1,500.00 (Product No.: 65F0005UC)

A discount is available to educational institutions. All prices are subject to Statistics Canada's Licence Agreement.

WHOLE FARM DATA PROJECT

The **Whole Farm Data Project** is a joint venture between Agriculture Canada and Statistics Canada. The **Whole Farm Data Base (WFDB)** provides a set of physical and financial data at the whole farm level by compiling data from various surveys and administrative sources. As a result, one can obtain farm revenue and expenditure data disaggregated by farm type, revenue class and subprovincial area. Custom Retrieval Service No.: 21C0005.

The **Extraction System of Agricultural Statistics (ESAS)** is menu-driven software available to users in a CD-ROM format. Using the WFDB as its source, ESAS allows users access to an extensive series of tables featuring the most commonly requested disaggregated physical and financial farm data. A user's guide and reference manual are included with the purchase of the CD-ROM product. The ESAS CD-ROM is now available at \$925.00; Product No.: 21F0001 C with annual updates at \$495.00; Product No.: 21F0001UC.

Introduction

A Few Words about Statistics Canada

Statistics Canada is our country's national statistical agency and, as such, is responsible for collecting and publishing data on almost every type of social and economic activity in Canada. To meet this responsibility it has developed a broad program which not only takes account of what information is wanted, but also endeavours to provide that information in the most appropriate format. This involves over 900 print publications, computer tapes, printouts, microcomputer diskettes, CD-ROM compact discs, as well as microfilm and microfiche.

Statistics Canada's operations are governed by the Statistics Act which identifies certain specific areas in which the Agency must collect and publish data. Beyond this it simply charges the Agency with the responsibility to:

"collect, compile, analyze, abstract and publish statistical information relating to the commercial, industrial, financial, social, economic and general activities and condition of the people".

Because it has such a broad mandate, Statistics Canada, in consultation with data users and providers, has to decide what it will collect and disseminate. The past 20 years have seen an enormous increase in the demand for detailed, up-to-date statistical information coming from all sectors including government, business, institutions, and private individuals. Statistics Canada has endeavoured to meet as much of the demand as possible but this has become increasingly difficult in recent years. In addition to concerns about privacy and paperburden, which have had a restraining effect on collection initiatives, budgetary constraints have led to increasing pressure to maximize the usefulness of the existing system and to encourage Canadians to make greater use of it.

Prior to 1971, Statistics Canada was called the Dominion Bureau of Statistics and the term "Bureau" is still used to refer to the Agency today. It is divided into about 60 divisions, each of which is responsible for a particular activity in the collection, processing or dissemination of statistics. These divisions are grouped together into six fields – each of which reports to the Chief Statistician of Canada who is in charge of the Agency's full range of activities.

Many divisions function as regular producers of a particular set of data. For example, Transportation Division is responsible for transportation data, Prices Division for data on various kinds of prices, and Demography Division for demographic estimates and population projections. This is why there will often be a particular "subject matter division" identified as the originating source of data from Statistics Canada.

Other divisions within the Agency are occupied with functions such as providing data processing services or disseminating data, which includes responding to requests for assistance from data users. The division with the specific function of aiding data users is the Advisory Services Division.

The Variety and Detail of Statistics

It is impossible to detail the multitude of subjects on which Statistics Canada produces data. Some statistical series are very well known and make news, even headlines, each time they are published. For example, there is the Consumer Price Index, regarded by many as the key measure of inflation; and the Labour Force Survey, which provides the unemployment figures every month. There is also the Census of Population which is taken every five years. More people are aware of the latter as an information gathering process since everyone is involved at one time or another but census data are potentially of interest and use to everyone.

FINDING AND USING STATISTICS

To give an example of the detail of data available, most people know about the Consumer Price Index (CPI) but few realize there are indexes published for components of the CPI, such as food, housing, clothing and transportation. Similarly, people who are aware that Statistics Canada publishes figures on the balance of Canada's trade do not always realize there are monthly data on the volume and value of exports and imports of individual commodities to and from individual countries. Likewise, a variety of individual reports are published each year on the various sectors of the manufacturing industry each including such principal statistics as number of establishments, number and type of employees, wages and salaries, cost of fuel and electricity, value of shipments and value-added (plus comparative statistics for Canada for earlier years and for provinces for the preceding year). This is in addition to more frequent publications on shipments, production or consumption of certain commodities and monthly figures on shipments, inventories and orders for manufacturing industries in total, numerous sub-aggregations and selected industries.

Other statistics are designed to present a broader economic perspective such as the quarterly *National Income and Expenditure Accounts* (13-001). These give a measure of the economy's overall performance showing such things as government revenue and expenditure, gross national expenditure, sources and disposition of personal income, national income and gross national product.

Statistics Canada makes a general distinction between statistics which are primarily used in economic studies and statistics used in studies of social phenomena. For example, the dollar value of output in the automobile industry would be regarded as an economic statistic. The number of people of Italian descent in the Montreal region would be regarded as a social statistic.

Social statistics often focus on characteristics such as age, sex, marital status, language, ethnicity, income, level of education and so forth. They include subjects as diverse as the incidence of illness or the frequency of crimes in an area.

Sources of Data

Statistics are collected from many different sources and in many different ways. Statistics Canada data are generally produced from surveys but can also include data produced as a by-product of administrative activities. For example, import and export data are obtained from customs forms, business financial data from corporate financial statements, justice statistics from court records and health statistics from hospital records.

Where surveys are used as the source of statistical data they may be either sample surveys or censuses. Sample surveys use the responses of a few to draw conclusions about the complete group or population. Census surveys are surveys in which every possible respondent is approached. The five and ten year

Censuses of Population and Housing are the most well known of the surveys using full census coverage.

In general, the source of data cannot be identified from the statistical tabulations themselves. Statistics Canada publications do, however, give descriptions of the methodologies used to obtain the data.

The two most important sources of survey data are private households and business establishments. When a survey is designed so that the statistical data are obtained by contacting private households, it is termed a household survey. In a household survey, such as the quinquennial Census of Population or the monthly Labour Force Survey, one person in the household is usually asked questions about each individual within the household, about their family relationships, and about the dwelling in which they live. Thus the one reporting unit can serve as the source for statistics on individuals, families, dwellings and other statistical units.

When a survey is designed so that statistical information is gathered by contacting officials in business establishments, it is termed an establishment survey. Establishment surveys provide most of the data on economic production, consumption, costs and many other factors important in measuring economic activity.

Users of statistical data need not necessarily think in terms of any specific survey or type of survey when seeking data on a particular subject. They will be able to identify a general subject area for which they need data and they may also know the particular statistical units and variables needed. After having found the data they need by looking through the *Statistics Canada Catalogue* index for the general subject area or for the particular statistical units of interest, users may then be interested in the sources of the data and the methodology used in compiling them. This information can give greater depth to the interpretation and analysis of the figures. Information on sources and methodology is usually given in the explanatory notes included in the publication and, if required, a more detailed explanation is available from the statisticians responsible for the data.

Standards of Service to the Public

Statistics Canada is mandated under the *Statistics Act* to produce and publish statistical information on the economic, social and general conditions of Canada and its population. In fulfilling this mandate, the Agency is committed to a client-oriented service, particularly with respect to product lines and dissemination methods.

Delivering Statistical Information

Statistics Canada makes a clear distinction between delivering information to the public and delivering information to specific users. As a result, those requiring customized information or a copy of a product are charged for its cost, while the public has free access to statistical information through the following channels.

FINDING AND USING STATISTICS

The Media: All Statistics Canada data are officially released in *The Daily*. This bulletin, issued every morning from Monday to Friday, provides summary information of key series and advises readers of the availability of Agency releases of new data, products and services. *The Daily* is delivered to the media free of charge, as are limited complimentary copies of publications. In turn, the media regularly keep Canadians informed of Agency output.

Libraries: All catalogued publications, including *The Daily*, are distributed through the Depository Services Program, which includes some 700 libraries across Canada. The public has free access to these publications by visiting any of these institutions. Statistics Canada's library also maintains a complete set of all information released.

Reference Centres: Statistics Canada operates 10 reference centres in major cities across Canada. The public can, at no charge, consult Statistics Canada publications, electronic products, maps, microfiche and related publications from other sources. The centres are open from Monday to Friday and offer research assistance, study facilities and use of equipment.

Inquiry Services - by telephone, visit or mail: Inquiry services are available in both official languages across the country. Telephone inquiries are answered locally and through toll-free lines. Services for the hearing impaired are also available in Ottawa and the nine regional centres. Inquiries at these reference centres that require up to 15 minutes of service are free of charge. Reference centres respond to telephone requests immediately if the information is readily available, or try to call back within a day if the information must be gathered.

Cost-recovered Services

Information products required by clients for individual use are considered specialized products and services and are priced to recover all costs. These services include:

Custom products and services, based on client needs, such as special surveys, tabulations and analyses from existing databases, and research and consultation.

Standard products and services, which anticipate user needs and are sold at preset prices, including *The Daily*, *Infomat* (a weekly summary of major releases), all publications, on-line access to the CANSIM database (covering all major economic and social data) and special CANSIM retrievals and electronic products.

