The Montreal Star says: "It is true, the Montrealers are as provincial as the Gallicians in quite Canada as a whole nation. The Carlton has the same spirit that the Fuentes have in the south. We have to get the amount facts regarding the subject, which generally forms the basis of any intelligentบทความในบทความของArrays.

But just now Europe is having a taste of what a racially pure country can achieve. Steel brings bids from all over the world. A little more steel has brought the necessary salaries. Steel has created in two years a steel ministry, which is not of the usual kind. Europe is becoming a steel kingdom, but the black steel is being blacked up within living memory.

Now if the people of this country are inclined to be biased about the United States, to nevertheless realize that this is not a good opportunity for the purchase of United States dollars across the line for the purchase of United States products. Owners of receiving sets pay a license fee, and the money thus realized is J."

owners of Canadian moving picture theatres, at least through the making and distribution of the films that are owned by wealthy corporations in a foreign country. In a word, one of the most powerful agencies for use this wonderful remedy, "would palpitate and beat, to grow, to develop as perhaps few even now imagine. It will be a swell and cramp, and all my friends
Interpool Grain Pool Payment on the 1928 Crop

In the Canadian National Railway report for the fiscal year ended March 31, 1929, a statement is included that the company is to make a payment of $1,507,534.53 to its shareholders.

This payment is in addition to the normal dividend, and is made as a result of the successful operation of the Interpool Grain Pool, a cooperative venture among the railway companies in Canada.

The Interpool Grain Pool was established in 1927 to help farmers who were facing difficult economic conditions. The pool allowed farmers to sell their grain at a guaranteed price, which provided them with stability and security.

The successful operation of the Interpool Grain Pool resulted in this special payment to shareholders, recognizing the hard work and commitment of those involved in its creation and management.

The payment of $1,507,534.53 represents a significant contribution to the shareholders of the Canadian National Railway, and is a testament to the success of the Interpool Grain Pool in fulfilling its intended purpose.
**THE COLEMAN JOURNAL**

**NOTES AND COMMENTS**

Coleman Board of Trade has been inactive since its annual meeting held in June 1928. The reason for this is because it had no defined plan of activity or no objective.

Members paid their fee and nobody troubled any further about it. Without a definite goal in view, work is liable to become haphazard and organizations tend to become satisfied with less than they otherwise would. If a well-considered program was drawn up at the commencement of the year, hitherto "disinterested" members could be encouraged into committees in which they could use their peculiar ability and talent to the best advantage, and in which they would become keenly interested. This plan is already roused interest in the majority of the larger centres with good results and is an example of self-sacrifice and service, against which the efforts of other organizations "service" or otherwise, appear small in comparison.

The increased volume of power that has been supplied to the towns and industries throughout the Crows Nest Pass during the past year is significant. It is a sure sign of increased activity. At the steam plant at the lake a few miles west of town, which commenced operations in 1927, the capacity is being doubled, and the output for this area is greater by far than any other district in the province. There may come the day when industries which require large quantities of coal and power may find it profitable to consider locations in this district, for immense natural resources such as exist here will surely be utilized to a far greater extent as the population of this western country increases.

Hockey play-offs cost more than is received in gate admissions. Gleichen and Coleman were drawn to play off in B. intermediate series, and to transport the teams in home and home games would entail a cost of approximately $400, including their hotel and incidental expenses. This is too expensive for the average team, and it means that play-offs have to be forfeited or somebody must delve into their pocket to foot the bill. Coleman hockey team paid its way this season, the rink company has received its large quantities of coal and power may find it profitable to consider locations in this district, for immense natural resources such as exist here will surely be utilized to a far greater extent as the population of this western country increases.

**NOTES AND COMMENTS**

The Board bases its existence upon service to the business community through the improvement of trade conditions and the encouragement of general prosperity. It has an opportunity, which is peculiar to it, of bringing the developed constructional abilities of successful businessmen into coordinated touch with economic and social life. The value of the Board of Trade to the community lies in its power to bring such ability, combined with diversified knowledge of business fundamentals, to the solution of more general problems.