It is Statistics Canada policy that the post-manuscript costs of producing and disseminating information in publications (in hard-copy form) be fully recovered from sales.

Services to Respondents

Although Statistics Canada has the legal mandate to collect information, it must also ensure that respondents understand their rights and obligations. Respondents are always provided with information about the purpose of the survey, the authority under which it is taken and confidentiality protection. They are also given a Statistics Canada telephone number should they want more information.

The Agency is also continually reducing response burden, particularly for small business, by using simpler and shorter forms, administrative records and greater use of sampling methods.

All Agency products have been screened to protect the confidentiality of individual Canadians and corporations.

Standards for Statistical Products and Services

Statistics Canada's effectiveness depends on the relevance, reliability, timeliness and accessibility of its products and services. These standards are applied to all Agency statistics and services.

Relevance: Constant efforts to improve the relevance of products and services include on-going consultations with users; more analysis of survey results to help users understand the information and its limitations; and, more data integration to provide a broader picture of issues.

Reliability and Quality: Data quality and quality of delivery are important. Statistics Canada provides users with indicators of the quality of all data, together with descriptions of their underlying concepts, definitions and methods. Established publishing standards ensure quality and consistency in presenting information for all product lines.

Timeliness: Statistics Canada strives for the earliest possible release of data, while balancing the need to maintain data quality. Technical improvements in data collection and processing have helped to speed up data releases. As well, the Agency now releases data highlights while more detailed reports are in production. Annual schedules of major economic data are provided to the media and users, and adherence to these announced dates is monitored. The standard for adherence to scheduled release dates is 100%. Since couriers are used to distribute publications in most parts of Canada, clients should receive them the day after release.

FINDING AND USING STATISTICS

Accessibility: The location and telephone numbers of the reference centres are listed in a wide range of materials reaching the public, including *The Daily*, publications and brochures. Full details on accessibility of Agency data, products and services are given in the earlier section "Delivering Statistical Information."

The priority attached to client service is reflected in the training given to reference centre staff, both on the availability of Agency data and customer relations. An annual survey to monitor quality of service, including courteousness, timeliness, accuracy and availability of service in both official languages in the regions, is also carried out.

Basic Statistical Concepts

Statistical Standards and Classification Structures

The need for users to know exactly what data represent and to be able to compare statistics from different sources makes it necessary for the people collecting statistics to use reasonably consistent definitions of the various characteristics being measured.

This presents a problem because most characteristics developed in statistical data have no single commonly accepted definition in general use. For example, does one define a gasoline station as an establishment in the petroleum industry or in the service industry? Is a 15-year-old looking for work too young to be counted with the officially unemployed? What occupational title do you give to a factory worker who spends all day drilling holes in engine blocks?

As the central statistical agency in Canada, Statistics Canada is working to encourage the standardization of concepts and terms used in statistical data of all types. For many statistics, there are wide variations in the meaning and interpretation of terms and concepts used, both by professionals and the public.

When seeking information on statistical units or characteristics presented in Statistics Canada publications, the first approach should be to refer to explanatory notes included in the publication itself. If this does not provide a satisfactory explanation, the staff at Statistics Canada's reference centres will be happy to provide further details where possible.

Classifications

Standard classification structures are used to organize statistics on industry, occupation and other important characteristics which must be categorized in some way in order to produce statistics on them. Classification structures set out distinct groups, sub-groups and so forth, and they include some form of definition for each.

One important benefit of these structures is to allow statistics from one source to be more comparable with statistics from another. If there were no standard classification structures, the data obtained from different surveys would be collected and compiled on an ad hoc basis without regard for comparable information elsewhere. For example, if separate surveys of employment and production used different definitions of the industry and therefore included and excluded different units in that industry, it would not be possible to compare the results of the two surveys. This would obviously limit the usefulness of both surveys. If the maximum potential of all available statistics is to be realized, it is important that standard classifications be adopted and that they have precise definitions and rules governing their application. In addition, it is necessary that both those who compile statistics and those who use them appreciate the nature of the classifications and the means by which they are applied in practice.

Four of the more important standard classification structures are those used for industries, commodities, occupations and geography. Although there are obvious relationships between each of these concepts they must be identified separately for statistical purposes.

Industrial Classifications

An industrial classification is a system for arranging producing units into industries, that is, groups of producing units engaged in similar types of activity in relation to similar goods and services. The term "industry" is used in its broader sense to include all economic activities ranging from the primary industries, such as agriculture and forestry, to those concerned with providing a service, such as barber shops, consulting services and various government functions. The classification of industries most commonly used by Statistics Canada (and by many others) is the Standard Industrial Classification (SIC) for establishments. This classification has four levels: divisions; major groups; industry groups; industries. The following example illustrates how this hierarchy is organized using the major group of transportation equipment industries of division E -- manufacturing industries.

Division E - Manufacturing Industries

Major Group	32	Transportation Equipment Industries
	321	Aircraft and Aircraft Parts Industry
	3211	Aircraft and Aircraft Parts Industry
	323	Motor Vehicle Industry
	3231	Motor Vehicle Industry
	324	Truck and Bus Body and Trailer Industries
	3241	Truck and Bus Body Industry
	3242	Commercial Trailer Industry

FINDING AND USING STATISTICS

- 3243 Non-Commercial Trailer Industry
- 3244 Mobile Home Industry
- 325 Motor Vehicle Parts and Accessories Industries
- 326 Railroad Rolling Stock Industry
- 327 Shipbuilding and Repair Industry
- 328 Boatbuilding and Repair Industry
- 329 Other Transportation Equipment Industries

Amendment to a widely used classification system inevitably causes concern as it disrupts the continuity of statistical time series. However, periodic review and amendment are necessary to reflect structural changes in the industrial make up of the country as new industries emerge and obsolete ones disappear.

The Standard Industrial Classification was first formalized in 1948, and given major revisions in 1960, 1970 and 1980. When using data from different surveys or different time periods, it is important to use the same version of the SIC.

The most recent edition of the classification is still the 1980 edition, *Standard Industrial Classification Manual, 1980* (12-501E). The introduction explains the classification concepts and the manual provides an extensive index to identify the appropriate industry class for various types of production activities.

The SIC is sufficiently general that it can be used to classify more than one type of statistical unit, but the user should keep in mind that it is specifically establishment-based, using the principal activity and type of output as the criteria for classification. In most cases the principal activity is readily apparent, but sometimes an establishment is involved in more than one activity (for example manufacturing and wholesale or retail trade).

Production statistics refer to the establishment unit and its related input and output, but data needs are not limited to that specific framework. A second industrial classification, the *Canadian Standard Industrial Classification for Companies and Enterprises, - SIC-C* (12-570E), provides a framework for classifying Canadian companies and enterprises to 18 main industrial sectors, 60 sub-sectors and 163 segments. It is particularly useful when collecting, compiling and publishing financial statistics such as corporation financial statistics and corporation profits.

A final warning to users: the United States Industrial Classification is similar to the Canadian SIC but the actual groupings and their respective codes used may vary significantly. Concordance tables, in *Concordance Between the Standard Industrial Classifications of Canada and the United States* (12-574E) allow comparisons between the 1980 SIC for Canada and the 1987 SIC for the United States, by identifying the differences between the two and providing a standard for relating establishment-based statistical data collected and published by the two countries, in terms of either SIC.

Commodity Classifications

The output of economic activity may be divided into two types: physical goods such as apples, metal pipes or chemicals; and services such as haircuts, dry cleaning, bus rides or lending money. In combination, physical goods and services are referred to as commodities at Statistics Canada. While goods and services have much in common, they are quite distinct in character and total make-up.

Commodities tend to be associated with particular industries but in fact one rarely finds an industry that produces only one type of commodity. For example, although Statistics Canada refers to the "motor vehicle industry", the "tire and tube industry" and the "small electrical appliance industry", each produces a variety of commodities, some of which are also produced by establishments classified to other industries.

The "goods" part of the commodity classifications used by Statistics Canada has been converted to the Harmonized System (HS), a six-digit international classification system. In order to meet specific national requirements, a Canadian version called the *Standard Classification of Goods* (SCG) (12-580E) was published for use with 1988 data. Annual amending supplements keep it up-to-date for use with data for subsequent years. Produced by the Standards Division, the SCG provides a list of categories that incorporates all of the specific categories of goods collected in the surveys conducted by Statistics Canada beginning with the 1988 reference year. The publication also includes historical information, interpretive notes and links to classifications used in 1987.

The SCG itself is seldom used directly in coding statistics because the coverage is too broad to apply directly to the unique mix of goods encountered in any given survey. When one considers the wide range of products produced, imported and exported by Canada, and the consequent need for greater or lesser detail, it is easy to understand how the different classifications have developed. Subsets of the SCG have been developed for application with specific surveys. The classes used in the subsets for imports, exports and the Survey of Manufactures have been identified in the manual by the letters I, E, and S.

A complete list of tariff codes is shown in the *Customs Tariff* (Revenue Canada, catalogue no. RV55-21992E) available through the Canadian Government Publishing Centre¹. Export codes, virtually all of which are identical to SCG codes flagged for exports, are shown in the Statistics Canada publication *Canadian Export Classification - HS-Based* (12-578E). *The Canadian Export-Import Alphabetical Index* (12-579E) helps users select the correct code.

¹ The coding system displayed in the *Customs Tariff* consists of a 10 digit code which departs from the SCG after the first 6 digits. It is comparable to the SCG coding system, however, in that tariff codes can be linked directly or aggregated to the codes flagged "I" in the SCG manual.

FINDING AND USING STATISTICS

Occupational Classifications

An occupation is defined as a collection of jobs sufficiently similar in their main tasks to be grouped under a common title for classification purposes. A job, in turn, encompasses all the tasks carried out by a particular worker to complete higher duties.

The source for information on occupational classification is the *Standard Occupational Classification, 1980* (12-565E). This manual provides a systematic classification structure to identify and classify the entire range of occupations in the Canadian labour force using as its basic classification principle the kind of work performed.

The classification structure consists of three levels of occupational classes, each providing successively finer details: major groups (two digits), minor groups (three digits) and unit groups (four digits). The following example shows how the classification is structured.

Major Group	21	Occupations in Natural Sciences, Engineering and Mathematics
Minor Group	211	Occupations in Physical Sciences
Unit Group	2111	Chemists
	2112	Geologists
	2113	Physicists
	2114	Meteorologists
	2117	Physical Sciences Technologists and Technicians
	2119	Occupations in Physical Sciences, not elsewhere classified

The Standard Occupational Classification contains the classification structure and definitions for the 23 major groups, the minor and unit groups and two separate presentations of some 15,000 occupational titles. Each unit group has the relevant occupational titles listed alphabetically after the definition of the group. An index presents the occupational titles in alphabetical order, irrespective of group association.

Detailed information on the tasks associated with a particular occupation can be found by consulting the *Canadian Classification and Dictionary of Occupations* (CCDO) (Employment and Immigration Canada).

Geographical Classifications

Census data are tabulated for a large number of geographical areas. They are of two types, administrative and statistical. Whereas administrative areas are defined, with a few exceptions, by Canadian federal and provincial statutes, statistical areas are defined by Statistics Canada as part of the spatial frame used to collect and disseminate census data.

Some of the more important geographic areas include:

Name of area system	Number of units 1991	Covers all of Canada
Province (PR)/Territory	12	Yes
County/Census Division (CD)	290	Yes
Municipality/Census Subdivision (CSD)	6,006	Yes
Census Metropolitan Area (CMA)	25	No
Census Agglomeration (CA)	115	No
Provincial Census Tract (PCT)	1,815	No ¹
Census Tract (CT)	4,068	No ¹
Enumeration Area (EA)	45,750	Yes

¹ Taken together, these two systems cover all of Canada.

Geographical areas are arranged in hierarchies. Census subdivisions (CSDs), for example, aggregate to census divisions (CDs) which in turn aggregate to a province or territory (PR). This relationship is reflected in the seven-digit Standard Geographical Classification (SGC) code, developed by Statistics Canada to produce integrated statistics by geographical area:

PR	CD	CSD
XX	XX	XXX (X denotes one digit)
Province or Territory	Census Division	Census Subdivision

Census divisions usually consist of administrative areas, established by law for such administrative purposes as regional transportation planning, school and health services. They tend to be stable over periods of time and, therefore, are useful for the historical analysis of statistical series. Census divisions go by different names in different provinces: communautés urbaines, counties, districts, district municipalities, metropolitan municipalities, municipalité régionale de comté, regions, regional districts, regional municipalities and united counties.

Census Subdivisions usually consist of areas under local government. Included are towns, villages, townships, Indian reserves. Unorganized territories, which make up the balance of the land area of Canada, are also considered CSDs.

Because of the need for data on smaller areas than those set out in the SGC, the Census of Population and Housing also publishes data for **census tracts (CT)**, permanent, small, urban neighbourhood-like areas, and **provincial census tracts (PCT)** which are rural community-like areas. Census tracts have an average population of 4,000, while provincial census tracts, which cover areas outside the CT program, have an average population size of 5,000.

Other important geographical areas include **census metropolitan areas (CMA)** and **census agglomerations (CA)**. CMAs and CAs consist of a large urban area, together with adjacent urban and rural areas sharing a high degree of economic and social integration with that urban area.

FINDING AND USING STATISTICS

Federal electoral districts (FED), defined by the Chief Electoral Officer of Canada, are the constituencies represented by members of the House of Commons. FEDs can cut across the boundary of any other geographic areas except the enumeration areas (EA).

Enumeration areas (EAs), the areas defined by Statistics Canada for census-taking, contain a minimum of 125 dwellings in rural areas and up to 375 dwellings in urban areas. Census data can also be produced for user-defined areas.

The amount of geographical detail that Statistics Canada can publish is determined by the type of data collected, by sample size and by other factors influencing statistical reliability, as well as by the confidentiality

provisions of the Statistics Act. In some cases, data are only available at the Canada level while in others, geographical detail is limited to the provincial or census metropolitan area level.

More information about the SGC may be found in the *Standard Geographical Classification* manual for 1991. **Volume 1** (12-571) describes the classification, as of January 1, 1991. It includes a 38,000 place name index. **Volume 2** (12-572) provides a series of 24 maps. **Volume 3** (12-573) provides a 5 year summary of the changes in the classification since the previous edition which referred to January 1, 1986. This volume also provides appendices describing a major change affecting all of the SGC codes in Quebec.

Current and Constant Dollars

When statistical tables give the value of, for example, sales, inventories or investment in current dollars, it simply means the values are expressed in terms of their price or cost at the time the survey or measurement was taken. However, the value (or purchasing power) of the dollar changes over time with inflation or deflation. For example, statistics may show that wages have increased substantially over a given period, but if prices have also gone up, the purchasing power of each wage dollar has decreased. To find out how much "real" wages, as opposed to cash wages, have increased, the wages have to be expressed in dollars which have a constant value over time, i.e., in constant dollars. Constant dollars can be used for any value expressed in dollars, or for indexes which reflect dollar values. When constant dollars are used in a statistical table, the value of the dollar in one particular year is selected and that year is always clearly stated. At present, most constant dollar series use 1986 dollars since that is the base year for most major national and international indexes.

Low Income Cut-offs

Statistics Canada's Low Income Cut-offs are a relative measure of the income adequacy of families and unattached individuals in Canada. A family which spent on average in 1989 more than 58% of its income on food, shelter and clothing is considered to be in difficult circumstances. The set of Low Income Cut-offs is adjusted for the size of the area of residence and for family size. The set is also updated annually by the Consumer Price Index, to account for yearly changes in the cost of living.

Low Income Cut-Offs of Family Units, 1991 (1986 base) (\$)

No. of People per Family	Population Size for Urban Areas					Rural Areas
	500,000 and over	100,000 499,999	30,000 99,999	Less than 30,000		
1	14,951	13,132	12,829	11,695	10,179	
2	20,266	17,802	17,390	15,852	13,799	
3	25,761	22,626	22,103	20,149	17,539	
4	29,661	26,049	25,449	23,200	20,192	
5	32,406	28,462	27,805	25,347	22,062	
6	35,177	30,893	30,180	27,512	23,947	
7 or more	37,833	33,230	32,463	29,593	25,757	

Source: *Income Distributions by Size in Canada* (13-207)

FINDING AND USING STATISTICS

While the Low Income Cut-offs are useful in analysing income distribution and in describing the characteristics of families and individuals with relatively low monetary incomes, **they are not intended as a measure of poverty.** This is because they do not take into account many other factors such as accumulated wealth, non-monetary income, and future earnings potential, which are also important in determining the economic well-being of families and individuals.

The Low Income Cut-offs for 1991 are presented on previous page. A family of four living in an urban area with a population of 500,000 or more, for example, would be classified as having a low income if the family income in 1991 was less than \$29,661.

Seasonal Adjustment

In Canada, the changing climate, or consumer habits related to it, affect nearly all business activity. Construction slows down in winter; tourism increases in summer; the Christmas season brings out far more shoppers than any other. The demand for particular goods and services changes along with the season; consumers want boots in winter, swim suits in summer and so on. This sometimes makes it difficult to determine the underlying trend from an examination of a series of month-by-month figures.

For this reason, many series are adjusted to remove the effect of seasonal variations. To do this, seasonal factors for each month are calculated. For example, if, in a typical year, sales of jewelry stores in March are 84% of average monthly sales, the seasonal factor for March for

jewelry stores sales would be 84. (Average monthly sales are the total annual sales divided by 12.) If sales in December are 140% of the average month's sales, the December seasonal factor would be 140.

Usually, about seven years of data in a series are required to provide a satisfactory basis for estimating seasonal factors. Once the seasonal factors are estimated, the seasonally adjusted series is calculated by dividing the value, quantity or index for each month by the monthly factor for that month and multiplying by 100 because the factor is a percentage.