Without a definite goal in view, work is liable to become haphazard and organizations tend to become satisfied with less than they otherwise would. German Aerial Expedition Will Again Attempt Conquest Of The Arctic This Spring

The expedition of the Arctic will again be attempted this spring. Plans by the German airship LZ-127 have within the next few months, when their co-operation. The expedition will be undertaken within the next five months, when the sun is far enough north to make the flight possible. The LZ-127 is a large airship, capable of carrying a crew of five and several passengers. It is equipped with engines that can fly for over 20 hours continuously.

The airship is being tented at the present time at the German airship station at Lütetsburg, Germany. It is expected that the airship will be ready for the expedition within the next few months.

School Attendance

3,987,768 Students Are Enrolled In Educational Institutions Of Canada

The number of students enrolled in educational institutions of Canada was, according to the latest returns, 3,987,768, or 32,800, or 8 per cent, more than in the school year 1925-1926. This is a record advance over the most recent years, and is the result of a general increase in the attendance of students in all classes and grades.

The expenditure on public education is approximately $100,000,000, or 1 per cent, more than in the school year 1925-1926.

Flooded Problem

Fire sufferers and particularly sufferers in the districts flooded by the Jackson River in northern Ontario, are asking the government for aid. A copy of the first report of the Department of Agriculture and Fisheries, which has been prepared by Mr. J. A. G. Smith, has been sent to the Department of Agriculture and Fisheries, in order that it may be made available to the public.

The report emphasizes the necessity for a large-scale program of flood control and water supply in the area affected.

Adam's lamp was a model that might safely be followed in the construction of the new light houses. The report includes the names of all other lamp making companies in the country.

January Immigration Figures

Migrant Movement To Canada From United States

January 1927 was considered to be a very good month for the introduction of immigrants to Canada. The number of immigrants who came to Canada from the United States in January amounted to 1,267,043, an increase of 16 per cent, over January 1926. The total number of immigrants who came to Canada in January 1927 amounted to 2,124,138, an increase of 11 per cent, over January 1926.

The return movement to the United States was 1,267,043, an increase of 16 per cent, over January 1926. The total number of returnees to the United States in January 1927 amounted to 1,857,095, an increase of 17 per cent, over January 1926.

January weather was reported to be very severe in January 1927. The Department of Agriculture and Fisheries reported that the weather was very severe in January 1927, and that the Department of Agriculture and Fisheries is doing everything possible to prevent the spread of disease and injury to crops and livestock.

The Department of Agriculture and Fisheries is doing everything possible to prevent the spread of disease and injury to crops and livestock.

Mexican And British Fishermen In Dispute

Mexican fishermen are in dispute with British fishermen regarding the fishing grounds in the Gulf of Mexico. The dispute was caused by the Mexican government's claim to the fishing grounds in the Gulf of Mexico, which the British government had previously claimed as its own. The dispute was settled by the International Boundary and Water Commission, which awarded the fishing grounds to the Mexican government.

The Department of Agriculture and Fisheries is doing everything possible to prevent the spread of disease and injury to crops and livestock.

No Money Needed For Montreal Harbour

Officials of the Ministry of Transport and Works are preparing a report on the construction of the new harbour at Montreal. The report will be submitted to the government for consideration. The report will be submitted to the government for consideration.

The Department of Agriculture and Fisheries reported that the weather was very severe in January 1927, and that the Department of Agriculture and Fisheries is doing everything possible to prevent the spread of disease and injury to crops and livestock.

The Department of Agriculture and Fisheries is doing everything possible to prevent the spread of disease and injury to crops and livestock.

Gallop Gang

Horse and Hound

Horse and hound were the subjects of a recent story in the Western Daily Mail. The story was about a horse and hound who were competing for the title of best hunter in the district. The horse and hound were owned by Mr. and Mrs. J. A. G. Smith, who had been training the animals for years.

The horse and hound were entered in a race held by the local hunting club, and the horse and hound were placed first and second in the race.

The horse and hound were entered in a race held by the local hunting club, and the horse and hound were placed first and second in the race.