On the bottom page is an example of a series on department stores sales in Canada showing the monthly dollar value of sales, the seasonal factors and the seasonally adjusted value of sales. Note that the seasonal factors themselves add up to 1,200 (12 x 100%) and that the unadjusted and adjusted figures add up to the same total. Thus, the adjustment process simply reallocates the annual total among the 12 months, but in such a way as to bring out the underlying trend more clearly. It provides answers to questions such as, "How do January figures compare with those of December, bearing in mind that December is always more than twice as busy a month as January?"

Sales are not the only figures which are seasonally adjusted. Employment, inventories, consumer credit, some consumer price indexes, industrial production and a number of other series are published both seasonally adjusted and unadjusted.

Department Stores Sales, Canada, 1990

Month	Unadjusted or actual sales (1)	Monthly factor (2)	Seasonally adjusted sales (1) x 100 (2)
	millions of dollars		millions of dollars
January	785.9	66.32	1,185.0
February	770.1	64.92	1,186.3
March	1,025.5	86.65	1,183.4
April	1,059.1	88.42	1,197.8
May	1,122.4	98.76	1,136.5
June	1,158.4	97.93	1,182.9
July	988.3	83.31	1,186.3
August	1,128.3	96.46	1,169.7
September	1,151.2	96.19	1,196.8
October	1,205.2	101.52	1,187.2
November	1,523.3	131.54	1,158.1
December	2,275.0	187.67	1,212.2

FINDING AND USING STATISTICS

Statistical Precision

Very few statistics can be expected to be 100% precise. Organizations with a professional interest in producing statistical data, such as Statistics Canada, pride themselves on publishing high quality data that are as accurate as possible within the bounds of reasonable cost and good statistical practice. The goal is always to minimize the sources of possible error and to identify where inaccuracies may occur.

In the terminology of statisticians, the sources of possible inaccuracies are referred to as types of errors. However, the use of this term does not necessarily infer that a mistake has been made.

Statistics gathered from surveys are subject to two basic types of error: sampling error and non-sampling error. Where statistics have been compiled by surveying a random sample from a larger group and then using the sample to infer values applying to the larger group, there exists a sampling error. This is simply the error that may result from not having counted the whole of the group. The probability of sampling error can be predicted within known ranges according to the size of the sample and the size of the sample is selected according to the sampling error that is acceptable for the purposes of the survey.

Non-sampling error includes the error from all other possible sources and it may occur both in sample surveys and in full census surveys (100% sample). Non-sampling error may occur from a number of different sources such as respondents failing to fill out questionnaires correctly, from failure to contact all respondents, or from activities during the process of computing statistics from the individual responses.

To the extent that these errors occur with a persistent bias, they may affect the statistics produced. For example, if people refuse to answer questionnaires or are not at home when interviewers visit their houses to count unemployed people, and these houses missed are houses more likely to shelter unemployed people, there will be a bias introduced which will tend to undercount the unemployed. However, if the error occurs in a random fashion, the effect on the data is likely to be minimal, especially when appropriate quality control measures are applied.

Another factor of which users should be aware is that all published data are, to some degree, out of date. Some statistics, such as the CPI, are published very quickly. Others may have a time lag of a year or two because the information is collected over a lengthy period after which the processing of the data takes further time. Some data are regularly published in two editions – termed preliminary and revised. This is done principally in order to be able to release the best data possible at an early stage and more accurate data later on. When data released in Statistics Canada publications are preliminary, they are indicated either by a lower case "p" or an explanatory note for the data. Revised figures are similarly indicated by a lower case "r" or an explanatory note.

Because published data cannot be regarded as 100% precise and can only be released after the time necessary to collect and process them, users should avoid making too precise judgments on the basis of statistics alone.

The Effects of Confidentiality on Statistical Tables

In some tables you may find that a number has been replaced by an "x" with a footnote stating that the number is confidential. Statistics Canada is governed by the Statistics Act which requires Canadians to provide Statistics Canada with the information it requests, yet guarantees that the information provided will be kept confidential.

The Act forbids Statistics Canada to publish any information that can be related to one person or one company. For industrial statistics, this requirement is generally satisfied by adherence to the rule of three, that is, that no figure which is made up of data on fewer than three companies can be published because one of the two would automatically know the facts about the other. While there are usually more than three companies in an industry in Canada, there are often only two in a province or only two which make, or export, a particular product. Even when there are more than three companies, it is sometimes necessary to suppress the figures because one firm dominates to such an extent that to publish the industry's figures would risk disclosing that company's information. Statistics Canada also has to ensure that it does not divulge confidential information by residual disclosure. If, for example, publishing information on a particular industry in Prince Edward Island is prohibited because there is only one manufacturer for that industry in Prince Edward Island, it is obviously impossible for Statistics Canada to publish statistics on that industry for each of the other provinces and territories and for Canada as a whole. If it did, it would be a simple matter to work out the figures for Prince Edward Island and, thereby the figures for the only company located there. In these cases Statistics Canada has to suppress the figures for at least one other province or release only national or regional figures.

Another procedure employed by Statistics Canada to protect the confidentiality of the data it receives is random rounding. This is a statistical technique whereby the final digit in every number in a table is rounded up or down to a zero or a five. This technique is used in the Census of Population tables where there is a danger of an individual being identified. For example, the census tract series provides detailed data relating to age, sex, education, housing, employment, income, etc., of a small urban area, often covering only one or two city blocks. These numbers are selected on a random basis to be rounded either up or down so it is impossible for users to work out the precise figure. This sometimes leads to the sums of individually rounded numbers not being exactly equal to the total as shown in the table. However, such slight changes in the numbers do not have a significant impact on the usefulness of the data for statistical purposes.

FINDING AND USING STATISTICS

Using Statistics

General Rules

Statistics are not difficult to use in many applications but there are a number of pitfalls for the unwary and, while some can be avoided by common sense, others might not be apparent to the inexperienced user.

Reading Statistical Tables

Users should always consult the introduction, footnotes, explanatory notes and definitions published with the statistics to be quite sure of what the figures measure. These notes give a clear explanation of the definitions and concepts used. If you need further information, contact the nearest Statistics Canada Regional Reference Centre listed in How to Find Statistics. This is very important, as statistics widely quoted in the press and on television can be misleading or inconclusive for some purposes. For example, a city once claimed to be 'the healthiest in the nation' because it had the lowest death rate. What was not mentioned was the fact that the city had no major hospital and the most serious cases were hospitalized in neighbouring cities, and that the statistics used were deaths according to where they had actually occurred, not by place of residence. This illustrates the importance of reading each and every note.

When reading a table, check what the numbers measure. It may be volume, value or the numbers may be expressed as an index (see following page). If adding two numbers, make sure they are compatible. Also check if the numbers are totals, subtotals or are cumulative and be sure you have the figures you want. Quite often monthly figures are accompanied by year-to-date figures, in which case the December figures may in fact be annual figures. Always check the column headings and the subtitles carefully to be sure you are clear on the units used (the numbers may be in thousands or millions).

Items To Note When Reading a Table

Title: Does it cover what is needed?

Time Period: Is the period covered the period required?

Column Heading: Do you want the total or individual items?

Units: Is it in hundreds, thousands or other?

Value Indicator: Is it dollar or volume unit or an index?

Period, Subject Area Breakdown, etc.: Do they cover what is needed? Do you want a single figure, a subtotal or a total?

Footnotes: Always check footnotes as they may clarify the data and provide the "ifs", "ands" and "buts".

Symbols:

The following standard symbols are used in Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- amount too small to be expressed
- P preliminary figures
- r revised figures
- x confidential to meet secrecy requirements of the Statistics Act.

Making Comparisons

Make sure you compare like with like, either when using two or more published numbers or when comparing your own figures with published data. For example, some accounting terminology can be misleading and if you are checking a company's figures against data for the whole industry, read the definitions to be sure of what the published figures include and exclude.

Do not confuse commodity data with industry data. For example, shipments of furniture include shipments of furniture from all companies - whether or not they are classified to the furniture industry. On the other hand, the value of shipments from, for instance, meat processors includes more than just the value of meat products. It can also include chemicals, oils, soaps and any other products meat processors may be producing. This distinction is very important when using statistics from two or more sources. For example, when using import and export statistics with shipment data, make sure you have shipments of commodities and check the classification definitions to be sure they are comparable.

Drawing Conclusions

Be careful not to jump to conclusions too quickly. For example, be wary of simple averages that include extreme values. If three photographers have an average income of \$24,000 a year, then individual incomes could be \$15,000, \$18,000 and \$39,000, in which case the majority earn far less than the average.

Similarly, a word of caution about forecasting. Everybody forecasts: manufacturers, retailers or heads of families. Since many plans for the future require some action in the present, forecasting is necessary. There are many methods of forecasting but all involve using information about the past and present. If you study data for a period of time in the past and see a trend developing you may be inclined to forecast something in the future, based on the assumption that what has happened in the past will continue to happen. Remember that any such projection of past experience into an uncertain future involves a risk and should not be undertaken without consideration of other information on possible future

FINDING AND USING STATISTICS

developments or factors which could cause a change. It is also wise to recognize that some statistical studies require the services of specialists – consultants trained in market research, forecasting, etc.

Nobody should be frightened of using statistics, but everyone should realize when they are out of their depth and when it is time to bring in the experts.

Some Basic Statistical Techniques

Percentages

One of the most frequently used ways to represent statistics, and one used extensively in Statistics Canada publications, is percentage. Although percentages are not difficult, sometimes they do cause trouble for people who are not statistically or numerically minded.

Percent simply means "per hundred" and the symbol used to express a percentage is %. One percent (or 1%) is simply one hundredth of the total or whole and is therefore calculated by dividing the total or whole number by 100.

$$1\% \text{ of } 250 = (1 \div 100) \times 250 = 2.5$$

To calculate a given percentage of a number, simply divide the total number by 100 and then multiply the result by the requested percentage:

$$12\% \text{ of } 250 = (250 \div 100) \times 12 = 30$$

To calculate what percentage one number is of another number, change this equation around and multiply the first number by 100 and then divide the result by the second number:

$$30 \text{ as a \% of } 250 = (30 \div 250) \times 100 = 12\%$$

If, as is often the case with statistical data, one has a series of numbers and each of these has to be expressed as a percentage of the total, then one simply adds the numbers in the series to find the total (i.e., the number equal to 100%) and carries out the above calculation for each number in the series.

For example, given the series 30, 150, 70:

$$\text{The total would be } 30 + 150 + 70 = 250$$

$$30 \text{ as a \% of } 250 = (30 \div 250) \times 100 = 12\%$$

$$150 \text{ as a \% of } 250 = (150 \div 250) \times 100 = 60\%$$

$$70 \text{ as a \% of } 250 = (70 \div 250) \times 100 = 28\%$$

If the percentages for each number in the series are added together they equal the percentage for the whole:

$$12\% + 60\% + 28\% = 100\%$$

To calculate the percentage difference between two numbers, the same basic calculations are used. For example, to find out the percentage increase from 250 to 280, the difference between the numbers is calculated:

$$280 - 250 = 30$$

and then expressed as a percentage of the first, or base, number:

$$(30 \div 250) \times 100 = 12\%$$

Determining the whole number (i.e., the value of 100%) when only the value of a given percentage is known, is another often useful calculation. For example:

if 280 is known to be 112%,

$$\text{then } 1\% \text{ must be } 280 \div 112 = 2.5$$

$$\text{and } 100\% \text{ must be } (280 \div 112) \times 100 = 250$$

One of the principal reasons why percentages are so widely used is that they enable a number of different things to be expressed on the same base so that they can then be compared.

For example, if the price of sausages increased from \$1.65 per pound to \$1.89 and the same quantity of wieners from \$1.26 to \$1.62, the two increases could be expressed as percentages:

$$\text{Sausages: } \$1.89 - \$1.65 = \$0.24$$

$$\$0.24 \text{ as a \% of } \$1.65 \text{ is } (\$0.24 \div \$1.65) \times 100 = 14.5\%$$

$$\text{Wieners: } \$1.62 - \$1.26 = \$0.36$$

$$\$0.36 \text{ as a \% of } \$1.26 \text{ is } (\$0.36 \div \$1.26) \times 100 = 28.6\%$$

It is now easy to see that the price increase of wieners was much higher than that for sausages.

It should be remembered that comparing percentages which have significantly different bases can create a false impression. For example, the change from one to two is 100% whereas the change from 5,000,000 to 6,000,000 is only 20%.

Index Numbers and Indexes

Index numbers are a statistician's way of expressing the difference between two measurements by designating one number as the "base", giving it the value 100 and then expressing the second number as a percentage of the first. For example, if the population of a town increased from 20,000 in 1988 to 21,000 in 1991, the population in 1991 was 105% of the population in 1988. Therefore, on a 1988 = 100 base, the population index for the town was 105 in 1991.

FINDING AND USING STATISTICS

An "index", as the term is generally used when referring to statistics, is a series of index numbers expressing a series of numbers as percentages of a single number. For example, the numbers

50 75 90 110

expressed as an index, with the first number as a base, would be

100 150 180 220

Indexes can be used to express comparisons between places, industries, etc., but the most common use is to express changes over a period of time, in which case the index is also a time series or "series". One point in time is designated the base period – it may be a year, month, or any other period – and given the value 100. The index numbers for the measurement (price, quantity, value, etc.) at all other points in time indicate the percentage change from the base period.

If the price, quantity or value has increased by 15% since the base period, the index is 115; if it has fallen 5% the index is 95. It is important to note that indexes reflect percentage differences relative to the base year and not absolute levels. If the price index for one item is 110 and for another is 105 it means the price of the first has increased twice as much as the price of the second. It does not mean that the first item is more expensive than the second.

Each index number in a series reflects the percentage change from the base period. It is important not to confuse an index point change and a percentage change between two index numbers in a series. For example, if the price index for butter was 130 one year and 143 the next year, the index point change would be:
 $143 - 130 = 13$

but the percentage change for the index would be:
 $(143 - 130) \div 130 \times 100 = 10\%$

Means and Medians

These are both ways of expressing a series of numbers by a single number. The mean most frequently referred to in Statistics Canada's publications is the arithmetic mean. It is what most people call the "average" and is calculated by adding up the numbers in the series and dividing the total by however many numbers there are. For example, if five children are aged respectively 3, 4, 5, 8 and 10 years old, their mean age is:

$$\frac{3 + 4 + 5 + 8 + 10}{5} = 6$$

The median is the value of the middle number of a series ranked in order of size. For example, given the ages of five children as 5, 4, 8, 3 and 10, to find the median age the series would first have to be rearranged in order of size, i.e., 3, 4, 5, 8, 10 and the value of the middle number, i.e., 5, would be the median age.

Finding Statistics

How to get more help

Statistics Canada publishes data in a variety of ways and finding the information needed, in the most useful format, can pose a problem for both experienced and inexperienced users. The following is a brief explanation of the different ways in which data are made available and the tools which are provided to help users identify and acquire the information they want.

This section is intended to assist users who wish to research information on their own. But the golden rule is: if in doubt – ask. Statistics Canada Regional Reference Centres are listed inside the front cover of this catalogue and readers who need more help are urged to contact them.

When users embark on a search for statistics to assist in a particular study, it will simplify their task if they can identify a basic unit and the particular variables which they wish to take into consideration. Statistics Canada reference centre staff are able to offer assistance in this. For example, a researcher might be interested in the unemployed, in which case the basic unit being considered would be the unemployed person. However, researchers using data on unemployed persons might like to investigate particular features, or variables, of the unemployed population, such as age, sex or level of education. So these researchers would seek statistics on the unemployed population cross-classified in statistical tables by whatever particular variables they expect to be relevant to an analysis of unemployment.

Generally, researchers can identify some sort of basic unit in which they are interested and some particular variables which they would like to investigate. Demographers might want to consider persons in terms of ethnicity or level of income. Criminologists might consider incidence of crime by geographic area or medical researchers might want to study patients classified by age.

Statistical units and the variables by which they are cross classified are established by Statistics Canada according to the needs of many different users. The variety of statistical units counted and the variables by which they are classified are limited by the costs of collecting data, the need to avoid overburdening the public with questionnaires, the need to guard against disclosure of confidential information and by other factors. More is said on the subject of standards and classifications of statistical data in the preceding section on using statistical data.

Access to Publications

Despite developments over the past few years in the dissemination of data via computers and microcomputers, the primary means of publishing statistics is still conventional hard copy, i.e., books and bulletins containing tables of figures.

FINDING AND USING STATISTICS

Catalogue Numbers

Nearly all Statistics Canada publications are given a unique five-digit catalogue number which, with the title, provides easy identification. These numbers are formulated as follows:

XX - XXX

1st digit	2nd digit	3rd digit	4th and 5th digits
Major subject group	Subject sub-group	Frequency of publication	Unique publication number

First digit. All publications are classified into one of the following eight major subject groups:

- 1 General and Reference
- 2 Primary Industries
- 3 & 4 Manufacturing
- 5 Transportation, Communications and Utilities
- 6 Commerce, Construction, Finance and Prices
- 7 Employment, Unemployment and Labour Income
- 8 Education, Culture, Health and Welfare
- 9 Census and Intercensal Studies

Second digit. Each major group is further divided into a number of sub-groups. For example, Major Group 6: Commerce, Construction, Finance and Prices is divided into sub-groups:

- 1 Business Conditions
- 2 Prices and Consumer Expenditure
- 3 Merchandising and Services
- 4 Construction and Housing
- 5 International Trade
- 6 International Travel
- 7 Balance of Payments and International Investments
- 8 Government Finance

Third digit. This indicates the frequency of publication.

- 0 Issued more often than once a year
- 2 Issued annually
- 4 Issued biennially
- 5 Issued once only or on an occasional basis
- 6 Issued irregularly with various subtitles
- 1 & 9 Reserved for Census publications

Fourth and fifth digits. These are issued sequentially to each publication in each sub-group and ensure that every publication has its own unique permanent number.

Suffix "E" or "F". These are given to the few publications for which separate English and French editions are issued. If nothing is mentioned, the publication is bilingual.

The following example is typical of how the catalogue numbering system works: The publication *Air Carrier*

Traffic at Canadian Airports was assigned cat. no. 51-005 as follows:

- 5 Major group: Transportation, Communications and Utilities
- 1 Sub-group: Air Transportation
- 0 Frequency: More than once a year – in this case quarterly
- 05 Fifth publication in this sub-group given a catalogue number

A new numbering concept, which uses subject and product class identifiers to group existing non-print publications, products and services, has been developed and implemented based on the numbering system described above.

The core of this concept is the "stub" number which is composed of seven fields. It contains a two-digit subject access number, identical to the one described above, followed by a "hinge" field indicating the product class. A four digit unique indicator that follows is in accession number order for each product within each product class. This allows the description of different versions of the same product to be grouped together. The remaining fields include variable descriptor, medium or mode of delivery, language used, and the issue number which is used by the system only and thus transparent to clients.

Example: **22 F 2040 P D E**

where **22** is subject number; **F**, product class; **2040**, unique number; **P**, variable descriptor; **D**, medium or mode of delivery; and **E**, language used.

Product Classes:

- (book/report)
- Fixed Product
- Custom Retrievals
- Micro Data Files
- Surveys
- OtHer

Variable Descriptor:

- Preliminary
- Supplement
- Revision
- Update
- Monographic Series
- Licence
- Guide
- X (not applicable)

Medium or mode of delivery:

- Tape
- Diskette
- Microfiche
- CD-ROM
- Direct ONline Access
- Paper
- Fax
- OtHer

FINDING AND USING STATISTICS

In addition to Statistics Canada's own catalogue numbering system, the Statistics Canada Library in conjunction with the National Library of Canada assigns eight-digit International Standard Serial Numbers to serial publications and ten-digit International Standard Book Numbers to occasional and census publications. These numbers facilitate identification, citation, ordering and bibliographic control on an international basis.

List of Publications

In addition to the *Statistics Canada Catalogue*, the *Statistics Canada Publications List* (11-209E) can facilitate access to Statistics Canada publications. It contains a brief description of publication titles (identical to those of the catalogue), the price, a "how-to-order" guide and information concerning discounts and special offers. One free copy is available to individuals in the official language of their choice. This document is not a substitute for the catalogue however and, in fact, it does not include a subject and author/title index, nor does it contain any information about electronic data and special services.

List of Supplementary Documents

Statistics Canada has, for many years, generated a significant quantity of supplementary documentation in the form of unpublished technical papers, discussion or working papers. Although less well-known than published material, it is nonetheless available to the public. The *Listing of Supplementary Documents* (11-207) lists research papers produced by Statistics Canada which are not included in the catalogue.

The Historical Catalogue, 1918-1980

Because the annual catalogue cannot contain all the publications ever issued by Statistics Canada, the *Historical Catalogue of Statistics Canada Publications 1918-1980* (11-512E) provides, in a single volume, a complete record of all the catalogued publications of Statistics Canada and the Dominion Bureau of Statistics. It documents the publishing program of the Bureau from its formation in 1918 to December 31, 1980. It also includes references to material such as the Censuses of Canada since 1851 and a number of publications issued by other federal departments prior to 1918.

To reference all publications to date, it is necessary to use the historical catalogue for the pre-1981 publications and annual catalogues from 1982 to the most recent.

Publication Format

In recent years, there has been an effort to standardize the format of Statistics Canada's publications. In 1989, the Agency introduced a new corporate visual style that clearly identifies Statistics Canada's material.

As a general rule, publications contain an introduction or description of the data, a table of contents and numerous statistical tables. The covers are of a standard

design with the Statistics Canada graphic identifying symbol in the upper left corner and the Government of Canada and Statistics Canada identification at the bottom of the page. The new standard typography, used for cover titles accompanied by the catalogue number, ensures that all Statistics Canada titles are clearly identified and recognizable.

Compendia

Most of the publications issued by Statistics Canada concentrate on one subject, for example *Electric Power Statistics*, (57-001) or on a group of related subjects, such as *Employment, Earnings and Hours*, (72-002). However, a few publications cover a broad range of topics:

The *Canadian economic observer* (11-010) is Statistics Canada's monthly flagship publication for economic statistics. Each issue contains a monthly summary of the economy, major economic and statistical events, a feature article and technical note. A statistical summary contains a wide range of tables and graphs on the principal economic indicators for Canada, the provinces and the major industrial nations. The *Canadian economic observer: historical supplement* (11-210) contains historical annual series that correspond to those published in the monthly tables. Data covered include the national accounts, prices, international and domestic trade, labour and financial markets. Provincial detail for employment earnings, retail trade, housing and consumer price indexes are also presented.

The 1994 edition of the *Canada year book* (11-402E) comprises 22 chapters of captivating text and more than 100 feature articles, tables and improved charts to form a comprehensive overview of Canadian life and issues today: current events, culture, geography, economy, demography, government, industry, and more. Highlights drawn from the 1991 Census and hundreds of surveys make this a publication of record, a must-have for everyone who relies on current knowledge of Canada: teachers, students, librarians, business people, researchers, policy makers and anyone interested in the state of the nation. The 1994 *Canada year book* is hardcover, with a full-colour dust jacket and over 700 pages of text and analysis. More than 145 large-format photographic images - black-and-white and colour - represent The National Archives, The National Gallery, the Canadian Museum of Contemporary Photography, and a host of gifted Canadian photographers.

Another Statistics Canada flagship is *Canada, a portrait* (11-403E). The 1993 edition presents an overview picture or portrait of the social, economic and cultural life of Canada today. Packaged in a 30 x 23 cm new hardcover format, it features six chapters: This Land, The People, The Society, Arts and Leisure, The Economy and Canada in the World. It includes text, charts and more than 60 high-quality colour photographs. Eminent Canadians - Jean Béliveau, Roberta Bondar, Douglas Cardinal, Tompson Highway, Antonine Maillet and W.O. Mitchell - have contributed prefaces to each chapter; additional quotes by and about Canadians and short feature articles complement the main text. A 10-colour-

FINDING AND USING STATISTICS

plate art section augments the Art and Leisure chapter, featuring work of Canadian visual artists, and a comprehensive index lists more than 400 entries.

For those looking for historical data, *Historical statistics of Canada* (11-516E) may serve as a starting point. This unique compendium depicts in text and extensive historical tables the nation's growth and development from Confederation to the modern era. The book, covering 22 topics, draws together social, economic and political time series from a wide variety of sources and provides explanatory notes on the statistics.

Canadian social trends (11-008E) discusses the social, economic, and demographic changes affecting the lives of Canadians. It contains the latest figures for major social indicators.

While other compendia address more specific subjects, the *Market research handbook* (63-224) is designed to be a comprehensive source of socio-economic statistics for all those who study the Canadian consumer market - market researchers, strategists, product planners and sales leaders. The broad range of data are equally relevant to consumer and business-to-business marketing; they present profiles of key industries including the small business sector, as well as consumers in all provinces and 45 major cities. International trade data and projections - of population, households, families, selected economic indicators, etc. - provide information for businesses seeking to expand or develop new product lines. The 1993 edition includes relevant data from the 1991 Census, more information about small businesses and about Canada-U.S. trade in goods and services.

Another annual publication *Report on the demographic situation in Canada* (91-209E) describes major demographic developments in Canada in recent years. Highlights include the birth rate, the death rate, nuptiality and divorce, common-law unions, life expectancy, infant mortality, leading causes of death, married and single mothers, international migration, internal migration, changes in the concentrations of ethnic groups. The second part of this report is devoted to some currently relevant demographic topics or issues. Part two of this latest report gives an overview of the population of Mexico. Some examples of previous topics are: age structure in transition: two centuries of demographic change; an overview of the principal world migratory flows since World War II; and the recent evolution of the Canadian and American populations.

Published four times a year, *Perspectives on labour and income* (75-001E) brings together and analyzes a wide range of labour and income data. Each issue presents approximately six articles covering topics such as youth in the labour market, pensions and retirement, work arrangements, education and training, and trends in the family income. The publication also devotes a section to new products, surveys, research projects and conferences. Another section consists of more than 50 up-to-date labour and income statistical indicators by province. Every autumn and spring, the publication offers a supplement that reviews recent labour market trends. The winter issue contains an annually updated index of

published articles. Finally, *Human activity and the environment* (11-509E) brings together data from Statistics Canada and other organizations taking a comprehensive look at the Canadian environmental trends and issues. New for 1994 are international and provincial environmental profiles, which allow easy comparison of varying environmental performance. Also new are improved sections on the economy, energy, soil erosion, air quality, contaminants and many others.

Census Publications

The Census of Population and Housing and the Census of Agriculture, conducted every five years, are major undertakings. Information from these censuses is published in hundreds of different publications, for standard and non-standard geographic areas, and in several media, to provide the most comprehensive database available concerning the population of Canada. Statistics Canada also produces a range of reference products that explain how to access and use census data.

The *1991 Census dictionary* (92-301E) provides detailed information on all of the concepts, variables and geographic elements of the 1991 Census. The information provided for each variable includes a definition, a historical summary, the related population, the associated census question number(s), applicable response categories or classifications, and special remarks. The *1991 Census dictionary* also provides a comprehensive subject index. This publication is an essential census reference tool which helps census data users to understand and interpret more easily the census data. There is also a *1991 Census electronic dictionary* (92-391E D) based on the print version. All concepts and definitions can be searched by key words. Also, the software allows printing and saving of specified definitions to file. This electronic product is intended to support other 1991 Census electronic products. The electronic format is IBM personal computer compatible and available on diskettes.

The second edition of the *1991 Census catalogue* (92-302E) is the first stop when searching for census products and services. The catalogue provides full product descriptions including information on the release date, price, medium, table titles and catalogue numbers. How to order the products is fully explained, and an order form is provided to make it simpler. Also included in the catalogue are descriptions of the various services available to census data users with a complete list of Statistics Canada contacts.

The *1991 Census handbook* (92-305E) provides a non-technical overview of the census. In straightforward text, it presents a brief history of Canadian censuses and describes the data collection and processing activities. It discusses each census question, including a comparison with those questions asked in 1986. The handbook introduces data users to the census variables and geography, and provides an overview of products and services. Data quality, confidentiality and different applications of census data are also discussed. For the first time, the handbook provides an overview of the census of agriculture.

FINDING AND USING STATISTICS

The *Reference Maps Series* (92-319 to 92-320), identifies census geographic areas and locates their boundaries, allowing users to relate census data to actual physical locations. Published reference maps are available for geographic areas that range in size from census tracts (neighbourhoods), census subdivisions (municipalities), census divisions (counties), to census agglomerations and census metropolitan areas (large urban centres). These reference maps and others are also individually available on demand.

Finally, complete details on the full line of Census of Agriculture products and services are included in the publication *1991 Census of agriculture products and services* (92-303). It helps users to identify which product or service best fulfils their data requirements and serves as a guide to understand the concepts and variables of the census of agriculture. This publication provides complete details on the full line of census of agriculture products and services, including pricing and ordering information. Descriptions of the geography used in the census as well as useful background information on the census are also included.

The range of reference products is completed by a series of workshops and seminars designed to assist users in maximizing the value of census data.

For more information about the different products and services from the 1991 Census, contact the regional reference centres.

Keeping up-to-date

The *Statistics Canada Catalogue* is published as frequently as possible. However, users are advised to be aware of the latest releases and whether or not previously published figures have been revised.

The Daily (11-001E), a bulletin published each business day, presents highlights from the day's major releases, announces reports and lists the titles of the publications released. *The Daily* of the last business day of each month contains a schedule of data releases for the coming month. In addition to print subscription, *The Daily* is available by FAX.

The weekly digest of key economic and social indicators from Statistics Canada is presented in *Infomat* (11-002E). This bulletin contains charts, a summary of the latest monthly statistics and a complete list of publications released during the week. This bulletin is also available both by print subscription or by FAX.

The *Index to Statistics Canada surveys and questionnaires* (12-205) lists all the questionnaire-based surveys of Statistics Canada and the questionnaires used by these surveys, including administrative forms used by Statistics Canada originating from other agencies, telephone interview questionnaires and instructional or guideline material. An alphabetical index to the titles of the surveys and questionnaires provides an indication of the subject content of Statistics Canada's questionnaire-based surveys. A contact name and telephone number are provided under the name of each survey. The questionnaires are also reproduced on microfiche with user instructions in the index contains instructions for its use.

Changes in Publications

Editions of the *Statistics Canada Catalogue* prior to 1986 and as of the 1994 edition provide a list of new publications issued since the previous catalogue and a list of discontinued publications. As well the catalogue presents a description of the publications, with the year of the first issue of the publication and the last year of issue if applicable (noted as "discontinued"). Examples of serial or occasional publication entries are shown at the beginning of the catalogue.

As well as being a collection management tool, the *Guide to managing Statistics Canada's publications in libraries* (11-208E) provides librarians with advice on building a reference collection of Statistics Canada publications in order to have at least 10 years of the most recently revised data. The guide features a comprehensive listing of all catalogued publications released since 1917, by Statistics Canada publication number. In addition to suggested retention policy, the entries provide links between current and discontinued publications and other useful reference notes.

FINDING AND USING STATISTICS

Statistics Canada Regional Reference Centres

Statistics Canada Regional Reference Centres are located across the country. Each centre has a collection of current publications and reference documents which can be consulted or purchased, along with microcomputer diskettes, microfiche, maps, and other products. Copying facilities for printed materials and microfiche are available, and clients also have access to CANSIM.

Each centre provides a wide range of additional services, including presentations, workshops and lectures.

For more information, users can call or visit the Centre closest to them. If you are outside the local calling area, please dial the toll-free number for your province.

FINDING AND USING STATISTICS

Ordering Publications

Types of Publications

Subscribing to Periodicals

You can subscribe to any Statistics Canada publication that is issued regularly. In the *Catalogue*, such publications are identified as daily, weekly, monthly, quarterly, semi-annual or annual. The description on page 8 explains how to determine the frequency of a publication by the catalogue number. All subscribers are sent their publication on the day it is released.

When completing the order form, remember to list the annual subscription price and write an "S" (subscription) in the issue column.

When you order a subscription you will be sent the next issue released. The length of time it takes to receive your first issue depends on the frequency of the publication. There may be a period of up to three months before the next issue of a quarterly publication is released, and the release of a new annual publication may take up to 12 months, depending on the release date.

As a continuing service to our subscription clients, we issue renewal notices and reminder notices as your expiry date approaches to help ensure uninterrupted delivery of your publications. You will also be advised of related publications to allow you to update your statistical library.

Multi-year subscriptions, are available for up to three years on Statistics Canada's most popular titles. The following publications are eligible for multi-year subscriptions:

Canadian Economic Observer (10-230)
Canadian Social Trends (11-008)
Perspectives on Labour and Income (75-001)
Infomat (11-002)
Health Reports (82-003)
Report on the Demographic Situation in Canada (91-209E)

Multi-year subscriptions ensure that there will be no interruption in the issues sent to you, as well as reducing administrative costs. Subscription rates for the second and third year are the same as the currently listed price, so multiyear subscribers are also insulated against price increases.

When ordering, please indicate clearly the number of years for which you would like to subscribe.

Purchasing Single Issues

You may wish to order a single copy of a publication before subscribing for a full period. To order a single copy of any publication or series, remember to list the single issue price when ordering. You will receive a copy

of the most recent issue. It takes up to seven days to process your order for currently available issues of any publication. Orders for publications not yet released are placed on back order and will be shipped to you the day the publication is released.

Many publications listed in the *Catalogue* are issued only occasionally. When ordering these titles, simply list the applicable Canadian, U.S. or foreign price, along with the catalogue number and title. Again, you will receive a copy of the most recent issue. **Please note that prepayment is required for the purchase of all casual/occasional publications.**

Ordering Publications

You may order any Statistics Canada publication using the order form at the back of this publication. **For existing clients, please give your client account number.**

Order by Mail or Fax

The signature of an **authorized company representative** is required on all orders.

Order your Statistics Canada publications by mail from...

Statistics Canada
 Marketing Division
 Sales and Service
 R.H. Coats Bldg. 9th Floor
 120 Parkdale Avenue
 Ottawa, Ontario
 Canada
 K1A 0T6

... or from one of our Regional Reference Centres listed in the *Catalogue* (page 483). For your convenience, bookstores and subscription agents are also listed in the *Catalogue* (page 489).

Order by Phone

To minimize delays, use your Purchase Order number, MasterCard or VISA and call 1-800-267-6677 (in Canada or the U.S.) or (613) 951-7277.

Regional Reference Centres are also pleased to take your telephone orders. Their telephone numbers are listed on the inside front cover.

To avoid double billing, please do not send written confirmation of phone orders.

Purchase in Person

You can purchase publications at any Statistics Canada Regional Reference Centre, at many local bookstores, and from authorized agents' outlets (see **Subscription Agents and Bookstores** on page 489).

FINDING AND USING STATISTICS

Payment

Cheques or money orders should be made payable to the Receiver General for Canada - Publications. Clients may also charge orders to MasterCard or VISA. Purchase Order numbers are also acceptable from authorized company representatives. Prepayment is required for all orders.

Canadian clients must pay in Canadian funds, adding 7% GST, where applicable. Clients from the United States and other countries must pay in US\$ drawn on a U.S. bank.

Renewals

For uninterrupted service, it is best to renew well in advance. Late renewal may result in missed issues that will have to be purchased separately, if available.

All customers will receive convenient renewal notices. A prompt reply to these will ensure continuous service. If you receive a renewal form or a reminder notice after you have mailed in your payment, please disregard it.

Prices

Prices listed in the *Statistics Canada Catalogue 1994* are subject to change without notice. To check current publication prices, call (613) 951-7277 or call any Statistics Canada Regional Reference Centre. They will gladly provide information or ordering assistance. For ordering assistance you may also call 1-800-267-6677.

Returns/Refunds

All sales are final except in the case of incorrect shipment. All returns must be pre-authorized by Statistics Canada. Details on this policy are available from Client Services staff. Call (613) 951-5078 for more information.

Clients who wish to cancel a subscription may receive a refund on undelivered issues only. Subscription issues already delivered may not be returned for a refund.

Returns are not accepted for the *Catalogue*.

Change of Address

Subscribers must notify Statistics Canada at least one month in advance of a change of address to ensure uninterrupted delivery. Clients who fail to notify Statistics Canada of a change of address will be responsible paying for replacements of missed issues. Free replacements or refunds will not be issued.

With your notification, please include:

- your old address;
- your new address;
- your client account number.

Delivery Methods

All of our publications are delivered by first class mail. Delivery time to most parts of Canada is a few days. Clients who request a rush service with courier delivery must prepay a \$25.00 fee plus the courier charges.

FINDING AND USING STATISTICS

Discounts on Statistics Canada Publications

Please note that discounts are applied to the price of the publication and not to the total amount which might include special shipping and handling charges and the GST.

a) Educational Institutions and Public Libraries

Schools, school boards, colleges, universities and public libraries receive a 30% discount on all publications. If you're not sure whether your organization qualifies for a discount, call (613) 951-7277 or your local Regional Reference Centre.

b) Bookstores and Authorized Agents

Standard trade discounts and returns policies are available to bookstores and authorized agents. For more information, call Sales and Service (613) 951-5078.

c) Subscription Agents

Subscription agents receive a 30% discount on all subscribable products.

d) Volume Discounts

Volume discounts are offered on multiple copies of the same publication that are shipped to one address. The schedule of volume discounts follows.

10-25 copies - 20%
26-50 copies - 30%
51-100 copies - 40%

101 or more copies - call Chief, Circulation Management at (613) 951-8926 to determine the discount that will apply to your order.

e) Back Issue Discounts

Clients are entitled to a 70% discount off the cover price of all designated back issues.

Periodicals, selected occasionals and 1986 Census publications are all included in the back issues program. *The Daily, Infomat, Survey Methodology* and the four most recent editions of *Canadian Social Trends, Perspectives on Labour and Income* and *Health Reports* are excluded from the program.

Statistics Canada fills orders for back issues as inventory permits. The minimum order, which must be prepaid, is \$20.00. Please contact our Sales and Service personnel at (613) 951-7277 to confirm price and availability.

f) Canadian Social Trends (11-008E) Discounts

Student - Students can subscribe to *Canadian Social Trends* at 30% off the regular subscription price of \$34.00 in Canada, US\$40.00 in the United States and US\$48.00 in other countries.

Multiple Subscriptions - Clients can receive five subscriptions to *Canadian Social Trends* for the price of three, provided all subscriptions have the same mailing address. This applies to any multiple of the 5 for 3 formula - a 40% discount.

FINDING AND USING STATISTICS

Publication Discount Packages and Special Offers

Many publications listed in the *Catalogue* are offered with related publications at a discount package price. To save you time when ordering, you need only list the package number (listed in brackets after the title) instead of each catalogue number in the package.

1. **Full Publication Service (10-111)**
This service automatically provides subscribers with copies of all non-census Printed publications as they are released. To verify the price, call (613) 951-5078.
2. **The Labour Force (10-232)**
A 20% discount is available to clients who purchase both *The Labour Force* (71-001) and *Labour Force Information* (71001P). The package price is \$240.00 in Canada, US\$288.00 in the United States and US\$336.00 in other countries.
3. **Calura Corporations package (10-020)**

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture – only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistics Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

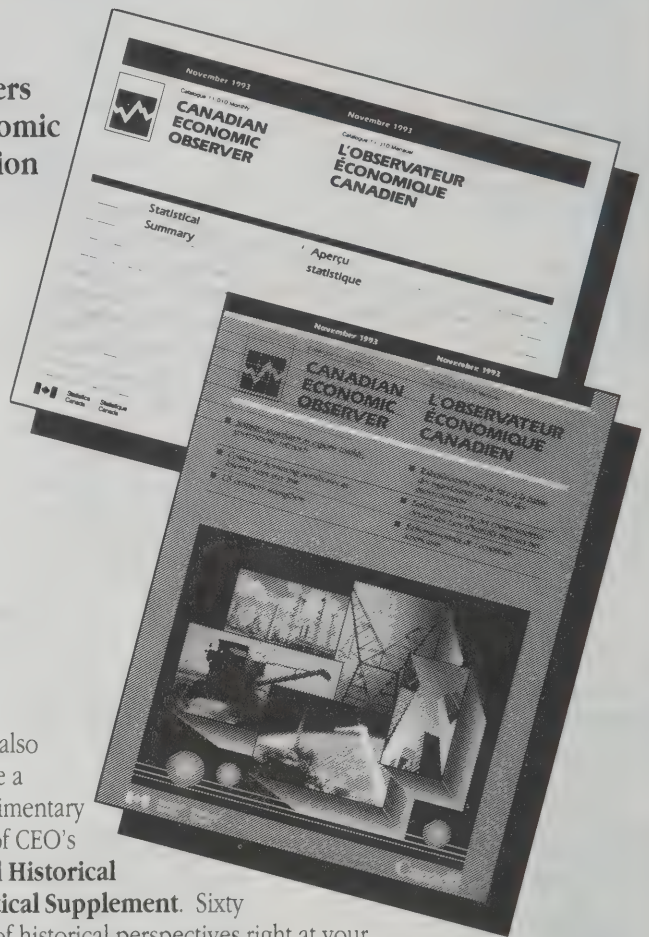

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. An exceedingly useful reference you'll turn to time and again. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more. An unparalleled monthly compendium of facts and detail.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts. Names and phone numbers of the experts who can help solve your particular research problem or find specialized data are listed with articles and features.

You'll also receive a complimentary copy of CEO's annual **Historical Statistical Supplement**. Sixty years of historical perspectives right at your fingertips – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

The *Canadian Economic Observer* (catalogue number 10-230) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries.

DATABASES FOR ENVIRONMENTAL ANALYSIS

The fastest way to get off to a good start!

Databases for Environmental Analysis: Government of Canada is your guide to sources of information on Canada's environment. No matter what topic you're researching, *Databases for Environmental Analysis* will point you in the right direction.

This valuable sourcebook is the product of a joint venture between Statistics Canada and Environment Canada. It contains descriptions of more than 370 databases to guide your research.

Looking for data on...

- ...agriculture and the environment?
- ...urban air quality?
- ...manufacturers of environmental products?
- ...contaminants in fish and seabirds?

Databases for Environmental Analysis has all federal government sources listed in one, easy-to-use publication! The databases are listed by government departments, including:

- Environment Canada
- Fisheries and Oceans
- Statistics Canada
- Forestry Canada
- Industry, Science and Technology Canada
- ...and many more!

For further convenience, this publication comes with a diskette, so finding the database which has the information you're looking for is as easy as typing in a "key word".

Don't commit any more time to hunting down data sources, order *Databases for Environmental Analysis* today!

Databases for Environmental Analysis: Government of Canada (Cat. no. 11-527E) is \$55.00 in Canada, US \$66.00 in the United States, and US \$77.00 in other countries.

To order write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. Or contact the nearest Statistics Canada Reference Centre listed in this publication.

For faster ordering, fax your order to (613) 951-1584. Or call toll-free 1-800-267-6677 and use your VISA, MasterCard or Purchase Order number.

CANADA YEAR BOOK TODAY

THE 1994 CANADA YEAR BOOK

*Your indispensable
and comprehensive
reference source
on Canada*

For essential information on Canada, turn to the *Canada Year Book*. An invaluable resource, the 1994 edition is beautifully designed in an inviting and easy-to-read format.

The 1994 *Canada Year Book* examines recent events, changes and trends in great detail. Organized carefully into 22 chapters, it answers questions on virtually every topic from geography through health to banking.

This edition features:

- ▶ Over 700 crisply written pages packed with eye-opening information on life in Canada — from social, economic, cultural and demographic perspectives
- ▶ 250 concise tables plus 63 charts and graphs that put statistical information into focus
- ▶ Stunning photographs capturing distinctively Canadian scenes by some of this country's finest photographers
- ▶ Fascinating short feature articles covering everything from archaeology to white collar trends

Trusted for over 125 years by students, teachers, researchers, librarians and business people, the *Canada Year Book* is the reference source to consult first on all aspects of Canada.

An enduring addition to any home or office library!

ORDER YOUR COPY OF CANADA YEAR BOOK TODAY.

Available in separate English and French editions, the 1994 *Canada Year Book* (Catalogue No. 11-402E) is \$59.95 plus \$5.05 shipping and handling in Canada, US \$72 in the United States and US \$84 in other countries.

To order, write to: Marketing Division, Publication Sales, Statistics Canada, Ottawa, Ontario K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and charge it to your VISA or MasterCard.
